INCIDENT OBJECTIVES	1. Incident Name Soberanes	2. Date 09/14/2016	3. Time 2200
4. Operational Period DAY / NIGHT September 15-16, 2016 0700 - 0700 Hours			
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations. • Reduce firefighter exposure by only engaging fire assignments with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests. • Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations. • Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information. • Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy. • Manage incident costs effectively for the values at risk through regular and ongoing cost analysis. Control Objectives Keep Fire <ul style="list-style-type: none"> • East of the Coast Ridge Road. • North of Nacimiento-Fergusson Road. • West of Carmel Valley and Reliz Canyon. • South of current containment lines in Branches I, II and IX. 			
6. Weather Forecast for Operational Period <ul style="list-style-type: none"> • Weather continues to warm and dry as high pressure builds over the area. • Temperatures are forecast to warm well above normal this week. 			
7. General Safety Message <ul style="list-style-type: none"> • Reduce firefighter exposure by only engaging fires with the highest probability of success. • The long term drought in California has produced the potential for extreme fire behavior. The need for maintaining the most current situational awareness is paramount. Expect the unexpected fire behavior!

Soberanes Fire Weather Forecast East Operational Area

Forecast Info

FORECAST NO: 54

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Thu. - 0700 Fri.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Thursday Sept 15th, 2016

SIGNED: Jon Bonk / Phil Manuel
Incident Meteorologists

TIME AND DATE

FORECAST ISSUED: 2000 hrs. 9/14/16

Jon's Cell (Hunter-Liggett): (240)778-5287
Phil's Cell (Toro): (240) 499-6636

**** *Becoming Hot and Very Dry* ****

WEATHER DISCUSSION: High pressure builds over the region bringing another round of hot and very dry weather. Mid and lower slope winds will continue to be strongly terrain driven over the next few days. Ridge winds will primarily come from north/northeast the next couple days with occasional bouts of northwest winds possible from onshore influences.

WEATHER FORECAST For Today:

WEATHER: Sunny.

TEMPERATURES: Highs 85-92 active fire area. (10-15 degrees warmer)

HUMIDITY: 14-23%. (down 4-8%)

20 FT WINDS:

RIDGETOP / UPPER SLOPE – North 5-10 mph becoming northeast with gusts to 15 mph in the afternoon.

LOWER SLOPE / VALLEY – Upslope/upvalley 4-8 mph. Gusts to 15 mph in the afternoon.

Marine Layer: Less than 1000 feet...little impact.

Haines: 4

WEATHER FORECAST For Tonight:

WEATHER: Clear.

TEMPERATURES: Lows 44-48 in the valleys. 52-58 ridges. (3-6 degrees warmer).

HUMIDITY: Valley bottoms: Max 55-60%. Ridges/Thermal belt: Peaking 40-45% late evening then falling to 28-34% by sunrise.

20 FT WINDS:

RIDGETOP – Northeast 8-11 mph with gusts 15 to 18 mph slowly favoring north overnight.

SLOPE/VALLEY – Down canyon 3-6 mph.

Marine Layer: Less than 1000 feet...little impact. **Thermal Belt:** Around 3500 feet

EXTENDED FORECAST: Hot and very dry through the weekend. Slope/Valley winds will be mainly terrain driven. Ridgetop winds will be primarily out of the North/Northeast, with brief wind shifts from the west at times due to battling onshore winds from the coast. Highs 85 to 90 Friday and upcoming weekend with eastern spike camps getting close to 100. Humidity in the single digits at the hottest locations.

Portable RAWS Frequency: 163.350 - DTMF tones: 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chews Ridge, 0039 Tassajara, 0031 Benchmark, and 0037 Coastal Ridge.

INPUTS						
WEATHER (see attached forecast)						
*** Wind Summary ***						
DAY: RIDGETOP: 0600 N 5-10mph G15		SLOPE/VALLEY: 0600-0900 Down-valley 2-5mph.....				
		0900-1800 Upslope/Up-valley 4-8mph G12-15				
NIGHT: RIDGETOP: 1800 NE 8-11mph G15-18		SLOPE/VALLEY: 1800-0600 Down-canyon 3-6mph				
OUTPUTS						
FIRE BEHAVIOR						
GENERAL						
<u>LOCAL THRESHOLDS – WATCH OUTS</u>						
Combinations of any of these threshold factors can greatly increase fire behavior:						
Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%	
Forecasted	Ridges	7-10mph	18-23%	85°	5-8%	
	Valleys	4-8mph	14-21%	92°	5-6%	
Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.						
Probability of ignition : Day: Shaded 50-70% Unshaded 70-90%						
Night: 40-60%						
SPECIFIC						
<u>BRANCH III, IV, VI</u>						
A general wind direction of Northeast will be favorable for operations. With the increase in temperature and the corresponding decrease in humidity expect the fire conditions to change accordingly. Due to the lighter general winds look for the local terrain influences to affect wind directions as the day heats up. By midday the upslope winds will out compete the ridge top winds. The local threshold for 10hr fuel moisture will be met by early afternoon and will readily burn.						
Look for the fire behavior to stabilize and diminish around 1900 as the humidity increases. This will last for a few hours. The humidity will slowly fall from 2200 through the early morning hours. Fire activity will gradually increase in and above the thermal belt 3500ft.						
AIR OPERATIONS						
A very shallow inversion may occur but should have little effect on air operations. VFR conditions expected through the remainder of the days operational period.						
SAFETY						
The complexity of operations should make us recall the basics. Standard Order Number 3 is emphasized today: Base all actions on current and expected behavior of the fire. Base all of your actions, not just some of them, on fire behavior while you're in the fire environment.						

Soberanes Fire Weather Forecast West Operational Area

FORECAST NO: 54

NAME OF FIRE: Soberanes

Forecast Info

PREDICTION FOR: 0700 Thu - 0700 Fri

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Thursday Sept 15th, 2016

SIGNED: Jason Clapp

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 1930 9/14/16

Jason Clapp – Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION:

***** Continued Warming and Drying *****

Upper ridge building over area will allow marine layer to re-establish near the coast around 1000 ft, but should not impact the coast. Expect northeasterly winds again continuing into mid-morning, giving way to breezy westerly winds in the afternoon along coastal ridge. Upper ridge will continue to warm and dry through the weekend.

WEATHER FORECAST For Thursday:

WEATHER: Shallow marine layer to about 1000ft this morning, staying west of coast. Northeast to East winds overnight into this morning will help dry airmass over burn area by sunrise.

TEMPERATURES: Highs 77-81 active fire area. (Up 8-13 degrees)

HUMIDITY: 20-25% (Down 10-15%). Lowest late morning/early afternoon.

20 FT WINDS:

RIDGETOP – NE/E 10-12, gusting 15-18 mph...after 1200 shift SW-W 6-10 mph, gusting 15 mph on coastal ridge. DIV PP may remain E-S in afternoon as coastal winds battle interior winds.

SLOPE/VALLEY – Downvalley 2-5 mph through 0900, then upvalley/upslope 3-7 mph. Gusts 9-12 mph in the afternoon.

Marine Layer Top: 1000 feet Above Sea Level. **Haines:** 4

WEATHER FORECAST For Thursday Night:

WEATHER: Clear, except for clouds on lower coastal slopes. Remaining breezy along ridges.

TEMPERATURES: Lows 58-62 in the valleys. 64-68 ridges. (Up 5-10 degrees).

HUMIDITY: Lowering overnight 30-35% in Higgins drainage...Dipping to 20% toward Friday morning over ridges w/ easterly winds.

20 FT WINDS:

RIDGETOP – Becoming Northeast/East 5-8 mph after 1800. Gusts 10-15 mph around midnight.

SLOPE/VALLEY – Downcanyon 3-6 mph.

Marine Layer: 1000 feet mainly impacting Highway 1.

EXTENDED FORECAST: A warming trend through the weekend with marine layer on lower to midslope. Highs 79-83 Friday and 84-88 over the weekend. Slope/Valley winds will be mainly terrain driven. Ridgetop winds will be more variable with diurnal onshore/offshore flow.

Portable RAWS Frequency: 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

OUTPUTS																			
FIRE BEHAVIOR																			
GENERAL:																			
Local Thresholds- Watch Outs																			
Combinations of any of these threshold factors may greatly increase fire behavior.																			
<table border="1" style="width:100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: center;">Thresholds:</th> <th style="text-align: center;">20' wind Over 7mph</th> <th style="text-align: center;">RH Less Than 17%</th> <th style="text-align: center;">Temperatures Over 98°</th> <th style="text-align: center;">10hr fuel Less than 6%</th> </tr> </thead> <tbody> <tr> <td rowspan="2" style="text-align: center;">Forecast</td> <td style="text-align: center;">Ridges</td> <td style="text-align: center;">6-10mph</td> <td style="text-align: center;">20-25%</td> <td style="text-align: center;">73-78°</td> <td style="text-align: center;">4-6%</td> </tr> <tr> <td style="text-align: center;">Valleys</td> <td style="text-align: center;">3-7mph</td> <td style="text-align: center;">15-20%</td> <td style="text-align: center;">75-83°</td> <td style="text-align: center;">2-5%</td> </tr> </tbody> </table>			Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%	Forecast	Ridges	6-10mph	20-25%	73-78°	4-6%	Valleys	3-7mph	15-20%	75-83°	2-5%
Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%														
Forecast	Ridges	6-10mph	20-25%	73-78°	4-6%														
	Valleys	3-7mph	15-20%	75-83°	2-5%														
Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages.																			
Abundant standing and down dead fuels remain from the 1999 Kirk and 2008 Basin fires. These heavy fuels can hold heat for days and under the right conditions initiate fire spread.																			
Probability of Ignition: Day: 60-70%, Night: 50-60%																			
NFDRS Indices: Yesterday Hastings ERC 58, Arroyo Seco BI 70																			
SPECIFIC:																			
Branch VI, VII and VIII: Heat in the Arroyo Seco and Higgins Creek area could become active today. Keep an eye on these areas.																			
AIR OPERATIONS:																			
Marine layer 1,000 feet ASL. Otherwise good visibility.																			
SAFETY:																			
Complacency is a real concern, as we have had little fire activity and cooler temperatures. Keep on your toes things are about to change back to hotter and dryer conditions.																			

“A computer once beat him at a game of chess, but it was no match for him at kick boxing.”

Provide Tactical Aerial Support

Bucket support requested by Ops, Branch, Division or Air Attack

Type 2 or Type 3 Helicopter as requested

Type 2 or Type 3 Helicopter as requested

Request through ICP Communications & MEDL on Command Repeater. Give location: lat/long if known. Check Medical plan/IAP.

As requested/7AC IR mapping.

Request through Air Attack via Initial Air/Ground. Give location and ground contact.

Coordinate operations with OPS and Firing Module

Aircraft to be available for IA within TFR. IA missions within TFR are requested thru OPS or Air Attack. Notify LP Dispatch

Will be requested through LP Dispatch.

Safety Message

INCIDENT: SOBERANES

DATE: 09/15/16

TIME: 0700 - 0700

FIRELINE QUESTIONS TO EMPHASIZE SAFETY

TEN QUESTIONS EVERY FIREFIGHTER MUST ASK AND ANSWER YES TO BEFORE ENGAGING IN FIRE SUPPRESSION

1. Do you understand the organization for this fire and your place in it?
2. Is there a plan and do you understand it?
3. Do you know it is OK to ask questions and ensure that the instructions you are given, provide for your safety and the safety of your fellow fire fighters?
4. Do you know the weather forecast for today?
5. Have you assessed fire behavior and made a prediction?
6. Are you interactive with the *Standard Fire Orders* and *Watch Out Situations*?
7. Do you have the Lookouts, Communications, Escape Routes, and *Safety Zones* in place?
8. Do you understand that it's both your responsibility and your right to say No to orders that cannot be accomplished without compromising one or more of the *Standard Fire Orders* or without mitigating each of the *Watch Out Situations*?
9. Can you describe the fire environment you are going to operate in?
10. Are you prepared to engage; monitor the fire environment, be proactive, and make adjustments?

BACK TO THE BASICS: Size-Up; when does it start and when does it end? On our way to this fire we were sizing-up the weather, fuels, topography and the condition of our crew. Now that we have several shifts under our belts, are we still doing this? If not, we should be! Size-up is a continual and ongoing process that should last us through the incident and safely back home.

CIRCLE OF SAFETY:

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid level
- Keep windows, mirrors, and lights clean to better see and be seen
- Check headlights, turn signals, tail lights, reflectors and running lights.
- Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter

SNAGS AND HAZARD TREES:

All trees, especially large trees are potentially dangerous.

- Trees don't tell when they are going to fall, they just do. Be heads up!
- Minimize your exposure time and resources around hazard tree.
- How many times do we have a conversation under large trees?

DEHYDRATION:

If you're thirsty, you've waited too long to drink water. You need to drink a minimum of 32 ounces of water per hour during the day shift.

FACT:

- If you lose 3 % of your hydration, you will lose 20% of your energy.
- If you lose 5% of your hydration, you lose 50% and you will need to visit medical.

HYDRATE! HYDRATE! HYDRATE!

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads. • Local traffic on Highway 1 & Carmel Valley roads during shift changes. • Watch out for wildlife on all roads, especially during dawn and dusk hours. • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, rocks and debris on the roadway. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, were not in a hurry. • Know that the flagging on the side of Coast Ridge road indicates a false berm created by dozer operations, stay to the inside of the roadway.
ALL	HAND AND AERIAL FIRING OPERATIONS	<ul style="list-style-type: none"> • Develop a plan and ensure all personnel understand it. • Follow the chain of command in implementing the firing operation. • Know who you are working for and what your job is. • Post lookouts and make sure communications exist. • Make sure all personal know their escape routes and safety zones. • Ensure accountability for all line personnel. • Remember there is "Unburned fuel between you and the fire." • Hazards: Heli-torch, drip torch fuel, firing devices and projectiles.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 3 different groups, ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and through briefing.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	FIRE BEHAVIOR AND WEATHER	<ul style="list-style-type: none"> • The weather is becoming hotter and drier. • Beware of increased active fire behavior. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.
ALL	POISON OAK	<ul style="list-style-type: none"> • Identify employees who are highly receptive to poison oak and minimize their exposure. • Clean clothing that has been exposed to poison oak. • Check in with medical for treatment when exposed. • Ensure all personnel can identify Poison Oak in work and camp areas.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings.
ALL	FATIGUE & COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Get adequate rest, follow the 2:1 work/rest guidelines. • Monitor ALL resources for level of fatigue. • Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident. • Maintain good hydration and a healthy food intake.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use a spotter when backing. • When in timber increase distance to 2.5 times the height of the trees.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

- Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.
 Division Supervisor/Operations contacts Communication:
- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
 - Division Supervisor/Operations will run medical emergency on command channel
 - Communications will contact the Medical Unit Leader on Command channel.
 - Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

- Contact Communications with patient complaint/condition and location, via LOGs Net
- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
 - Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	<i>Ground or Air Ambulance to Hosp.</i>	<i>Transport to Med Unit</i>
<i>Mechanism</i>	<i>Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area</i>	<i>Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns</i>
<i>Area Injured</i>	<i>Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint</i>	<i>Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee</i>
<i>Symptoms</i>	<i>Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating</i>	<i>Alert and oriented No shortness of breath Good pulses</i>

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

IIBMHB 2016 - PERSONNEL CHAPTER 10

Meal Periods (Actual Hours Worked Employees)

Compensable meal periods are the exception, not the rule (5 CFR 551.411 (c) 36 and 29 CFR 785.19 (a))

Personnel assigned to the fireline may be compensated for their meal period if all of the following conditions are met:

- The fire is not controlled, **and**
- The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, **and**
- The compensable meal break is approved by the supervisor at the next level and it is documented in remarks on the CTR, SF-261.

In those situations where all other incident support personnel cannot be relieved from performing work and must remain at a post of duty, a meal period may be recorded as time worked for which compensation shall be allowed and documented in remarks block on the CTR, SF-261.

For personnel in support positions, and fireline personnel after control of the fire, a meal period of at least 30 minutes must be ordered and taken for each work shift (e.g., a minimum 30 minute break for shifts of 8 hours or more). All meal periods unless justified in remarks must be shown as a 30 minute break.

Local Government responding under CFAA follow their department policy and guidelines regarding hours and meal breaks.

On-Shift Time

On-shift time includes a combination of actual work, ordered standby, and compensable travel. On-shift time has a specific start and ending time and is recorded as clock hours. Each resource is responsible for ensuring they are meeting their 2/1 Work Rest Ratio and/or getting approval in advance from their supervisor and completing a Work Rest/Mitigation form to be approved by IC.

If you have any questions for Finance please call:

Human Resource Message

TEAMWORK

There are times in life when we are faced with adversity and we don't know what to do. Sometimes all you need is that extra hand to get you through that adversity. Most times all you have to do is look to your left or right, and notice that you have a team member that's willing to give you the extra hand you need to help you get through your situation. Take advantage of the offer for that hand, or ask for that hand, after all, teamwork is what will get you through.

**When you wake in the morning,
think positivity into your life,
it will help you get through the day.**

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

EXPECTATIONS

Welcome to this Incident.
Thank You for your Cooperation & Support!

August 2015

CONDUCT AND BEHAVIOR

This team is committed to “**ZERO TOLERANCE**” of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are **NOT allowed** within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Training

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 **Training Expectations – See back page.**

Evaluations

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

Injuries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be reviewed and signed by the next level supervisor. A finance “Rules of Engagement” document will be provided in the IAP explaining further requirements.

Social Media

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident’s professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.

ROCKY W. OPLIGER

Incident Commander

SCOTT VAIL

Deputy Incident Commander

THANK YOU FOR YOUR COOPERATION AND GOOD WORK!!

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4 TRAINING EXPECTATIONS

1. Upon arrival at the incident and after check-in, the trainee will bring the following documents to the initial meeting with the training specialist:
 - a. A properly initiated Position Task Book.
 - b. Your Request Number and your Agency (3) letter identifier.
 - c. Your agencies Fire Chief or Training Officers name, address, and phone number to insure that a copy of the training documents will be mailed back to your home unit.
 - d. Your current Incident Qualification Card (red card) that identifies you as a Trainee in the position you are seeking to be trained.
2. Have you identified or has a Trainer been assigned to you and if so, have the Trainer present when you meet with the training specialist.
3. At closeout and prior to entering the demobilization process, you should complete, sign, and review with the trainer the Final exit interview form. Once the form is complete, bring the following documents to the Training Specialist for closeout;
 - a. Position Taskbook (Evaluation Record dated and signed by the Trainer).
 - b. Completed ICS 225 (Personal Evaluation Record) dated and signed by both the trainee and trainer.
 - c. Completed Final Exit Interview Form – dated and signed by both the trainee and the trainer.

Trainer Expectations

1. Arrive with the Trainee at the initial meeting with the Training Specialist.
2. Be ready to provide your Contact information and your Incident Request number.
3. Have a Current Incident Qualifications Card (Red Card) in a position of equal or greater qualifications that the Trainee is trying to achieve.
4. Be willing to educate, support, and provide professional and consistent feed back to the trainee during the assignment.
5. Throughout the incident the trainer shall continue to monitor and review with the trainee their tasks and goals within the taskbook.
6. The trainer, where appropriate is expected to sign off task's that are achieved by the trainee and to complete and sign the following documents.
 - a. ICS 225 (Personal Evaluation Form)
 - b. Evaluation Record at the back of the taskbook.
7. The trainer shall portray a positive and professional attitude that lets the trainee know that it is desirable to ask for direction and feedback.
8. When accepting the role as a trainer, you are expected to act in a professional manner that represents the California Interagency Incident Management Team 4 and your home agency.
