Incident Action Plan

08/11/12

0600-0600

**INCIDENT OBJECTIVES**1. Incident Name
Chihuahua 22. Date Prepared
08/10/20123. Time Prepared
20004. Operational Period
08/11/2012 0600-0600**5. Management Objectives:**

- Provide for firefighter and public safety through operational briefings, tailgate safety sessions and PIO media briefings.
- Protect the natural and cultural resources by using MIST tactics in sensitive area when appropriate.
- Keep costs commensurate with the assets at risk.

5a. Control Objectives:

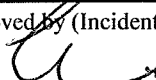

- Keep the Fire north of HWY 79.
- Keep the Fire south of Cooper Cienega Truck Trail.
- Keep the Fire east of Oak Grove Valley.
- Keep the Fire west of Puerta La Cruz Truck Trail/ Indian Flat Road.

6. Weather Forecast for Period

INCIDENT Weather Forecast

FORECAST NO: 1 NAME OF FIRE: Chihuahua 2

PREDICTION FOR: 24 SHIFT UNIT: Cal Fire

SHIFT DATE: August 11, 2012 SIGNED: Richard Thompson

TIME AND DATE Incident Meteorologist

FORECAST ISSUED: 745 PM 8/10/12

WEATHER DISCUSSION: Monsoonal moisture will continue to stream over the incident through the operational period. There will be another round of thunderstorms on and around the incident. However some morning cloud cover will likely delay the start of thunderstorm development until after 1300. Any thunderstorms that develop will likely produce measurable rainfall although the amounts will vary greatly from storm to storm.

Sunday will see the last day of monsoonal thunderstorm activity with any development expected to be more isolated. For early next week...dry conditions will prevail although temperatures will still remain above seasonal normals.

WEATHER FORECAST:

WEATHER: Partly cloudy. Chance of light showers in the morning...then a chance of thunderstorms in the afternoon and early evening.

TEMPERATURES: Highs: 94-100.
Lows: 68-74.

HUMIDITY: Min: 12-20%
Max: 60-65%

20 FT WINDS:

RIDGETOP - 0600-1600: Southeast 4-8 MPH Gust 14 MPH.
1600-0600: Northwest 5-10 MPH.

SLOPE/VALLEY - 0600-1000: Variable 3-6 MPH.
1000-2000: Upslope/upvalley 8-14 MPH Gust 20 MPH
2000-0600: Downslope/downvalley 2-4 MPH.

LAL: 3

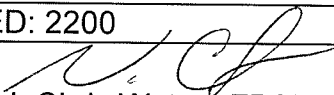

CWR: 20 Percent

OUTLOOK FOR SUNDAY (0600-0600): Partly cloudy. Slight chance of thunderstorms in the afternoon and evening. Highs: 92-98. Lows: 66-72. Min RH: 15-25%. Max RH: 60-65%. Ridgetop winds: southeast 4-8 MPH Gust 14 MPH morning and afternoon...northwest 5-10 MPH evening and overnight. Slope/Valley winds: upslope/upvalley 8-14 MPH Gust 20 MPH daytime...downslope/downvalley 3-6 MPH nighttime.

EXTENDED FORECAST MONDAY THROUGH WEDNESDAY:

Monday through Wednesday: Mostly clear. Highs 90-96. Lows 64-70. Min RH: 15-25%. Max RH: 55-65%. Ridgetop winds: Southwest 5-10 MPH Gust 15 MPH. Slope/Valley winds: upslope/upvalley 8-14 MPH Gust 20 MPH daytime...downslope/downvalley 3-6 MPH nighttime.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildfire
FIRE NAME: Chihuahua	OPERATIONAL PERIOD: 8/11/2012 0600-0600
DATE ISSUED: 8/10/2012	TIME ISSUED: 2200
UNIT: MVU – San Diego Unit	SIGNED: 
	Typed/printed: Chris Waters FBAN

INPUTS

WEATHER SUMMARY:

Expect light easterly winds in the morning hours until 1000 hrs. Westerly winds will begin as the day warms up. Today will once again be very warm with temperatures approaching 100 degrees by afternoon. The only reprieve from the heat may be afternoon thunderstorm development. Thunderstorms are expected over the fire today with erratic winds, downdrafts, and thunder showers. There will also be a small chance for lightning.

Max Temp: 97 Degrees / Minimum RH: 10% / Probability of Ignition: 60-80%

See attached spot weather forecast.

OUTPUTS

FIRE BEHAVIOR:

Morning fire behavior will primarily consist of backing fire with the occasional short flanking run as the fire backs. Afternoon fire behavior will be dependent on whether thunderstorms develop as expected. Erratic winds caused by downdrafts can be expected if thunderstorms approach the fire area. Redshank and Buckwheat fuel beds are highly susceptible to ignition, so the threat of long range spotting will continue unless there is adequate thunderstorm precipitation.

SPECIFIC:

Fuels surrounding the fire area are dominated by Redshank, Buckwheat, Chamise, and some isolated patches of grass. All of these fuels respond very quickly to changes in the weather therefore can be expected to support substantial increases in fire spread if established in adjacent fuel beds. Continue to monitor adjacent fuels for spotting activity or flare ups adjacent to control lines. Lightning is a possibility today so monitor the surrounding area for new ignitions.

AIR OPERATIONS:

Visibility is expected to be excellent most of the day. The only exception will be if thunderstorms set up over the fire. Erratic winds may hamper air operations and cloud cover will obscure visibility as storms pass.

SAFETY

Review thunderstorm safety considerations and monitor the fire area for approaching thunderstorm activity. Take weather observations hourly and communicate any sudden changes or important developments.

Chihuahua 2 Fire Safety Message

August 11, 2012

Major Hazards and Risks:

WEATHER!!!! Be aware of changing conditions and erratic winds. Review the weather forecast. Be alert for possible thunderstorm development.

Situation Awareness - Observe the 30/30 rule: If you see lightning and hear thunderclaps follow in less than 30 seconds, take the storm precautions listed in IRPG page 19.

****Do not resume work in exposed areas until 30 minutes after activity passes***

****If only isolated trees are nearby, keep your distance twice the tree height.***

Steep, Rugged Terrain Watch footing, maintain distance from other crew members.

FATIGUE, DEHYDRATION AND HEAT EXHAUSTION!!! Get plenty of rest, watch for fatigue and mitigate, and follow proper hydration procedures.

Eat properly! Many heat illnesses include nutrition issues as a contributing factor. You need to consume enough calories!

Review the Heat Exhaustion Safety Alert! Ensure crew members follow the guidelines!

Key Points:

Be careful when driving, both on the curvy highways and the truck trails.

The Ten Standard Orders are **FIRM**. There is no compromise.

Every Crew: conduct AND document your tailgate safety message.

Establish and Maintain your LCES.

Each element needs to be established AND maintained throughout the shift, if LCES is compromised, mitigate it.

LCES Topic of the Day: **S**

***Survivable without a fire shelter?
Scouted for size and hazards?***

Escape time and safety zone size requirements will change as fire behavior changes.

Watchout topic of the day: **#17**

Terrain and fuels make escape to safety zones difficult.

Are you aware of the safety zone locations. Have you planned your actions accordingly?

SAFETY ALERT

HEAT RELATED ILLNESS

HEAT RELATED ILLNESS IS PREVENTABLE!!!!

All personnel shall follow established guidelines.

Heat-induced illness is a result of the body's inability to cope with heat. This can be a minor symptom or a serious life-threatening injury. While recognition and treatment are important, prevention is the key.

Becoming acclimated to working in a hot environment takes time.

- It normally takes 4-8 days to acclimate
- Fatigue and alcohol consumption delays this process
- Persons not acclimated are at increased risk and can suffer heat-related illness at lower levels of heat and work activity

Personnel need to pre-hydrate before work and continuously hydrate during work.

- Water is the primary form of fluid replacement
- Before work, it is recommended to drink 20 ounces of sports drink
- During work drink 8 ounces of water every 15 minutes (1 Quart/hour)
- Cool / cold water is preferred
- Consider a carbohydrate / electrolyte sports drink as a portion (25%-50%) of the fluid intake

Avoid Hyponatremia

- Hyponatremia develops when the concentration of sodium is diluted in the bloodstream
- Exercise-induced hyponatremia occurs when this phenomenon is caused by excess water intake during exercise or work
- Proper nutrition and consumption of carbohydrate/electrolyte sports drinks as part of hydration will assist in avoiding hyponatremia
- Symptoms can include disorientation, headache, muscle cramps and nausea

Take Frequent Rest Breaks

- Hydrate during the rest break
- Create improvised shade, get out of the sun
- Document your rest breaks

Avoid Certain Drinks

- To help prevent dehydration, **AVOID** carbonated beverages and performance beverages such as Red Bull, Rock Star, Monster Drinks, etc.
- Caffeine hastens fluid loss in the urine.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel
- Communication Unit will clear command channel for emergency traffic as needed

CAMP EMERGENCY:
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT WITH PATIENT: YES ___ NO ___
 AGE _____
 SEX: MALE ___ FEMALE ___

**ALL EMERGENCIES---Secure the area
and identify witnesses for later
investigation. Keep an accurate log of
events.**

Prepared By (Communications Unit)

Ken Parker COML(t)

Incident Location

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the TX and 1X reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

FINANCE SECTION MESSAGE
8/11/12

PLEASE MAKE SURE HIRED EQUIPMENT SHIFT TICKETS ARE COMPLETED AND DROPPED OFF IN THE TIME UNIT BY AGENCY PERSONNEL / LINE SUPERVISORS ONLY.

PLEASE REPORT ALL INJURIES TO COMP / CLAIMS & FIRE SUPPRESSION DAMAGE, NO MATTER HOW MINOR, TO COMP CLAIMS. PLEASE INCLUDE PHOTOS AND LOCATION ALONG WITH A BRIEF DESCRIPTION

ANY OFF SITE FEEDING CHARGED TO THE INCIDENT MUST BE PRE-APPROVED BY THE LOGISTICS SECTION CHIEF AND/OR FINANCE SECTION CHIEF.

ROGER RAINES, FSC
RICH BROWNE, DEP. FSC

ATTENTION ALL TRAINEES

**If you would like to receive credit for this assignment
you must check in with the Training Specialist.**

Bring your *initiated* Position Task Book and your

Trainer's information. (name, home unit and phone number)

The Training is located in the DEMOB/TNSP trailer.

DEMOBILIZATION PLAN CHIHUAHUA FIRE CAMVU-008547

DEMOB PROCEDURES

- When your Name / Request number is posted on a Demob list, report to the Demobilization Unit.
- ***FOR STRIKE TEAMS: ONLY THE STRIKE TEAM LEADER NEEDS TO REPORT TO THE DEMOBILIZATION UNIT.***
- You must have your Order / Request number to begin the Demobilization process.
- Pickup Demobilization Checkout form (ICS-221) from the Demobilization Unit, and obtain the necessary Unit Leader sign-offs:
 - Supply Unit
 - Communications Unit
 - Ground Support/Vehicle Inspection(If Applicable)
 - Documentation Unit
 - Time Unit
 - Training Unit(If Applicable)
 - Accommodations(If Applicable)
- Return the completed Demobilization Checkout form (ICS-221) to the Demob Unit.

Your mechanical inspection appointment time will be written in the upper right corner of your printed ICS-221.

**DO NOT REPORT FOR MECHANICAL INSPECTION PRIOR TO
YOUR ASSIGNED TIME FRAME!**
