SAFETY MESSAGE

SAFETY IS OUR FIRST PRIORITY

Fire fighter and Equipment Operator safety comes first

- Lookouts
- Communications
- Escape Routes
- Safety Zones

SAFETY THOUGHT
Slow is smooth and smooth is fast. Take your time and get things done safely.

MAJOR HAZARDS AND RISKS	
<ul style="list-style-type: none"> • Driving on narrow forest roads: steep drop offs, tight curves, potholes, unexpected oncoming vehicles. • Driving on Tollhouse Rd/168: Heavy traffic, steep drop offs, aggressive or distracted drivers. • Heat/dehydration—Drink lots of water 	<ul style="list-style-type: none"> • Heavy Equipment Use • Snags • Slight chance of thunderstorms • Steep terrain--falls/slips • Fatigue • Complacency

CAMP BREAKDOWN	
Remember, camp safety is every bit as important as fireline safety.	
<ul style="list-style-type: none"> • Use a spotter when backing vehicles • Watch for people or objects in your blind spots • Watch for tripping hazards (extension cords, boxes, rocks, etc.) • Lift with your legs, not your back. Better yet, get help to lift heavy objects 	<ul style="list-style-type: none"> • Wear gloves when pinch or sharp hazards exist • When working on a ladder, have a person steady it • Do a final sweep to pick up any dropped personal items, trash, or flagging.

DRIVING HOME	
<ul style="list-style-type: none"> • Get adequate rest before beginning return travel. Driving while drowsy or fatigued can be just as dangerous as driving while drunk. • Buckle up! Obey posted speed limits. Turn on headlights. Clean windshields. • The use of handheld devices is prohibited while driving. Don't get distracted. • Drive defensively; Be courteous to other drivers. • Take frequent rest breaks. Alternate drivers when possible. 	

Closing in on the home stretch of this incident...but keep focused until the end.

Thanks for a great safety record. Let's stay safe as we continue suppression repair, break camp, and eventually drive home.

RESOURCE ADVISOR MESSAGE

Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- If you find something, grab a GPS point, bump it up the chain of command or directly inform an ARCH/READ on the line or back in camp.

Neon Green and White Flagging Together

- READs will be using flagging for areas to avoid suppression activities.
 - The two flagging colors used are a strip of white and a strip of neon green.
- For more information, please consult with an ARCH/READ.

Food on the Line Attract Wildlife Over Time.

- Keep food off the line as much as possible. It lures in wildlife, especially on indirect and contingency lines. Food associate's wildlife to humans and can cause future issues (i.e. bears looking for food in camps and drop points).

Sensitive Riparian Areas

- Meadows are natural barriers. Tie the line to them and not through them.
- Stream and creeks should be approached with care. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues.

Keep Up the Good Work!

- Picking up trash/micro-trash.
- Removing unused flagging.
- Sharing information and working alongside ARCH/READs.
- To the extent possible, when moving on to a new area leave the former better than you found it.

-----**Watch Out!! These are Endangered Species!**-----

- **YOSEMITE TOAD**
- **HABITAT:** Forests, open areas, meadows, around lake edges
