GENERAL ****Initial Attack Group** – The following is applicable to any new starts you may encounter.**

A Fuels and Fire Behavior Advisory has been issued for California grass and herbaceous-dominated ecosystems due to above-average fuel loading.

The fire area contains grass, mixed oak, and brush, with grass being the main contributor to the fire spread. The grass is especially dense due to two good winters, making it hard to control as retardant and water cannot penetrate to the ground. It's important to note that the fire may still spread through the dense grass even if it appears controlled. Fire that transitions into brush or timber models will have a reduced rate of spread but intensity and resistance to control will increase.

Specific areas of concern:

Division A - The fire's spread has been successfully contained within established lines. Mitigating unburned islands within the containment lines will further reduce any threat to the line. No spread outside the lines is anticipated.

Division D – Now that you have been able to gain access and build line in this division the threat of spread has diminished along the ridgeline, but monitoring of any heat sources that remain near the line will be necessary. Along Dinkey Creek the consumption of fuels has minimized the threat as well, but this also needs to be monitored.

Division M - This division had not put up much smoke until yesterday afternoon when remaining heat ignited unburned fuel within the perimeter east of Helispot 5. While rotor wing was able to knock it down pretty quickly the area over the ridge may be harboring spots and needs to be monitored. Continued hot and dry conditions may cause a repeat performance since there are other areas along Rodgers Ridge that have unburned fuel near the ridge.

Division U&Z - This division is looking very well. Roll-out concerns have been diminished as the heavier fuels have been consumed.

Night - Downhill or down-canyon wind is expected during the night. The most significant impact from winds is expected in Divisions A and D, however, no significant spread is expected if the interior islands have been dealt with.

Air Operations: No anticipated limitations.

SAFETY

While the threat of fire spread has diminished it has not all the way gone, and all of the other hazards you face have not. Keep your heads in the game and proceed at a safe pace to accomplish the remaining goals.

SAFETY MESSAGE

Mop Up is Hazardous Work!

- Injury and accidents are common during the mop up phase.
- Gather situational awareness in your work area and communicate it.
- Reduce risk by identifying and mitigating hazards.
- Stay focused on task, don't let the routine nature of the assignment allow your mind to wander resulting in a loss of situational awareness.
- Take frequent breaks, stay hydrated, and manage fatigue.

Keep Up On Your Personal Health

Maintaining peak performance requires that you take good care of your body.

Get the appropriate amount of rest, utilize sleep trailers if able to reduce cumulative fatigue as best as possible.

Proper Nutrition and hydration are critical to managing fatigue, take advantage of the available electrolytes provided.

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name:	2. Operational Period:	Date From:	7/8/24	Date To:	7/9/24
BASIN INCIDENT		Time From:	0700	Time To:	0700
Incident Area	Hazard/Risks	Mitigations			
ALL	Heat Related Fatigue & Overexertion	Remain hydrated, seek shade and take breaks to reduce exertion when and where possible.			
ALL	Driving Hazards	Driving and potential for collision with other vehicles (civilian or fire apparatus), pedestrians, wildlife or obstructions in roadway.			
ALL	Snags	Identify potentially fire weakened trees and flag as hazardous. Coordinate with DIVS to have qualified fallers cut down hazard trees. Avoid hazard trees, particularly during high wind. Mitigate snag hazard before inserting personnel for line construction.			
ALL	Rolling Material	Be alert for roll out of burning debris that can cause fire below you. Utilize lookouts. Do not have personnel working below you while digging line.			
ALL	Aircraft use: Fixed wing and helicopters	Coordinate helicopter use with air attack and helicopter manager. Ensure that personnel are clear of drop zone. Adhere to aviation procedures and refer to IRPG.			
ALL	Heavy Equipment Operations	Maintain awareness when working near operating heavy equipment, remain within view and communications of the operator(s).			
ALL	Medical - Lengthy patient evacuation/transport times	Plan to utilize air medical transport when transportation by ground could be extended. Stage ambulances in areas where extraction times will be extended.

The Ten Commandments of Human Relations

1. **SPEAK TO PEOPLE.** There is nothing so nice as a cheerful word of greeting.
2. **SMILE AT PEOPLE.** It takes 72 muscles to frown and only 14 to smile.
3. **CALL PEOPLE BY NAME.** The sweetest music to anyone's ears is the sound of his/her own name.
4. **BE FRIENDLY AND HELPFUL.** If you have friends, be a friend.
5. **BE CORDIAL.** Speak and act as though everything you do is a genuine pleasure.
6. **BE GENUINELY INTERESTED IN PEOPLE.** You can like almost everybody if you try.
7. **BE GENEROUS WITH PRAISE.** Cautious with criticism.
8. **BE CONSIDERATE WITH THE FEELINGS OF OTHERS.** There are usually three sides to every controversy: yours, the other fellows, and the correct side.
9. **BE ALERT TO GIVE SERVICE.** What counts most in life is what we do for others.
10. **ADD TO THIS A GOOD SENSE OF HUMOR...**a big dose of patience, a dash of humility and you will be rewarded many fold.

Apologizing
doesn't always
mean you're
wrong and the
other person is
right. It means
you *value* your
relationship *more*
than your ego.

RESOURCE ADVISOR MESSAGE

Below is a summary of the methods outlined in the suppression repair plan (SRP). It doesn't replace the full suppression repair plan, but it can be used as a cheat sheet. See the suppression repair plan for full details on each activity.

OVERALL GOAL: Leave the area better than you found it and leave no trace of suppression actions as much as possible.

Fire Line: Pull back soil berms (dozer, cup trenching, etc.), flush cut stumps where possible, restore ground cover, water bar where necessary, block/hide entrance and exit.

Sensitive Natural and Cultural Areas: These areas are flagged off with neon green and white. Give these areas a buffer and avoid causing additional ground disturbance.

Heli-spots, drop point zones, sling sites, staging areas, medi-vac sites: Remove trash, equipment; restore ground cover where possible/practical.

Spike Camps: Clear site equipment, back haul trash, restore ground cover where appropriate.

Water Drafting/Pump Sites: Restore water sources used or developed as draft sites to original condition. Remove any dams, dikes, or other impoundments created for fire suppression activities. Repair stream banks if damaged.

Road Repair: Restore roads to pre-incident condition according to their maintenance level. Repair suppression-related damage: Culvert function, rolling dips, ditch lines. Restore grade if needed. Remove/chip excess vegetation from clearing activities. Close access where appropriate to prevent unauthorized OHV use.

Concentrations of Slash: Slash will either be chipped or piled. See the SRP for details on slash piling.

Trash and Backhaul: Please pay attention to the little stuff, micro trash. Hose straps are a great example of micro trash.
