Soberanes Fire Weather Forecast

Forecast Information & SPOT Forecasts

FORECAST NO: 83
PREDICTION FOR: 0700 Fri - 0700 Mon
SHIFT DATE: Friday, October 14, 2016

NAME OF FIRE: Soberanes
UNIT: CA-BEU/LPF MRD
SIGNED:

Shawn Weagle
Incident Meteorologist
Phone: 503.956.7504

FORECAST ISSUED: 1900 Thursday 10/13/16

***** HEAVY RAIN AND STRONG WINDS MAY MAKE SOME ROADS IMPASSABLE TODAY *****

***** Up to 1 inch of rain expected on the Coastal Ridges *****

***** More rain expected Saturday Night and Sunday *****

Weather Discussion: An unseasonably strong and moisture-rich Pacific frontal system will move north to south across Central California today. Strong S-SW winds – with gusts 35 to 45 mph possible along the coast and on exposed ridges – will accompany locally heavy rain to make most roads on the coastal side of the fire dangerous or impassable today. Even on the inland side of the fire, where less rain is expected, there will likely be problems as the first substantial rain in 6 months shakes out rocks, dirt, and debris onto some roads. totals from this system will likely range from 0.10” to 0.20” in the drier south and east portions of the fire, with 0.50 to 1.00” expected along the coast and nearby ridges. Cool, moist, unsettled weather will continue through the weekend with another good chance for rain Saturday Night into Sunday as the next strong front arrives.

WEATHER FORECAST for Today (Friday, October 14):

	Coast / Ridgetops	Inland Valleys / Lower Slopes
Weather	Cloudy with rain spreading across the fire area. Rain heavy at times coast/ridges. Windy , especially coast and ridges.	
Highs	55 - 65°, except 65 – 70° far SE portion of fire.	
RH	Above 70%, except 40-50% early far SE portion of fire.	
20 ft Winds	S-SW 20-30 mph with gusts up to 45 mph coast and ridges.	S-SW 15-20 mph with gusts up to 35 mph. Winds lighter but gusty at times in sheltered valleys.
Rainfall	0.75” to 1.50” Coastal Ridge. 0.40” to 0.80” interior of fire. 0.10 to 0.25” drier areas like Arroyo Seco and Fort Hunter Liggett. 0.10” or less King City. (Note: some of this may come after sunset)	

WEATHER FORECAST for Tonight: Cloudy with rain tapering off overnight. RH above 80%. Temperatures in the 50s. W-SW wind 10-15 mph with gusts to 25 mph, diminishing in inland valleys overnight.

OUTLOOK for Saturday, October 15:

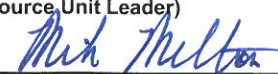

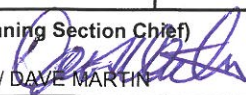

Weather	Mostly cloudy with scattered showers, then becoming windy late with rain developing overnight.	
Temps	<i>Highs:</i> 55-65°	<i>Lows Sat Night:</i> 50-58°
RH	<i>Min RH:</i> 60-80% ridges, around 50% valleys.	<i>Max RH:</i> 80-100%
20 ft Winds	SW becoming S, increasing from 10-15 mph early to 15-25 mph with gusts to 40 mph late afternoon and through the night. Sheltered valleys will have lighter winds but still be gusty at times.	

OUTLOOK for Sunday, October 16:

Weather	Rain, possibly heavy at times coast and ridges. Very windy.	
Temps	<i>Highs:</i> 55-65°	<i>Lows Sun Night:</i> 46-56°
RH	Above 70%	
20 ft Winds	S-SW 20-30 mph with gusts up to 50 mph coast and ridges. Valleys S-SE 10-20 mph with gusts up to 35 mph.	
Rainfall	Possibly another 0.50” to 1.00” Coast and adjacent ridges. 0.25” to 0.50” elsewhere, except 0.10” to 0.25” King City	

NEXT WEEK: Becoming drier/warmer with offshore flow developing. RH dropping back into the teens by Wed.

AIR OPERATIONS SUMMARY
IGCS 220

Prepared By: Jerry Disney
 AOB
 5/2/16

Prepared Date: 10/13/2016

Prepared Time: 1630

1. INCIDENT NAME: Soberanes Fire	2. OPS PERIOD DATE: 10/14/2016	START TIME: 0700	END TIME: 2100	SUNRISE: 0711	SUNSET: 1834
----------------------------------	--------------------------------	------------------	----------------	---------------	--------------

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped. All GPS data to be collected in DEGREES, DECIMAL MINUTES format. AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways. Bodies of Water, etc. If Retardant/Foam/Agent is dropped within these areas immediately notify the AOB and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area. Fly with Transponder 1255.

King City Helibase: KIC
 Latitude: 36 13.713
 Longitude: 121 07.278

5. TFR's:
 Request #: A-10129
 Polygon: NM
 Altitude: 9000' MSL
 NOTAMS: 6/9747
 Frequency: 119.1250

Soberanes – Safety Message

INCIDENT: Soberanes Fire

DATE: 10-14-16

TIME: 0700 – 1900

Situational Awareness:

Start the day with a briefing and re-brief during the day as the job changes. Use all the assessment guides to develop and maintain Situational Awareness. Constantly re-evaluate your situation throughout the day. Use the time tested process of “Looking Up, Down, and All Around”, and the other assessment materials from the Incident Response Pocket Guide.

WATCH-OUTS

- **Communications** – With the changes in the work areas, ensure that communications exist. Will a human repeater be necessary? Are you cloned to the right group you are working in?
- **Vehicle Driving** - Roads are steep and narrow with many blind corners. Drive slowly, defensively, with your lights on, and stay on your side of the road! **WATCH OUT** for commercial, private, and other vehicles that commonly drive faster than we do.
- **Medical Plan** - Know where assigned medical personnel are located. Know in advance the request process in the Medical Plan. Ensure positive communications with the ICP.
- **Danger/Hazard Trees** - Continue to evaluate the areas around and under all trees. Use the IRPG guidelines on page 22. Minimize the exposure, and exposure time.
- **Rain / Wind** – Reduce driving speeds on wet, slick roads. Watch out for rock and mudslides. Limit driving exposure on muddy roads.

Fight Complacency

- One common reason for firefighter injury in the latter stages of a fire is when the firefighter throws her/his mind into neutral and doesn't think about the work they are doing. They are not thinking about how to do the job right, but just how to get the job done so they can just get home. Couple this with fatigue, and you really have a “**WATCHOUT.**”
- There's a difference in between **just** getting the job done, versus getting the job done when **MENTALLY ENGAGED.**

So with that, keep your mind engaged and attentive to the task. Continually ask yourself if you are doing the job safely, the way you were trained. Keep an eye on your co-workers too. If you see them doing something that is unsafe, **YOU NEED TO SAY SOMETHING** immediately about the unsafe act.

South Central Sierra Incident Management Team
Dave Witt 661-330-0187

INCIDENT RISK ANALYSIS

SOBERANES FIRE CA-BEU-003422

(ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads, nightly moisture/fog may create slick roads • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic and <u>bicycles</u> on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Roads are narrow with steep drop-offs. • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	COMPLACENCY	<ul style="list-style-type: none"> • Motivate each other with positive feedback. • Maintain a positive attitude around fellow workers at all times. • Focus on your job during work hours. • Call, text or email your family when off the fireline and enjoy that time. • Treat your crewmembers like family and watch out for their safety at all times • Review your IRPG during down times to stay fresh.
ALL	WEATHER WIND / RAIN	<ul style="list-style-type: none"> • Snags/Fire weaken trees. • Wet slick road surface. • Rolling Rocks/ Mud Slides. • Dirt Roads- Slick, muddy. Loss of traction. • Potential Flooding. • Decrease in visibility while driving.
ALL	MOP-UP / REHAB	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area. Assess the hazards and implement appropriate mitigations.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the trees. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Watch for snags, don't rest under oaks, even green ones. They're falling • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	CAMPS	<ul style="list-style-type: none"> • Watch for dead or drought damaged trees in sleeping areas • Maintain hygiene to avoid camp crud • Sleep only in designated areas • Drive slowly and watch for fellow firefighters while driving (5mph in camp). • Ensure you get a full briefing daily • Check in when off the line to maintain accountability

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as it programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Ix reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

<p>8. EVACUATION LOCATION:</p> <p style="padding-left: 20px;"> - Lat/Long <i>(Datum WGS84) EX: N 40 42.45' x W 123 03.24'</i> _____ - Patient's ETA to Evacuation Location: _____ - Helispot/Extraction Size and Hazards: _____ </p>									
<p>9. CONTINGENCY: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i></p> <p>_____</p> <p>_____</p>									
<p>REMEMBER:</p> <p style="padding-left: 20px;"> -Confirm ETA's of resources ordered -Act according to your level of training - <u>If air or ground ambulance is DELAYED:</u> Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate. </p>									

TRAINING SPECIALIST MESSAGE

All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in the ICP

The Training Specialist is available immediately following the morning Operations Briefing to 2130.

Brad Smith -209-770-4809

Sean Wolf -661-317-1770

Human Resource Message Soberanes Fire October 14, 2016

“Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated”. Fireline Handbook, Chapter 6, Common Responsibilities.

SEXUAL HARASSMENT at work, including emergency incidents, occurs when unwelcome conduct, on the basis of gender or sexual preference, adversely affects a person’s ability to do their job. Sexual harassment includes, but is not limited to, the following types of conduct:

- ↓ Unwelcome sexual advances
- ↓ Requests for sexual favors
- ↓ Discussing sexual activities
- ↓ Telling off-color jokes
- ↓ Unnecessary touching
- ↓ Displaying sexually suggestive pictures
- ↓ Using demeaning or inappropriate terms
- ↓ Using indecent gestures
- ↓ Using crude and offensive language
- ↓ Commenting on physical attributes

“If we each take responsibility in shifting our own behavior, we can trigger the type of change that is necessary to achieve sustainability for this planet. We change our planet, our environment, our humanity every day, every year, every decade, and every millennia.” -Yehuda Berg-

Janine Summy, HRSP, 509-429-1206

Alan Seago, HRSP, 707-315-6537

John Campbell HRSP (t), 951-203-4367

Suppression Repair Treatments

These Suppression Repair Treatments are to be used in conjunction with the Soberanes Suppression Repair Treatment Map.

Dozer Line/ Firebreak

- Use small dozer and/or excavator to rehab line
- Pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak

Wilderness Dozer Line:

- Use small dozer and/or excavator to rehab line
- When line cut through brush: pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed

Non Wilderness Dozer Line Repair:

- If dozer line was a road before fire then maintain roadbed and drainage. Pull in berms and brush along roadside.
- If road was not present before fire then water bar, pull in berms, and disperse cut brush across fire line.

Hand Crew

- Use hand crews to complete rehab work
- Move displaced native material (soil & duff) back onto fire line
- Pull back brush and berms and spread over the width of break
- Leave tops of felled trees attached, this will appear more natural
- Cut water bars diagonal to fire line, where natural drains occur and construct as natural as possible. If possible, at natural drain direct outlet of water into a clump of brush or rocks
- For dozer line: slash and water bars will be hand constructed

Trail Maintenance:

- Use small dozer (e.g., D5) and/or excavator to rehab line
- Pull back brush, berms and rocks
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%).
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak.
- Reestablish hiking trail along road prism
- Repair cross drains where segments of trail have been affected by suppression activities

Jeep Trail Repair:

- Reestablish drainage
- Pull back brush, berms and rocks, and spread over width of jeep road
- Install tank-trap (as per indicated by READ)

Road Maintenance:

- Disperse or chip cut brush away from roadsides
- Maintain pre-existing road drainage

Repair Declined

- Private landowner has indicated that no repair should occur
- Check with Repair Group READS before travelling through this area

Department of Defense Dozer Line:

- No suppression repair

Private Property Suppression Damage Reporting

If a private property owner needs to report damage to their property from fire suppression activities that has not been repaired, please have them call the following number:

(831) 385-5434, ext. 71243
