INCIDENT ACTION PLAN

RIVER - CA-BEU-004024 CARMEL - CA-BEU-004081

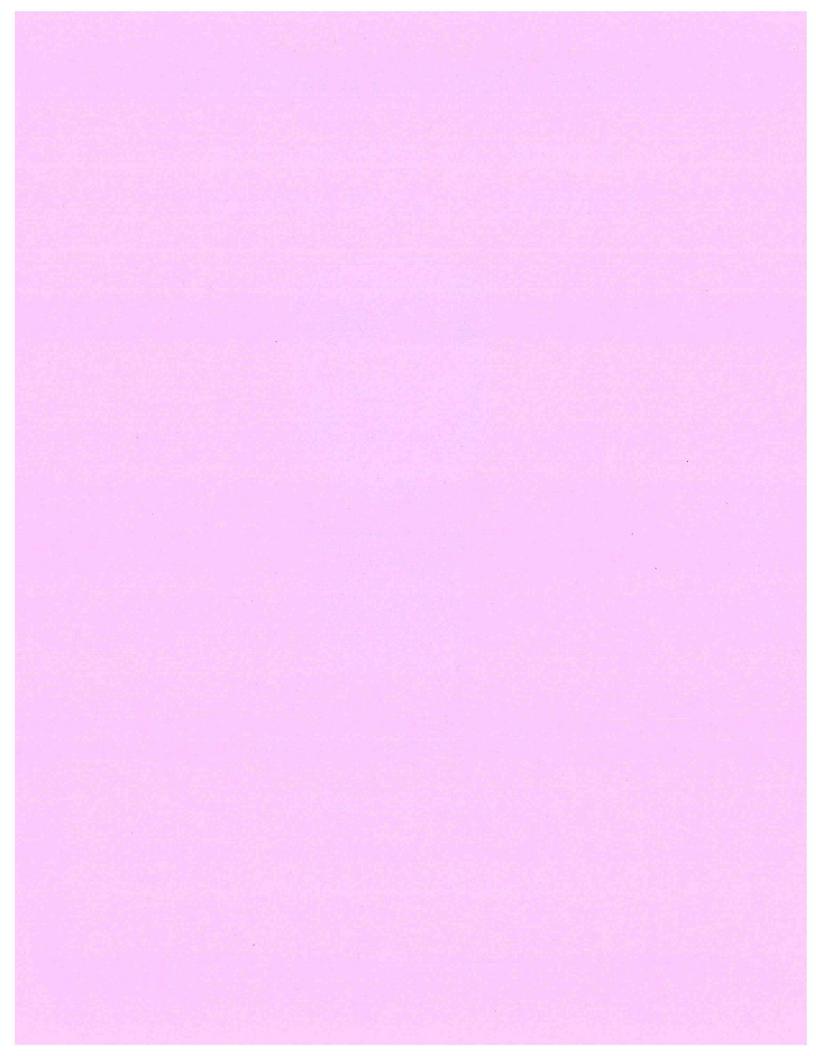

OPERATIONAL PERIOD

8/20/2020 0700

to

8/21/2020 0700

Briefing on CDF TAC 24

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date Fro	om: 8/20/2020	Date To:	8/21/2020
RIVER AND CARMEL		Time Fro	om: 0700	Time To:	0700
3. Objective(s):					
Management Objectives					
-Provide for and maintain emergency personnel an	d public safety at all times.				*
-Ensure COVID -19 precautions and best practices	are met at all times.				
-Protect property, improvements, and infrastructure	e.				
-Ensure coordinated, timely and accurate release of	of public information.				
-Foster and maintain relationships with all cooperat	tors and stakeholders.				
-Protect economic, natural, cultural and heritage re	sources.				
-Maintain fiscal accountability and keep costs comr	mensurate with values at risk.				
River Control Objectives					
-Keep the fire North of Greenfield					
-Keep the fire South of Mudhen Lake Fort Ord					
-Keep the fire East of Corral de Tierra Road					
-Keep the fire West of River Road					
Carmel Control Objectives					
-Keep the fire North of Hennicksons Ridge					
-Keep the fire South of Klondike Canyon					ê
-Keep the fire East Corral Viejo Canyon					
-Keep the fire West of Robinson Canyon Road

INCIDENT Weather Forecast

FORECAST NO: 2

PREDICTION FOR: 24 Hour Shift

SHIFT DATE: 08/20/20

TIME AND DATE

.THURSDAY . . .

FORECAST ISSUED: 2000 on 08/19/20

NAME OF FIRE: River UNIT: Cal Fire CA-BEU

SIGNED:

Jim Dudley Incident Meteorologist

<u>WEATHER DISCUSSION</u>: High pressure will finally weaken and move to the east as a weak trough of low pressure moves across the fire area on Thursday and Friday. Gusty afternoon winds will affect the fire on Thursday afternoon as cooler, marine air infiltrates the area. Temperatures will be moderately cooler on Friday with relative humidity trending upward. Winds on Friday will be mainly terrain driven with afternoon sea breezes.

Sky/weather.....Areas of morning smoke...patchy smoke in the afternoon. Max temperature....85-90. Min humidity......15-23 percent. Wind (20 ft)......Downslope 2-5 mph 0800 then becoming upslope 3-8 mph with gusts to 14 mph through 1300. Winds increasing after 1500 with west to northwest winds 12-20 mph with gusts to 30 mph. CWR..... percent. LAL....1. Mixing height......Increasing to 2500 feet agl by 1200 then to 5000 feet agl in the afternoon. Transport winds.....Northwest around 12 mph. Marine layer......None. .THURSDAY NIGHT... Sky/weather.....Patchy Smoke otherwise clear. Min temperature....65-70. Max humidity......45-50 percent. Wind (20 ft).........West to northwest 9-13 mph with gusts to 20 mph through 2000 then Becoming downslope 2-5 mph. CWR..... percent. LAL....1. Mixing height.....Lowering to less than 500 ft AGL. Transport winds.....Northwest around 7 mph. Marine layer......Shallow to less than 1000 ft. .FRIDAY . . . Sky/weather..... Patchy smoke otherwise mostly sunny. Cooler. Max temperature..... Highs 78-84. Min humidity.....30-35 percent. Wind (20 ft)........Downslope 2-5 mph through 0800 then becoming upslope 3-8 mph with gusts to 14 mph through 1300. Winds then west to northwest 7-15 mph with gusts to 23 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 5000 ft AGL. Transport winds.....West around 5 mph. Marine layer.....Less than 1000 ft through 1000 then none.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4 TYPE OF FIRE: Wildfire

FIRE NAME: River OPERATIONAL PERIOD: 8/20-21/20 0700-0700

DATE ISSUED: 8/19/20 TIME ISSUED: 2200

INPUTS

WEATHER SUMMARY:

The weather will remain warm and dry today with temperatures 85-90 degrees and relative humidity 15-23 percent. Overnight humidity should have a better recovery to 45-50 percent. Winds will be slope driven in the morning becoming west to northwest at 12-20 mph with gust to 30 mph. Refer to the weather forecast for more detailed information.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire area has been shaded by smoke at lower and higher elevations with slight lifting in the late morning and early afternoon. This will continue today, with slightly higher lifting in the afternoon. This shading has moderated the fire behavior slightly, which will increase if the air above clears allowing sun onto the fuels. The inversion has also prevented large plum growth and has reduced the spotting distance. The fire has become well established in the drainages to the west of the main ridge system on the southern portion.

SPECIFIC:

The north portion of the fire burned towards the residential areas to the north. The ridges are exposed and have light fuels, pay attention for the potential of the west wind to drive the fire towards the homes, as it transitions slopes. The east side of the fire will continue to back down the slopes to the valley floor and the agricultural fields. The southern portion of the east flank could be influenced by the stronger wind burning across the slope and making u hill runs in the sheltered areas. The southern portion of the fire has continued to progress south and west and will continue to back down into the canyon towards Carmel Valley Road. Watch for downslope/canyon winds to push it to the valley bottom. The west flank of the fire is predominately on top of the ridge and will have the driest conditions, and the wind will be parallel to the ridge during the day. Watch for rolling material igniting fire below you on the sections of the ridge where the fire has dropped below the ridge to the west.

AIR OPERATIONS

The mixing height above the fire may limit aircraft use over portions of the fire.

SAFETY

The River Fire and Carmel Fire are burning in close proximity to each other, make sure you are aware where the opposite fire is and burning conditions.

INCIDENT Weather Forecast

FORECAST NO: 1

PREDICTION FOR: 24 Hour Shift

SHIFT DATE: 08/20/20

TIME AND DATE

FORECAST ISSUED: 2000 on 08/19/20

NAME OF FIRE: Carmel UNIT: Cal Fire CA-BEU

SIGNED:

Jim Dudley Incident Meteorologist

<u>WEATHER DISCUSSION:</u> High pressure will finally weaken and move to the east as a weak trough of low pressure moves across the fire area on Thursday and Friday. Gusty afternoon winds will affect the fire on Thursday afternoon as cooler, marine air infiltrates the area. Temperatures will be moderately cooler on Friday with relative humidity trending upward. Winds on Friday will be mainly terrain driven with afternoon sea breezes.

Sky/weather.....Areas of morning smoke...patchy smoke in the afternoon. Max temperature....77-80. Min humidity......15-23 percent. Wind (20 ft)......Downslope 2-5 mph 0800 then becoming upslope 3-7 mph with gusts to 12 mph through 1300. Winds becoming west to northwest 6-10 mph with gusts to 18 mph after 1300. CWR..... percent. LAL....1. Mixing height......Increasing to 2500 feet agl by 1200 then to 5000 feet agl in the afternoon. Transport winds.....Northwest around 12 mph. Marine layer.....None. .THURSDAY NIGHT... Sky/weather.....Patchy Smoke otherwise clear. Min temperature....60-65. Max humidity......65-70 percent. Wind (20 ft).....West to northwest 4-9 mph with gusts to 13 mph through 2000 then Becoming downslope 2-5 mph. CWR..... percent. LAL....1. Mixing height.....Lowering to less than 500 ft AGL. Transport winds.....Northwest around 7 mph. Marine layer......Shallow to less than 1000 ft. Sky/weather.....Patchy smoke otherwise mostly sunny. Cooler. Max temperature.....Highs 76-82. Min humidity.....40-45 percent. Wind (20 ft)......Downslope 2-5 mph through 0800 then becoming upslope 3-6 mph with gusts to 10 mph through 1300. Winds the west to northwest 5-10 mph with gusts to 16 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 5000 ft AGL. Transport winds....West around 5 mph. Marine layer.....Less than 1000 ft through 1000 then none.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2 TYPE OF FIRE: Wildfire

FIRE NAME: Carmel OPERATIONAL PERIOD: 8/20-21/20 0700-0700

DATE ISSUED: 8/19/20 TIME ISSUED: 2200 /

UNIT: BEU – San Benito Monterey SIGNED:

Typed/printed: Don Watt FBAN

INPUTS

WEATHER SUMMARY:

The weather will remain warm and dry today with temperatures 77-80 degrees and relative humidity 15-23 percent. Overnight humidity should have a better recovery to 65-70 percent. Winds will be slope driven in the morning becoming west to northwest at 6-10 mph with gust to 18 mph. Refer to the weather forecast for more detailed information.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire area has been shaded by smoke at lower and higher elevations with slight lifting in the late morning and early afternoon. This will continue today, with slightly higher lifting in the afternoon. This shading has moderated the fire behavior slightly, which will increase if the air above clears allowing sun onto the fuels. The inversion has also prevented large plum growth and has reduced the spotting distance. The wind will be in line with the valley bottom, from the northwest. The downcanyon winds will bring fire from the ridge tops to the valley overnight.

SPECIFIC:

The wind pattern will continue to spread the fire to the southeast during the day. Downslope/canyon winds in the evening could develop. The north side of the fire on the ridge above Carmel Valley Road could develop the strongest downslope/canyon winds. In the same area the River Fire is on the opposite slope above the road. Be aware of the fire conditions and the weather of both fires. The north side of the fire will continue to back against the wind and could be influenced with downcanyon winds in the evening. The fuels in the fire area are dry and will create spotting issues from the trees, however should remain short range with the inversion. The south end of the fire will be in an area of multiple drainages, be aware of slope reversal of the fire front.

AIR OPERATIONS

The mixing height above the fire is low which may limit aircraft use over portions of the fire.

SAFETY

The environment is dryer than in the past days increasing the potential for spots and increased fire behavior. Watch for wind and slope alignment as the wind shifts throughout the day.

SAFETY MESSAGE/PLAN (ICS 208)

INCIDENT NAME: River
CA-BEU-004024

Operational Period: Date From: 8/20/20
Time From: 0700

MAJOR HAZARDS AND RISKS:

IIII

Wildland/Urban Interface:

Reference the CAL FIRE structure defense guide card & pg. 12-16 in the IRPG. Keep alert for WUI hazards.

Entrapment Avoidance:

Adhere to the 10 Standard Firefighting orders. Consider the 18 Situations that Shout Watch Out. Consider the Common Denominators of Fire Behavior on Tragedy Fires. Maintain LCES. Establish your decision point(s). Conduct risk management.

<u>Hydration/Nutrition/Fatigue:</u>

Drink plenty of fluids throughout the day and eat accordingly. Address dehydration and fatigue concerns immediately upon symptom onset.

Driving:

Steep, narrow or dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving. Follow posted speed limits while driving in Toro base camp.

Power lines:

Follow Power Line Safety guidelines (IRPG pg.24.)

Follow FIRESCOPE identification and management of Life Safety Zones procedures, 3 horizontal strands of fire line tape, write "Do not enter" or "Do not cross"

Heavy Equipment:

Utilize good spacing and watch for rollout and falling debris. Stay visible and work above and not below equipment. Maintain situational awareness at all times.

Hazardous Trees and Snags:

Be alert of snags. When crews are working in a very hazardous area stay diligent and flag hazardous areas. Avoid taking breaks under trees.

Communications:

Ensure your radio load is current per ICS 205 in the IAP.

Place human repeaters as necessary to communicate.

Site Safety Plan Required? Yes: No:X

Approved Site Safety Plan(s) Located at: N/A

Prepared By: Dennis Lange Position/Title: SOF1

CARMEL F	IRE STATUS
Incident Start Date: 8/18/2020	Incident Start Time: 3:00 P.M.
Cause: Under investigation	Acres:
Containment:	Total Personnel:

2-1-1 – The public is encouraged to call 2-1-1 to receive current incident information.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – The Public Information Office would like copies of the videos and pictures that you may take when *not* engaged in fire suppression activity, duties of your overhead assignment, or in an unsafe environment. Please bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we do not want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident.

####

Training Specialist Message

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist. This will ensure proper that each trainee receive proper credit and documentation for their assignment.

The Training Specialist is in trailer row next to Check -in.

DON'T WAIT UNTIL DEMOBILIZATION TO STOP BY.

Dave Randolph Training Specialist (805) 857-4820

Archaeological and Historical Sites Fireline Guidance for the River Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brownblack soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
- 2. No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
- 3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- 4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Narrative

Suppression Repair is conducted under the authority of sections 4675 and 4676 of the Public Resources Code. Suppression Rehabilitation is the necessary and reasonable repairs made and actions taken to minimize the effects of fire suppression activities on state and private property, soil, watercourses, cultural resources, wildlife and fish habitat. The following specifications shall be used in the repair of suppression activity associated with the River Incident:

Control Lines:

- 1. Where excessive berms were formed, back blade or pull berms onto control line surface.
- 2. Back blade or pull organic debris onto and scatter evenly over control line surface at designated sensitive areas.
- 3. Construct waterbars on slopes greater than 20% slope.
 - a. Waterbars shall be constructed at 35°-45° angle to the control line.
 - b. Waterbars shall be constructed to a depth of 6 inches below grade and 6 inches above grade.
 - c. Discharge shall be free of obstruction and where possible, shall discharge into rock, vegetation or other material that will disperse the water and reduce its energy.
 - d. Space waterbars every 75-100 feet on slopes 25 percent or less, 50 feet on slopes 26-50 percent and 30 feet on slopes greater than 50 percent.
- 4. On out sloped roads, remove lower berm, formed during suppression activity, to allow water to flow off the surface evenly.
- 5. At access points to dozer lines, scatter brush and other organic material available from suppression activity to hide the entrance and discourage use of the line.

Watercourse Crossings and Waterways:

- 1. Remove dirt and other debris deposited in the watercourse to allow free flow of water and reduce the movement of material downstream.
- 2. Re-slope watercourse to original channel shape and location.
- 3. Notify fire suppression repair specialist of any damage to water diversion devices, such as culverts.

Access Roads:

- 1. Re-slope all constructed access roads to as natural as shape as existed before their use on the incident.
- 2. Breach berms according to the spacing standards for waterbars on dozer line.

Areas of Special Concern:

- 1. Archaeological Site:
 - a. Archaeological sites shall be evaluated for impact and need for State Archaeologist involvement. Sites shall be treated per Archaeological Certified staff or State Archaeologist.

General Cleanup:

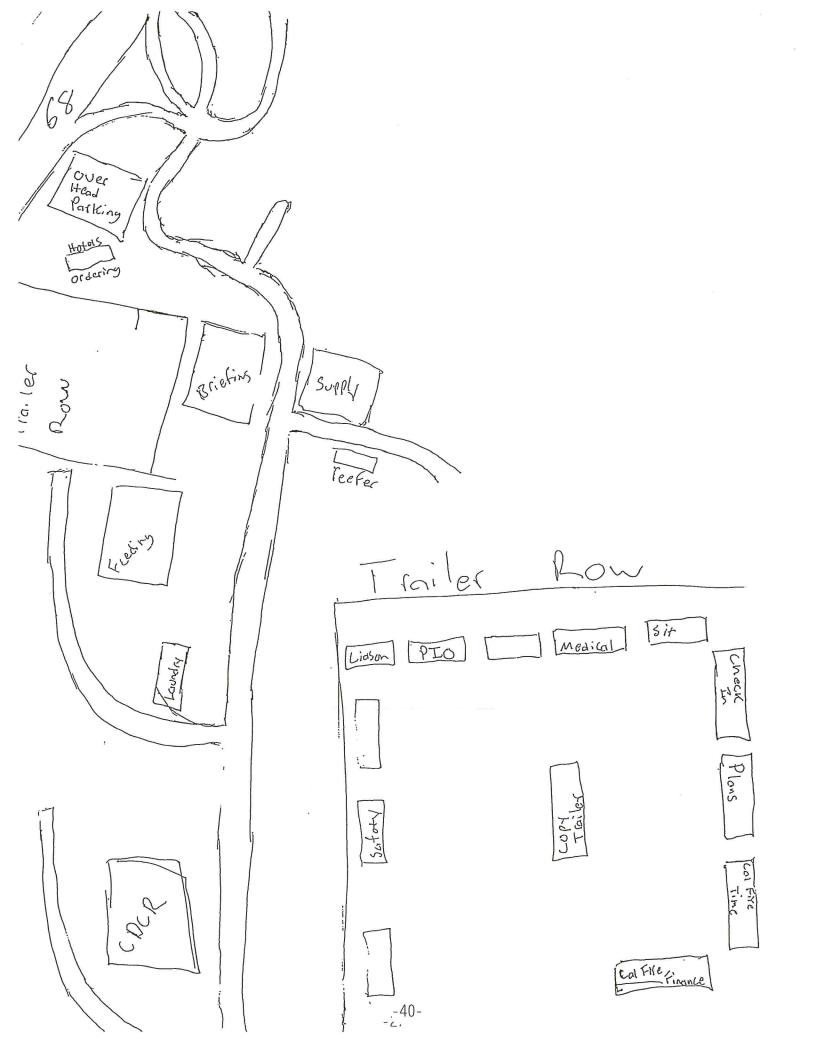

1. Collect <u>any and all</u> forms of trash such as plastic water bottles, cardboard, plastic flagging, foodstuffs, wrappers, blown hose and plastic bags and PACK IT OUT or ARRANGE FOR MATERIAL TO BE FLOWN OUT.
