8/29/2020 0700

Briefing on CDF TAC 24

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	8/28/2020	Date To:	8/29/2020
RIVER AND CARMEL		Time From:	0700	Time To:	0700
3. Objective(s):					
Management Objectives					
-Provide for and maintain emergency personnel an	d public safety at all times.				
-Ensure COVID -19 precautions and best practices	are met at all times.				
-Protect property, improvements, and infrastructure	e.				
-Ensure coordinated, timely and accurate release of	of public information.				
-Foster and maintain relationships with all cooperate	tors and stakeholders.				
-Protect economic, natural, cultural and heritage re	esources.				
-Maintain fiscal accountability and keep costs comm	mensurate with values at risk.				
River Control Objectives					
-Keep the fire North of Arroyo Seco Road					
-Keep the fire South of Mudhen Lake Fort Ord					
-Keep the fire East of Carmel Valley Road					
-Keep the fire West of River Road					
Carmel Control Objectives					
-Keep the fire within current fire perimeter

INCIDENT Weather Forecast

FORECAST NO: 10

PREDICTION FOR: 24 Hour Shift

SHIFT DATE: 08/28/20 TIME AND DATE

FORECAST ISSUED: 1900 on 08/27/20

NAME OF FIRE: River UNIT: Cal Fire CA-BEU

SIGNED:

Jim Dudley Incident Meteorologist

<u>WEATHER DISCUSSION:</u> Low pressure will remain off the Central California Coast for the next few days and that will keep the onshore flow and nightly marine intrusions in place over the fire area. With this, overnight fog and low clouds will move in in the evenings and persist over the valleys and lower slopes through mid to late mornings. Afternoons will feature mainly sunny skies. Overnight humidity recovery will be excellent below the marine layer and good to moderate above. Winds will remain terrain driven through early afternoon with normal slope...canyon and valley conditions prevailing. Afternoon sea breezes will affect valleys closer to the coast as well as the slopes facing the Salinas Valley.

.FRIDAY . . . Sky/weather.....Patchy fog and low clouds lower slopes through 0900 otherwise sunny. Max temperature.....Highs 74-83 lower elevations...86-91 higher terrain. Min humidity......37-47 percent lower slopes...25-37 percent ridges and higher elevations. Wind (20 ft)........Downslope/downcanyon 2-6 mph through 0800 then upslope/upcanyon 3-8 mph with gusts to 15 mph after 1300. West to northwest wind 5-11 mph in the afternoon with gusts to 16 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 6000 ft AGL. Transport winds.....Southeast around 9 mph. Marine layer......Around 1500 ft. .FRIDAY NIGHT... Sky/weather.....Patchy fog and low clouds lower slopes...otherwise clear. Min temperature.....55-62 lower slopes and valleys...66-73 higher terrain and ridges. Max humidity.....75-90 percent lower slopes and valleys...28-33 percent higher terrain and ridges. Wind (20 ft)......Downslope/downcanyon 2-6 mph. CWR..... percent. LAL....1. Mixing height......Lowering to around 900 ft AGL. Transport winds.....East around 5 mph. Marine layer......Around 1500 ft. .SATURDAY . . . Sky/weather.....Patchy fog and low clouds lower slopes through 0900 otherwise sunny. Max temperature.....Highs 73-82 lower elevations...85-90 higher terrain. Min humidity......36-46 percent lower slopes...25-35 percent ridges and higher elevations. Wind (20 ft)......Downslope/downcanyon 2-6 mph through 0800 then upslope/upcanyon 3-8 mph with gusts to 15 mph after 1300. West to northwest wind 5-11mph in the afternoon with gusts to 16 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 6000 ft AGL. Transport winds.....East around 10 mph. Marine layer.....Around 1000 ft.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 12 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: 8/28-29/20 0700-0700 DATE ISSUED: 8/27/20 UNIT: BEU – San Benito Monterey Typed/printed: Don Watt FBAN INPUTS

WEATHER SUMMARY:

There will be fog in the lower slopes and valleys through 0900. The maximum temperature will be 74-91 degrees, with a minimum humidity of 37-47 percent in the lower slopes and 25-37 in the upper slopes and ridges. Wind will be terrain driven through the morning becoming west to northwest 5-11 mph with gust to 16 mph in the afternoon. Overnight patchy fog will return to the lower slopes and valleys. The temperature will drop to 55-73 degrees, and humidity will be 75-90 percent in the lower slopes and 28-33 percent on the upper slopes and ridges. Winds will turn to downslope 2-6 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The weather will be clear today when the marine layer clears in the lower elevations, this will allow more solar heating of the fuels. Heating of the fuels will increase the activity of smoldering fuels. The areas with incomplete combustion of the fuels and the unburned between the fire line and the fire will become active in the late afternoon. The wind will also increase the activity as it increases in the afternoon as the wind increases ahead of the marine layer. When working in areas with underslung line be aware of smoldering material rolling below the line. Continue to look up into the canopy when working in the oak trees, there may be dead limbs smoldering or internal burning in the tree trunk and limbs.

SPECIFIC:

Portions of Division A and D continue to have fire backing towards the control line. These sections will be in the fog belt in the morning and will continue to burn actively after the suns warms the fuels. The southern Portion of Division D and F will increase in activity with the increasing wind, especially on the exposed ridges containing brush fields. The west wide of the fire, in Divisions F, I, and L, there is still the potential for rolling material to ignite fuels on the opposite side of the fire line.

AIR OPERATIONS

The marine layer will restrict aircraft from the King City Helibase in the morning and early evening.

SAFETY

Steep terrain can create several hazards, watch you footing and be aware of people and equipment working above you.

INCIDENT Weather Forecast

FORECAST NO: 9

PREDICTION FOR: 24 Hour Shift

SHIFT DATE: 08/28/20 TIME AND DATE

FORECAST ISSUED: 1900 on 08/27/20

NAME OF FIRE: Carmel UNIT: Cal Fire CA-BEU

SIGNED:

Jim Dudley Incident Meteorologist

<u>WEATHER DISCUSSION:</u> Low pressure will remain off the Central California Coast for the next few days and that will keep the onshore flow and nightly marine intrusions in place over the fire area. With this, overnight fog and low clouds will move in in the evenings and persist over the valleys and lower slopes through mid to late mornings. Afternoons will feature mainly sunny skies. Overnight humidity recovery will be excellent below the marine layer and good to moderate above. Winds will remain terrain driven through early afternoon with normal slope...canyon and valley conditions prevailing. Afternoon sea breezes will affect valleys closer to the coast as well as the slopes facing the Salinas Valley.

.FRIDAY . . . Sky/weather.....Patchy fog and low clouds lower slopes through 0900 otherwise sunny. Max temperature.....Highs 74-83. Min humidity......37-47 percent lower slopes...25-37 percent ridges and higher elevations. Wind (20 ft)......Downslope/downcanyon 2-6 mph through 0800 then upslope/upcanyon 3-8 mph with gusts to 15 mph after 1300. West to northwest wind 5-11 mph in the afternoon with gusts to 16 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 6000 ft AGL. Transport winds.....Southeast around 9 mph. Marine layer.....Around 1500 ft. .FRIDAY NIGHT... Sky/weather.....Patchy fog and low clouds lower slopes...otherwise clear. Min temperature.....55-62 lower slopes and valleys...66-73 higher terrain and ridges. Max humidity......75-90 percent. Wind (20 ft)......Downslope/downcanyon 2-6 mph. CWR..... percent. LAL....1. Mixing height.....Lowering to around 900 ft AGL. Transport winds.....East around 5 mph. Marine layer......Around 1500 ft. .SATURDAY . . . Sky/weather.....Patchy fog and low clouds lower slopes through 0900 otherwise sunny. Max temperature.....Highs 73-82. Min humidity......36-46 percent lower slopes...25-35 percent ridges and higher elevations. Wind (20 ft)........Downslope/downcanyon 2-6 mph through 0800 then upslope/upcanyon 3-8 mph with gusts to 15 mph after 1300. West to northwest wind 5-11mph in the afternoon with gusts to 16 mph. CWR..... percent. LAL....1. Mixing height......Increasing to around 6000 ft AGL. Transport winds.....East around 10 mph. Marine layer.....Around 1000 ft.

FORECAST NUMBER: 10 FORECAST NUMBER: 10 FIRE NAME: Carmel DATE ISSUED: 8/27/20 UNIT: BEU – San Benito Monterey Typed/printed: Don Watt FBAN

INPUTS

WEATHER SUMMARY:

There will be fog in the lower slopes and valleys through 0900. The maximum temperature will be 74-83 degrees, with a minimum humidity of 37-47 percent in the lower slopes and 25-37 in the upper slopes and ridges. Wind will be terrain driven through the morning becoming west to northwest 5-11 mph with gust to 16 mph in the afternoon. Overnight the fog will return to the lower slopes and valleys. The temperature will drop to 55-73 degrees, and humidity will be 75-90. Winds will turn to downslope 2-6 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The weather will be clear today when the marine layer clears in the lower elevations, this will allow more solar heating of the fuels. Heating of the fuels will increase the activity of smoldering fuels. The areas with incomplete combustion of the fuels and the unburned between the fire line and the fire will become active in the late afternoon. The wind will also increase the activity as it increases in the afternoon as the wind increases ahead of the marine layer. When working in areas with underslung line be aware of smoldering material rolling below the line. Continue to look up into the canopy when working in the oak trees, there may be dead limbs smoldering or internal burning in the tree trunk and limbs.

SPECIFIC:

Watch for rolling material in the steep terrain, especially in the Carmel River canyon. The areas around the structures will continue to have smoldering material, especially as you move farther out from the buildings, continue to work these areas to reduce the potential for any issues as repopulation continues. The interior fuels will continue to consume as the weather dries out after the marine layer moves out and the sun gets to the fuels. Overnight the marine layer will extinguish the smaller fuels.

AIR OPERATIONS

The marine layer will restrict aircraft from the King City Helibase in the morning and early evening.

SAFETY

Steep terrain can create several hazards, watch you footing and be aware of people and equipment working above you.

SAFETY MESSAGE/PLAN (ICS 208)

Operational Period: Date From: 8/27/20 River: CA-BEU-004024 Date to: 8/28/20 **Carmel:** CA-BEU-004081 Time From: 0700 Time to: 0700

//// MAJOR HAZARDS AND RISKS:

IIII

Driving:

Drive defensively and use seat belts at all times. Expect the unexpected around every curve. Drive slowly and ensure your headlights are on. Steep, narrow or dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving. Follow posted speed limits while driving in Toro base camp

Aircraft Operations:

Use assigned air to ground frequency to communicate with aircraft. Stay clear of both roto wing and fixed wing drop zones. Be clear and concise with your instructions.

Demob:

Reference Agency policy for driving and work rest guide lines. Keep alert and do a vehicle safety circle before and after ever stop.

Fatigue Hydration Nutrition:

Stav hydrated Seek opportunities to cool and rest when incident allows.

Be alert for signs of heat stress in yourself and others.

Drink electrolyte drinks at a 3 water to 1 electrolyte ration.

Communications:

Ensure your radio load is current per ICS 205 in the IAP. Place human repeaters as necessary to communicate. Be clear and concise with instructions.

Power lines:

Follow Power Line Safety guidelines on pg. 24 of the IRPG.

Follow FIRESCOPE identification and management of Life Safety Zones procedures, 3 horizontal strands of fire line tape, write "Do not enter" or "Do not cross"

Hazardous Trees and Snags:

Be alert of snags. When crews are working in a very hazardous area stay diligent and flag hazardous areas. Avoid taking breaks under trees.

Prepared By <u>Dennis Lange</u> Signature: Position/Title: SOF1 Date/Time: 8.25,2020 1800 ICS 208 IAP Page

PERSONNEL WITH COVID-19 SYMPTOMS

- Symptoms per the CDC's current guidelines include the following:
 - o Cough, fever(100.4), chills, muscle pain, shortness of breath, sore throat, new loss of taste or smell
- Incident Base or Fire Line
 - o Maintain appropriate face covering
 - o Notify supervisor and proceed to CALMAT
 - o Isolate and assess patient
 - o Medical direction to test, return patient to home unit/agency for testing

CONTACTED OR EXPOSED PERSONNEL AND ASYMPTOMATIC

- Notify supervisor
- Maintain appropriate face covering
- Self-monitor for symptoms
- Employee will continue assignment with preventative measures

PREVENTATIVE MEASURES TO SLOW THE TRANSMISSION COVID-19:

- Wash your hands regularly with soap and water, or clean them with alcohol-based hand rub.
- Maintain at least six feet distance between you and people coughing or sneezing.
- Avoid touching your face.
- Cover your mouth and nose when coughing or sneezing.
- · Stay home if you feel unwell.
- Refrain from smoking and other activities that weaken the lungs.
- Practice physical distancing by avoiding unnecessary travel and staying away from large groups of people.
- Maintain proper personal care (healthy diet and rest)

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691.

PHOTOGRAPHS AND VIDEOS OF INCIDENT —The Public Information Office would like copies of the videos and pictures that you may take when *not* engaged in fire suppression activity, duties of your overhead assignment, or in an unsafe environment. Please bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we do not want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident.

MAIL DELIVERY – Although we ask that you no longer have mail delivered to the incident, we will continue to accept outgoing letters.

All State, Federal and Local Government Agency Trainees working on Position Task Books will need to be closed out with the Incident Training Specialist by 1200 on Saturday, August 29th. This will ensure that each trainee receive proper credit and documentation for their assignment.

The Training Specialist is in trailer row next to Check -in.

Trainee's will need to bring a completed:

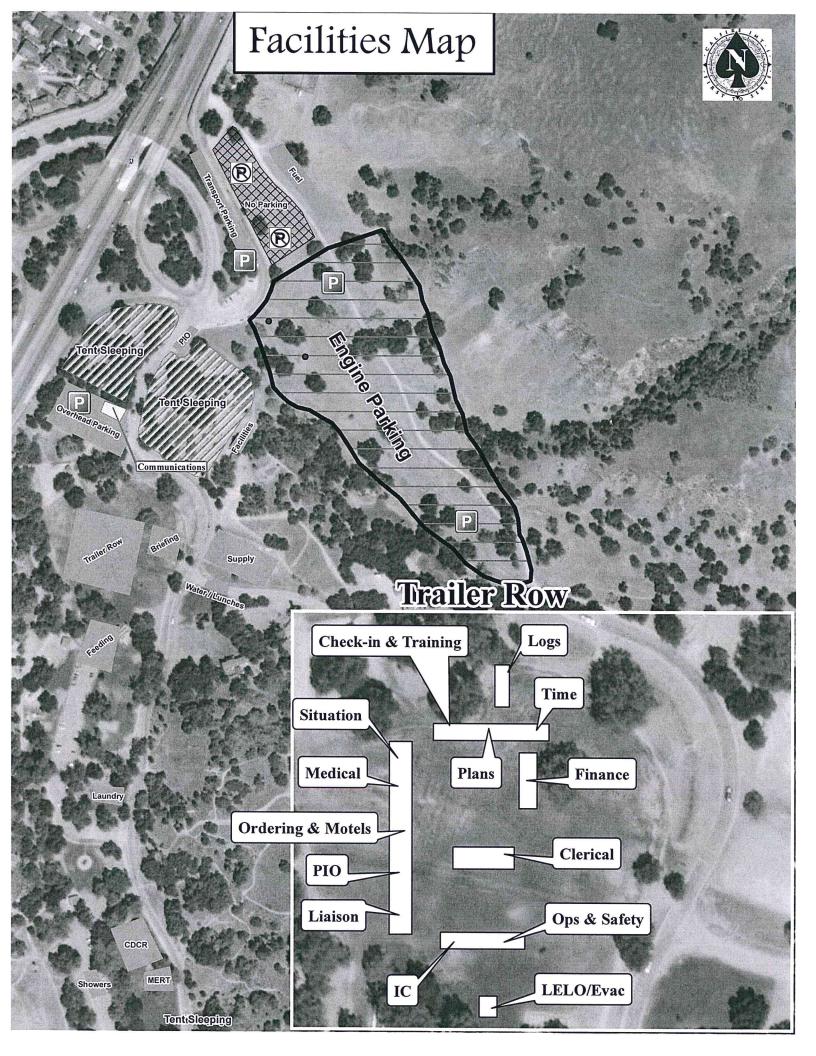

- ✓ Position Task book
- √ ICS-225 Incident Personnel Performance Rating
- √ Evaluation Record

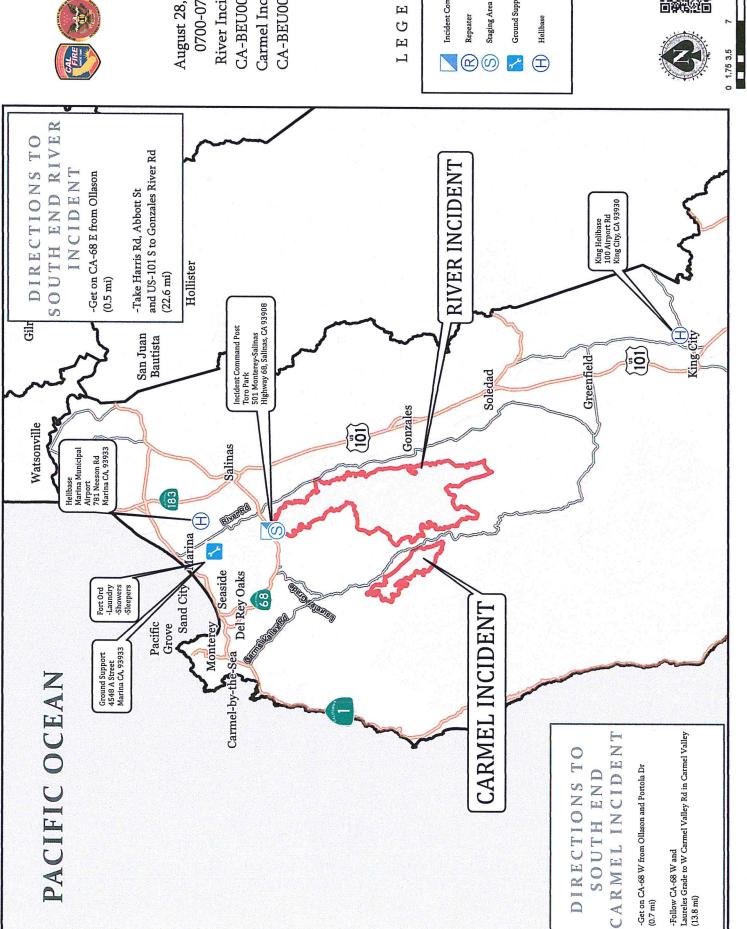

Don't wait until demobilization to stop by for any questions.

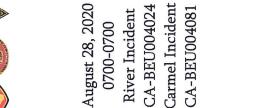

Dave Randolph Training Specialist (805) 857-4820

Archaeological and Historical Sites Fireline Guidance for the River and Carmel Incidents Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites contain circular depressions (house pits), artifact scatters, grinding holes in rocks (bedrock mortars), and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, stone buildings, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
- 2. Some archaeological sites have been flagged with orange and white candy-striped "Special Treatment Zone" flagging. If you encounter a flagged area, heavy equipment should not enter or operate within the area. If such an area is entered or operated in, please inform the State Archaeologist. Any questions regarding flagged sites can be directed to the State Archaeologist.
- 3. While some sites have been flagged, many have not. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- 4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor and/or the State Archaeologist. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
