CA-FKU-019190

Wednesday

## OPERATIONAL PERIOD

9/4/2024 0700

to

9/5/2024 0700

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <p style="text-align: center; margin-top: 10px;"><b>BOONE</b></p>	<b>2. Operational Period:</b>	Date From: 9/4/2024 Time From: 0700	Date To: 9/5/2024 Time To: 0700
---	-------------------------------	--	------------------------------------

**3. Objective(s):**

- Management Objectives**
- Provide for emergency personnel and public safety at all times.
  - Protect property, improvements, and infrastructure.
  - Ensure coordinated, timely and accurate release of public information.
  - Foster and maintain relationships with all cooperators and stakeholders.
  - Protect economic, natural, cultural and heritage resources.
  - Maintain fiscal accountability and keep costs commensurate with values at risk.

- Control Objectives**
- Keep the fire North of Monterey County Line
  - Keep the fire South of Los Gatos
  - Keep the fire East of Priest Valley
  - Keep the fire West of Juniper Ridge

**General Situational Awareness:**

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

**6. Incident Action Plan**

<b>1. Incident Name:</b> <b>BOONE</b>	<b>2. Operational Period:</b>	Date From: 9/4/24 Time From: 0700	Date To: 9/5/24 Time To: 0700	Last Update 9/3/2024 22:32:40

Fire Weather Planning Forecast for Interior Central California National Weather Service San Joaquin Valley - Hanford CA 147 PM PDT Tue Sep 3 2024.

DISCUSSION... A large upper-level ridge will build into Central California today and strengthen through the next few days. This will result in much above normal temperatures and lowering daytime humidity. A cooling trend will then take place next weekend as a trough moves into the region. Some mid level moisture will be pulled northward ahead of this trough and provide for chances of afternoon showers and thunderstorms over the Sierra Nevada on Friday and Saturday

.TONIGHT...

Sky/weather.....Mostly clear.  
 Min Temperature.....68-78.  
 24 hr trend.....8 degrees up.  
 Max Humidity.....31-41 percent.  
 24 hr trend.....17 percent down.  
 20-Foot Winds.....West 4 mph.  
 LAL.....1.  
 Chc Wetting Rain....0 percent.

.WEDNESDAY...

Sky/weather.....Sunny.  
 Max Temperature.....92-102.  
 24 hr trend.....4 degrees up.  
 Min Humidity.....14-24 percent.  
 24 hr trend.....1 percent down.  
 20-Foot Winds.....Northeast 4 mph.  
 LAL.....1.  
 Ventilation.....Poor to good.  
 Mixing height.....0-10400 ft AGL.  
 Transport Winds....Northeast around 5 mph shifting to the southwest in the afternoon.  
 Chc Wetting Rain....0 percent.

.WEDNESDAY NIGHT...

Sky/weather.....Mostly clear.  
 Min Temperature.....70-80.  
 24 hr trend.....1 degree up.  
 Max Humidity.....30-40 percent.  
 24 hr trend.....1 percent down.  
 20-Foot Winds.....West 3 to 5 mph.  
 LAL.....1.  
 Chc Wetting Rain....0 percent.

.THURSDAY...

Sky/weather.....Sunny.  
 Max Temperature.....94-104.  
 24 hr trend.....2 degrees up.  
 Min Humidity.....13-23 percent.  
 24 hr trend.....1 percent down.  
 20-Foot Winds.....West around 4 mph shifting to the north around 6 mph in the afternoon.  
 LAL.....1.  
 Ventilation.....Poor to good.  
 Mixing height.....0-12500 ft AGL.  
 Transport Winds....North around 5 mph.  
 Chc Wetting Rain....0 percent.

# WFTIIC Four Month Outlook

Visit WFTIIC Hub @ <https://wftiic.ca.gov> for more information | Created: September 2, 2024

## Significant Fire Potential | September - December 2024

### Northern Operations | [Click Here for Source](#)

- Extended periods of unusually flammable live-dead fuels are expected in September, with the duration likely decreasing from October to December. Widespread low elevation green-up will likely occur by December.
- Abundant, cured herbaceous fuels, and unseasonably flammable brush along with dry-gusty wind events will be the main drivers for large fire potential during the next four months.
- Significant Fire Potential is near to above normal during September for all areas shaded in red, then returns to normal for October through December when large fire activity is historically less.

### Southern Operations | [Click Here for Source](#)

- There is a moderate tilt in the odds towards above normal large fire potential from September through December for all areas shaded in red due to the odds favoring a drier than normal fall season.
- Large fires are likely to be primarily grass and fine fuels dominated.
- Due to the anomalously wet winter and spring seasons, there is an abnormally large load of grass crop and thus a larger fuel load than normal.
- Due to no areas of prolonged drought, larger live fuels (timber) are less susceptible to ignition than finer fuel.

## Drought Monitor

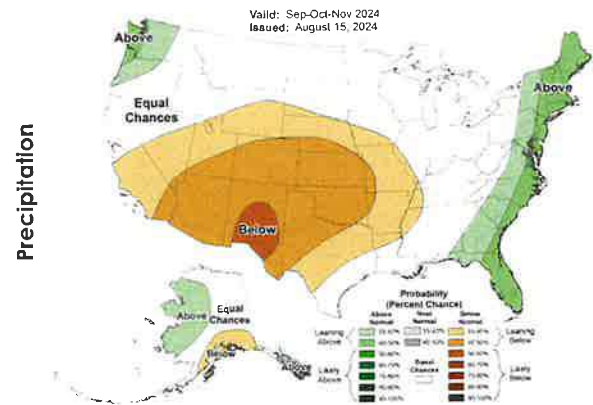

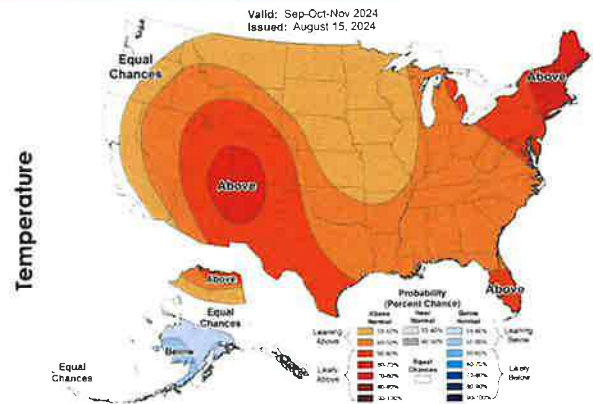

[California | U.S. Drought Monitor \(unl.edu\)](#)

Since the beginning of our water year (Oct. 1st), most areas are remaining slightly to well above average due to an anomalously wet late winter and early spring. The recent Pacific weather systems have brought above-normal precipitation to northern California and the Pacific Northwest. Coastal parts of northern California received over two inches of rain. The rain that fell was not enough to make up for deficits that have accumulated over several months to more than a year, so no improvement to the depiction was made.

## Temperature & Precipitation

[Climate Prediction Center](#)

## September 2024 Outlook & Fire History

[CALFIRE Statistics](#)

The Significant Fire Potential Outlook projects near to above normal activity in September. During this month, one to two large fires typically occur per PSA due to heightened fire risk from hot, dry conditions and strong winds, particularly in the Southern Region. Over the years, the month of September has witnessed some of the most destructive wildfires in California, such as the Napa-Sonoma County **Glass Fire (2020)**, which burned 67,484 acres and destroyed 1,520 structures and the Lake-Napa-Sonoma County **Valley Fire (2015)**, which burned 76,067 acres and destroyed 1,955 structures.

Steep winding roads are throughout the incident. Slow down when driving on loose gravel and blind curves. Drive defensively with headlights on and use hands free devices.

Working on steep, uneven terrain. Be mindful of rolling materials.

Ensure radios are properly programmed for today's IAP and that crews are trained in communications procedures for the incident.

Maintain situational awareness. Look up, Look down, Look around

Stay hydrated!!! Time to think = time to drink. Document rest and hydration on 214.

Remain mindful of what is going on around you! LCES!

HEADS UP!!! Lookout for SNAGS when working around areas with burned trees. Evaluate all wind damaged trees with large limbs before working under around them.

Avoid complacency!!!! Experiencing extreme fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.
