IF CONDITIONS BECOME UNREPRESENTATIVE,  
 CONTACT THE NATIONAL WEATHER SERVICE.  
 SPOT FORECAST FOR BRIDGE...CALFIRE-MMU  
 NATIONAL WEATHER SERVICE HANFORD CA  
 900 PM PDT FRI SEP 5 2014

FORECAST IS BASED ON IGNITION TIME OF 1750 PDT ON SEPTEMBER 06.  
 IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER  
 SERVICE.

.DISCUSSION...A DRY SOUTHWEST FLOW ALOFT WILL CONTINUE THROUGH  
 SATURDAY. TERRAIN DRIVEN WINDS WILL PREVAIL. SOME MOISTURE IS  
 EXPECTED TO MOVE IN FROM THE SOUTH BY SUNDAY BUT ANY SHOWERS  
 OR THUNDERSTORMS ARE EXPECTED TO REMAIN SOUTH OF THE FIRE AREA  
 AT THIS TIME.

.TONIGHT...

SKY/WEATHER.....CLEAR.  
 MIN TEMPERATURE.....61-64.  
 MAX HUMIDITY.....32-35 PERCENT.  
 EYE LEVEL WINDS.....DOWNSLOPE 1-3 MPH.  
 SURROUNDING RIDGE...SOUTHEAST 4-8 MPH.  
 MIXING HEIGHT.....LOWERING TO AROUND 700 FEET AGL.

TRANSPORT WINDS.....SOUTHEAST 9 MPH.

. SATURDAY...

SKY/WEATHER.....SUNNY.

MAX TEMPERATURE.....91-93.

MIN HUMIDITY.....18-21 PERCENT.

EYE LEVEL WINDS.....UPSLOPE 3-6 MPH. GUSTS TO AROUND 9 MPH.

SURROUNDING RIDGE...SOUTH TO SOUTHWEST 5-10 MPH. GUSTS TO 15 MPH.

MIXING HEIGHT.....RISING TO NEAR 6500 FEET AGL.

TRANSPORT WINDS.....SOUTH 15 MPH.

. SATURDAY NIGHT...

SKY/WEATHER.....CLEAR.

MIN TEMPERATURE.....60-63.

MAX HUMIDITY.....33-37 PERCENT.

EYE LEVEL WINDS.....DOWNSLOPE 2-4 MPH.

SURROUNDING RIDGE...SOUTHWEST 3-6 MPH.

MIXING HEIGHT.....LOWERING TO NEAR 600 FEET AGL.

TRANSPORT WINDS.....SOUTHWEST 8 MPH.

. SUNDAY...

SKY/WEATHER.....SUNNY.

MAX TEMPERATURE.....92-94.

MIN HUMIDITY.....15-18 PERCENT.

EYE LEVEL WINDS.....UPSLOPE 3-6 MPH.

SURROUNDING RIDGE...SOUTHWEST TO WEST 6-12 MPH WITH GUSTS TO 16 MPH.

MIXING HEIGHT.....RISING TO AROUND 7000 FEET AGL.

TRANSPORT WINDS.....SOUTHWEST 18 MPH.

FORECASTER...MOLINA

# **SAFETY MESSAGE**

INCIDENT: Bridge	DATE: 9/5/2014	TIME: 22:00
------------------	----------------	-------------

**MAJOR HAZARDS and RISKS:**

**WEATHER:** Weather will be hot and dry, stay hydrated.

**PERIMETER CONTROL:** Fuels are drier than normal for this time of year. Spotting potential is high. Watch for falling rocks, and loose footing. Dieback of California Gray Pine poses increased risk of spotting, increased fire behavior, and falling hazards.

**DRIVING:** Roadways are tight, narrow, and windy in many areas. Watch out for traffic in the fire area.

**STEEP TERRAIN:** Steep terrain makes access difficult and presents a falling and tripping hazard. Beware of rolling boulders and debris.

**Mineshafts:** Watch out for mineshafts. Flag and notify Division supervisor when found.

**Rattlesnakes:** Watch out for rattlesnakes in the area.

**NARRATIVE:**

When fire, fuels, weather and topography align, expect rapid rates of spread and high fire intensities. Know where your safety zones are and evaluate for escape time vs. rate of spread prior to engagement. Ensure all personnel in the area are aware of decision points for disengagement, escape routes and safety zones.

Follow structure protection guidelines (IRPG pg 16). Don't over commit yourself. Carefully determine defensible structures and establish decision points for disengagement. Overhead power lines are to be considered energized at all times and treated accordingly with isolation and distance. Communicate powerline hazards to adjoining resources and flag any hazardous conditions.

**BE ALERT, KEEP CALM, THINK CLEARLY, ACT DECISIVELY!** Always maintain your situational awareness. Take breaks as needed and when operationally feasible. Stay hydrated and document any and all injuries with your supervisor. Remember...if you are thirsty...you are already dehydrated.

Roadways will be heavily congested with emergency vehicles and evacuating public. Visibility will be limited at times due to smoke. Vehicle operations must be done in a safe and professional manner. All personnel must wear seat belts.

**Escape Route/Safety Zone Checklist**

**Escape Routes:**

- \*Have more than one escape route identified and communicated
- \*Scout it – soils, vegetation, slope that hinder travel
- \*Time it – slowest person, fatigue, distance
- \*Mark it – flagged for day and night use

**Safety Zones:**

- \*Survivable without a shelter
- \*Natural – clean burn, water, bare soil/rock
- \*Manmade – constructed sites, roads
- \*Scouted for size and hazards. Will everyone fit?
- \*Close enough considering escape time needed

**Lookouts**

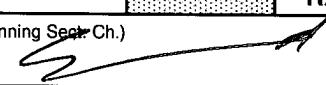

**Communications**

**Escape Routes**

**Safety Zones**

# CAL FIRE

## Madera-Mariposa-Merced Unit

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

**CAL FIRE**  
**Madera-Mariposa-Merced Unit**  
**WATER USAGE LOG**

DATE: \_\_\_\_\_

Division / Group: \_\_\_\_\_

AGENCY ID / VENDOR: \_\_\_\_\_

I.e., Strike Team 1110C, Acme Water Tenders

REQUEST # \_\_\_\_\_

**TURN INTO FINANCE DAILY**

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**\*\*Please note if you made contact with property owner and their contact.  
(Use reverse side if needed.)  
Information: \_\_\_\_\_**

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

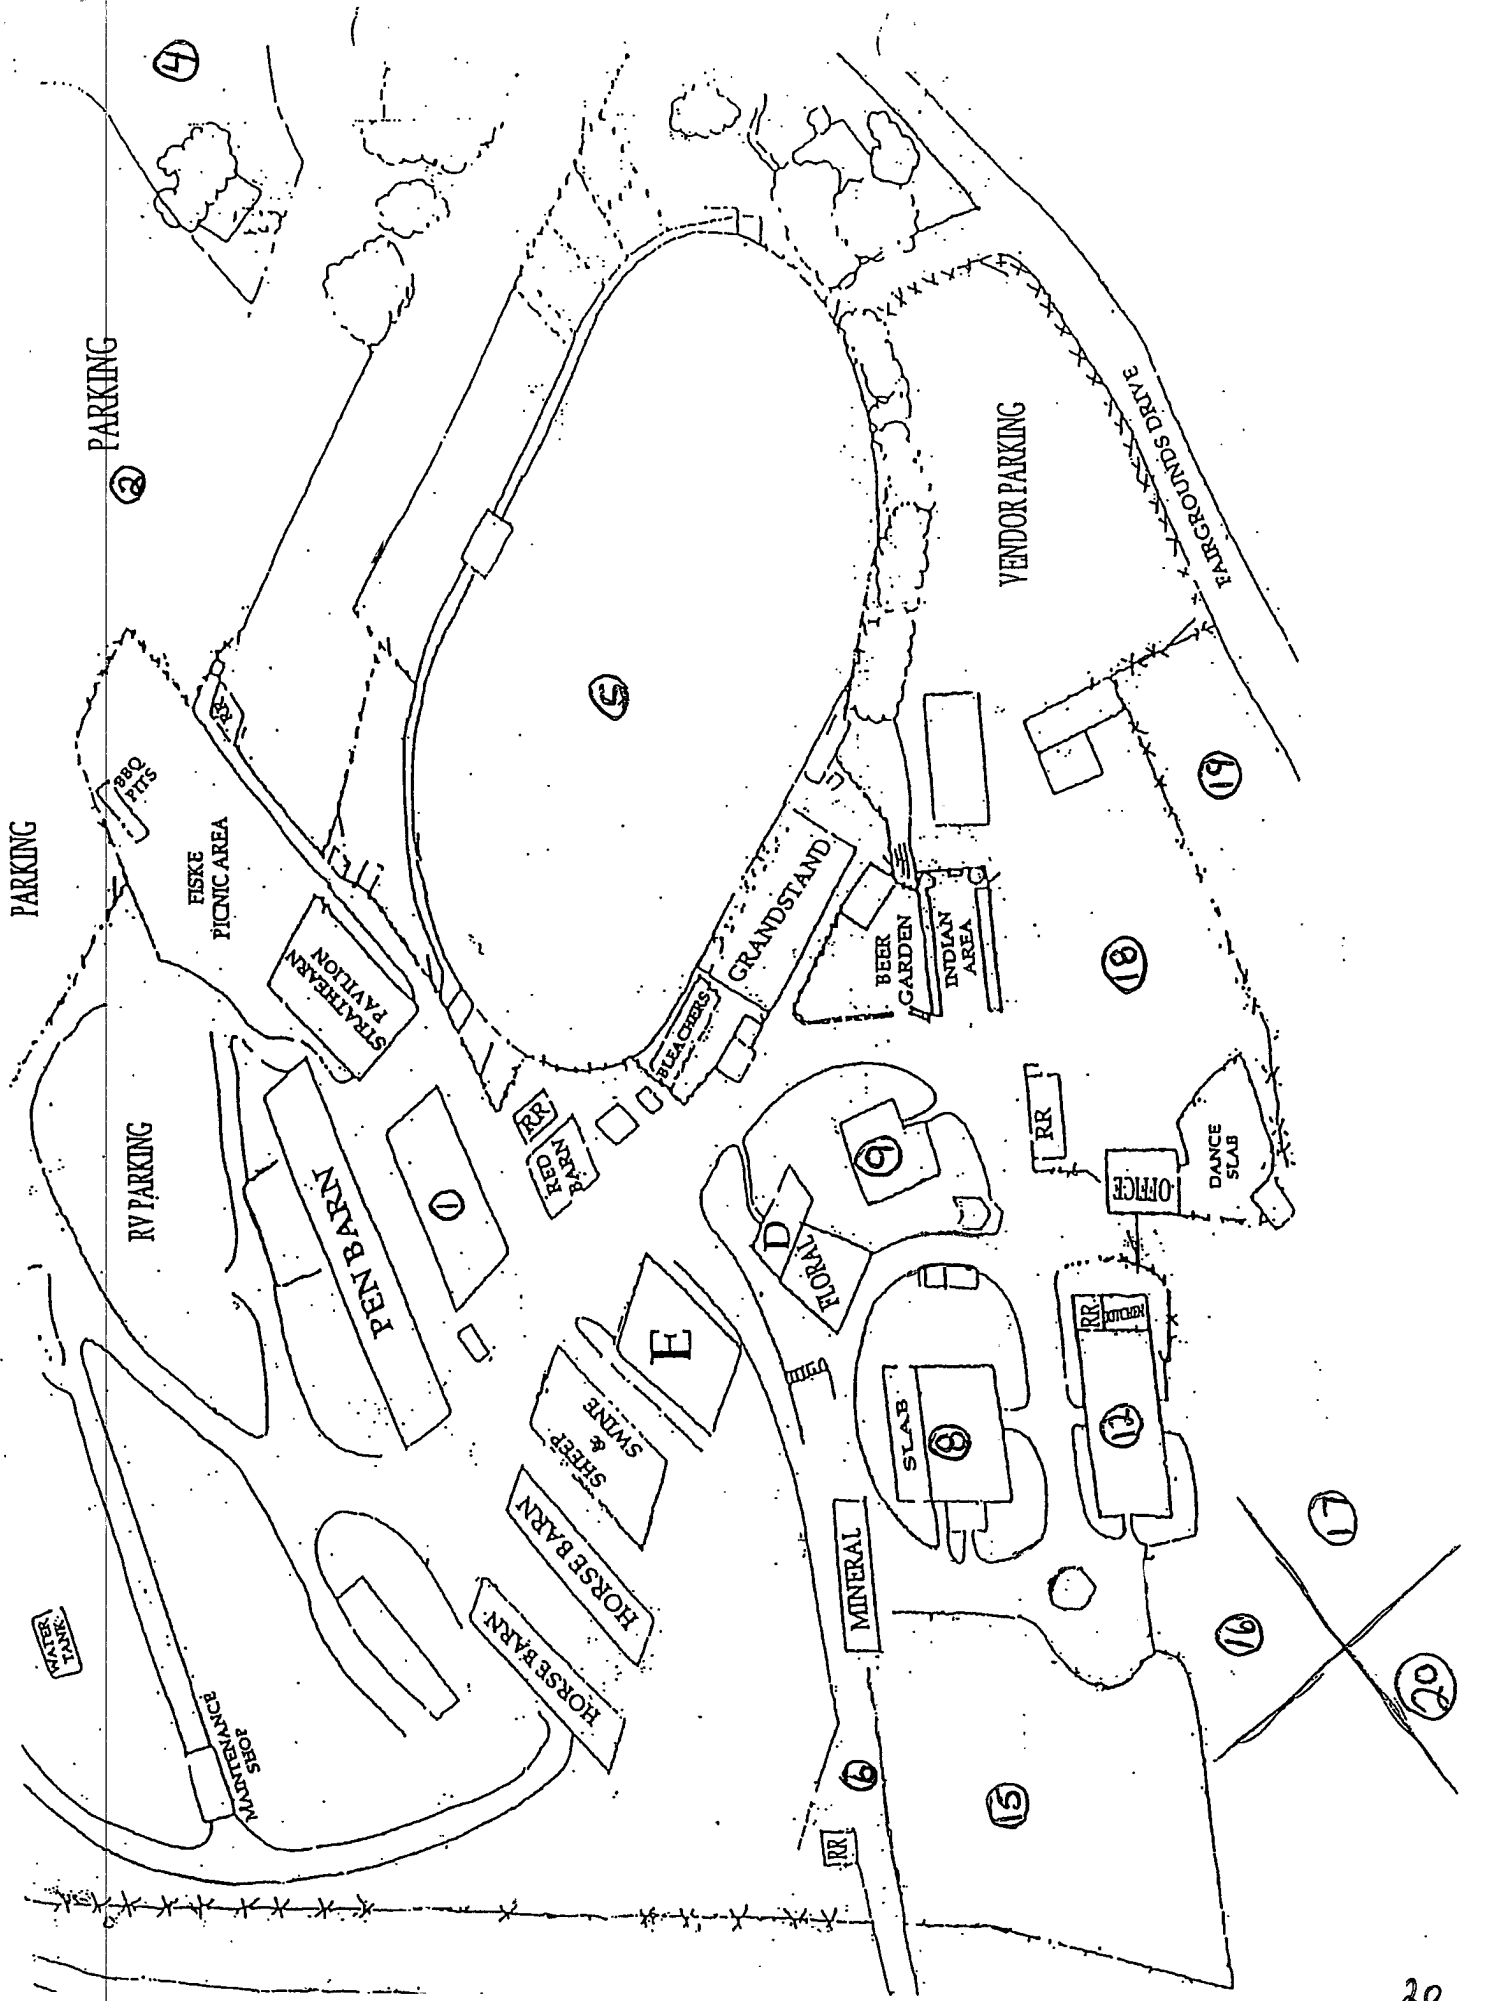

## **Archaeological and Historical Sites Fireline Guidance for the Bridge Incident**

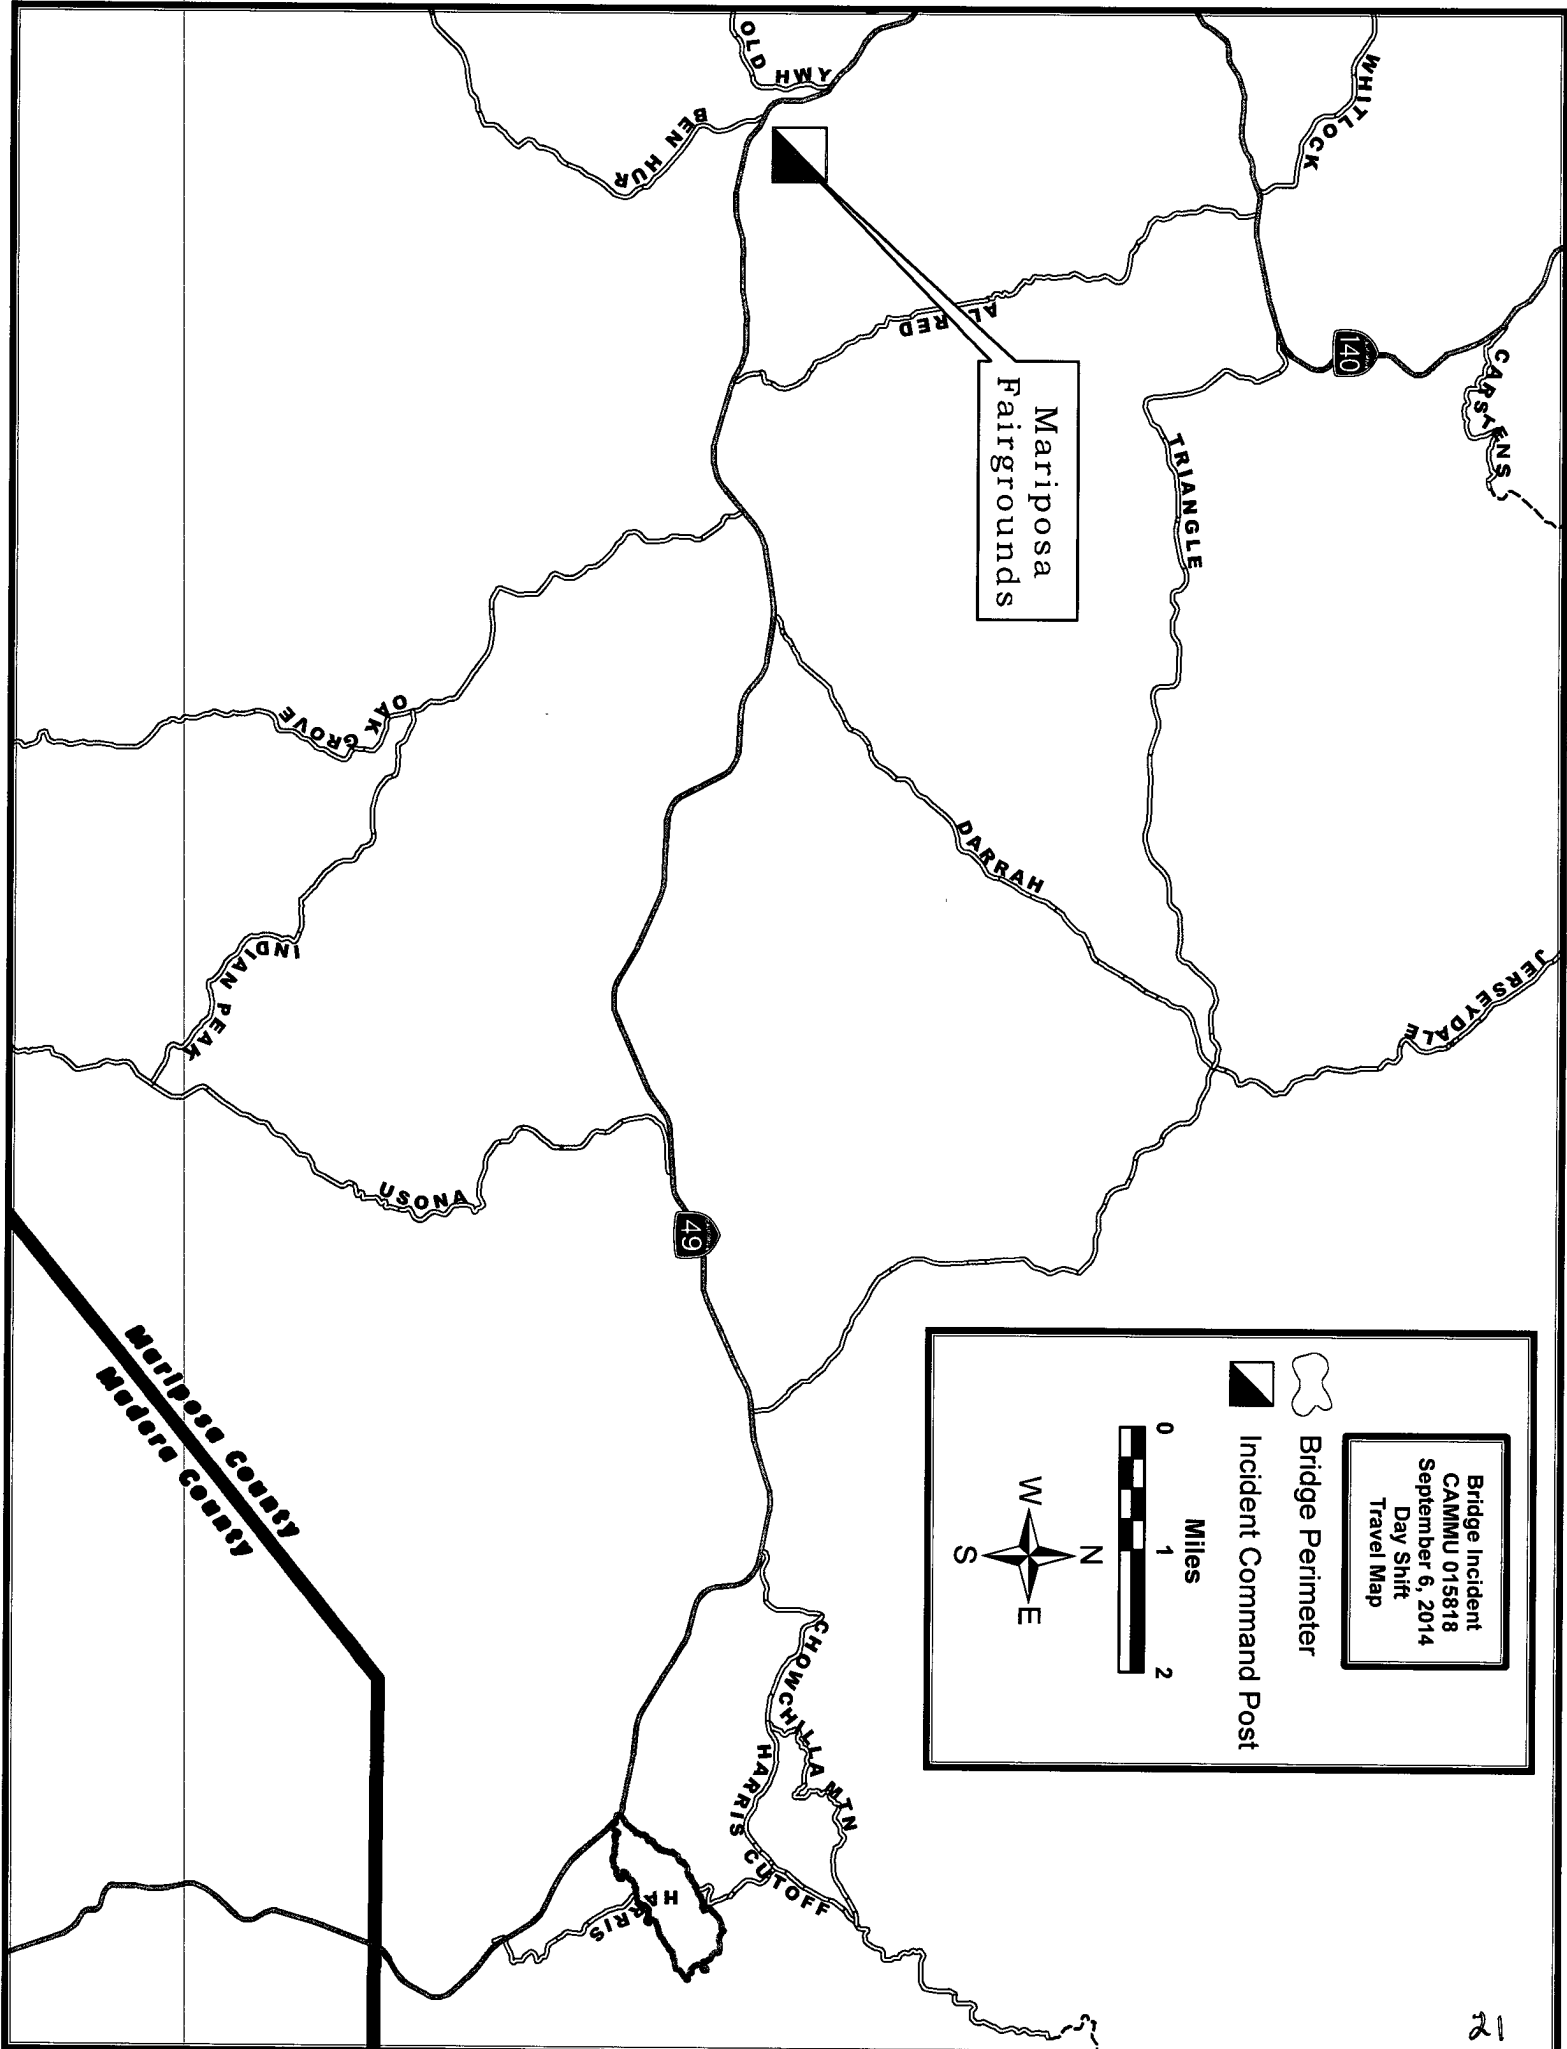

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
2. No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
