Fire weather

OPERATIONAL PERIOD

Friday, September 9th 0700

to

Saturday, September 10th 0700

INCIDENT OBJECTIVES

1. Incident Name
Soberanes Fire

2. Date Prepared
09/8/16

3. Time Prepared
1900

4. Operational Period – 09/09/2016 0700 FRI - to - 09/10/2016 0700 SAT

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire:
 - Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.
 - North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity
 - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation
 - East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.
- Assess suppression repair needs on federal lands and implement where safe and appropriate.
- Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Ensure cost containment measures are identified, applied, and documented.
- Enhance community relationships through respect, engagement, communication, and trust.
- Keep public informed of incident status

Control Objectives:

- Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.
- Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.
- Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.
- Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.
- Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis and End-state:

Communities and other values at risk are protected with a combination of direct and indirect tactics to suppress the fire. Existing or, historic fire lines are used for control purposes to minimize resource effects to wilderness. Life First Doctrinal Guidelines and Chief's Intent for 2016 and implement the right plan at the right place at the right time with the right assets for the right duration and the right reason in order are followed to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk, listen... then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

FORECAST NO: 48

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Fri - 0700 Sat.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Friday Sept 9th, 2016

SIGNED: Phil Manuel

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 1900 9/8/16

WEATHER DISCUSSION: High pressure over the incident area will result in little change in the weather. Persistent drying will continue, especially for elevations above 2000 feet where humidity recovery has not exceeded 30%. Humidity minimums for areas with active fire will continue to dip into the teens and possibly the single digits. A marine layer will be present for elevations below 2000 feet resulting in better humidity recovery at night for the lower coastal slopes, in addition to periodic cloud layer intrusions at night and early morning. Transport winds today will be out of the northeast with offshore smoke transport in the afternoon. Changes are on the way this weekend and early next week. Saturday will be another light wind day, but with increasing instability. This will favor greater smoke column growth. As we transition into next week, there is increasing confidence that a strong trough of low pressure will traverse the region, winds increasing.

WEATHER FORECAST For Friday:

WEATHER: Morning clouds along lower coastal slopes, otherwise sunny with seasonal temperatures. Dry.

TEMPERATURES: Highs 82-93 active fire area. 75 to 82 lower coastal slopes (unchanged)

HUMIDITY: 10-28% Branch VII and VIII. 12-18% Tassajara. 28 to 40% lower coastal slopes. (unchanged)

20 FT WINDS:

RIDGETOP – Northeast 4 to 8 mph with some gusts 12-15 mph in the afternoon.

Branch VII and VIII – Terrain-driven/upslope 2-5 mph gusts 8 mph, except brief Southwest 3-7 mph with gusts 10 mph at coastal ridge 1300-1700.

SLOPE/VALLEY - Upslope 3-7 mph gusts 8-12 mph late afternoon.

Marine Layer: 1500 feet with little or no impact on firelines. **Haines:** 4

WEATHER FORECAST For Friday Night:

WEATHER: Clear above 1000 feet. Clouds and fog redeveloping lower coastal slopes below 1000 feet.

TEMPERATURES: Lows 48-54 in the valleys. 58 to 66 ridges. (unchanged).

HUMIDITY: Poor Recovery 25-35%, falling to 10-20% after 0300 in Branch VII and VIII.

20 FT WINDS:

RIDGETOP – Northeast 4 to 8 mph with gusts 10 to 15 mph.

Branch VII and VIII- Northeast 8-12 mph gusts up to 20 mph.

SLOPE/VALLEY – Evening upcanyon 3-7 mph...becoming downcanyon 2-5 mph.

Marine Layer: Under 1000 feet mainly impacting Highway 1.

EXTENDED FORECAST: Moisture aloft will sneak across the area from the south Saturday. This will result in partly cloudy skies, and favor greater smoke column growth in the vertical. Temperatures will remain seasonal with highs mainly in the 80s.

Portable RAWS Frequency: 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

INPUTS

WEATHER SUMMARY (see attached forecast)

***** Morning Clouds along lower coastal slopes, otherwise sunny with seasonal temperatures. Dry*****

Temps: 82-93 active fire area. 75-82 lower coastal slopes (unchanged)

RH: 19-29% Branch VII and VIII. 12-18% Tassajara. 30-40% lower coastal slopes

20 Ft Winds: Ridges NE 4-8 G 12-15 mph, Branch VII and VIII SW 5-9 G 14 mph. Slope/Valley- Upslope 3-7G8-12

Night: Temp 48-54 valleys, 58-66 ridges, RH 25-35%, teens Branch VII. Winds ridges 4-8G15, Br VII 12-14G20.

OUTPUTS

FIRE BEHAVIOR

GENERAL

Today looks a lot like yesterday. Marine layer down low in the AM. Poor overnight RH recovery. Fuels are very dry.

Fire at the head is moving out of the area burned by the 1999 Kirk Fire and now in fuels only burned by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant and increase fire intensity.

With dry fuels, alignments in shrub fuels will continue to run upslope and upvalley, especially where aligned with ridge winds. On north slopes and stringers of heavy fuels in draws and drains, short runs upslope are possible. Fires stall at the ridges after slopping over. Be aware that these heavy fuels may prompt more rollout on steep slopes where burning actively up high.

Head fire spread rates in brush can be up to 1 mph on steepest slopes. Flanking spread across slope can be significant especially on east and west aspects today when exposed to southerlies. 10-20' flame lengths with running fire can be expected.

ERC 69 1hr 4-6% Pig 70% Spotting up to .1 mile

SPECIFIC

BRANCH III, IV

Little fire remains on the slope above the Carmel River south of the Los Padres. There is still no heat observed near Miller Mountain and above the English Cabin. Fire in the North Fork of the Big Sur drainage could continue to burn toward the ridges above Tassajara. Open fireline above Willow Creek was not active yesterday, but anticipate rollout from the slope above.

BRANCH VI

Fire above Zigzag Creek continues to find wind and slope alignments; spreading to the NE toward Willow Creek as well as up slopes and down drainage toward Lost Valley Creek. Once established on south facing slopes in Lost Valley, spread up and down valley could average ½ mile per day with terrain breezes.

Branch VII,VIII

DIV N – Now mostly burned out, primary concern for spotting across the line decreases each day. NE winds late in the day is the biggest threat.

DIV UU/SS – Most active fire coming out of Zigzag Creek could be getting established in Lost Valley Creek. Upvalley winds from the Arroyo Seco into Lost Valley Creek will be enhanced by NE winds. Look for updrainage and cross slope runs toward Higgins Creek.

AIR OPERATIONS

Marine layer under 1000 ft mainly impacting Highway 1.

SAFETY

Winds are changing direction to NE. Additions to active fireline may find unburned fuels ahead of the new wind direction. Evaluate your situation with that in mind.

Division/Group Assignment List (ICS 204 WF)

1. Incident Name:			3.			
SOBERANES			Branch:		Division/Group:	
2. Operational Period:			III		J / K	
Date/Time From: 09/09/2016 0700 FRI		Date/Time To: 09/10/2016 0700 SAT				
4. Operations Personnel

6. Control Operations/Work Assignments:						
<p>TASK: Develop structure protection plan. PURPOSE: Ensure adequate resources and an appropriate strategy is identified to protect structures. END STATE: Resource and Equipment needs are identified and MAPs that allow for successful protection of values at risk.</p> <p>TASK: Utilize available resources to implement structure protection measures. PURPOSE: Provide for protection of values of risk. END STATE: Values at risk are protected to the extent possible with available resources.</p>						
7. Special Instructions:						
<p>**Resource Identified as Night Swing. Monitor fire behavior and growth from DP 42. The Communications Plan is complex; please review the ICS 205 with all Division personnel. DIVS, TFLD, and HEQB must account for & certify all hired equipment shift tickets during the operational period. Use headlights. Slow down. Assume there is a vehicle around each corner. Division Supervisors: fire apportionment validation process will be to call Kris Armstrong at (661) 342-7297 between 0830-1100. “If you see something, say something.” Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

DIVS, TFLD, and HEQB must account for & certify all hired equipment shift tickets during the operational period. Use headlights. Slow down. Assume there is a vehicle around each corner. Division Supervisors: fire apportionment validation process will be to call Kris Armstrong at (661) 342-7297 between 0830-1100. "If you see something, say something." Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

6. Control Operations/Work Assignments:						
<p>TASK: Continue to secure Coast Ridge RD from previous firing operations. PURPOSE: Contain fire activity along control lines, protecting structures and values at risk along Highway 1. END STATE: All control lines successfully held fire with no infrastructure damage.</p>						
7. Special Instructions:						
<p>Please keep all Dozer lines out of Highway 1 viewshed. The Communications Plan is complex; please review the ICS 205 with all Division personnel. Use headlights. Slow down. Assume there is a vehicle around each corner. Look up. Be aware of hazard trees. Review and understand medical emergency evacuation plan. DIVS, TFLD and HEQB must account for & certify all hired equipment shift tickets during operational period. Once ignition begins, only critical resources will be south along North Ridge Rd in front of the ignition group. If the main fire gets established on the south facing slope and Logwood drainage, only critical resources will be in unburned areas. If fire becomes established west of the North Coast Ridge Road and cannot be contained with resources on hand, an evacuation order for Partington subdivision will be initiated. Division Supervisors: fire apportionment validation process will be to call Dave Dukart at (805) 698-2541 between 0830-1100. Utilize Ch. 12 (V-Tac 14) for traffic control on North Coast Ridge Road. "If you see something, say something." Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

6. Control Operations/Work Assignments:						
<p>TASK: Monitor fire activity in assigned area and hold lines burned by day shift. PURPOSE: To ensure adequate resources are allocated to protect values at risk. END STATE: Changes in fire location and potential are identified and communicated.</p>						
7. Special Instructions:						
<p>Please keep all dozer lines out of Highway 1 viewshed. Use headlights. Slow down. Assume there is a vehicle around each corner. LOOK UP, be aware of hazard trees. Firing Plans: Ensure all line personnel in the division are notified and that the GO No GO checklist is utilized. The Communications Plan is complex. Please review the ICS 205 with all Division personnel. DIVS, TFLD, and HEQB must account for & certify all hired equipment shift tickets during the operational period. Please follow medical plan for medical emergencies. H-407 is available for night hoist operations. At 0001 hrs. all Divisions will contact Branch for any Branch needs. Division Supervisors: fire apportionment validation process will be to call Dave Dukart 805-698-2541 between 0830-1100. Utilize Ch. 12 (V-Tac 14) for traffic control on North Coast Ridge Road. Safety officers to contact SOF2 Greiling at 907-631-8506 and Commo in case of emergency. “If you see something, say something.” Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

Prepared By (Communications Unit)				Incident Location					
Lindsey Lien COML				5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

HEALTH AND SAFETY MESSAGE

SAFETY is a CORE VALUE

INCIDENT: Soberances Fire

DATE: Friday, Sept. 9, 2016 TIME: Day Operations

YOUR PERSONAL HEALTH AND SAFETY is our highest priority (see incident objectives)

ATTITUDE/Complacency; DRIVING; Remember to turn on headlights as soon as the vehicle is placed in drive.

Fire Order of the Day –Be alert, keep calm, think clearly, act decisively
"We are committed to Zero Tolerance of carelessness and unsafe actions."

Narrative:

ATTITUDE/Complacency- affects our judgement and how we respond to hazards on the fireline such as snags, rolling rocks or even driving. We get used to a particular Division and think it will be the same as yesterday, but sometimes it's not the same. Yesterday's green tree may have burned out from a burnout operation and a slight breeze will send it down. THERE is still plenty of FIRE OUT THERE.

Serious accidents are preceded by 100,000 to 250,000 unsafe behaviors/acts! – actions that are most deadly are "High Risk - Low Frequency," those are dangerous tasks we don't do often (sound familiar).

COMMON DEMONINATOR of a TRAGEDY = they didn't think it would happen to them; the specter of COMPALCENCY says to you: "Hey this is no problem, nothing is happening here, it's just a holding action, or mopup, you've done it this way 250,000 times before, and it's so much easier." YOU ARE SETTING YOURSELF UP.

Now (not during an accident review) is the time to review what you are doing, and how you are doing it. Ask yourself (& others):

*** What am I doing? Am I involved with high risk/low frequency events (not done often)?
Have I done a LOOK UP-LOOK DOWN- LOOK AROUND? What is predictable here? How is it preventable??
Have I done a SAFETY work assessment of where I'm working??

*** Have I identified hazards and unsafe behaviors?
What have I done to mitigate or eliminate them?

*** Have I reviewed the Fire Orders?
Have I identified WATCH OUT situations?
Have I told others what and where they are, and how to avoid or eliminate them?

IF IT'S PREDICTABLE - IT'S PREVENTABLE

Watch Out Situation of the Day

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Escape Route/Safety Zone Checklist (Review in the IRPG)

Escape Routes:

- *More than one escape route
- *Avoid steep uphill escape routes
- *Scouted – soils, vegetation, slope
- *Timed – slowest person, fatigue, dozer speed
- *Marked – flagged for day and **night** use
- *Vehicles properly parked for escape

Safety Zones:

- *Survivable without a shelter
- *Natural – clean burn, water, bare soil/rock
- *Manmade – constructed sites, roads
- *Scouted for size and hazards (Review size requirements)
- *Close enough considering escape time needed

Remember and Follow:

- *The 10 Standard Fire Orders
- *The 18 Situations That Shout Watch Out
- *The Common Denominators of Fire Behavior on Tragedy Fires
- *The Downhill Line Construction Guidelines

Incident Safety Officers: Alaska IMT1 Safety Team

Training Message

We're setting up at Molera!

Training and Human Resources are establishing a joint shop at Molera Camp.

Open Saturday 9/10 @ 0700.

Molera Training/Human Resources:

Shawn Holden Cell(916)215-8325

Office(831)626-3149

Forms, Training check-in or check out and support are all available at both Toro and Molera.

Toro Training Tracy Stelman (209)283-4562

9/9/16

SOCIAL MEDIA AND PHOTOGRAPHY

We know that firefighters are using personal cell phones and cameras to shoot photographs and video on the job.

Information likes getting your photos to share on Inciweb and Facebook. But we urge personnel not to let photography become a distraction that could jeopardize firefighter safety.

We also know that some information and photos will wind up being posted on personal social media accounts.

Your very survival as a firefighter depends on your intense focus on your work. Activities that distract from your situational awareness threaten the safety of those directly involved and also of those around them. No photo is worth an accident.

The firefighting community has a close bond; we are asking each person to consider this relationship and be mindful of risks and safety for all involved.

Firefighters should be careful posting work-related information or activities on their personal social media accounts or websites. It reflects the professionalism of their crew, their agency, and the wildland firefighting community. Be professional and mindful of what you post.

Thanks,
Your PIO's

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport: [Click here to enter text.](#)

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.
