INCIDENT ACTION PLAN MINERAL INCIDENT

CA-FKU-010219

OPERATIONAL PERIOD

7/20/2020 0700

to

7/21/2020 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:		Date To:	7/21/2020
Mineral	a. operational remote.	Time From:		Time To:	0700
3. Objective(s):			0,00	Time To.	0700
Management Objectives					
-Provide for emergency personnel and public safe	ety at all times.				
-Protect property, improvements, and infrastructu	re.				
-Ensure repopulation takes place in a quick, effici	ent, and effective manner.				
-Ensure coordinated, timely and accurate release	of public information.				
-Foster and maintain relationships with all cooper	ators and stakeholders.				
-Protect economic, natural, cultural and heritage r	esources.				
-Maintain fiscal accountability and keep costs com-	nmensurate with values at risk.				
Control Objectives					
-Keep the fire North of HWY 198.					
-Keep the fire South of Los Gatos Creek Road.					
-Keep the fire East of San Benito / Monterey Cour	ıty Line.				
-Keep the fire West of Parsons Ridge.					
General Situational Awareness:					
Steep and rugged terrain, critically dry and rec	eptive fuel beds, active area f	or fire history	and drought stre	ssed trees.	
5. Site Safety Plan Required?

INCIDENT Weather Forecast

FORECAST NO:

5

NAME OF FIRE:

Mineral Fire

PREDICTION FOR:

Mon-Tue 0700-0700

UNIT:

CALFIRE Fresno Kings

SHIFT DATE:

July 20-21, 2020

Incident Meteorologist:

Dan Harty

FORECAST ISSUED:

1900 PDT July 19, 2020

WEATHER DISCUSSION:

Little changes expected today but generally a couple degrees less hot. Conditions will remain dry with low afternoon humidity followed by mostly poor to moderate overnight recovery. Div F should see some better recovery along with cooler temperatures. Terrain driven winds will again become breezy by afternoon with some gusts into the upper teens, then returning to mainly light overnight. An offshore low pressure system will drift towards the coast on Tuesday and is expected to move over central California on Wednesday. This will bring some cooling and increase in humidity through midweek. But it will also bring an increase in winds from the southwest and west.

WEATHER FORECAST for MONDAY:

WEATHER:

Sunny.

MAX TEMPERATURES: 88-97°

MIN HUMIDITY:

18-25%

20 FOOT WINDS:

SLOPE/VALLEY -

Downslope 2-5 mph through 0800 then becoming upslope/upcanyon 4-8 mph

with gusts to around 18 mph after noon.

RIDGETOP -

Southeast 4-8 mph with gusts around 12 mph.

WEATHER FORECAST for MONDAY NIGHT:

WEATHER:

Areas of smoke, otherwise clear.

MIN TEMPERATURES:

68-78°

(Div F 62-68°)

MAX HUMIDITY:

30-45%

(Div F 50-65%)

20-FOOT WINDS:

SLOPE/VALLEY - Downslope 2-5 mph after 2100.

RIDGETOP -

Southeast 3-6 mph with gusts to 9 mph.

OUTLOOK for Tuesday and Wednesday:

Areas of smoke, a few high clouds possible, otherwise mostly clear skies. Maximum temperatures 86-95° Tuesday and 82-91° on Wednesday. Minimum relative humidity 20-30 percent followed by mainly poor to moderate overnight recovery of 30-45 percent. Increasing onshore flow could bring a little stronger winds with westerly gusts to around 25 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: WILDLAND						
FIRE NAME: MINERAL CA-FKU-010219	OPERATIONAL PERIOD: JULY 20 0700-0700						
DATE ISSUED: July 19, 2020	TIME ISSUED: 20:00						
UNIT: FRESNO KINGS	SIGNED: Stephen Volmer						
	Typed/printed: FBAN Stephen Volmer						

INPUTS

WEATHER SUMMARY: Hot dry conditions with low relative humidity, and poor overnight recovery. Gusty conditions will exist along the ridgetops. Be alert for periods of minimal wind activity between 21:00 and 07:00, this will cause the smoke to settle into the drainages overnight.

Remember...Wind goes where water flows.

Daytime high temperatures will be in the upper 90's, decreasing to the mid 70's in the evening. Minimum relative humidity will be between 19-25%. Winds upslope 4-8mph with gust to 18mph in the afternoon. Night time recovery will be minimal with humidity lowering to 35% and temperatures in the mid 70's. Nighttime downslope winds 2-5mph after 2100, with ridgetop winds from the Southeast 4-8 mph with gusts to 9mph. **DIV F humidity will climb after sundown to 65%.**

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels have continued to dry out and are nearing critical levels within all regions of the state. The primary fuels for the area are cured grasses, decadent Chamise fields, Oak/Pine understory. Firing operations have had areas of 100% consumption on all aspects. Expect dangerous fire spread rates when wind, slope, and topography are in alignment throughout the area. Any new ignitions within the area will have similar fire behavior. The 1,000 hour fuels will continue to hold heat throughout the evenings. Be alert for fire weakened timber in all areas.

SPECIFIC:

GRASS: Rate of Spread....120 ft/min Flame Length....8 ft Spotting.... .30 mi Probability of Ignition 92%

BRUSH: Rate of Spread....110 ft/min Flame Length....22 ft Spotting.... .50 mi Probability of Ignition 92%

UNDERSTORY: Rate of Spread....10 ft/min Flame Length....3 ft Spotting.... .10 mi Probability of Ignition 92%

DIV A/C, M/Z- Minimal fire activity.

DIV L- Heavy fuels will continue to burn down. Deep seated heat will continue to smolder.

DIV F- Heavy fuels will continue to burn down. Fire weakened timber will begin to release.

Sunset 7/17...20:15 Sunrise 7/18...06:00

AIR OPERATIONS: Expect to have limited visibility in the lower elevations of the fire early in the morning due to the abundance of smoke setting in. Upper level winds will be out of the South, and will smoke in the Northern side.

SAFETY

Fire weakened timber and branches will hamper driving conditions on all roads.

Stump holes will retain deep seated heat for days, be cautions while working in the burn.

MINERAL SAFETY MESSAGE

Maintain Situational Awareness

INCIDENT: Mineral Fire CA-FKU-010219 DATE: July 20, 2020 TIME: 0700-0700

Major Hazards and Risks: Steep Terrain, Hot Dry Weather, Completency, Hydration and Driving.

Mop Up: Conduct thorough briefing for all personnel. Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean as practical. Evaluate unburned islands/Increase situational awareness. Back haul all trash and equipment off the line and return it to base camp. When lifting equipment, lift with your legs and not your back.

Firing Operations: Brief your crews, maintain LCES, and follow the Firing Operations Checklist. Ensure everyone is wearing PPE, watch for spots across the line. Report injuries to supervisor immediately.

Complacency: Having the same assignment on the same ground day after day can lead to complacency and make us more vulnerable to accidents. Maintain your situational awareness through to the end of your assignment.

Fire Behavior: Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically! Be alert to changes in wind direction and expect changes in fire behavior. Stay alert for new starts.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain separation and Situational Awareness. Watch for roll out.

COVID 19: Practice Social Distancing maintain 6' separation, utilize masks and frequently wash / sanitize your hands. Monitor for symptoms and report immediately. More information available in the Safety Folder access through QR code on IAP.

Valley Fever: Limit dust exposure. Utilize recirculation for A/C. More information available in the Safety Folder access through QR code on IAP.

Personnel: Monitor yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase as well. Keep an eye on your crew and partner.

Driving: Slow Down! Drive defensively with headlights on and seatbelts fastened. Coordinate your movements on one-lane roads. Utilize A/C recirculation while on dirt roads. **Maintain and monitor road conditions.**

<u>Tailgate Safety</u> <u>Hazard Tree Safety</u>

Hazard trees both dead snags and live green trees are one of the most common risks encountered on the fire line. All firefighters Survey their work area for potential hazard trees.

Review Hazard Tree Safety in your IRPG

- Watch out for stump holes.
- Watch out for fire weakened trees and limbs.

FIRE SUPPRESSION REPAIR

- Monitor safe working distances.
- Utilize communication with heavy equipment operators (radio or hand signals).
- Maintain accountability of personnel.
- Avoid working below equipment, watch for rolling material.

MINERAL INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS /	REMEDIES						
ALL	MOP UP / BACK HAUL	Don't become complacent, stay alert be prepared for hazards and new starts. Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Conduct thorough briefing for all personnel (inside rear cover IRPG).							
ALL	STEEP TERRAIN / ROLLING DEBRIS	Minimize exposure to smoke, and rotate personnel. Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness and separation.							
F, L	BACKFIRING and BURNOUT OPERATIONS	Before beginning a backfiring or burnout operation, en Lookouts are posted, communications are established teams, Escape routes and safety zones are established firing operations. Ensure approval and relay to all adjoin Operations Checklist. Wear full PPE.	with both firing and holding and not compromised by the						
ALL	FATIGUE / HEAT / DEHYDRATION	Be alert for signs of fatigue and take breaks as necessar Monitor incoming resources for level of fatigue. Drink shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; up to 1.5 gal. per and when possible.	water before, during and after						
ALL	COVID 19	Maintain 6' distance whenever possible. Utilize masks, washing/sanitizing, disinfect common surfaces, follow I Guidelines. Monitor for symptoms, follow reporting profolder from QR code on IAP.	Fresno County Public Health						
ALL	VALLEY FEVER	Limit exposure to dust. Reference Safety folder from QR code on IAP. Monitor personnel for signs/symptoms.							
ALL	DOZER SAFETY	Watch for rolling material. Monitor safe working distances. A void working below a Dozer. Utilize communication with the operator (radio or hand Watch for signs indicating buried high-pressure gas line Stay out of the dust.							
ALL	POWER LINES	Follow <i>Power Line Safety</i> guidelines (IRPG). Communimmediate supervisor. Flag area around downed power all downed power lines as energized.	nicate power line hazards to lines and deny access. Treat						
ALL	AIRCRAFT OPERATIONS	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft.							
ALL	SERPENTINE SOILS (Asbestos)	Limit exposure to dust. Maintain roads.							
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG). Establish adequate safety zones (IRPG). Use Downhill Line Checklist (IRPG). Follow "Look Up, Look Down, Look Around" procedures (IRPG). Utilize Risk Management Process (IRPG).

County of Fresno DEPARTMENT OF PUBLIC HEALTH

COVID-19 PROTECT YOURSELF AND OTHERS

Know How it Spreads

- The best way to prevent illness is to avoid being exposed to this virus.
- The virus is spread:
 - ✓ between people who are in close contact with each other.
 - through respiratory droplets produced when an infected person coughs, sneezes or talks. Breathing in the droplets or getting them on your hands and then transferring them into your mouth, nose or eyes will infect you with the virus.

Know how to Protect Yourself and Others

- Cover your mouth and nose with a cloth face cover when around others.
 A face cover is not a substitute for social distancing.
- Wash your hands often with soap and water.
 If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol.
- · Avoid touching your eyes, nose, and mouth.
- Avoid close contact
 As much as possible, maintain 6 feet of distance between yourself and others.
- Cover coughs and sneezes keep your fluids to yourself!

Clean and Disinfect

• Clean AND disinfect frequently touched surfaces often.

Monitor Your Health Daily

- Be alert for symptoms:
 - > Fever, cough, difficulty breathing, headache, sore throat, etc.
- Advise your supervisor as soon as you start having symptoms.

Promotion, preservation and protection of the community's health

CAL FIRE / IMT 2

COVID-19 EMPLOYEE DAILY SCREENING QUESTIONNAIRE

WINTERAL CATRO OTOZIS DUCC.	MINERAL	CA-FKU-010219	Date:
-----------------------------	----------------	---------------	-------

<u>Prior</u> to employee beginning workday, if thermometer is available, take a temperature reading and ask screening questions. Record findings below:

		<u>U 1</u>				
Employee Name/ ICS Position	Are you feeling ill/feverish?	Are you having chills?	New/ Worsening cough?	New/ Worsening shortness of breath?	New or prolonged sore throat?	Fever≥ 100.4°F
Exception 1990						
	•					

TO BE TURNED IN DAILY, OR AT THE END OF YOUR SHIFT TO THE MEDICAL UNIT . 7/07/2020

COVID-19 DAILY CHECKLIST

 D	
Disinfect ALL	At least twice a day, wipe down ALL hard surfaces in the
Surfaces	work station and on apparatus using an appropriate cleaning
	disinfectant solution OR a bleach solution of 1/3 cup of bleach
	to one (1) gallon of water.
Decontamination	Please refer to the CAL FIRE COVID-19 Response Recommended
Procedures for	Actions and Guidance Document on the CAL FIRE EMS Program
Personnel,	Intranet page for information regarding decontamination procedures
Clothing, Etc.	for personnel, apparatus, equipment and workplace.
Temperature	If thermometer is available, conduct scan of all employees at the
Scans	start of workday.
Ensure Proper	Ensure ALL employees frequently wash hands for a minimum of 20
Hygiene	seconds often throughout the shift and after every patient and/or
	personal contacts.
Documentation	If any personnel have an identified exposure, IMMEDIATELY follow
	notification procedures for exposure.
Observe Physical	Review all Centers for Disease Control & Prevention (CDC)
Distancing	recommended social distancing protocols and personal protection
Protocols	guidelines regarding How to Protect Yourself &Others.
Supply Needs	Ensure all locations have adequate supply of required supplies
	to ensure smooth uninterrupted operations.

PROTOCOL FOR "YES" ANSWERS:

If an employee answers "YES" to any question:

- 1. Isolate them from other employees and refer them to an appropriate healthcare provider for evaluation and treatment.
- 2. Follow the notification process as outlined in the memorandum "COVID-19 Guidelines for all CAL FIRE."

REMIND PERSONNEL TO:

- Wash their hands and use alcohol-based hand sanitizer often.
- Do not shake hands, touch or hug others.
- Use physical distancing of six (6) feet or greater whenever possible including meals, exercise, and tasks in the station.
- Personnel should follow CDC, CDPH, along with any applicable local county public health protocols regarding COVID-19 directives/orders both inside and outside the workplace.
- Do not come into work if feeling ill/feverish or showing any respiratory illness signs.

"Mineral" Incident Fire Suppression Repair Plan

I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Mineral Fire in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Re-establish existing berms where applicable.
- Breach berms to facilitate drainage, where applicable.
- 3) Clean culverts plugged with soil and rock resulting from fire suppression actives.
- 4) Blading or grading of roads may be necessary.

C. Firelines; Hand and Dozer

Install waterbars as needed. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using prefire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Water Bar or cross drain spacing				
Fireline or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing may be sloped back to prevent future stream bank failure.

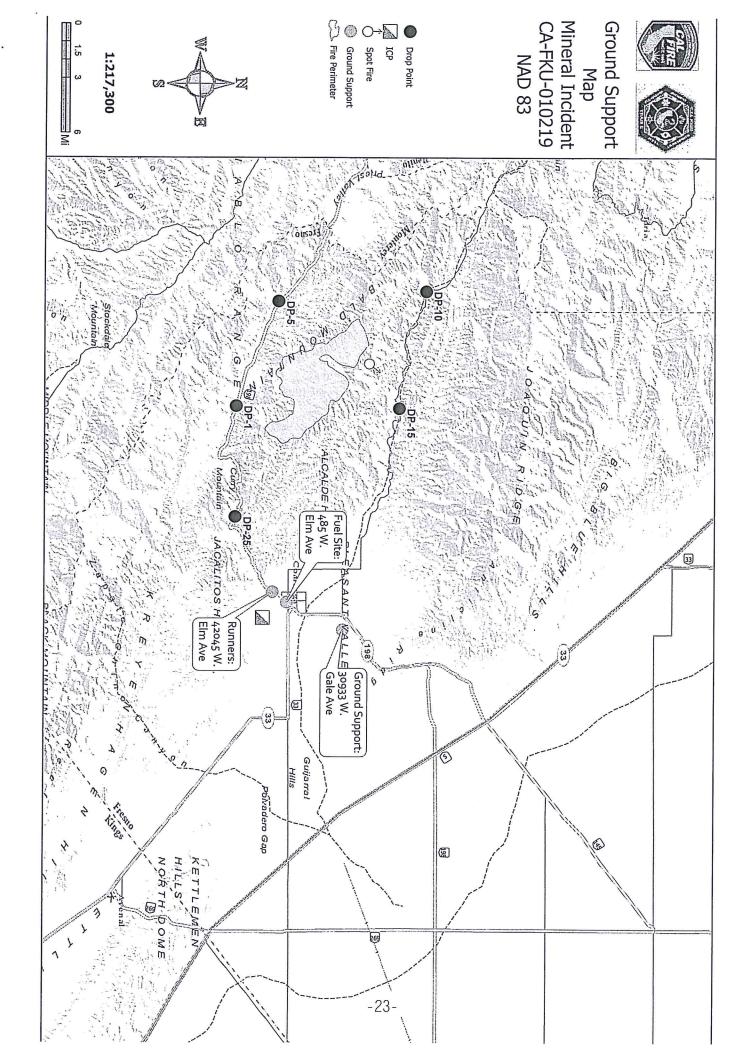

E. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)

Prepared by:

Lucas Titus, Fire Suppression Repair Lead

DEMOBILIZATION PLAN

Mineral Fire CA-FKU-010219

DEMOB PROCEDURES

- Due to COVID-19, every effort will be made to ensure the demobilization procedures will limit face to face contact. Please follow the following plan:
- Check the demob list daily. You can find the demob list posted around camp or by utilizing the QR code on your IAP. <u>Please report to demob only at your</u> <u>scheduled time.</u>
- Wear a facial covering and maintain proper social distancing guidelines throughout the demob process.
- The demob unit will provide you with an ICS-221 check-out form.
- For the following units, demob personnel will make radio contact to ensure you are clear for demobilization:
 - Supply Unit
 - Communications Unit
 - Accomodations Unit (If applicable)
- For the following units, you will report in person to complete your check-out:
 - o Time Unit
 - Documentation Unit
 - Training Specialist (If applicable)
 - Ground Support Unit <u>CALTRANS Yard at 30933 W. Gale Ave. Coalinga</u>
- Please ensure only essential personnel (Strike Team Leaders, Crew Boss's,
 One person per single resource, etc) are attending the in person demob.
- Finally, return your completed ICS 221 to the demob unit and you will be advised of your status (released home, reassigned, etc.)

Stan Atchison (310) 749-9758

Demobilization Unit Leader, CALFIRE Incident Management Team 2

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

ALL ASSIGNED TRAINEES

working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The Training Specialist is available immediately following the morning Operations Briefing.

TRAINING SPECIALIST

MINERAL PUBLIC INFORMATION

Incident Information Line: 559-961-7102

Email pictures to: mineralfire2020@gmail.com

MEDIA

<u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire
 personnel cannot provide members of the media with authorization to enter private
 property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

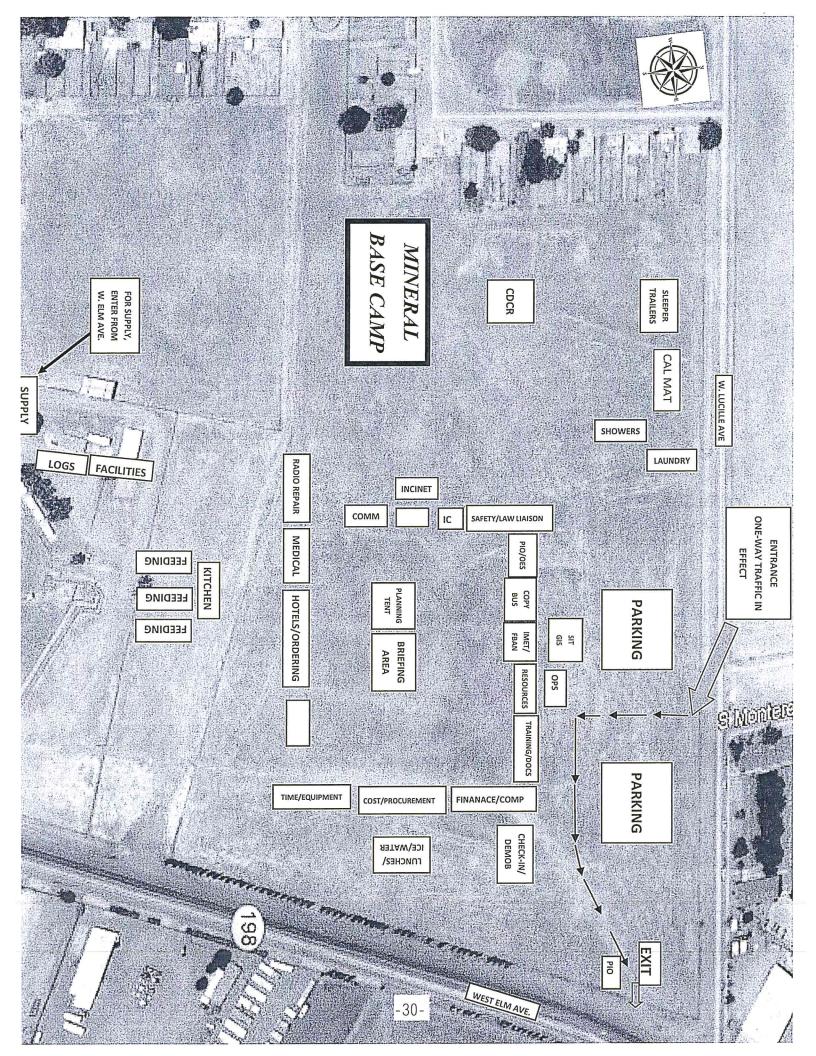

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE

The Information staff will assist you in mailing and receiving letters and packages.
