Rye Fire

National Weather Service Los Angeles/Oxnard

2017-12-06 5:36 PM PST

Spot Forecast for Rye Fire...CORRECTED

National Weather Service Los Angeles/Oxnard CA

536 PM PST Wed Dec 6 2017

Forecast is based on request time of 0700 PST on December 07.
If conditions become unrepresentative...contact the National Weather Service.

...RED FLAG WARNING IN EFFECT UNTIL 8 PM PST SATURDAY DUE TO STRONG SANTA WINDS AND VERY LOW HUMIDITIES...
...WIND ADVISORY IN EFFECT UNTIL 10 PM PST THIS EVENING...
...HIGH WIND WARNING IN EFFECT FROM 10 PM THIS EVENING TO 4 PM PST FRIDAY...

.DISCUSSION...An offshore flow pattern will remain in place across the area through the weekend as surface high pressure is expected to be anchored over the Great Basin. Strengthening of the offshore flow is expected on Thursday as a trough of low pressure moving to the east provides some upper-level support for stronger winds, similar to what was observed Monday night and Tuesday. Very critical fire weather conditions due to the strong northeast winds and very low relative humidities will linger through Friday. However gusty offshore winds and very low humidities will keep Red Flag conditions through Saturday.

.THURSDAY...

Sky/weather.....Sunny. Areas of smoke.
Max temperature.....65-69 degrees.
Min humidity.....8-12 percent.
Wind (20 ft).....
Slope/valley.....Northeast winds 22 to 32 mph with gusts to around 47 mph.
Ridgetop.....Northeast winds 32 to 42 mph with gusts to around 57 mph.
Mixing height.....1000 ft AGL or less until 1000 hours lifting to 3800-4200 ft AGL by the afternoon.
Transport winds.....Northeast winds 25 to 35 mph.

.THURSDAY NIGHT...

Sky/weather.....Mostly clear. Areas of smoke.
Min temperature.....Around 42.
Max humidity.....16-21 percent.
Wind (20 ft).....
Slope/valley.....Northeast winds 17 to 27 mph with gusts to around 35 mph.
Ridgetop.....Northeast winds 27 to 37 mph with gusts to around 45 mph.
Mixing height.....1700-2100 ft AGL early falling to 1000 ft AGL or less.
Transport winds.....Northeast winds 25 to 35 mph early diminishing to 20 to 30 mph overnight.

.FRIDAY...

Sky/weather.....Sunny.

Max temperature.....68-72 degrees.

Min humidity.....8-12 percent.

Wind (20 ft).....

Slope/valley.....Northeast winds 12 to 22 mph with gusts to
around 30 mph.

Ridgetop.....Northeast winds 22 to 32 mph with gusts to
around 40 mph.

Mixing height.....1000 ft AGL or less until 1000 hours lifting to
3800-4200 ft AGL by the afternoon.

Transport winds.....Northeast winds 20 to 30 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: WILDLAND
FIRE NAME: RYE	OPERATIONAL PERIOD: December 7-8 0700-0700
DATE ISSUED: December 6, 2017	TIME ISSUED: 21:00
UNIT: Los Angeles County LAC-362441	SIGNED:  Typed/printed: FBAN Stephen Volmer

INPUTS

WEATHER SUMMARY: ***RED FLAG WARNING in effect through 8pm Saturday 12/9***

Strong and gusty Northeast winds 30-40 mph with gusts to 70mph will continue in the area. Erratic winds will be present along ridgetops and drainages. Expect poor overnight humidity recovery. High temp 70, Low 45, Min RH 5-10%

OUTPUTS

FIRE BEHAVIOR

GENERAL: All fuels in the area are extremely dry, due to the recent heat wave in November, and long periods of little to no precipitation.

Fuels will ignite easily, with rapid growth, and long range spotting during the entire shift. Live fuel moisture levels are just above the critical percentile, with some areas well below the critical mark.

Current ERC levels have begun to drop slowly since the 30th, placing the area below the 90th percentile.

SPECIFIC: The fire behavior below outlines what can be expected from any spot fires and new starts in the local fire area.

GRASS: Rate of Spread....150 ft/min Flame Length....10 ft Spotting....1/2 mi Probability of Ignition 75%

GRASS SHRUB: Rate of Spread....110 ft/min Flame Length....15 ft Spotting....1/2 mi Probability of Ignition 75%

BRUSH: Rate of Spread....250 ft/min Flame Length....30 ft Spotting....1 mi Probability of Ignition 75%

Fuels are very receptive to ignition. Be cautious of work being done by heavy equipment, and parking locations.

Be alert for fire weakened trees. Trees will hold heat and smolder for extended periods of time, producing both a safety hazard and ignition source in any wind condition.

Sunset 12/6...16:43 Sunrise 12/7...06:48

AIR OPERATIONS: Transport winds will be Northeast 35mph with a mixing height of 4200' AGL. High winds will be present throughout the area hampering the effectiveness of aircraft. Erratic winds will be present over ridgetops.

Expect clear air over the fire area, unless a new fire develops to the East of the incident.

SAFETY

Winds will increase rapidly without any warning. Take the weather often to track trends.

Relatively small fires or deceptively quiet areas of large fires.

Winds increasing, and getting dryer

SAFETY MESSAGE CANYON INCIDENT

1. Incident Name: Rye

2. Operational Period: Date From: 12/07/17
Time From: 07:00

Date To: 12/08/17
Time To: 07:00

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

BRIEF ALL YOUR PERSONNEL ON THE CURRENT DAYS IAP BEFORE ENGAGING IN YOUR DIVISIONAL ASSIGNMENT.

- Stay aware of what is happening around you and adapt your exit strategy accordingly.
- Strong & erratic winds are predicted throughout the operational period.
- Establish: LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES & SAFETY ZONES.
- Be aware of complacency. Many of us have been on multiple fire assignments this year, starting as early as March. Continue to be aggressive, but look out for each other.
- Review; Wildland Urban Interface Firefighting pgs. 12-16 in your IRPG.
- No PPE allowed in the eating areas. Wash hands regularly and always before entering the eating areas.
- If personnel get fatigued, (but it's not a medical emergency), use Fireline Paramedics for evaluation and rehab in a shaded area on the fire line.
- Drive with head lights on and slow down.
- Units working along the Highways must use code three lights while parked. Be aware of traffic passing in the open lane.

IF IT'S PREDICTABLE IT'S PREVENTABLE

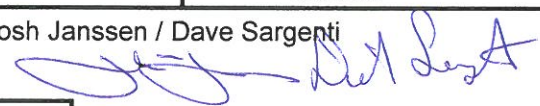

4. Site Safety Plan Required? Yes No

CAL FIRE INCIDENT MANAGEMENT TEAM 6

BRIAN ESTES – INCIDENT COMMANDER

DEMOBILIZATION PLAN - SUMMARY

RYE Incident

CA-LAC-362441

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All Resources will arrive at the Demobilizations Unit at their scheduled time Only.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their scheduled demobilization time.
- **All Rental Vehicles will receive a safety inspection prior to leaving the incident.**
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call South Ops at 1-800-237-3703 immediately upon being released from the incident

RESPONSIBILITIES

Unit Leaders will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. **Use the Declaration of Excess Resources sheet or General Message Form (ICS-213) to list all excess resources.** Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment. Resources are not to contact South Ops or the expanded dispatch center unless instructed to do so by the Demobilization Unit.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region CAL FIRE forces
6. Within Region CAL FIRE Forces
7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.
