

# YUBA FIRE

## Incident Action Plan

CA-NEU-16856

MONDAY  
August 17, 2009  
0600 - 0600

<b>INCIDENT OBJECTIVES</b>	1. Incident Name Yuba Fire	2. Date 8/16/09	3. Time 2000 hrs
4. Operational Period 8/17/09 – 0600 to 0600			
5. General Control Objectives for the Incident (include alternatives) <p>Management Objectives:</p> <ol style="list-style-type: none"> <li>1. Provide for the health and safety of the firefighters and the public.</li> <li>2. Minimize damage to improvements and the environment.</li> <li>3. Keep costs commensurate with values at risk.</li> <li>4. Work cooperatively with allied agencies.</li> </ol> <p>Control Objectives:</p> <ul style="list-style-type: none"> <li>• Keep the Fire North of San Juan Ridge</li> <li>• Keep the Fire South of Lake Francis and Marysville Road</li> <li>• Keep the Fire East of Rice's Crossing</li> <li>• Keep the Fire West of Pleasant Valley Road/Sebastopol Diggings/Chute Ridge.</li> </ul>			
6. Weather Forecast for Period See attached Spot Weather Forecast			
7. General Safety Message See attached Safety Message

## ORGANIZATION ASSIGNMENT LIST

<b>1. Incident Name</b>	
Yuba Fire	
<b>2. Date</b>	<b>3. Time</b>
8/16/09	2000 hrs
<b>4. Operational Period</b>	
8/17/09 0600-0600	
Position	Name
<b>5. Incident Commander and Staff</b>	
Incident Commander	Robert Lewin / Kevin O'Leary (T)
Deputy	Kelly Keenan
Safety Officer	Chris Cox / Walt Holloway (T)
Information Officer	Nick Schuler / Fernando Herrera / Greg McKeown (T)
Liaison Officer	Steve Negro / Greg Turner (T)
<b>6. Agency Representative</b>	
Agency	Name
CHP	Sgt. Scott Klocker
Yuba/Nevada S.O.	Lt. Jim Downs/Lt. Shannon Moon
USFS, TNF/PNF	Mike Cherry/John Estes
USFS, PNF	John Estes
PG&E	Ken McClure
Yuba County OES	Aaron Ward
Nevada County OES	Vic Ferrera
<b>7. Planning Section</b>	
Chief	Bruce Schofield / Mike Despain (T)
Deputy	Jeff Johnson
Resources Unit	Matt Conoscente (T) / Andy Murphy (T) / Dave Anderson (T)
Situation Unit	Buddy Bloxham / Ron Roberts (T) / Jeff Dapper (T)
Documentation Unit	
Demobilization Unit	Bill Smith / Jeff Adams (T)
Technical Specialists	
Training	Paul Melendrez
Fire Behavior Analyst	Chris Waters
IMET	Ryan Walbrun
<b>8. Logistics Section</b>	
Chief	Robert Michael / Geoff Pemberton (T)
Deputy	Frank Reilly
Supply Unit	Tim Stewart
Facilities Unit	Wendy Stuller
Ground Support Unit	Gary Phillips
Communications Unit	Scotty Preston / Chet Ashbaugh (T)
Medical Unit	
Hotel Tech	Milford Ferguson
Hired Equip Tech. Spec	Walt Williams/Henry Baker

<b>9. Operations Section</b>		
Chief	Brian Estes / Mark Brunton	
Deputy	Justin McGough	
Staging	Lake Francis Staging	
Staging	Bridgeport Staging	
<b>a. Branch I - Division/Groups</b>		
Branch Director	Fred Lopez	
Deputy		
Division/Group	Div A/B	Ken French
Division/Group	Div Z	Robert Sanders
Division/Group		
Division/Group		
Division/Group		
<b>b. Branch II - Division/Groups</b>		
Branch Director	Dave Russell	
Deputy		
Division/Group	Div C	Jason Morris
Division/Group	Div D	Mark Barr
Division/Group		
Division/Group		
Division/Group		
<b>c. Branch III - Division/Groups</b>		
Branch Director	Billy See	
Deputy		
Division/Group	Div L	Don Watt
Division/Group	Div M	Jeremy Hill

Division/Group		
Division/Group		
<b>d. Air Operations Branch</b>		
Air Operations Branch Director	John Richardson	
Air Support Group	Travis Alexander	
Air Support Supervisor		
Helicopter Coordinator	Scott Upton / Randy Rapp	
Helibase Manager	Matt Stanford	
<b>10. Finance Section</b>		
Chief	Roger Raines	
Deputy		
Time Unit	Andrew Lorpuz / Richard Bruning (T)	
Procurement Unit	Rich Brocune	
Compensation/Claims Unit	Laura Germany	
Cost Unit	Terry Eastwood / Mara Zaver (T)	
Prepared by (Resource Unit Leader)		

# Yuba Fire Safety Message

August 17, 2009

## Major Hazards and Risks:

**WEATHER!!!!** Be aware of changing conditions and erratic winds. Review the weather forecast.

**ALWAYS** watch for **SNAGS**. Avoid them, flag them and report them so we can get them mitigated.

**Driving Safety:** Watch speeds on roads, there are tight turns, narrow roads and civilian traffic.

**FATIGUE, DEHYDRATION AND HEAT EXHAUSTION!!!** Get plenty of rest, watch for fatigue and mitigate, and follow proper hydration procedures.

## Key Points:

Poison Oak is abundant in the drainages. Watch for snakes, bees, and ticks.

Stump holes with hot ash can be found in all areas of the fire.

Mine Shafts may be found in all areas of the fire.

**ELECTRICAL SAFETY:** Watch out for power lines, treat them all as live. **BE CAREFUL** – Generators **MAY** back feed the system.

The Ten Standard Orders are **FIRM**. There is no compromise.

Every Crew: conduct **AND** document your tailgate safety message.

Establish and Maintain your LCES.

Each element needs to be established **AND** maintained throughout the shift, if LCES is compromised, mitigate it.

**LCES Topic of the Day:**

**E**

What is an escape route?

Do you have YOUR two escape routes planned?

Does your whole CREW know the escape route?

**Watchout topic of the day: #11**

Unburned fuel between you and the fire

Do you have lookouts?

Are you in communication with adjoining forces?

Have you scouted your section of line?

# SAFETY ALERT

## HEAT RELATED ILLNESS

### ***HEAT RELATED ILLNESS IS PREVENTABLE!!!!***

All personnel shall follow established guidelines.

Heat-induced illness is a result of the body's inability to cope with heat. This can be a minor symptom or a serious life-threatening injury. While recognition and treatment are important, prevention is the key.

Becoming acclimated to working in a hot environment takes time.

- It normally takes 4-8 days to acclimate
- Fatigue and alcohol consumption delays this process
- Persons not acclimated are at increased risk and can suffer heat-related illness at lower levels of heat and work activity

Personnel need to pre-hydrate before work and continuously hydrate during work.

- Water is the primary form of fluid replacement
- Before work, it is recommended to drink 20 ounces of sports drink
- During work drink 8 ounces of water every 15 minutes (1 Quart/hour)
- For every three water drinks, consume at least one electrolyte drink.
- Remember – After 6-8 hours of even good hydration, you must have **nutrition (carbohydrates) as well or the liquid will do you no good!**

### **Avoid Hyponatremia**

- Hyponatremia develops when the concentration of sodium is diluted in the bloodstream
- Exercise-induced hyponatremia occurs when this phenomenon is caused by excess water intake during exercise or work
- Proper nutrition and consumption of carbohydrate/electrolyte sports drinks as part of hydration will assist in avoiding hyponatremia
- Symptoms can include disorientation, headache, muscle cramps and nausea

### **Take Frequent Rest Breaks**

- Hydrate during the rest break
- Create improvised shade, get out of the sun
- Document your rest breaks

### **Avoid Certain Drinks**

- To help prevent dehydration, **AVOID** carbonated beverages and performance beverages such as Red Bull, Rock Star, Monster Drinks, etc.
- Caffeine hastens fluid loss in the urine.

INCIDENT ACTION PLAN SAFETY ANALYSIS											Incident Name Yuba Fire		Date: August 17, 2009		Time: 0600-0600

## Fire Weather Forecast

FORECAST NO: 1

NAME OF FIRE: Yuba

PREDICTION FOR: 0600 Mon-0600 Tue

UNIT: CALFIRE-NEU-016586

SHIFT DATE: Aug 17-18th 2009

SIGNED:

TIME AND DATE

FORECAST ISSUED: 2100 8/16/09

Incident Meteorologist  
Ryan Walbrun

---

**WEATHER DISCUSSION:** Strong high pressure will build over the state today with continued warming and drying trend over the Yuba Fire. Winds will be primarily terrain driven down the canyons and along the Yuba River. However, the general wind flow will be Northeast in the morning and late night hours with West to Southwest in the afternoon and evening. The inversion will likely strengthen under the building High, keeping smoke and heat contained but should the fire build enough heat during a sustained slope run the inversion will break during the afternoon hours. Any firing operations should be cognizant of the tendency for up-canyon winds during the afternoon and possible strong down-canyons at night in Branch III along the Yuba River. Remember bends in the river are dangerous locations for wind eddies. Finally, during night Operations... expect strong thermal belts between 1000-2000 feet with little or no RH recovery and warm overnight temperatures.

---

**WEATHER FORECAST For Monday:**

...Continued Hot and Dry ...

**WEATHER:** Widespread smoke until midday... otherwise hazy sunshine.

**HIGH TEMPERATURES:** 90-100...locally cooler under dense smoke in Branch II and III

**MINIMUM HUMIDITY:** 12-19%

**20 FT WINDS:**

**RIDGETOP** – Northeast 4-8 mph with gusts 12 mph early...then West 3-6 mph gusts 10 mph in the afternoon.

**SLOPE/VALLEY** – Down-canyon 3-6 mph gust 10 mph til 11 am then turning up-canyon this afternoon.

**HAINES INDEX:** 3-4...stable airmass aloft. Low potential for plume dominated fire behavior.

**STABILITY/INVERSION:** Stable airmass. Inversion will be strong and likely only partially break by 1300. However should the inversion suddenly break expect extreme behavior.

---

**Monday Night:** Clear except areas of smoke settling into the canyons. Low 60-70. Min RH 30-40%...locally drier on the ridges above the Yuba River. Evening up-canyon winds to 8 mph becoming downcanyon 2-5 mph overnight. On the ridges West-Southwest to 10 mph in the evening turning Northeast 5-10 mph after midnight.

---

**EXTENDED FORECAST:** High pressure continues Tuesday and Wednesday with little overall change in the weather. Perhaps a hint of cooling by the end of the week with slightly stronger West-Southwest winds.

---

**Safety Thought:** Stay Hydrated. Heat related illnesses are cumulative.

---

**Observed Weather on Sunday:**

Reader Ranch RAWS at ~1893 feet: High 93 degrees Min RH 14% ...max gust 12 mph .

Bangor RAWS at 803 feet: High 95 degrees Min RH 15%...max gust 14 mph.

## FIRE BEHAVIOR FORECAST NO. 02

NAME OF FIRE: Yuba Incident CA-NEU-16856

PREDICTION FOR: Day/Night Shift

SHIFT DATE: 08/17/09 (Monday) TIME AND DATE FORECAST ISSUED: 08/16/09 2000 Hours

Signed: N. Chris Waters FBAN 

**Weather Summary:** High pressure will continue to build over the area bringing warmer temperatures and lower relative humidity. Nighttime inversions and resulting thermal belts will develop over the fire area and persist throughout the day. Expect northeast down canyon winds to support active burning over night.

**Fire Behavior General:** Fire spread is primarily surface spread supported by roll outs and uphill runs with occasional group and single tree torching accompanied by spotting. Fuels on the southerly aspects above the Yuba River are primarily heavy oak brush and scattered pockets of Grey and Ponderosa Pine. Northerly aspects are generally dominated by Sierra Mixed Conifer and Ponderosa Pine stands.

Terrain within the Yuba River Canyon is extreme with slopes close to the Yuba River well over 100%. These slopes will continue to support roll outs and hard slope runs – the dominate driver of fire behavior of this fire. Areas away from the river canyon present terrain and fuels conditions more suitable to suppression operations.

Nighttime easterly winds will continue to support active burning within thermal belts. Expect fire activity to show sudden increases over higher elevations as these winds surface. Well developed inversions will develop over night and persist throughout the day. Smokey conditions will continue to dampen fire behavior by blocking solar radiation to fuel beds. If the smoke clears, fire activity will increase significantly.

### Predicted PI (1600 Hrs.)

Clear Sky 90%

Under the Smoke 50%

### SPECIFIC:

Branch I: South Aspects. Grass and oak woodlands with scattered stands of timber and heavy brush. Fire activity has dropped off significantly with only the river canyon supporting active fire spread. River canyon slopes will continue to support roll out driven slope runs.

Branch II: South and West Aspect. Ponderosa Pine and mixed conifer timber stands and brush fields over steeper terrain. Fire continues to move up canyon during the day. Expect continued strong slope runs over the steeper portions of the Branch.

Branch III: North Aspect. Heavy mixed conifer timber stands. Fire will continue to make slope runs over the steeper slopes. Fire will generally moderate substantially upon reaching the top of the ridges.

**AVIATION OPERATIONS:** Heavy inversions in the morning with smoky conditions persisting most of the day.

**SAFETY:** Watch for strong slope runs originating from roll outs. This fire activity will continue for the entire shift. If the smoke clears expect sudden and extreme increases in fire behavior.

<b>DIVISION ASSIGNMENT LIST</b>		1. Branch I		2. Division/Group Division A/B

Prepared by (Communications Unit) Scott Preston COML (T) Chet Ashbaugh COML (T) 						Incident Location County _____ State _____ Latitude _____ N Longitude _____ W					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# **YUBA INCIDENT FINANCE MESSAGE MONDAY, AUGUST 17, 2009**

**FOR YOUR CONVIENENCE THE PERSONNEL & EQUIPMENT TIME UNITS ARE OPEN 0500 TO 2200.**

**THE ENTIRE FINANCE SECTION HAS MOVED TO THE WHITE TRAILERS BETWEEN FRANKLIN HALL (ICP) AND THE FEEDING AREA.**

**IF YOU ARE USING A MOTEL ARRANGED BY CAL FIRE, YOU MUST FOLLOW OUR MOTEL POLICY. EACH AND EVERY PERSON STAYING IN THE MOTEL MUST SIGN THE MOTEL ROSTER. EXAMPLE: IF THERE ARE 21 PEOPLE ON YOUR STRIKE TEAM THEN THERE NEEDS TO BE 21 INDIVIDUAL SIGNATURES, ONE PER LINE. FAILURE TO FOLLOW THE RULES WILL HELP YOU LOSE THIS VALUABLE SERVICE.**

**We are in the process of installing an internet connection so we can start using the E FC-33. Please make sure your E-Pay is showing the correct schedule. We will have E-Pay computer available near the ICP to help facilitate this.**

**Strike Team Leaders: Please use the attached FC-33 Update Sheet to assist us in updating your FC-33's.**

**Hired Equipment resources must have their shift tickets signed by the line supervisor – DIVS, BRANCH, STAGING.**

**Line Supervisors are responsible to verify accuracy on the shift tickets, CLEARLY sign & print your name, collect the shift tickets and TURN THEM IN to the Time Unit.**

**All Hired Equipment resources must come to the time unit and provide you rental agreements, etc. if you have not done so yet.**

**IF YOU HAVE ANY FINANCIAL PROBLEMS OR QUESTIONS PLEASE DO NOT HESITATE TO COME AND ASK US. EVEN LITTLE PROBLEMS ARE BEST AVIODED EARLY. IN MOST CASES WE CAN FIND A SOLUTION!**

**FC ROGER RAINES JR.

# All Trainee's

---

The Training Specialists check-in has been establish in the building where Check in & Time are located.

All Trainee's & Trainer's need to check with us prior leaving for your assignment.

Our Hours will be 0600 – 1900

Please bring your Task books with you when you check-in

All Trainee's & Trainers need to check in with us at the end of each shift

Remember Training is the state of MIND

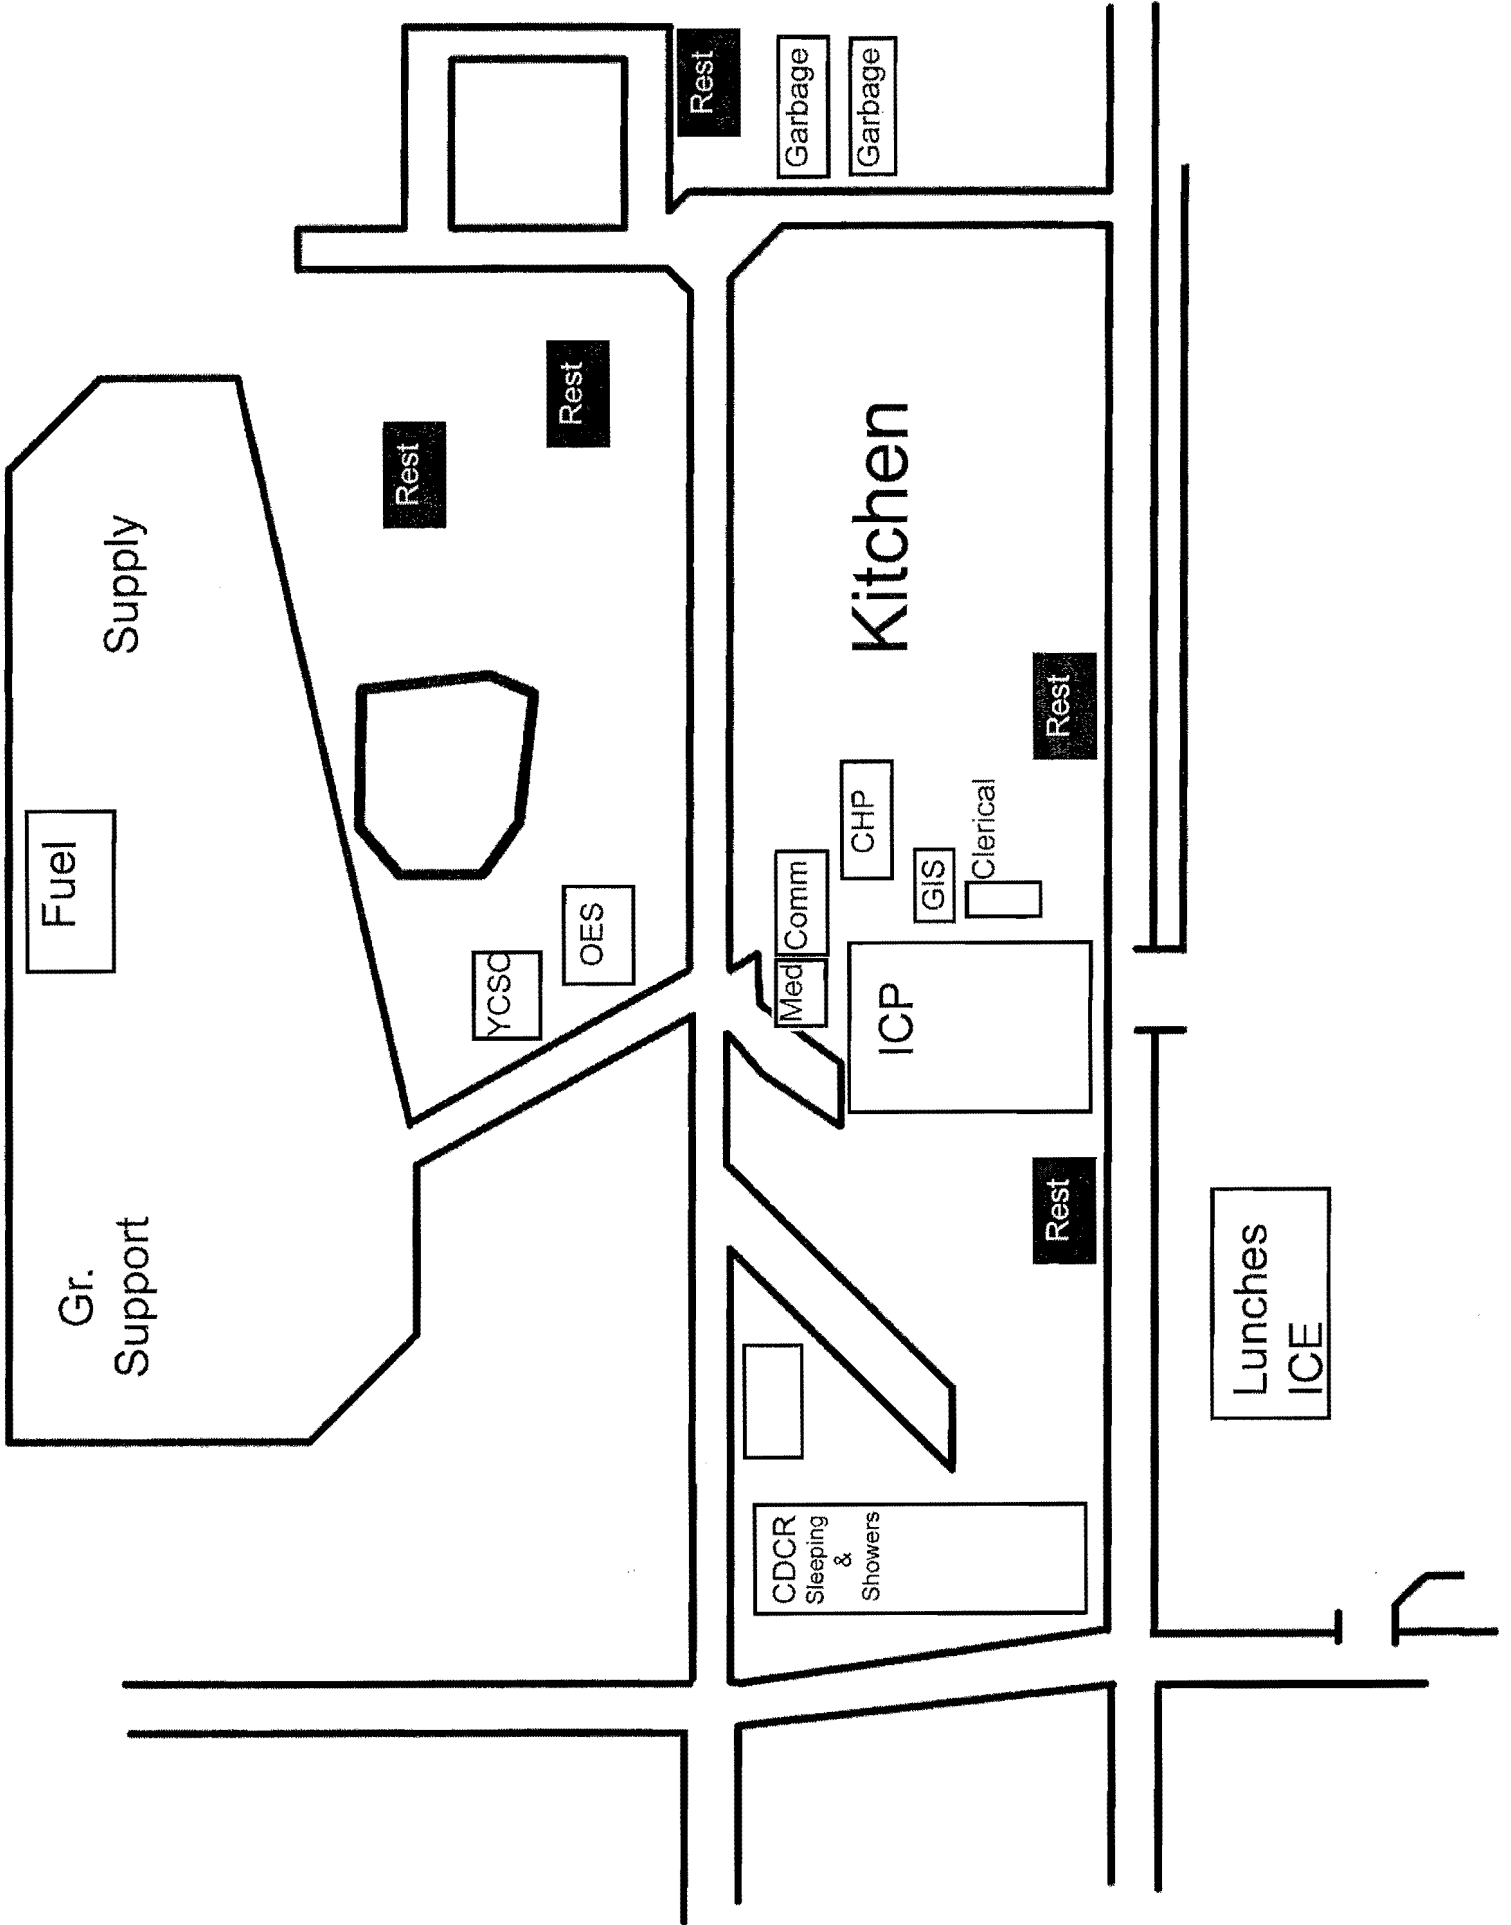

# DEMOBILIZATION PLAN YUBA FIRE CA-NEU-16856

## DEMOB PROCEDURES

- When your Name / Request number is posted on a Demob list, report to the Demobilization Unit.
- ***FOR STRIKE TEAMS: ONLY THE STRIKE TEAM LEADER NEEDS TO REPORT TO THE DEMOBILIZATION UNIT.***
- You must have your Order / Request number to begin the Demobilization process.
- Pickup Demobilization Checkout form (ICS-221) from the Demobilization Unit, and obtain the necessary Unit Leader sign-offs:
  - Supply Unit
  - Communications Unit
  - Ground Support/Vehicle Inspection(If Applicable)
  - Documentation Unit
  - Time Unit
  - Training Unit(If Applicable)
  - Accommodations(If Applicable)
- Return the completed Demobilization Checkout form (ICS-221) to the Demob Unit.
