FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Apache	OPERATIONAL PERIOD: 7/30/24 (12hr)
DATE ISSUED: 7/29/2024	TIME ISSUED: 1800
UNIT: CA-LPF	SIGNED: Dennis Burns /s/

INPUTS

The entire Fire Area is under a Fuels and Fire behavior advisory for fine fuel loading
Seasonal Temps and RH

WEATHER SUMMARY:

Temps: Day 87-89 Night Mid 50s

RH: Day 12-15% Night 60-80%

Winds: Day Upslope/up canyon 4-6mph gusts 10-15mph Night Light down slope and down valley
Ozena ERC 70/ 88th Percentile POI 70-80%

FIRE BEHAVIOR

GENERAL: No forward fire progression is expected on the Apache Fire. Spotting distance is up to .1 mile on ridge tops and from rollout.

Fuels will become sparse as you move to the north and east although the ground is steep there will be opportunities to pick up any fire that escapes its current footprint.

SPECIFIC:

Apache Branch: The fire is burning in sparse grass and pinion juniper. Retardant has been effective holding the fire in the grass. With multiple bisecting drainages the fire has the potential to rapidly shift from backing to head fire

If the fire escapes its current perimeter expect moderate rates of spread in the grasses.

IA: With the hot dry conditions, the fine fuels are easily susceptible to ignition. Take care when operating heavy equipment and avoid parking in high grass. If supporting IA expect moderate rates of spread and spotting up to .10mile.

AIR OPERATIONS: Conditions will be good for air operations. No expected smoke or fog impacts.

SAFETY

- Common Denominator 1 tragedies often occur on quiet areas of large fires.
- Common Denominator 2 tragedies often occur in light flashy fuels.

SAFETY MESSAGE
