Fire Weather Forecast

FORECAST NO: 4
PREDICTION FOR: Saturday
SHIFT DATE: July 22, 2017
FORECAST ISSUED: 1630, July 21, 2017

NAME OF FIRE:
UNIT:
Incident Meteorologist:

Detwiler
Madera-Mariposa-Merced
Tom Wright (240-778-5304)

DISCUSSION:

Expect conditions to start heating up Saturday. Temperatures will start edging up toward 100 again with humidities falling into the low- to mid-teens. Winds will be primarily slope driven, but ridges and other exposed areas will see the typical switch to west-northwest in the afternoon.

SATURDAY:

- WEATHER: Sunny.
- WIND (20 FT): Midslope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-northwest 4-8 mph.
- MAX TEMPERATURES: 96-102
- MIN RH: 12-16%
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope, breaking by 1000 hrs.
- MIXING HEIGHT: Near mid-slope in the morning, then rising to 5500 ft after 1000 hrs.
- TRANSPORT WINDS: Light and variable through 1000 hrs then becoming west-southwest around 5 mph.

SATURDAY NIGHT:

- WEATHER: Clear.
- WIND (20 FT): Becoming downslope 1-3 mph after 2200. Above the inversion: North around 5 mph.
- MIN TEMPERATURES: 64 Valleys to 70 Ridges
- MAX RH: 28% Ridges to 40% Valleys
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope developing after 2200

SUNDAY:

- WEATHER: Sunny and hot.
- WIND (20 FT): Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-northwest 3-6 mph.
- MAX TEMPERATURES: 100-106
- MIN RH: 10-13%
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope, breaking by 1000 hrs.
- MIXING HEIGHT: Near mid-slope in the morning, then rising to 7000 ft after 1000 hrs.
- TRANSPORT WINDS: Light and variable through 1000 hrs then becoming west-southwest 5-10 mph.

3-5 Day Planning Outlook:

Monday: Clear. Lows 66-70. Max RH: 30-35%. Highs: 98-102. Min RH: 12-15%. Winds: Slope driven 2-5 mph.
Tuesday: Clear. Lows 62-68. Max RH: 35-45%. Highs: 94-98. Min RH: 17-20%. Winds: WNW 3-6 mph.
Wednesday: Clear. Lows 62-68. Max RH: 35-45%. Highs: 96-100. Min RH: 17-20%. Winds: WNW 4-8 mph.

Android

QR Codes to Fire Weather Calculator App (for taking weather observations)

- Fill out all fields, tap calculate, then send/share observation
- Please email kml and csv to detwilerobs@gmail.com
- No signal? The app stores the obs for you and will queue them up for transmission when you have a signal

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: WILDFIRE
FIRE NAME: DETWILER	OPERATIONAL PERIOD: JULY 22, 2017 24 HR
DATE ISSUED: JULY 21, 2017	TIME ISSUED: 1900
UNIT: CALFIRE MADERA-MARIPOSA-MERCED	SIGNED: 
	Typed/printed: TIM CHAVEZ

INPUTS

WEATHER SUMMARY:
WARMING AND DRYING THROUGH THE OPERATIONAL PERIOD. SEE INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL:

NFDRS-ENERGY RELEASE COMPONENT =74 (A LITTLE BELOW AVERAGE)
BURNING INDEX 123, HUNDRED HOUR FUEL MOISTURE 6%, TEN HOUR FUEL MOISTURE 5%, 1 HOUR FUEL MOISTURE 2-3%, PROBABILITY OF IGNITION 80-100 DURING DAYLIGHT HOURS.
GRASS FUELS IN SUNLIGHT ARE VERY RECEPTIVE TO IGNITION.

SPECIFIC:

BRANCH I, III, V, AND VI

NO MOVEMENT ANTICIPATED. HIGH SPOTTING POTENTIAL EXISTS DUE TO HEAVY GRASS FUELS AND HIGH PROBABILITY OF IGNITION. SOME AREAS OF TREE MORTALITY COULD BE A SOURCE OF FIREBRANDS. STANDING GREEN AND DEAD TREES ARE A HAZARD TO FALL AT ANY TIME.

BRANCH II

AREAS OF 63-YEAR OLD CHAMISE CHAPARRAL WILL BURN WITH EXTREME INTENSITY IN THE PROPER ALIGNMENT. INTERIOR UNBURNED ISLANDS HAVE HIGH REBURN POTENTIAL.

BRANCH IV

TERRAIN IS VERY DIFFICULT IN THIS BRANCH. NO FIRE HISTORY IN THIS AREA SINCE 1924. AREAS OF TREE MORTALITY INCREASE AS THE FIRE MOVES NORTH OUT OF INDIAN GULCH.

BRANCH VII

SOME OF THIS BRANCH HAS PUSHED UP AGAINST THE 2008 TELEGRAPH FIRE. THIS BURN AREA HAS 2-6 FOOT CHAMISE AND MANZANITA WITH SOME PINE REPRODUCTION. VIRTUALLY NO LEAF LITTER FUELS OR GRASS UNDER THE BRUSH. THE FIRE HAS STALLED OUT ON ITS OWN AND WOULD TAKE WINDS OVER 10 MPH TO CARRY FIRE.

AIR OPERATIONS: SUNRISE 0556, SUNSET 2017.
SMOKE WILL OBSCURE VISIBILITY UNTIL AFTER 1200.

SAFETY

USE THIS QR CODE TO VIEW THE TREE MORTALITY MAP FOR MARIPOSA COUNTY. THESE TREES HAVE BEEN DEAD FOR TWO YEARS OR MORE AND ARE READY TO FALL OR SPREAD SPOTFIRES ACROSS YOUR LINES.
http://www.fire.ca.gov/treetaskforce/downloads/maps/TreeMortality_RBP_MMU.pdf

- THE ABILITY TO EXPECT THE UNEXPECTED, AND ANTICIPATE THE UNDESIRABLE, IS ESPECIALLY CRITICAL IN HIGH-RISK ENVIRONMENTS SUCH AS WILDLAND FIREFIGHTING. RATHER THAN FOCUSING ON SEEKING CONFIRMATION, ONE MUST BE "PREOCCUPIED WITH FAILURE". -K. CLOSE "WHY THE LESSONS FROM CRAMER MATTER"

SAFETY MESSAGE

DETWILER

CA-MMU 014474 JULY 22, 2017 0700-0700

GENERAL SAFETY AWARENESS

MANY HAZARDS AND RISKS REMAIN

Watch Out

- Watch for abandoned Mine Shafts, LPG tanks, Hazardous Materials
- Tree Mortality, Fire weakened trees, Snags, Valley Oaks
- Unstable structural members and free standing chimneys

Mitigation

- Mark, GPS and Flag Mine Shafts. Make the hazard known. Report to Supervisor
- Look up to live-Look up, Look Down, Look all around
- Always consider the values at risk and adjust actions accordingly

FIRE BEHAVIOR

THE YEAR AFTER A DROUGHT IS THE YEAR TO BE AWARE OF

Watch Out

- Increased annual grass crop
- Dead tree crowns will increase ember production when fire is established at the tree base
- Northerly morning winds switching to westerly in the afternoon

Mitigation

- Utilize all required PPE when on the fire line
- Preplan for short and long range spotting
- Have escape routes identified and make them know to your crew

CITIZENS BACK IN THE AREA

CIVILIAN REPOPULATION IN THE FIRE AREA

Watch Out

- Watch for unexpected vehicles and civilian foot traffic
- Power Lines are being re-energized in the fire areas
- Watch for distracted civilians driving through the fire area
- Vehicles will be moving in tight areas around residences, schools and parking areas

Mitigation

- Use safety and hazard lights as needed. Practice defensive driving
- Treat all power lines as if they are live while working around power lines
- Provide back-up and spotter personnel – more than one may be needed
- Drive safely, wear seat belts and monitor fatigue when driving on and off the incident

SAFETY COMMUNICATION

Carbon Monoxide Poisoning

Carbon Monoxide (CO) is an odorless, tasteless, and invisible gas. Elevated CO levels can be associated with operational tasks such as: direct line construction, holding operations and during mop-up. This increases as crews are exposed during these tasks for long periods or consecutive work periods.

Elevated CO levels may also be found in areas with high smoke concentration or areas recently burned. These areas include:

- Near the active flame front and smoldering fuels.
- Areas of heavy smoke concentrations due to inversions or downwind of the fire and/or topography (saddles, basins, ravines, etc).
- Extended work periods around motorized equipment.
- Working in enclosed areas with motorized equipment.

Blood CO Level	Symptom(s)	Behavior
Moderate	Possible headache, nausea, and increasing fatigue.	Increasing impairment of alertness, vision discrimination, judgement of time, physical coordination, and/or becoming increasingly complacent.
High	Headache, fatigue, drowsiness, nausea, vomiting, dizziness, convulsions, cardiorespiratory difficulty.	Above behavior becomes more acute to extreme.

If workers are showing signs and/or symptoms of CO poisoning as listed above, move them away from the area and to an area with “fresh air”. Personnel who display the symptoms or behaviors listed above should be evaluated and determined fit for duty before their next work assignment/period.

To prevent exposure to high concentrations of CO:

- When possible, select strategy and tactics that minimize worker exposure to smoke concentrations (indirect attack).
- Rotate workers from areas with elevated smoke levels to areas of less smoke and/or cleaner air.
- Instruct personnel to take their breaks in areas of less smoke and/or cleaner air if possible.
- Continually monitor personnel for the signs and/or symptoms listed above.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCOORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCOORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on CALCOORD with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
 - Medical Unit
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

DETWILER INFORMATION

844-668-3473 / 844-MMU-FIRE

Media Line 562-619-7467

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. Do not post:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE

The Information staff will assist you in mailing and receiving letters and packages.

DEMOB
DETWILER INCIDENT
CA-MMU-014474

- Resources must Check-In prior to the Demob process
- In order to be deemed excess, supervisors must submit an ICS-213 to the Resources Unit
- Resources report to Demob at the times posted on the tentative Demob list, which is posted around the Incident Base.
- Prior to reporting to Demob, Please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support (Vehicle Inspection)
 - All rental vehicles MUST be inspected
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob

"Detwiler" CAMMU 014474 Incident Fireline Suppression Repair Plan

I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Detwiler Fire, in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Repair roads to pre-fire condition as requested by the Repair Specialist.
- 2) Re-establish existing berms where applicable.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Where vegetative material was cut and deposited adjacent to permanent roads it shall be lopped and scattered to a depth within 30" of the soil surface.

C. Firelines; Hand and Dozer

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Waterbar Guidelines:

- 1) Spacing: These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended *minimum* intervals:

Fire line Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- 2) Location: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- 3) Depth and Width: Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to

top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.

- 4) Angle: Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

E. Archaeological or Historic Sites (if discovered)

- 1) All sites and potential sites shall be flagged and avoided.
- 2) Impacted sites will be reported to the Suppression Repair Specialist as soon as possible.
- 3) If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified.

F. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
- 3) Grade and water roads, as needed, that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations.

Prepared by:

Len Nielson, Emergency Fireline Suppression Repair Technical Specialist

TRAINING MESSAGE

Training Specialist Now located at Merced Fair Grounds inside of Sierra Hall next to Check-In. All Federal, State, and Local Government agency trainees working on position task books need to register with the training specialist in order to receive proper credit for your assignment. Bring your task book with you.

TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

- Provide **CONSTRUCTIVE FEEDBACK** for trainee and make your words valuable for the person or people responsible for reviewing the evaluation.
- Describe what the trainee did on the assignment to justify their rating. **PAINT THE PICTURE** to the reviewing officials on the complexity of the assignment!
- Be **HONEST** enough to let the trainee know what their strengths and weaknesses are, how they performed and if they met, did not meet, or exceeded your expectations.
- **DOCUMENT** what skills or tasks the trainee should work on next if recommending continuing assignments.
- If recommending certification, **BE SPECIFIC** in the performance evaluation that you are recommending them for certification.

Jonathan White (562) 324-1811

INCIDENT TRAINING SPECIALISTS

CULTURAL MESSAGE

On this Fire, there are a significant amount of both prehistoric archeological sites and historical sites. The prehistoric sites could range from small rock outcrops with seed processing mortars or slicks to large seasonal camps. These could include more features like bedrock milling locations, midden soil (dark black colored soil), lithic scatters, and other surface artifacts.

There are a variety of historic sites as well. The most common are mining sites, historic camps, and railroad grades (mostly down near the Merced River). There could be metal can dumps, cement pads, mining equipment, glass, ceramics, and other debris.

*****Be Careful if you encounter a former Mine in the Field*****

They pose environmental as well as physical dangers!

There could be only partially covered open vertical shafts. Be careful working in these areas. There also could be chemical residues that could be harmful. Stay away if possible.

If you find any prehistoric or historic site, contact Herb Dallas at (951) 840-0004. Take a GPS point if possible or mark its location on a map. Report any mining hazards to the Situational Unit Leader. Flag the location in the field as well, if you feel it poses a danger to other field personnel. Take a GPS point.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____
