Spot Forecast for River...CAL FIRE  
National Weather Service San Francisco Bay Area  
608 PM PDT Mon Aug 17 2020

.DISCUSSION...Hot weather will continue through Tuesday as high pressure continues over the area. Temperatures will be a few degrees cooler on Wednesday followed by more cooling on Thursday as high pressure weakens. Marine layer will remain very shallow through Tuesday night resulting in poor overnight RH recoveries. Seabreeze winds are expected to remain light through Tuesday night. By Wednesday the marine layer may deepen enough to allow gusty seabreeze winds to make it to the burn area Wednesday afternoon.

.TUESDAY...

Sky/weather.....Sunny.  
Max temperature.....88-93.  
Min humidity.....25-30 percent.  
Wind (20 ft).....West winds 5 to 10 mph.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 2</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: River</b>	<b>OPERATIONAL PERIOD: 8/18-19/20 0700-0700</b>
<b>DATE ISSUED: 8/17/20</b>	<b>TIME ISSUED: 2200</b>
<b>UNIT: BEU – San Benito Monterey</b>	<b>SIGNED: </b>

### INPUTS

#### WEATHER SUMMARY:

The weather will remain warm and dry for the next several days with a high pressure over the area. The marine layer will not have an effect on the fire area overnight. High temperatures will be 88-93 degrees with minimum relative humidity 25-30 percent. Low temperature overnight will be 69-74 degrees and relative humidity 40-45 percent. Winds will be west 5 to 10 mph during the day changing to northwest up to 5 mph overnight. Transport winds will be northwest around 10 mph during the day dropping to 5-10 mph overnight.

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

The fire has been the most active in the brush fields with flame lengths up to 20 feet and a moderate rate of spread, less than 20 ch/hr. This will increase during upslope runs or during increased winds across the slope. The understory in the oak trees will be sheltered from the wind for most of the time with low flame lengths and slow to moderate rates of spread. In more open canopies this will increase, especially during the transition into the open grass fields on the ridges and lower slopes. The rate of spread will increase with the high winds on the lower slopes, which can transition from across the slope to downslope during the evening hours. The marine layer will not affect the fire overnight, and will allow the fire to continue to actively burn throughout the night.

##### SPECIFIC:

The main ridgeline of the mountains in the fire location runs from northwest to southeast. This feature lines up with the northwest transport wind and will continue to push the fire southeast on the top of the ridge and on the upper portion of the slopes. The mid and lower slopes are more influenced by the upslope and downslope flow. The fire will make runs in the lower slopes, in the grass and drainages with the downslope winds. Watch for the west wind to influence the downslope flow increasing the fire intensity and rate of spread. Spotting has been minimal and will remain short range when it does occur. As the fire continues to move across the slope be aware of slope driven runs. Continue to monitor the weather in your area throughout the shift as there are several different wind patterns influencing the fire. Please bring any observations to the FBAN or IMET.

### AIR OPERATIONS

The mixing height above the fire is low which may limit aircraft use over portions of the fire.

### SAFETY

The wind pattern is different on different portions of the slope, keep current on the conditions in you portion of the fire and watch what the fire is doing around you.

Steep winding roads are throughout the incident. Slow down when driving on loose gravel, dirt, and blind curves. Drive defensively with headlights on and use hands free devices.

Working on steep, uneven terrain. Be mindful of rolling materials.

Ensure radios are properly programmed for today's IAP and that crews are trained in communications procedures for the incident.

Maintain situational awareness. Look up, Look down, Look around

Stay hydrated!!! Time to think = time to drink. Document rest and hydration on 214.

Remain mindful of what is going on around you! LCES!

HEADS UP!!! Lookout for SNAGS when working around areas with burned trees. Evaluate all wind damaged trees with large limbs before working under around them.

Avoid complacency!!!! Experiencing dangerous fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.

In country not seen in daylight. Be cautious, especially with steep drop offs.

Wear all PPE.

# Fire and COVID-19 Briefing Checklist

## Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
  - Cough, more than expected
  - Shortness of breath or difficulty breathing
  - New loss of taste or smell
  - Fever                      ○ Sore throat
  - Chills                      ○ Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

## Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
  - Radios, phones, doors, pumps, fuel cans, etc.

## Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

## Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

## Protect yourself, your crew, and your camp!

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident.
