FIRE WEATHER FORECAST

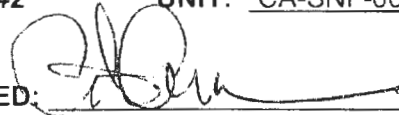

NAME: BASIN INCIDENT

FORECAST #2

UNIT: CA-SNF-000731

SHIFT: SUNDAY, JUNE 30, 2024

SIGNED:

Pete Curran - IMET

TIME / DATE ISSUED: 1700hrs Sat 6/29/24

WEATHER DISCUSSION:

Warm and dry conditions are expected across the fire area again today with max and min temperatures running 5-8 degrees above average. Daytime RH minimums will also dip to the middle teens today. Diurnal slope winds will prevail over the fire with mostly light westerly winds today. A robust thermal inversion that has kept visibilities low with poor smoke dispersal will continue thru the morning hours before slowly dissipating by mid-afternoon. Starting next week, a long duration heat wave will bring triple digit heat to the entire region with low humidity and result in an extended period of critical fire weather from mid-week at least thru Friday. An Excessive Heat Warning is in effect starting Tuesday (7/2) thru Friday (7/5) including the Basin Fire and fire camp.

SUNDAY: Smokey under the inversion breaking mid-afternoon, then sunny, warm and dry.

MAXIMUM TEMPERATURE (deg F):
87-92 degrees

MINIMUM RELATIVE HUMIDITY:
14-20%

20 FOOT WINDS:

Terrain-driven slope winds 6-12mph early, then west 6-9mph with gusts to 13mph

Chance of Wetting Rain: 0

INVERSION: Strong inversion trapping smoke & haze over lower terrain until mid afternoon.

SUNDAY NIGHT: Warm overnight lows. Mostly clear with haze early, then smokey after 2am.

MINIMUM TEMPERATURE (deg F):
64-72 (upper/lower elevations)

MAXIMUM RELATIVE HUMIDITY:
42-48%

20 FOOT WINDS:

Terrain driven downslope winds 6-12mph. Ridgetops NE 6-12mph

Chance of Wetting Rain: 0

INVERSION: Thermal inversion developing late. Areas of smoke & haze in and over lower elevations.

MONDAY OUTLOOK:

A few degrees warmer. Smokey morning inversion continues. Light west winds 6-9mph. Strong heat wave begins on Tuesday along with an Excessive Heat Warning.

GENERAL

Fuels in the current fire area are predominately Grass with mixed Oak and brush, which is what the fire has taken advantage of so far. Notably the grass crop is the result of two good winters and is matted, resulting in higher resistance to control because retardant and water cannot penetrate all the way to the ground. Be aware that the fire may be creeping through the matted grass even if it seems to be controlled by retardant. Surrounding areas transition into brush, and timber with large amounts of dead and down, especially to the north near Dinky Creek. As the fire impacts these live fuels they will not support the higher rates of spread we have seen so far, the indices in live fuel and the heavies are not as severe as the average for this year. Therefore, aspect and fuels are going to be your best indicator for the Rate of Spread (ROS) you will see.

Specific areas of concern:

DIV A, D&M – The primary concern for spread is in DIV A, the area west of and in Dinky Creek where the fuels begin to transition to heavier size classes and more live fuels. While this area may be protected from general wind the drainage winds will try to push the fire up canyon during the day will increase fire progression up drainage along Dinky Creek with a chance of spotting across the creek. The west flank in this area will back against the wind to the west during the day especially in lighter fuels, and become an impact to DIV Z.

DIV U&Z – Expect continued backing to the Kings River in the western and eastern portions of each of these divisions, driving the possibility of spotting from roll out and from swirling winds, especially in the areas where the river bends. Continue to be aware of the matted grass holding heat and continuing to move at the surface.

Night: Expect downhill/down canyon spread during the night, and expect the fire to remain active well into early morning.

Air Operations: Smoke will adversely affect operations early in the day.

SAFETY

Unburned fuel between you and the fire.

	SAFETY MESSAGE	

Stay focused on the safety aspects of your assignment

- Ensure LCES is in place prior to engagement.
- Establish decision points when conditions can deteriorate.
- Take weather observations.
- Monitor the fire environment for changes in the fuel, topographic and weather elements. Forecast the fire behavior.
- Evaluate the work area for hazards, communicate hazards, mitigate or avoid the hazards.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMMUNICATION
--	---	--

CRITICAL FIRE WEATHER

With the upcoming forecast for very HOT temperatures and low RH can support extreme fire behavior conditions.

Also, with the upcoming extreme hot weather forecast, we need to take care of ourselves. When possible, take more breaks shade and pace ourselves.

REMEMBER!!

HYDRATE-HYDRATE

Stay Hydrated

Wake up water up!

Drink fluids before, during, and after the shifts.

For every 2 bottles of water, drink 1 bottle of Gatorade.

At 2% dehydration, performance will fall off by 10-20% and is the #1 trigger of fatigue and other heat related illness

Basin Incident

Human Resource Message

June 30 ,2024

Mutual Respect

- Mutual Respect is your responsibility to treat people with dignity and respect, it is also your right to receive the same treatment.

Some things to remember while on this incident:

- Be kind and considerate to everyone in camp. Interact with all your colleagues with courtesy, politeness, and kindness. Even co-workers who don't particularly like each other can be civil and respectful, even a simple "Good morning" goes a long way.
- Let's remember that not everyone on this incident has the same sleep schedule. At night when you are in the tent sleeping area outside of camp, keep the noise to a minimum.
- Lastly, lets ensure that we are treating our base camp support teams, i.e., CCC's, food service, etc., with the courteous and respect that they deserve. They, as well as everyone else are working tirelessly to ensure that you have the adequate support that you need so we all can accomplish our mission objectives.

Janine Summy, Human Resource Specialist, 509-429-1206
