Soberanes Fire Weather Forecast

Forecast Information & SPOT Forecasts

FORECAST NO: 78

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sun - 0700 Mon
SHIFT DATE: Sunday, October 9, 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Jason Clapp

TIME AND DATE

FORECAST ISSUED: 1900 Saturday 10/8/16

Incident Meteorologists

Shawn Weagle (Rana Camp) – 503-956-7504

Jason Clapp (Toro ICP) – 530-383-4839

***** Onshore flow returning...but one more day of very warm and dry weather today *****
***** Southwest winds expected to become gusty by early this afternoon *****

Weather Discussion: Cooler weather is expected along the coast today, but little change is expected inland or on coastal ridges above the very shallow marine layer. Poor to no humidity recovery again last night, single-digit RH values are expected again across much of the fire today. Inland areas will see the cooling trend begin in earnest Monday, as the marine layer slowly deepens and onshore flow persists. Temperature and humidity are expected to return closer to October averages by midweek.

WEATHER FORECAST for Today (Sunday):

| | Ridgetops / Upper Slope | Valleys / Lower Slopes |
|--------------------|---|--|
| Weather | Mostly Sunny (High Clouds) | Mostly Sunny (High Clouds). Much cooler immediate coast only. |
| Highs | 76 – 84° (down 1-3°) | Inland: 84 – 92° (down 1-3°) Coast: 65 – 75° (down 8-15°) |
| Min RH | 6 – 12% (little change) | Inland: 6 – 10% (little change) Coast: 45 – 65% (up 20-40%) |
| 20 ft Winds | E-SE 3-7 mph in the morning, shifting SW 10-15 mph around 1100. Afternoon gusts to 25 mph... possibly 30 mph on coastal ridges. | Upslope 2-6 mph, becoming SW 5-10 mph with gusts to 20 mph in the afternoon. |
| | Coastal/Molera – Offshore/down-canyon 3-7 mph in the morning, becoming S-SW 4-8 mph with gusts to 15 mph in the afternoon. | |

Marine Layer: 500 to 1000 MSL.

Haines: 5

WEATHER FORECAST for Tonight: Mainly clear; remaining very dry with no RH recovery expected above thermal belts. Patchy fog developing along immediate coastline. RH 7-15% above thermal belts. Valley RH recoveries to 25-40%; much higher along coast. Winds SW 6-12 mph with gusts to 22 mph, becoming down-drainage 2-5 mph by 2000 below midslope. Lows in the upper 40s and 50s, except 60-65 above thermal belts.

OUTLOOK for Monday:

| | | |
|--------------------|---|---|
| Weather | Mostly Sunny and a little cooler inland. Patchy fog along the immediate coastline. | |
| Temps | <i>Highs:</i> 60s coast, 70s ridges, 80s inland | <i>Lows:</i> 45-55° |
| RH | <i>Min:</i> 12-20%, except 35-55% coast. | <i>Max:</i> 35-55%, except 70% or higher coast. |
| 20 ft Winds | E-SE 2-5 mph early, becoming SW 6-12 mph with gusts to 20 mph in the afternoon. | |
| | Coastal/Molera – Offshore/down-canyon 3-7 mph through mid-morning, then becoming W-NW 5-10 mph with afternoon gusts to 20 mph. | |

EXTENDED OUTLOOK (starting Tuesday): Steady cooling trend will continue through midweek, with gradual humidity increases. Winds will become more onshore as the Pacific jet stream slowly aims farther south toward California. There is a slight chance of rain as early as Thursday, with better chances developing next weekend. Details remain highly uncertain, so stay tuned.

FIRE BEHAVIOR FORECAST

| | |
|---------------------------|---|
| FORECAST NUMBER: 77 | TYPE OF FIRE Wildfire |
| FIRE NAME: Soberanes Fire | OPERATIONAL PERIOD 10-9-2016 24 HOUR SHIFT |
| DATE ISSUED 10-8-2016 | TIME ISSUED 1700 HOURS |
| UNIT CA-BEU-003422 | SIGNED <i>[Signature]</i> FBAN (T) <i>[Signature]</i> |

INPUTS

Review Weather Forecast for details
 Warmer and drier. Limited RH recovery. Gusty winds.

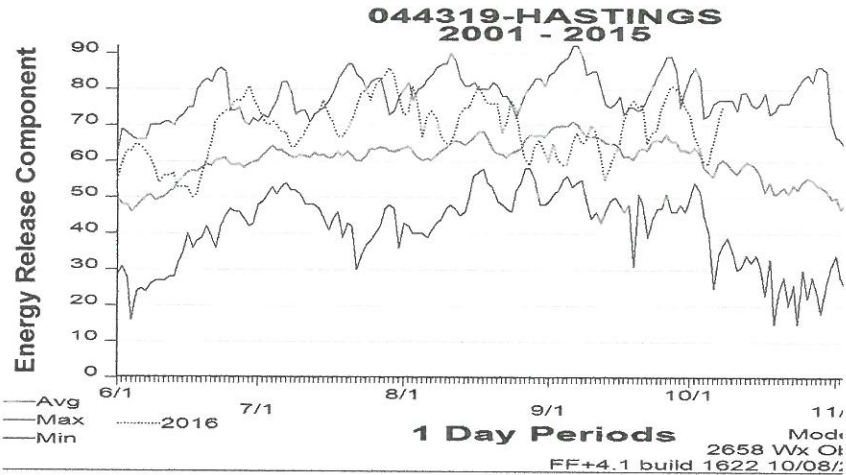

FIRE BEHAVIOR

GENERAL

Current fuel conditions will support active fire spread. Expected south west winds will impact areas previously sheltered from north and east winds. Resources responding to new initial attack or fire outside containment lines should expect resistance to control. Live fuel moistures remain extremely low due to drought conditions and will take time to fully recover. Forecasted record setting ERC 78 (90th percentile), BI 98.

Optimal Alignment - Peak Burning Conditions

POI = 85 - 90% Spotting Distance= up to 3/4 Mile. ROS 100 + ch/h Fine Dead Fuel Moisture = 3 %

LOCAL THRESHOLDS - WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

| | | | | |
|-------------|-----------------------|---------------------|--------------------------|---------------------------|
| Thresholds: | 20' wind Over 7mph | RH Less Than 17% | Temperatures Over 98° | 10hr fuel Less than 6% |
|-------------|-----------------------|---------------------|--------------------------|---------------------------|

SPECIFIC

- Heavy fuels will continue to burn out and may be problematic where close to the fires edge. New smokes will likely continue to be detected throughout the fire perimeter.
- Areas of concern remain in remote and inaccessible terrain.

AIR OPERATIONS

Gusty afternoon winds expected over the ridges.

SAFETY

Success depends upon previous preparation, and without such preparation there is sure to be failure.

Confucius

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped. All GPS data to be collected in DEGREES, DECIMAL MINUTES format.
 AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Fly with Transponder 1255.

Air Attack Briefing 132.0250 AM (A-10002)

For scheduling recon flights contact Ranch HB communications @ 925-407-6353

All rotor wing aircraft will be on the ground at 1900.
 TUSI Advisory 126.200 for restricted airspace.

Soberanes Fire – Safety Message

SINCIDENT #CA-BEU-003422

DATE: 10.9.16

TIME: 0700-1900

Major Hazards

- *Traffic Hazards and Driving.*
- *High temperatures*
- *Complacency*
- *Water Tender Extraction Project off of North Coast Ridge Road - Day 3*
- *Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps*
- *Working around Heavy Equipment in the suppression repair groups*

Demobing?

As you finish out this assignment and possibly your season, you should stop and reflect on your assignment. Think of all the hard work, new friends met, old relationships strengthened and the role you played in the positive outcome of this incident. Furthermore reflect on going home, your family, friends and wives\husbands and children. They are anticipating and just as excited about the coming day as you are. So what can you do to ensure you get home safely? In short, take your time and don't push it. Getting there is more important than what time you get there. If you're driving others, remember that their lives are in your hands. Don't forget that, ever.

Sharing the road with a bicyclist

Each year in California, more than 100 people are killed and hundreds of thousands more are injured in bicycle collisions. Some bicycle related crashes are connected to the bicyclist's behavior, while others are due to the motorist's lack of attention.

Bicycle riders on public roads have the same rights and responsibilities as motorists, and are subject to the same rules and regulations.

Motorists must look carefully for bicyclists before turning left or right, merging into bicycle lanes, and opening doors next to moving traffic. Respect the right-of-way of bicyclists because they are entitled to share the road with you.

Rick Bertram-Toro SOF2 805-471-8076

Tom Zeulner-Toro SOF2 805-440-5252

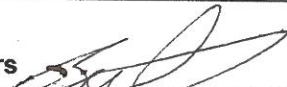

Ron Garcia-Rana SOF2 559-392-1045

There will be lots of bicyclists on Carmel Valley Road this weekend.

A handwritten signature in blue ink, likely belonging to one of the contact persons listed in the text.

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day Shift

| DIV/BR | HAZARDOUS ACTIONS / CONDITIONS | MITIGATIONS / WARNINGS / REMEDIES |
|--|--------------------------------|---|
| ALL | TRAFFIC HAZARDS AND DRIVING | <ul style="list-style-type: none"> • Use caution while driving on all incident roads, nightly moisture/fog may create slick roads • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic and bicycles on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Roads are narrow with steep drop-offs. Hwy 1 will be super busy this weekend... • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment. |
| ALL | WEATHER AND FIRE BEHAVIOR | <ul style="list-style-type: none"> • Higher temps over the next few days. • Winds will test weakened trees, stay alert around snags • Stay hydrated. Monitor resources for heat related illness. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • Historical trends indicate changes in the fire environment support large fire growth. |
| DIV UU | WATER TENDER EXTRACTION | <ul style="list-style-type: none"> • Conduct thorough briefing for all personnel involved (inside rear cover IRPG). • Ensure Lookouts, Communications, Escape Routes and Safety Zones in place. • Remove any ignition sources prior to extraction. • Keep coolant, fuels and oil out of the environment. • Only qualified, private riggers set the hauling system. • Keep all incident personnel 500 feet or more from scene while hauling. • During backhaul with helicopter follow IRPG page 52-55. |
| ALL | MOP-UP/REHAB | <ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area. Assess the hazards and implement appropriate mitigations. |
| ALL | COMMUNICATIONS | <ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for. |
| ALL | AVIATION OPERATIONS | <ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute. |
| ALL | HEAVY EQUIPMENT OPERATIONS | <ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the trees. • Never work below or behind heavy equipment. |
| ALL | ENVIRONMENTAL HAZARDS | <ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Watch for snags, don't rest under oaks, even green ones. They're falling • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions. |
| ALL | Spike Camps | <ul style="list-style-type: none"> • Watch for dead or drought damaged trees in sleeping areas • Maintain hygiene to avoid camp crud • Sleep only in designated areas • Drive slowly and watch for fellow firefighters while driving (5mph in camp). • Ensure you get a full briefing daily • Check in when off the line to maintain accountability |

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"
Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** (Datum WGS84) *Ex: N 40° 42.45' x W 123° 03.24'* _____

4. SEVERITY OF EMERGENCY: TRANSPORT PRIORITY

| SEVERITY | TRANSPORT PRIORITY |
|--|--|
| <input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> | Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE. |
| <input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i> | Ambulance or consider air transport if at remote location. Evacuation may be DELAYED. |
| <input type="checkbox"/> ROUTINE-GREEN <i>Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.</i> | Non-Emergency. Evacuation considered Route of Convenience. |

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen

Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED

Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- **Run Medical Emergency on Command** - **Coordinate with air ambulance on CALCORD tone 6**

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) *EX: N 40 42.45' x W 123 03.24* ' _____

- **Patient's ETA to Evacuation Location:** _____

Helispot/Extraction Size and Hazards: _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training

- If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

INCIDENT RADIO COMMUNICATIONS PLAN

 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as it programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and 1x reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Human Resource Message

Thought for the Day

Just as accident rates increase when you become a little complacent, so do human resource contacts and complaints of inappropriate behavior, harassment, and discrimination.

- **The fire has been going on for awhile**
- **People are starting to get tired, and some ready to go home**
- **People have a little more time to think about things that upset them during a fire**
- **People are more easily irritated**

Be aware of these facts and make the necessary effort to recognize and deal with human resource situations before they become conflicts that are painful and out of control.

Carl shoves Roger, Roger shoves Carl, and tempers rise

*"Yesterday is history, tomorrow is a mystery, today is a gift,
which is why we call it the present."— Bill Keane*

TRAINING MESSAGE

TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

- ✓ Provide **CONSTRUCTIVE FEEDBACK** for trainee and make your words valuable for the person or people responsible for reviewing the evaluation.
- ✓ Describe what the trainee did on the assignment to justify their rating. **PAINT THE PICTURE** to the reviewing officials on the complexity of the assignment!
- ✓ Be **HONEST** enough to let the trainee know what their strengths and weaknesses are, how they performed and if they met, did not meet, or exceeded your expectations.
- ✓ **DOCUMENT** what skills or tasks the trainee should work on next if recommending continuing assignments.
- ✓ If recommending certification, **BE SPECIFIC** in the performance evaluation that you are recommending them for certification.

Brad Smith - 209-770-4809

Brad Stewart 530-518-0132

Suppression Repair Treatments

These Suppression Repair Treatments are to be used in conjunction with the Soberanes Suppression Repair Treatment Map.

Dozer Line/ Firebreak

- Use small dozer and/or excavator to rehab line
- Pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak

Wilderness Dozer Line:

- Use small dozer and/or excavator to rehab line
- When line cut through brush: pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed

Non Wilderness Dozer Line Repair:

- If dozer line was a road before fire then maintain roadbed and drainage. Pull in berms and brush along roadside.
- If road was not present before fire then water bar, pull in berms, and disperse cut brush across fire line.

Hand Crew

- Use hand crews to complete rehab work
- Move displaced native material (soil & duff) back onto fire line
- Pull back brush and berms and spread over the width of break
- Leave tops of felled trees attached, this will appear more natural
- Cut water bars diagonal to fire line, where natural drains occur and construct as natural as possible. If possible, at natural drain direct outlet of water into a clump of brush or rocks
- For dozer line: slash and water bars will be hand constructed

Trail Maintenance:

- Use small dozer (e.g., D5) and/or excavator to rehab line
- Pull back brush, berms and rocks
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%).
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak.
- Reestablish hiking trail along road prism
- Repair cross drains where segments of trail have been affected by suppression activities

Jeep Trail Repair:

- Reestablish drainage
- Pull back brush, berms and rocks, and spread over width of jeep road
- Install tank-trap (as per indicated by READ)

Road Maintenance:

- Disperse or chip cut brush away from roadsides
- Maintain pre-existing road drainage

Repair Declined

- Private landowner has indicated that no repair should occur
- Check with Repair Group READS before travelling through this area

Department of Defense Dozer Line:

- No suppression repair
