WEATHER DISCUSSION: Low pressure off the Central California coast will remain in place Sunday before retreating to the southwest beginning Monday. A strong ridge of high pressure will then build into the region next week with a pronounced warming and drying trend. Winds however will not be strong, with normal slope and valley diurnal conditions prevailing. Humidity recoveries will become poorer with each day as temperatures trend to well above normal. Coastal sea breezes and marine layer will become shallower Sunday and Monday with a possible dissipation of the marine layer by Tuesday and Wednesday.

.SUNDAY...

Sky/weather.....Patchy fog and low clouds lowest slopes and valleys through 0900... otherwise sunny.
Max temperature.....80-90.
Min humidity.....25-35 percent lower coastal slopes...15-20 percent ridges and higher elevations.

INPUTS

WEATHER SUMMARY:

There will be fog in the lower slopes and valleys through 0900. The maximum temperature will be 80-90, minimum humidity will be 25-35 percent on the lower slopes and 15-20 percent in the higher elevations and ridges. Wind will be terrain driven through the morning and early afternoon becoming west to northwest 5-11 mph with gust to 18 mph in the afternoon. Overnight patchy fog will return to the lower slopes and valleys. The temperature will drop to 60-75 degrees, and humidity will be 65-75 percent in the lower slopes and 20-30 percent on the upper slopes and ridges. Winds will turn to downslope 2-6 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The marine layer in the morning and the evening will dampen the activity of the smoldering material. The afternoon will be sunny and breezy increasing the smoldering material. The oak trees tend to burn on the interior, continue to look for signs of smoldering in the trunks and the canopy above. If there is a new start in the area it will be wind driven with the terrain winds or the northwest winds in the afternoon. The lower elevations and the sheltered areas will have a slow rate of spread and low intensity levels. The ridges and slopes will burn with a moderate to rapid rate of spread when slope and wind come into alignment.

SPECIFIC:

Sections of the fire line are underslung, ensure those sections are moped up to prevent rolling material across the line. Root systems of trees can still be smoldering under the surface for several days, look for signs of heat around stumps and trees. The weather can be used to your advantage, when the marine layer will increase the moisture in the air increasing the efficiency during mop up. When working in the oak trees be aware of the limbs above which may have been weakened. Rocks in the steep terrain could be unstable as the vegetation holding them in place has burned away.

AIR OPERATIONS

The marine layer will restrict aircraft from the King City Helibase in the morning and early evening.

SAFETY

Remember to wear the appropriate safety equipment for the task being performed. Stumps and root systems have been burning for a while and can collapse into hot ash pits.

//// MAJOR HAZARDS AND RISKS: ////

Driving:

Drive defensively and use seat belts at all times. Expect the unexpected around every curve. Drive slowly and ensure your headlights are on. Steep, narrow or dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving. Follow posted speed limits while driving in Toro base camp

Weather:

Constantly monitor for changes in weather. Areas that may have previously burned can **re-burn**. Utilize your Lookouts, Communications, Escape Routes and Safety Zones.

Demob:

Reference Agency policy for driving and work rest guide lines. Keep alert and do a vehicle safety circle before and after ever stop.

Communications:

Ensure your radio load is current per ICS 205 in the IAP. Place human repeaters as necessary to communicate. Be clear and concise with instructions.

Power lines:

Follow Power Line Safety guidelines on pg. 24 of the IRPG.
Follow FIRESCOPE identification and management of Life Safety Zones procedures, 3 horizontal strands of fire line tape, write "**Do not enter**" or "**Do not cross**"

Personnel Protective Equipment:

Wear the appropriate PPE for the task you are working on. Do not let complacency set in. Utilize your gloves and eye protection per Department policy.

CAL FIRE IMT COVID-19 ACTIONS

PERSONNEL WITH COVID-19 SYMPTOMS

- **Symptoms per the CDC's current guidelines include the following:**
 - Cough, fever(100.4), chills, muscle pain, shortness of breath, sore throat, new loss of taste or smell
- **Incident Base or Fire Line**
 - Maintain appropriate face covering
 - Notify supervisor and proceed to CALMAT
 - Isolate and assess patient
 - Medical direction to test, return patient to home unit/agency for testing

CONTACTED OR EXPOSED PERSONNEL AND ASYMPTOMATIC

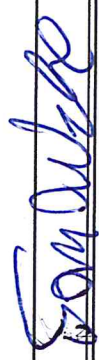

- Notify supervisor
- Maintain appropriate face covering
- Self-monitor for symptoms
- Employee will continue assignment with preventative measures

PREVENTATIVE MEASURES TO SLOW THE TRANSMISSION COVID-19:

- Wash your hands regularly with soap and water, or clean them with alcohol-based hand rub.
- Maintain at least six feet distance between you and people coughing or sneezing.
- Avoid touching your face.
- Cover your mouth and nose when coughing or sneezing.
- Stay home if you feel unwell.
- Refrain from smoking and other activities that weaken the lungs.
- Practice physical distancing by avoiding unnecessary travel and staying away from large groups of people.
- Maintain proper personal care (healthy diet and rest)

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691.

PHOTOGRAPHS AND VIDEOS OF INCIDENT –The Public Information Office would like copies of the videos and pictures that you may take when *not* engaged in fire suppression activity, duties of your overhead assignment, or in an unsafe environment. Please bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we do not want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

Archaeological and Historical Sites

Fireline Guidance for the River and Carmel Incidents

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites contain circular depressions (house pits), artifact scatters, grinding holes in rocks (bedrock mortars), and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, stone buildings, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological sites have been flagged with orange and white candy-striped "Special Treatment Zone" flagging. If you encounter a flagged area, heavy equipment should not enter or operate within the area. If such an area is entered or operated in, please inform the State Archaeologist. Any questions regarding flagged sites can be directed to the State Archaeologist.
3. While some sites have been flagged, many have not. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor and/or the State Archaeologist. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
