FIRE WEATHER FORECAST

FORECAST NO: 7

PREDICTION FOR: Sept 24-25, 2020 0700-0700

INCIDENT NAME: West Castle Zone

UNIT: CA-SQF

SIGNED: Andrew Gorelow

TIME AND DATE

FORECAST ISSUED: Wed, Sep 23 @ 1800 hours

Incident Meteorologist - Andrew Gorelow

WEATHER DISCUSSION: Stable conditions over the fire are expected to remain in place through into the weekend keeping air quality poor and visibility limited. Winds at the surface will again remain generally light and terrain driven. Winds above the fire are likely to be more northwest helping to push the smoke to the southeast. Because of the additional shading, look for RHs only to drop into the mid to upper 20s to mid-30s and temperatures to reach the mid-70s to mid-80s. Similar conditions will remain into Saturday, but there is some indication that better mixing at the surface will occur by Sunday leading to better overall visibility and a return to warmer and drier conditions.

SKY/WEATHER TODAY (THURSDAY): Sunny, but smoky. Stable conditions are expected again today leading to poor air quality and reduced visibility for much of the day. There will be some increase in winds aloft out of the northwest which will push the smoke southeast, but not enough to clear the smoke. Winds at the surface will remain generally terrain driven. With the more stable conditions continuing, temps will stay lower and RHs may remain higher.

WEATHER SUMMARY:

Sunny, smoky with a stable atmosphere providing poor smoke dispersion. Temperatures will range from the low 70's to 80's. Minimum humidity will be 24 to 31%. Winds will be diurnal, following the main drainages. Above the fire, winds will be northwest 5 mph in the afternoon. Visibility improving late afternoon. Overnight humidity recovery will range from 41-48%.

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
GRASS	50-90	5-7	.10 mi	70%
BRUSH	70-110	17-19	.30 mi	60%
TIMBER/LITTER	3-8	1-3	.30 mi	40%

GENERAL:

Live fuel moistures are low, and large dead woody debris is at record lows. High elevation ERC's remain above the 97th percentile. Stable air will restrict movement of the smoke and the shading helps keep fire activity in check. Expect visibility to improve by late afternoon. Active ground fire is common throughout the interior islands. Heavy fuels continue to burn out. Roll out remains a threat on the steep slopes. Flare ups and short range spotting likely near recently burned control lines. Fire spread will tend to the east, primarily by surface spread and short range spotting.

SPECIFIC:

Branch XXI – Active ground fire in some interior islands. Fire into fuel jackpots will cause flare ups, with short range spotting.

Branch XXV – Favorable conditions for burning, holding, and mop up. Aviation dependent firing operations may be adversely impacted by poor visibility. Burning material on steep slopes can easily roll out across control lines and will initiate spot fires.

Branch XXIX – Fire movement will be east inside Sequoia NP. Fire has been checked up above Garfield Creek by effective helicopter bucket work last shift. Similar opportunity may exist today, providing more time to complete control lines north of the SF Kaweah River. The surface fire progression does not favor fire reaching the river in the next shift.

AIR OPERATIONS: Limited visibility due to smoke and inversion layers. Visibility should improve by 1400.

SAFETY:

Fire weakened trees have been falling, have blocked roads, and can drop hot embers across control lines. Check for trees that are likely to fall wherever you are working and where vehicles are stopped or staged. Verify a second route out if you are not familiar with the area.

DEMOBILIZATION PLAN - SUMMARY

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. Surplus Personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.
- o Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- o All Resources will arrive at the Demobilizations Unit at their scheduled time Only.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a
 "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their
 scheduled demobilization time.
- All <u>Rental Vehicles</u> will receive a safety inspection prior to leaving the incident.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call South Ops at 1-800-237-3703 immediately upon being released from the incident

RESPONSIBILITIES

Unit Leaders will declare resources excess to their Section Chief. Section Chiefs will declare excess resources to the Planning Section Chief through the Resource Unit Leader. This should be done 36 hours in advance of anticipated release. Use the Declaration of Excess Resources sheet or General Message Form (ICS-213) to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the RESOURCE UNIT where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the DEMOB UNIT, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment. Resources are not to contact South Ops or the expanded dispatch center unless instructed to do so by the Demobilization Unit.

RELEASE PRIORITIES

- 1. Organized fire departments
- 2. OES engines
- 3. Hired personnel and equipment
- 4. Other agencies (USFS, BLM, etc.)
- 5. Out of region CAL FIRE forces
- 6. Within Region CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24-hour off shift. In addition, they must use the following complete 24-hour period as reset time before they depart from the incident.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is not permitted on private property without the property owner's permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.
