FIRE BEHAVIOR FORECAST FORECAST NUMBER: 10 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: 8/26-27/20 0700-0700 DATE ISSUED: 8/25/20 UNIT: BEU – San Benito Monterey Typed/printed: Don Watt FBAN INPUTS

WEATHER SUMMARY:

There will be fog in the lower slopes and valleys through 1000. The maximum temperature will be 74-82 degrees, with a minimum humidity of 45-55 percent in the lower slopes and 35-45 in the upper slopes and ridges. Wind will be terrain driven through the morning becoming west to northwest 5-11 mph with gust to 16 mph in the afternoon. Overnight the fog will return to the lower slopes and valleys. The temperature will drop to 56-63 degrees, and humidity will be 90-100 percent in the lower slopes and 60-65 percent on the upper slopes and ridges. Winds will turn to downslope 2-6 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The weather will be clear today allowing more solar heating of the fuels. Heating of the fuels will increase the activity of smoldering fuels. The areas with incomplete combustion of the fuels and the unburned between the fire line and the fire will become active after noon. The wind will also increase the activity as it increases in the afternoon. The oaks and larger brush will contribute to rolling material, potentially creating a spot fire. When working in areas with underslung line be aware of smoldering rolling below the line. Continue to look up into the canopy when working in the oak trees, there may be dead limbs smoldering or internal burning in the canopy.

SPECIFIC:

Portions of Division A and D continue to have fire backing towards the control line. These sections will be in the fog belt in the morning and may continue to burn actively after the suns warms the fuels. The southern Portion of Division D and F will increase in activity with the increasing wind, especially on the exposed ridges containing brush fields. The grazed fields will not burn unless there is a strong wind to move the fire, creating sheeting in the short grass. The west wide of the fire, in Divisions F, I, and L, there is still the potential for rolling material to ignite fuels on the opposite side of the fire line.

AIR OPERATIONS

There will be some haze throughout the day but should not restrict aircraft over the fire. Make sure to be clear of the area when helicopters are dropping in your area.

SAFETY

Steep terrain can create several hazards, watch you footing and be aware of people and equipment working above you.

The fire has had time to consume heavy materials creating stump holes and ash pits, watch where you are walking and working.

The maximum temperature will be 74-80 degrees, with a minimum humidity of 45-55 percent in the lower slopes and 35-45 in the upper slopes and ridges. Wind will be terrain driven through the morning becoming west to northwest 5-11 mph with gust to 16 mph in the afternoon. Overnight the fog will return to the lower slopes and valleys. The temperature will drop to 65-72 degrees, and humidity will be 90-100 percent in the lower slopes and 60-65 percent on the upper slopes and ridges. Winds will turn to downslope 2-6 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The weather will be clear today with smoke clearing throughout the day, this will allow more solar heating of the fuels. Heating of the fuels will increase the activity of smoldering fuels. The areas with incomplete combustion of the fuels and the unburned between the fire line and the fire will become active after noon. The wind will also increase the activity as it increases in the afternoon. The oaks and larger brush will contribute to rolling material, potentially creating a spot fire. When working in areas with underslung line be aware of smoldering rolling below the line. Continue to look up into the canopy when working in the oak trees, there may be dead limbs smoldering or internal burning in the canopy.

SPECIFIC:

In Divisions AA, KK, and QQ, the main issue for the fire will be rolling material in the steep terrain, especially in the Carmel River canyon. There are sections of the line where the heavy material has been smoldering and shifting causing them to break free and roll. The areas around the structures will continue to have smoldering material, especially as you move farther out from the buildings, continue to work these areas to reduce the potential for any issues as repopulation continues.

AIR OPERATIONS

There will be some haze throughout the day but should not restrict aircraft over the fire. Make sure to be clear of the area when helicopters are dropping in your area.

SAFETY

Steep terrain can create several hazards, watch you footing and be aware of people and equipment working above you.

The fire has had time to consume heavy materials creating stump holes and ash pits, watch where you are walking and working.

EVENING PUBLIC BRIEFING STREAM – We will be providing a nightly public Incident Update Briefing. The live stream can be found at the local Unit social media profiles listed above.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691.

PHOTOGRAPHS AND VIDEOS OF INCIDENT –The Public Information Office would like copies of the videos and pictures that you may take when *not* engaged in fire suppression activity, duties of your overhead assignment, or in an unsafe environment. Please bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we do not want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident.

MAIL DELIVERY – As a courtesy, the following address has been secured for assigned personnel to has personal correspondence delivered.

Training Specialist Message

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist. This will ensure proper that each trainee receive proper credit and documentation for their assignment.

The Training Specialist is in trailer row next to Check -in.

Before Trainee's are demob'd, please close out with the Training Specialist. Trainee's will need to bring a completed:

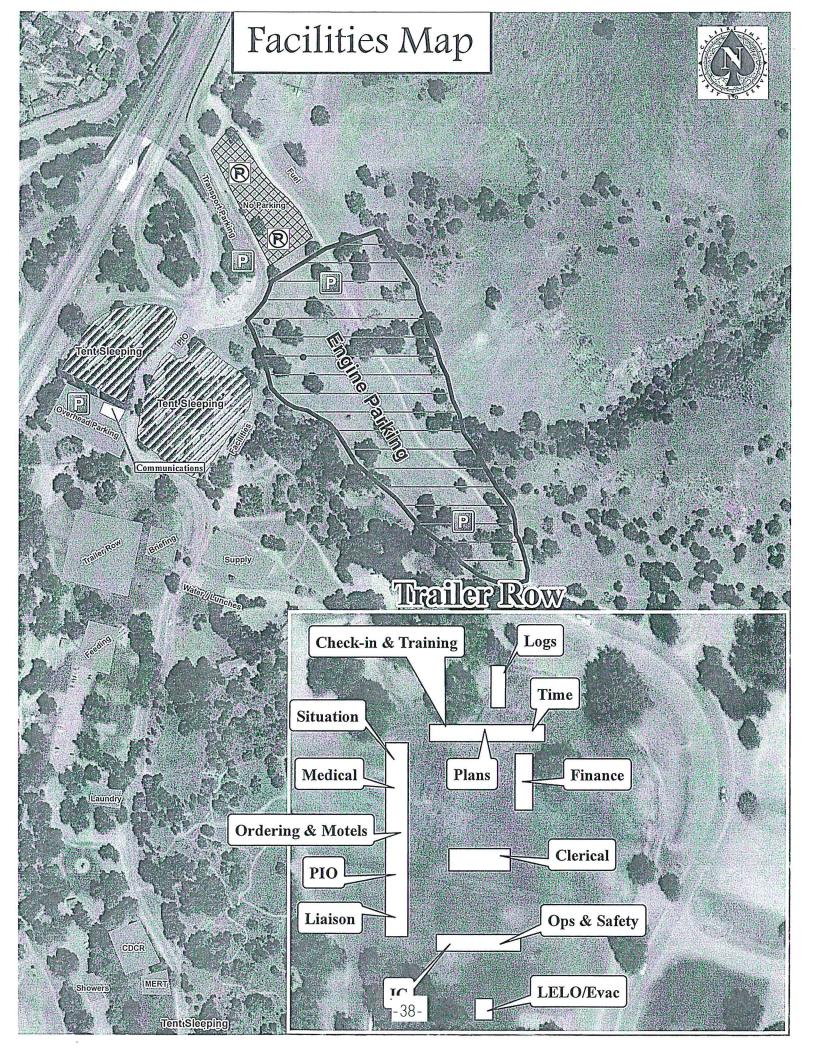

- √ Position Task book
- √ ICS-225 Incident Personnel Performance Rating
- √ Evaluation Record

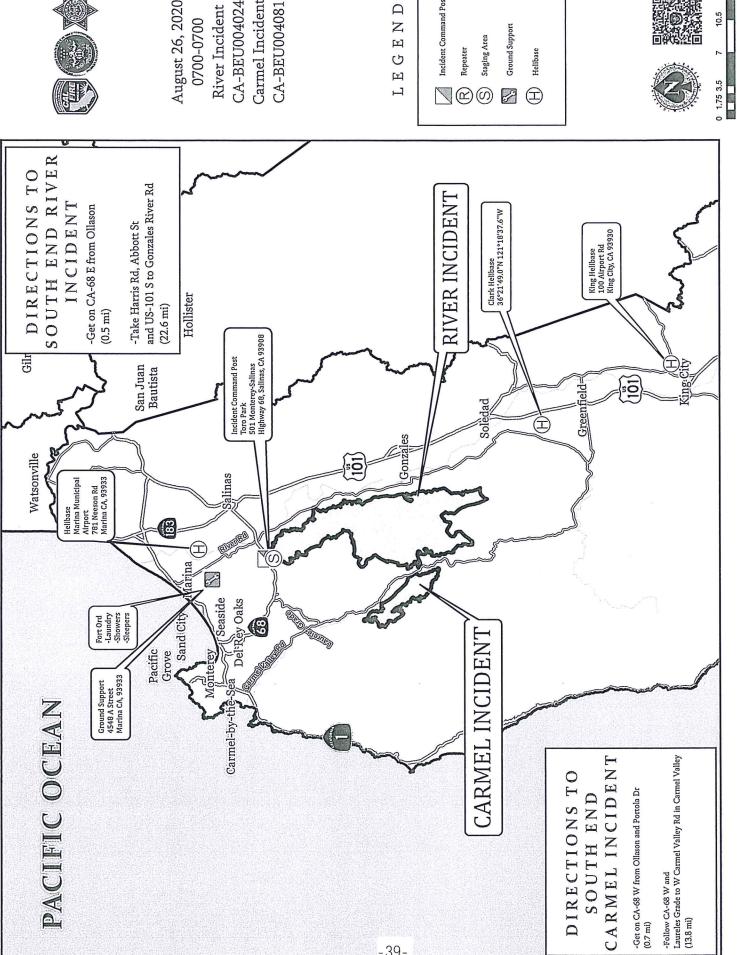

Don't wait until demobilization to stop by for any questions.

Archaeological and Historical Sites Fireline Guidance for the River and Carmel Incidents Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites contain circular depressions (house pits), artifact scatters, grinding holes in rocks (bedrock mortars), and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, stone buildings, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
- 2. Some archaeological sites have been flagged with orange and white candy-striped "Special Treatment Zone" flagging. If you encounter a flagged area, heavy equipment should not enter or operate within the area. If such an area is entered or operated in, please inform the State Archaeologist. Any questions regarding flagged sites can be directed to the State Archaeologist.
- 3. While some sites have been flagged, many have not. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- 4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor and/or the State Archaeologist. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
