

INCIDENT ACTION PLAN

WHITE - CA-KRN-031252

Monday

OPERATIONAL PERIOD

7/22/2024 0700

to

7/22/2024 1900

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: WHITE-CA-KRN-031252	2. Operational Period:	Date From: 7/22/2024	Date To: 7/23/2024
		Time From: 0700	Time To: 1900

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

- Keep the fire within the current perimeter.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Spot Forecast for WHITE...CAL FIRE
National Weather Service Hanford CA
100 PM PDT Sun Jul 21 2024

Forecast is based on forecast start time of 0700 PDT on July 22.
If conditions become unrepresentative...contact the National Weather Service.

...EXCESSIVE HEAT WARNING IN EFFECT UNTIL 11 PM PDT WEDNESDAY...

.DISCUSSION...

The warming trend will continue across the area today. The warming trend escalates on Monday and Tuesday with dangerous heat returning to much of the area through midweek. Winds will remain terrain and diurnally driven.

.MONDAY...

Sky/weather.....Sunny (10-20 percent).
Max temperature.....93-95.
Min humidity.....19-21 percent.
Eye level winds.....West to southwest 5-9 mph, with gusts to 16 mph.
Surrounding ridge...Southwest 8-14 mph. Gusts up to 20 mph.
Mixing height.....Rising to around 8000 ft AGL.
Transport winds.....Southwest around 11 mph.
Wind (20 ft).....Northwest winds 6-10 mph shifting to the southwest 9-15 mph in the afternoon. Gusts to around 20 mph.

.MONDAY NIGHT...

Sky/weather.....Clear (0-10 percent). Haze and areas of smoke in the evening.
Min temperature.....69-73
Max humidity.....35-38 percent.
Eye level winds.....Northwest 5-10 mph with gusts to 16 mph.
Surrounding ridge...Northwest 6-12 mph with gusts to 18 mph.
Mixing height.....Lowering to less than 500 ft AGL.
Transport winds.....Northwest around 10 mph.
Wind (20 ft).....Northwest winds 5-10 mph.

Forecaster...MOLINA

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: WILDFIRE
FIRE NAME: WHITE	OPERATIONAL PERIOD: 24 HOUR 7/22/2024
DATE ISSUED: 7/21/2024	TIME ISSUED: 1900
UNIT: KERN COUNTY / CAL FIRE	SIGNED: 
Typed/printed: Morgan Diefenbach – FBAN (T)	

INPUTS

WEATHER SUMMARY:

EXCESSIVE HEAT WARNING REMAINS IN EFFECT UNTIL 11 P.M. WEDNESDAY!

Hot and sunny with a few stray clouds.

Max. Temperature: 93-95 **Min. Humidity:** 19-21%

20' Wind: Northwest 6-10 mph with gusts to 20 mph, becoming southwest 9-15 mph in the afternoon, then northwest 5-10 mph in the evening.

Overnight: Clear skies, lows in the high 60s to low 70s, maximum humidity recovery 35-38%.

See spot weather forecast in IAP for detailed weather information.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Elevated temperatures and low relative humidity will continue to provide the potential for rapid fire growth in the cured annual grasses and litter if fire becomes established outside the containment lines, or for local initial attack. Expect increased availability of live fuels as the warming trend continues over the fire area and overnight humidity recovery remains poor.

Probability of ignition will reach 90-100% by midafternoon, depending on aspect and fuel shading.

SPECIFIC:

BRANCH VII: Expect isolated smoke from heavy fuels and stump holes within the remainder of the green island, particularly midday and into the afternoon as slopes receive full sun.

BRANCH XI: No movement outside the existing perimeter is anticipated.

AIR OPERATIONS:

No smoke impacts to air operations anticipated. Mixing height 8000' AGL. Good visibility.

Sunset: 8:04 P.M.

Sunrise: 5:56 A.M.

SAFETY

- Common Denominator #1: Relatively small fires and deceptively quiet areas of large fires. Maintain LCES for all personnel even though fire activity has died down.
- Fire in drainages can loosen rocks and rolling objects. Use caution when working on slopes, especially when others are working directly above or below you.

SAFETY MESSAGE

PREPARE AND PREVENT

****EVERYONE GETS A BRIEFING****

- **Weather:** Temperatures are rising, and the humidity is reducing. Stay Hydrated with water and electrolytes and ensure work rest cycles
- **Communications:** Ensure your radios are properly cloned to today's frequencies, ensure good communications with supervisor and adjoining forces, use human repeaters where radio needed
- **Weather:** Temperatures are rising, and humidity is reducing. Hydrate with water and electrolytes during your shift and while off shift. If you are thirsty, you are already in a mild dehydration state
- **L.C.E.S:** Post lookouts, ensure Communications and everyone is aware of the Escape Routes and Safety Zones
- **Aircraft:** Ensure good communications and the line is clear when dropping water and retardant

Situational Awareness

- Grass crop is more robust than normal which can create a greater challenge to suppression success
- Dead Fuel moistures are below average for this time of year, expect increased fire behavior at times
- Flag and make known any hazards: fire weakened trees, road conditions, and powerlines

Valley Fever

- Valley Fever is caused by a fungus that is naturally within the soil and can be inhaled without knowing it when disturbed
- Symptom onset can be delayed for 1-3 weeks after exposure, usually symptoms are respiratory, and flu like in nature
- Try and reduce the creation of dust and dust clouds and working within dust clouds as much as possible
- Read the Valley Fever Safety Message and facts within the IAP
- Notify supervisor if any illness occurs

Valley Fever

Prevention and Education

The following information is being provided by the CAL FIRE Safety Program. Share this information with the physician for any employees being treated for symptoms which could indicate Valley Fever.

Valley Fever in Firefighters

Coccidiomycosis, or “cocci” for short, is a naturally occurring fungus that when inhaled with dust particles can result in a clinical condition called Valley Fever. The fungal spores exist in several geographic locations in the United States, including much of California. Wildland firefighters in California, including several CAL FIRE employees, have experienced an increase in clinical illness from this infection leading to several hospitalizations and prolonged illness from this disease. The most common presentation of infection is a respiratory illness often resulting in diagnosis of ‘pneumonia’ based on clinical symptoms including cough, fever, night sweats severe fatigue, chest pain and joint pain typically occurring 1 to 3 weeks after exposure.

It should be noted that Valley Fever and COVID-19 share many of the same symptoms and lab tests are needed to confirm a diagnosis. Firefighters who experience symptoms of Valley Fever, especially if they test negative for COVID-19, should contact their Health Care Provider and supervisor. Firefighters should tell their Health Care Provider about their symptoms and if they worked outdoors in an area where Valley Fever is common, especially if they were digging in the soil or were in dusty areas.

Share this with Your Healthcare Provider

Due to the cumulative exposure firefighters may experience during training and fire response activities, they can be at an increased risk for Valley Fever. Wildland firefighting activities including, but not limited to, using heavy equipment, digging fire lines, mopping up, and working around helicopters in bare soil can generate dust in the air making the fungus spores airborne.

Health Care Providers are encouraged to consider diagnosis of Coccidiomycosis for personnel who have had exposure risk.

Help keep our firefighters safe by asking all patients about their work. Have a high suspicion for Valley Fever among firefighters, especially those who have worked in areas known to have high rates of Valley Fever.

Note to Treating Physician: Please strongly consider repeat blood tests if initial test is negative and Valley Fever symptoms persist. If questions arise, CAL FIRE’s Medical Consultant is available for a telephone consultation with the CAL FIRE employee and their healthcare provider.

CAL FIRE Medical Consultant can be reached at (916) 995-0678.

Valley Fever

Prevention and Education

Information for Employees and Supervisors

Valley Fever is not spread from person to person; you get Valley Fever by breathing in dust from soil that contains the fungus. The fungus in the soil is too small to see and when the soil is disturbed the fungus can get into the air and be breathed in by personnel. Use of respiratory protection, such as an N95 mask, is recommended when feasible to reduce exposure to dust.

What can increase your risk for Valley Fever?

Anyone, even healthy, young people, can develop Valley Fever. However, outdoor workers who disturb the soil in areas of California where Valley Fever is common are more likely to breathe in the fungus from dust in the air and become infected. Due to the common activities performed during fire suppression operations, firefighters are at risk of inhaling the Valley Fever fungus from dust in the air. Examples of firefighting activities that may cause exposure to the Valley Fever fungus include:

- Using heavy equipment that creates dust
- Digging of fire lines; especially using McLeod or similar tool and generating dust in air
- Mopping up
- Working frequently in a dust cloud
- Traveling in a vehicle with open windows going to or from a fire
- Operating helicopters around bare soil

What are the signs and symptoms of Valley Fever?

Approximately 6 in 10 people do not develop symptoms of Valley Fever and their bodies fight off the infection naturally. For those who do get sick, they usually have respiratory symptoms or pneumonia because the fungus tends to infect the lungs. Common symptoms that may develop include:

- Fatigue
- Cough
- Difficulty Breathing
- Fever
- Night Sweats
- Chest Pain
- Weight Loss
- Rash
- Muscle or Joint Pain

How do I know if I have Valley Fever?

Symptoms alone are not sufficient to diagnose Valley Fever. The only sure way is to seek medical care. A licensed Health Care Provider will determine if you need to have a blood sample test to look for *Coccidioides* antibodies or antigens.

There should be a low threshold for obtaining a chest X-ray in personnel complaining of respiratory symptoms. Serologic are most often used to diagnose the Valley Fever fungus¹ but may need to be repeated if initial testing is negative other methods including culture and microscopy may need to be performed if symptomatic individuals cannot be otherwise diagnosed.

CURRENT INCIDENT STATUS	
Incident Start Date: 7/13/24	Incident Start Time: 11:09 a.m.
Cause: Lightning/Natural	Acres:
Containment:	Total Personnel:

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Correctly identified news media members should not be restricted from entering locations specified within the code. However, this does not include crime scenes or private property and does not imply that the news media may interfere with incident operations while in the areas of concern. More information can be found by following the QR code.

CAL FIRE SOCIAL MEDIA POLICY

You will adhere to the CAL FIRE social media policy, Section 0691 when assigned to a CAL FIRE incident. You can find further information about the CAL FIRE social media policy following the QR code.

PHOTOGRAPHS AND VIDEOS OF THE INCIDENT

The Public Information Office would like copies of the video and pictures you safely took while not in an emergency, fire suppression activity, or overhead assignment. Upload your video and images to the Public Information Dropbox; they will be reviewed and possibly uploaded to our many Kern County and CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional, or embarrassing circumstances, which are a severe breach of ethics.

LOST AND FOUND

The Information Section will manage lost and found items for the incident at the PIO Office.

Incident Base Camp Mailing Address
