INCIDENT ACTION PLAN BASIN INCIDENT

CA-SNF-000731

P5R1L7 (0515)

Saturday

IAP
MAPS

OPERATIONAL PERIOD

7/6/2024 0700

to

7/7/2024 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: BASIN INCIDENT	2. Operational Period:	Date From: 7/6/2024	Date To: 7/7/2024
		Time From: 0700	Time To: 0700

3. Objective(s):

Management Objectives:

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.

Control Objectives:

- Keep the fire North of the Kings River in order to keep the fire out of the Sequoia National Forest and related infrastructure.
- Keep the fire East of the Dinkey Trimmer Road to protect infrastructure in the Pine Flat Lake area.
- Keep the fire South of McKinley Grove Road to protect campgrounds and grazing allotments.
- Keep the fire West of Garlic Meadow Creek to prevent fire from entering Sequoia & Kings Canyon National Parks.

General Situational Awareness:

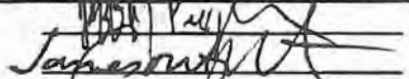

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.
- Ensure medical plan is in place before beginning operations.
- Dangerously high maximum and minimum temperatures are expected.

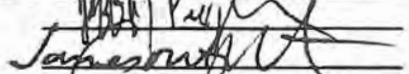

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

FIRE WEATHER FORECAST

NAME: **BASIN INCIDENT**

FORECAST #8

UNIT: CA-SNF-000731

SHIFT: SATURDAY, JULY 6, 2024

SIGNED: 

TIME / DATE ISSUED: 1800hrs Fri 7/5/24

Pete Curran - IMET

WEATHER DISCUSSION:

Ongoing heat wave will continue to bring very high temperatures with low humidity to the region into the middle of next week, elevating fire weather and cumulative heat stress concerns. High temperatures over the lower elevations of the fire will range from 104°-109°, with little overnight relief with lows 75°-80°. Generally light winds out of the west will prevail over the fire each day with gusty NE diurnal slope winds overnight. RH minimums will dip into the middle to upper teens over the next few days.

****EXCESSIVE HEAT WARNING THRU 7/11/24****

SATURDAY: Sunny hot & dry. Accumulating heat stress.

MAXIMUM TEMPERATURE (deg F):
94-108 degrees (upper/lower elevations)

MINIMUM RELATIVE HUMIDITY:
18-25%

20 FOOT WINDS:

Morning: Terrain-driven slope winds ENE 5-8mph G25 early, then west 6-9mph with gusts to 15mph

Chance of Wetting Rain: 0

INVERSION: Subsidence inversion lifting late morning/early afternoon.

SATURDAY NIGHT: Mostly clear with warm overnight lows. Poor R/H recovery

MINIMUM TEMPERATURE (deg F):
74-79 (upper/lower elevations)

MAXIMUM RELATIVE HUMIDITY:
35-45%

20 FOOT WINDS:

Terrain driven downslope winds 6-12mph. Ridgetops NE G25 mph

Chance of Wetting Rain: 0

Moonlight Illumination: 0% (new moon)

INVERSION: Subsidence inversion with a few areas of smoke/haze over lower elevation

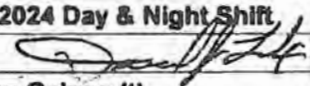

SUNDAY OUTLOOK:

Very hot and dry. T: 96-106 RH Min: 15-25% Wind: West 6-9 G14

Local Weather Observations near the fire: Email Weather Observations to: firewxobs@gmail.com

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 9	TYPE OF FIRE: Wildfire
FIRE NAME: Basin	OPERATIONAL PERIOD: July 6, 2024 Day & Night Shift
DATE ISSUED: July 5, 2024	TIME ISSUED: 2000 
UNIT: CA-SNF- 000731	Prepared: Dan Felix, FBAN, Bryan Gaines (t)

INPUTS

**** See Fire Weather Forecast for discussion and specific weather. ****

WEATHER SUMMARY:

Temp: Highs 94-108 degrees.
RH: Minimum 18-25 percent
Winds: Terrain-driven slope winds, ENE 5-8mph gusts to 25mph early, then west 6-9mph gusts to 15mph.
Inversion: Subsidence inversion lifting late morning/early afternoon.
Night: 74-79 degrees, 35-45%, down slope 6-12mph, Ridge NE G25 mph.
Moonlight Illumination: 0% (new moon)

GENERAL

A Fuels and Fire Behavior Advisory has been issued for California grass and herbaceous-dominated ecosystems due to above-average fuel loading.

The fuels in the fire area consists of grass with mixed oak and brush, with grass being the primary contributor to the fire spread. The grass crop is particularly dense due to two good winters, making it more resistant to control efforts as retardant and water cannot penetrate to the ground. It's important to note that the fire may still spread through the dense grass even if it appears to be controlled. At this point the spread has been arrested but the threat of moving into receptive fuels remains, especially in the areas that have unburned fuel within the perimeter. Spotting across Dinky Creek and onto the west aspect with light fuels would result in rapid rate of spread and allow this fire to transition into areas with a large amount of standing and down heavy fuels.

Specific areas of concern:

Division A – Established lines have arrested the spread of the fire. However unburned fuel patches exist within the containment lines and as the dead and down, and live fuels become more available to ignition there is a possibility of spotting posing a potential threat to containment lines.

Division D – The open line that exists in this area is holding well in the retardant and at the bottom of Dinkey Creek but we have experienced some spread near the creek and that can be expected to continue until it is lined. The swirling winds around the bend of the creek may carry smoke and embers across to the east side, where there is a high risk of fire due to the more continuous grass fuel load. If this occurs, the fire will spread rapidly.

Division M - This division is in good shape, however there are areas of unburnt fuel within the perimeter that could produce enough ember cast to cause spotting if enough wind impacts these areas.

Division U&Z- This division is looking very well. Roll-out could still cause some issues on the east end but that threat is diminishing as the heavier fuels consume.

Night - Downhill or down-canyon wind is expected during the night. The most significant impact from winds is expected in Divisions A and D, however, no significant spread is expected.

Air Operations: There are no anticipate limiting factors anticipated.

SAFETY

You all have done a great job to get this far, but there is a bit more to be done to put this dragon to put to sleep. So, stay vigilant so that the dragon does not rear its ugly head.

Lookouts Communications Escape Routes Safety Zones	Basin Incident 07/06/2024 - Day and Night Shift
	SAFETY MESSAGE

WHAT IS THE PROBABILITY OF SUCCESS?

- When you are developing your tactical plan honestly weigh the probability of successfully completing your objectives.
- Do you have the time, resources, logistical support, and supervision needed for the assignment?
- Do you have all elements of your safety plan in place?
- Are the risks associated with the assignment worth the gain?
- When your probability of success falls below 75% it should be a red flag to consider an alternative plan.

MAJOR HAZARDS AND RISKS

Be sure all elements of your safety plan are in place prior to engagement

Your Personal Health

Maintaining peak performance requires that you take good care of your body.

Get the appropriate amount of rest. Manage your off time to get as much sleep as possible.

Proper Nutrition and hydration are critical to managing fatigue.

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name:	2. Operational Period:	Date From: 7/6/24	Date To: 7/7/24
BASIN INCIDENT		Time From: 0700	Time To: 0700
Incident Area	Hazard/Risks	Mitigations	
ALL	Heat Related Fatigue & Overexertion	Remain hydrated, seek shade and take breaks to reduce exertion when and where possible.	
ALL	Driving Hazards	Driving and potential for collision with other vehicles (civilian or fire apparatus), pedestrians, wildlife or obstructions in roadway.	
ALL	Snags	Identify potentially fire weakened trees and flag as hazardous. Coordinate with DIVS to have qualified fallers cut down hazard trees. Avoid hazard trees, particularly during high wind. Mitigate snag hazard before inserting personnel for line construction.	
ALL	Rolling Material	Be alert for roll out of burning debris that can cause fire below you. Utilize lookouts. Do not have personnel working below you while digging line.	
ALL	Aircraft use: Fixed wing and helicopters	Coordinate helicopter use with air attack and helicopter manager. Ensure that personnel are clear of drop zone. Adhere to aviation procedures and refer to IRPG.	
ALL	Heavy Equipment Operations	Maintain awareness when working near operating heavy equipment, remain within view and communications of the operator(s).	
ALL	Medical - Lengthy patient evacuation/transport times	Plan to utilize air medical transport when transportation by ground could be extended. Stage ambulances in areas where extraction times will be extended.	
ALL	Entrapment - Spot Fire Suppression, Compromised Egress	Ensure LCES, Adhere to Fire Orders, Mitigate Watch Out Situations. Be aware of limited turn arounds for vehicles and narrow roads. Establish communications with ground crews.	
ALL	Slips/Trips/Falls	Watch footing and trip hazards. Maintain spacing while hiking and proceed slowly on steep slopes.	
ALL	Human Factors - Night Ops: Visibility, Fatigue	Once established, be aware Spike Camps may have minimal lighting at night, potential for wildlife interactions increased, and greater distances to medical treatment facilities.	
ALL	Burns - Ash Pit/Stump Holes	Ensure all appropriate PPE is worn, be alert hazards within the burn while moping up.

FINANCE MESSAGE

Finance Email: 2024.basin.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block.

Contract crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP or spike camp.

All Local Government employees **MUST** have a MARS account to complete and submit their F-42's for reimbursement.

Authorization for Lodging ended 6/28 for most resources. As of 6/29 full camp services were available and reimbursement for lodging expenses is only allowed for night shift resources.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

The following resources need to please check in with Finance:

REQUEST NUMBER	RESOURCE NAME	ISSUE or QUESTION
E-21	Dust Busters	Missing Shift Tickets
E-160	Palmer Tractor	Missing Shift Ticket
E-67	Lone Star	Need miles recorded
E-61	Central Sierra	Missing Signatures
C-46	PR Reforestation	
E-212	Lite on the Land	Need Travel Miles
E-43.6	Castro	Missing 07/02 CTR
C-8	Cariso	Need Times

THANKS FOR KEEPING UP ON YOUR TIMES!!!

Human Resource Message
July 6, 2024**

Work and Fatigue in Wildland Firefighting effects your physical and emotional state!

Wildland Firefighting is arduous work, performed for long shifts in difficult environmental conditions. The work can be dangerous due to the fire and working conditions. Heat, smoke, rolling rocks, falling snags, and other hazards threaten the worker. Fatigue can impair performance and decision making, increasing the risk of injury. Prolonged exposure to fatigue, stress, smoke, and poor nutrition has the potential to increase the incidence of upper respiratory illness, but also mental lapses.

The stress response is necessary to prepare an athlete, firefighter or soldier for a maximal effort in a physical challenge, but it can be unhealthy if it occurs too often in the wrong setting.

Fatigue—A sense of tiredness, either mental or physical, brought on by stress (lack of sleep, physical work, nutritional inadequacies, or mental stresses). Fatigue following work or sleep deprivation is a normal state and can be reversed with adequate recovery or rest.

Accumulated (Chronic) Fatigue—Fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, resulting in decreased productivity, compromised immune function, and reduced alertness.

Fatigued workers perform poorly and behave carelessly, tolerate greater errors, and become inattentive. They display decreased motivation, increased irritability and depression, and low morale. Accumulated fatigue is more persistent, producing a wider array of effects on performance, health, and morale than ordinary fatigue. Accumulated fatigue requires longer recovery periods than ordinary fatigue.

Correct Nutrition, Hydration and Rest are good coping mechanisms for stress and fatigue. Make use of your down time and rest per the work/rest guidelines.

Your Mental Health Matters!

“Everybody can be great...because anyone can serve. You don't have to have a college degree to serve. You don't have to make your subject and verb agree to serve. You only need a heart full of grace. A soul generated by love.”

- Martin Luther King

Janine Summy, Human Resource Specialist, 509-429-1206

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- If you find something, grab a GPS point, bump it up the chain of command or directly inform an ARCH/READ on the line or back in camp.

Neon Green and White Flagging Together

- READs will be using flagging for areas to avoid suppression activities.
 - The two flagging colors used are a strip of white and a strip of neon green.
- For more information, please consult with an ARCH/READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and can cause future issues (i.e. bears looking for food in camps and drop points).

Sensitive Riparian Areas

- Meadows are natural barriers. Tie the line to them and not make one through them.
- Streams and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade when tracking over and try not to turn until you cross) to protect habitat and stream stability.

Keep Up the Good Work!

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing information and working alongside ARCH/READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

-----Watch Out!! Noxious Weed!-----

Spanish Broom: Like Scotch broom, its close relative, Spanish broom can dominate disturbed areas where it can out-compete native plants and alter soil nutrients. It does not provide good forage for wildlife and mature stands are noted to be a fire hazard in California.

Trainee Success Starts Here

ARRIVAL AT INCIDENT

- Check-In to incident
- Check-In with Training (USE QR CODE IN IAP on TNSP page)
- Check-In with Supervisor (Trainer)
- Communicate goals with Trainer
- Provide Trainer with your PTB

WHILE AT THE INCIDENT

- Communicate daily with your trainer
- Complete your 214's
- Have tasks signed off in your PTB

AT THE END OF YOUR ASSIGNMENT

- Collect PTB with signatures
- Have trainer complete evaluation record in back of PTB
- Have trainer complete trainee evaluation (225)
- Complete exit interview (Use QR code in IAP on TNSP page)
- THANK YOUR TRAINER!

DEMOB Procedures

In person check-out is being utilized on this incident. Monitor the IAP for the tentative DEMOB list. If there is an error on the dates, please communicate through your division or section to the check-in desk. They can then get the information verified and if needed, corrected.

Check out sheets will be available late afternoon on your last work day. Stop in at the DEMOB trailer to pick up your copy. Only get signatures from those sections that are highlighted.

1. All non-local resources will have at least 8 hours of rest prior to being released from the incident.
2. All resources will meet any agency-specific requirements on hours of travel per day or other travel restrictions.
3. Any heavy equipment operators or owners must have appropriate permits and follow any limitation on the movement of their equipment on public highways.
4. For an early release from the incident, prior to your last work day, an ICS 213 from your section must be submitted to DEMOB documenting an early release.
5. Emergency demobilization will be processed as quickly as possible. Individuals will be required to go through demobilization and checkout procedures. Demobilization and Resources Units will assure that manifests are changed as needed.
6. All resources needing airfare arranged will need to notify DEMOB 72 hours prior to the travel day.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE POINT OF CONTACT BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)"

"This will be the Division W Medical, POC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (Priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Point of Contact		Name of on-scene POC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: (IRPG PAGE 106) Age: Weight: Chief Complaint:

Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air@Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
