## WEATHER DISCUSSION:

Building high pressure over the west will bring above average temperatures over the next several days with triple digit heat expected by mid-next week over the 4<sup>th</sup> of July holiday period. RH minimums will also dip into the low teens by early next week leading to an extended period of elevated fire danger. Mostly light, westerly winds are expected over the fire each day with gusts under 20mph. An Excessive Heat Watch is in effect for the lower elevations of the fire starting on Tuesday (7/2).

---

**SATURDAY:** Smokey under the inversion breaking early afternoon, then sunny, warm and dry.

**MAXIMUM TEMPERATURE (deg F):**

85-90 degrees

**MINIMUM RELATIVE HUMIDITY:**

18-23%

## **20 FOOT WINDS:**

Terrain-driven slope winds 6-12mph early, then west 6-9mph with gusts to 13mph

**Chance of Wetting Rain:** 0

**INVERSION:** Moderate trapping smoke & haze over lower terrain until early afternoon.

---

**SATURDAY NIGHT:** Mostly sunny with areas of smoke and haze. Warm overnight lows.

**MINIMUM TEMPERATURE (deg F):**

62-70 (upper/lower elevations)

**MAXIMUM RELATIVE HUMIDITY:**

40-45%

## **20 FOOT WINDS:**

Terrain driven downslope winds 6-12mph. Ridgetops NE 6-12mph

**Chance of Wetting Rain:** 0

**INVERSION:** Thermal inversion developing late. Areas of smoke & haze in over lower elevations.

---

## **SUNDAY OUTLOOK:**

Sunday will bring another few degrees of warming with drier RH minimums near 15%.

## GENERAL

Fuels in the current fire area are predominately Grass with mixed Oak and brush, which is what the fire has taken advantage of so far. Notably the grass crop is the result of two good winters and is matted, resulting in higher resistance to control because retardant and water cannot penetrate all the way to the ground. Be aware that the fire may be creeping through the matted grass even if it seems to be controlled by retardant. Surrounding areas transition into brush, and timber with large amounts of dead and down, especially to the north near Dinky Creek. As the fire impacts these live fuels they will not support the higher rates of spread we have seen so far, the indices in live fuel and the heavies are not as severe as the average for this year. Therefore, aspect and fuels are going to be your best indicator for the Rate of Spread (ROS) you will see.

### Specific areas of concern:

**DIV A&D&M** – The primary concern for spread is in DIV A, the area west of and in Dinky Creek where the fuels begin to transition to heavier size classes and more live fuels. While this area may be protected from general wind the drainage winds will try to push the fire up canyon during the day and will increase the threat of spotting across the North Fork of the Kings River. The west flank in this area will back against the wind to the west during the day especially in lighter fuels, and become an impact to DIV Z.

**DIV U&Z** – Expect continued backing to the Kings River in the western and eastern portions of each of these divisions, driving the possibility of spotting from roll out and from swirling winds, especially in the areas where the river bends. Continue to be aware of the matted grass holding heat and continuing to move at the surface.

**Night:** Expect downhill/down canyon spread during the night, and expect the fire to remain active well into early morning.

**Air Operations:** Smoke will adversely affect operations early in the day.

## SAFETY

The weather is starting to get hotter and drier, and the fire is spreading in to different fuel types. Be aware of these changes and continually assess the new hazards that this will present.

### **SAFETY MESSAGE**

## **Remain Vigilant for...**

### **- Spot Fires**

Diurnal and terrain winds have potential to influence spot fires.

### **- Falling Rocks**

Steep terrain, heavy equipment sending things rolling.

### **- Roadway Impediments**

Washouts, narrow passages, parked vehicles all create potential obstructions to safe and timely movements.

### **- Aircraft Operations**

Aerial Suppression and Logistics Support missions in your area.

### **- Communications**

Maintain awareness of staying in contact with your Leadership and adjoining forces as you traverse the land.
