

INCIDENT ACTION PLAN

WEST CASTLE ZONE SQF COMPLEX

CA-SQF-002541

Tuesday

OPERATIONAL PERIOD

9/29/2020 0700
to
9/30/2020 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: WEST CASTLE ZONE SQF COMPLEX	2. Operational Period:	Date From: 9/29/2020 Time From: 0700	Date To: 9/30/2020 Time To: 0700
--	-------------------------------	---	-------------------------------------

3. Objective(s):

- Management Objectives**
- Provide for emergency personnel and public safety at all times.
 - Ensure COVID-19 precautions and best practices are met at all times.
 - Protect property, improvements, and infrastructure.
 - Ensure repopulation takes place in a quick, efficient, and effective manner.
 - Ensure coordinated, timely and accurate release of public information.
 - Foster and maintain relationships with all cooperators and stakeholders.
 - Protect economic, natural, cultural and heritage resources.
 - Maintain fiscal accountability and keep costs commensurate with values at risk.

- Control Objectives**
- Keep the fire South of Hwy 198 - Sierra Dr / Milk Ranch Peak / Paradise Peak / Empire Mtn.
 - Keep the fire East of Springville / Yokhol Valley / Blue Ridge.
 - Keep the fire North of the Pier Fire dozer contingency line.

General Situational Awareness:

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

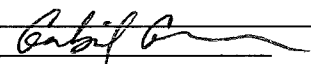

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

FIRE WEATHER FORECAST

FORECAST NO: 12
FORECAST FOR: Sept. 29-30, 2020 0700-0700
FORECAST ISSUED: September 28, 2020, 1800 PDT

INCIDENT NAME: West Castle Zone
UNIT: CA-SQF
SIGNED: *Mark Loeffelbein*

Incident Meteorologist – Mark Loeffelbein

WEATHER DISCUSSION: The heat will continue under high pressure that has taken control of the region. Terrain driven winds will continue but with the additional heat expect there to be an uptick in wind speeds. With the lack of large scale flow the transport winds will be relatively light meaning the smoke won't travel far from the area keeping conditions fairly smoky. On the west side of the fire RHs will fall into the early afternoon and then level off or even rise a little as slightly higher humid air is pulled in from the valleys to the west. Overnight thermal belt development is likely with locations above 3,500 feet not likely to see good RH recoveries. Temperatures will be running 5 to 10 degrees above average with ICP expected to approach 100 degrees this week.

SKY/WEATHER TODAY: Mostly Sunny (0-10% Cloud Cover). Smoky.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

3000 FT: 89 to 92 degrees (1-2° Warmer) / 17 to 22% (2-3% Lower)
6000 FT: 77 to 82 degrees (1-2° Warmer) / 19 to 24% (2-3% Lower)

20 FOOT WINDS:

Slope/Valley: Winds are expected to remain terrain driven through the afternoon with speeds 3 to 6 mph gusts up to 12 mph.
Ridges: Northwest 6 to 10 mph.

MIXING HEIGHT...6,000 FT AGL **VENTILATION...**Poor - Good.

TRANSPORT WIND...Northwest 8 mph.

CWR (0.10")...0% **LAL....**1 **HAINES....**4

SKY/WEATHER TONIGHT: Clear with poor overnight RH recoveries. Light drainage winds.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

3000 FT: 63 to 68 degrees (0-2° Warmer) / 32 to 37% (1-2% Lower)
6000 FT: 53 to 58 degrees (0-2° Warmer) / 26 to 31% (2-4% Lower)

EYE LEVEL WINDS:

Slope/Valley: Downslope/Downvalley 1 to 4 mph.
Ridges: Light and variable.

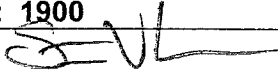

CWR (0.10")...0% **LAL....**1

EXTENDED OUTLOOK (5000 ft.):

Wednesday and Thursday...Mostly Sunny (0-20% Cloud Cover). Smoky. **High Temp:** 83-85. **Min RH:** 17-22%.
Winds (20 foot): Morning drainage winds becoming Upslope/Upvalley 3-6 gusts to 10 mph. Ridges NW 5-10 mph.
CWR (0.10"+): 0% **LAL:** 1 **Haines:** 5.

Friday...Mostly Sunny (0-20% Cloud Cover). Smoky. **High Temp:** 81-83. **Min RH:** 16-21%. **Winds (20 foot):**
Morning drainage winds becoming Upslope/Upvalley 3-6 gusts to 10 mph. Ridges NW 5-10 mph. **CWR (0.10"+):** 0%
LAL: 1 **Haines:** 5.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: WILDFIRE
FIRE NAME: WEST CASTLE ZONE CASQF-002541	OPERATIONAL PERIOD: 9/29-9/30/20 0700-0700
DATE ISSUED: 9/28/20	TIME ISSUED: 1900
UNIT: SEQUOIA NATIONAL FOREST	SIGNED:  Typed/printed: Stephen Volmer FBAN

INPUTS

WEATHER SUMMARY:

Sunny and smoky conditions will continue with the stable atmosphere and inversion dissipating in the late afternoon. Temperatures will range from the high 70's to the low 90's. Minimum daytime humidity will remain dry at 20-27%. Winds will continue to be diurnal, following the main drainages. Ridgetop winds will be Northwest 6-10 mph. Visibility will be limited, with minor clearing above 6,000' elevation in the late afternoon. Overnight humidity recovery will be minimal again ranging between 32-37% with a thermal belt settling in at 3,500 ft elevation.

Review the weather forecast for more details

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
GRASS	45-75	5-7	.30 mi	68%
BRUSH	75-110	12-16	.30 mi	66%
TIMBER/LITTER	4-12	1-3	.30 mi	65%

GENERAL:

The abundance of timber and brush litter in the area is extremely dry and receptive. ERC's for the area are just above the 90th percentile. Local fuel moistures are at critical levels. The inversion will continue to limit fire spread. Active ground fire will continue to smolder, creep through, and burn out, interior islands. Heavy fuels will continue to burn down and produce deep seated, very hot ash pits and stump holes. Fire weakened trees and burning snags continue to threaten control lines and roads.

SPECIFIC:

- Smoldering material within the interior islands has the potential to become active as the temperatures increase. Heat building in the drainages has the potential to exhibit dangerous rates of spread and produce large amounts of ember cast should they become active and run to the ridges.
- Rolling material will enhance fire spread. Be alert along the roadways for entire burning log sections that could roll out, block the roadway, or igniting fire below you.
- Backing fire spread will be very slow under the current conditions. Expect activity to increase in all areas, if the inversion lifts.

Sunset 18:40

Sunrise 06:51

AIR OPERATIONS:

Visibility will increase minimally in the late afternoon when the inversion lifts. Deep drainages could retain smoke all day. Upper level transport winds will be from the Northwest 8 mph. Have a secondary plan in place before requesting air assets, they may be delayed or unable to assist due to limited visibility.

SAFETY:

- Weather getting hotter and drier. Thermal belts at night will have increased fire activity potential.
- Stay out of chutes, drainages, in-turns, and saddles...especially with unburnt islands below you.
- On a hillside where rolling material can ignite fuel below you.

SAFETY MESSAGE WEST CASTLE ZONE SQF COMPLEX

1. Incident Name: WEST CASTLE ZONE SEQUOIA COMPLEX	2. Operational Period: Date From: 9/29/20 Time From: 07:00	Date To: 9/30/20 Time To: 07:00
---	---	------------------------------------

HEALTH & WELLNESS: Wear a Mask, PLEASE!

Adhere to COVID-19 Best Practices – Wipe Surfaces & Door Handles.

MONITOR for FATIGUE and DEHYDRATION; Hydrate before, during, & after exertion.

Don't let complacency set in; maintain situational awareness.

MONITOR for signs & symptoms of Heat Related Emergencies (IRPG. Pg. 109)

MOP UP OPERATIONS: there are still hazards...

Watch for roll out, watch for snags; watch your footing, watch for stump holes

Caution: Do not step into ash pits or root balls.

Identify, Communicate & Mitigate Hazards – Flag & Report.

HAZARD TREES: It's the ones that haven't come down yet!

Drought, Bug Kill, & Fire Weakened Trees all have accident potential.

Local diurnal winds have influence on tree lean and fall zones.

Fall trees with in your certification; flag & avoid when mitigation cannot be completed.

AIR OPERATIONS: CLEAR the LINE!

Monitor Comms; assure the frequencies – radio discipline.

REHAB & REPAIR: CONTRACTORS, & RE-POPULATION:

Maintain Communications & Communicate Hazards to Heavy Equipment Operators.

Work together and Coordinate Work Zones in the same area.

Caution to citizens and additional vehicle traffic.

DRIVING: Be defensive for all drivers on the road.

EVALUATE your driving routes; monitor speed, gear selection, & brakes.

UTILIZE chocks, backers and spotters; when in doubt scout it out!

Watch cross traffic; Local traffic is not use to increased vehicle traffic; use blinkers.

Dirt Roads are narrow, silty, and worn – Use Caution

Share the road with damage assessment teams and contractors; all aiding the efforts.

Hydrate - Maintain Situational Awareness - Report

4. Site Safety Plan Required? Yes No

5. Prepared by: Name: J. Buchmeier SOF1 / J. Novak SOF1(T)

ICS 208

Date/Time: September 28, 2020 / 1730

1. Incident Name: WEST CASTLE ZONE SQF COMPLEX		2. Incident Number: CA-SQF-002541
3. Incident Area	4. Hazards/Risks	5. Mitigations
DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	COVID 19, ILLNESS, & HYGIENE	Adhere to local, state, federal and CDC health guidelines. Maintain social distancing when applicable. Wear a mask for yourself/others. Report any symptoms immediately to a supervisor. Hygiene, hand washing, and disinfecting of surfaces & handles often. Watch for signs and symptoms of Valley Fever, Smoke Exposure, or illnesses.
ALL	FATIGUE, HEAT, & DEHYDRATION	Don't underestimate the task at hand. Adhere to work/rest cycle for all task(s). Drink water before, during and after shifts, up to 1.5 gal. per shift. Review Heat Related Emergencies (IRPG Pg. 109). Seek shade when you can. Watch for stack-effect of fatigue and exhaustion; REST & Plan operations.
ALL	COMPLACENCY	Be alert for signs of fatigue and distractions; remain engaged. Know your LCES and maintain situational awareness. Have the right radio clone. Know your adjoining forces and FREQUENCIES. Primary, Alternate, Contingency, Emergency on all new assignments.
ALL	FLARE UP & WIND	Fuels are dry; re-burn potential. Monitor conditions and diurnal winds. Watch alignment and rates of spread; no frontal assaults. Calculate tree fall and branch release; project down-wind falling. Fire in drainages and river bottoms; steep terrain can allow runs & spotting.
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness. Know Tree Hazards in the work area. Dangerous Mountain Roads – SLOW Defensive Driving.
ALL	FALLING MODULES & HAZARD TREES.	The ones that haven't fallen yet; look up, look around – identify hazard trees. Identify and isolate the area to provide for the safety of others. Bug Kill & Fire Weakened; Flag and make proper notifications. Do not fall trees out of your certification level. Evaluate wind and lean prior to making cuts.
ALL	MOP UP & STUMP HOLES	Look for signs of heat; watch for ash pits. Maintain situational awareness and assure good footing. Control your surroundings; watch out for each other.
ALL	DRIVING HAZARDS	SLOW DOWN! Do 360's before moving vehicles. Utilize Chocks. Drive with headlights and seatbelts on; drive defensively. Long travel distances – fatigue; Watch Speed through communities. Utilize spotters and backers; when in doubt, scout it out. Assess Road Conditions; Flag hazard if you cannot mitigate, report. Contractors working off roads; utility repair. Tree abatement.
ALL	REHAB & REPAIR	Watch for rolling material; Monitor safe working distances. Avoid working below dozer; communicate with the operator. Damage Assessment Crews working off roads and around structures Acknowledge Utility Partners and Contractors; assessment and repair work. Monitor footing; evaluate work area and routes; tool control is essential.
ALL	AIRCRAFT OPERATIONS	Monitor air-to-ground frequencies; they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft; clear the line. Only utilize aircraft to insert personnel on the line when necessary.

AIR OPERATIONS SUMMARY ICS-220

Incident Name / Number WEST CASTLE ZONE SOF COMPLEX / CA-SOF-002541

Sunrise 6:50 **Startup** 7:20 **Cutoff** 18:11 **Sunset** 18:41

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
 TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
 TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED
 ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES FORMAT.

*AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.*

TRAINING MESSAGE

*****Training will be closing out at 1700 hours on Wednesday the 30th. You must see Training prior to this time to receive a Validated Training Assignment.**

TRAINERS

- **Complete the PTB Evaluation Record prior to Demob**
- **Complete an ICS 225 (Personal Performance Record) prior to Demob**
- **Complete the Final Evaluator's Verification page in the PTB if you are recommending them for qualification**

TRAINEES

- **Ensure you have the above-mentioned documents completed and signed by your Trainer prior to Demob**
- **You do not have to wait for your assigned Demob time to close out with the Training Specialist**

**Any questions please contact the
Training Specialist:
Shane Vargas (530) 410-4225**

CAL FIRE INCIDENT MANAGEMENT TEAM 6

Jeff Veik— INCIDENT COMMANDER

West Castle Zone SQF Complex CA-SQF-002541

DEMOBILIZATION PLAN - SUMMARY

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. Surplus Personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All Resources will arrive at the Demobilizations Unit at their scheduled time Only.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is recommended of the resource to contact Ground Support and have an oil change 24 hours prior to their scheduled demobilization time.
- **All Rental Vehicles will receive a safety inspection prior to leaving the incident.**
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call **South Ops at 1-800-237-3703** immediately upon being released from the incident

RESPONSIBILITIES

Unit Leaders will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. **Use the Declaration of Excess Resources sheet or General Message Form (ICS-213) to list all excess resources.** Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment. Resources are not to contact **South Ops** or the expanded dispatch center unless instructed to do so by the Demobilization Unit.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region CAL FIRE forces
6. Within Region CAL FIRE Forces
7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24-hour off shift. In addition, they must use the following complete 24-hour period as reset time before they depart from the incident.

West Castle Zone Finance Message

NO Off-Site Feeding

All feeding is provided by the Food Unit at the Incident Base

COMP/CLAIMS

Vehicle/Equipment Damage: Report details to Comp/Claims and have Ground Support evaluate (State vehicles will need Std. 270/274 forms)

Injuries: Submit documentation to Comp/Claims; CAL Fire supervisors complete electronic IAPS

Property Damage: Please report details (including address, Lat/Long location) to Comp/Claims

Water Logs: Please complete and submit to Comp/Claims daily

CAL FIRE TIME Process

Shift Tickets: Line supervisors complete for Hired Equipment and submit hard copy to TIME

Local Government: Check-in with OES

CAL FIRE resources: Complete eFC-33 input sheet and provide activity updates to TIME

**Please be COVID cognizant and send only 1 representative to submit documentation

FEDERAL TIME Process

Federal resources: Please submit your CTR or Shift Ticket daily. You can submit your time using one of the following methods:

1. Fillable PDF CTR/Shift Tickets: QR code to the fillable forms are included below.
2. Hard copy CTR/Shift Tickets: Complete a hard copy, take a photo and email/text that information to Finance: 2020.Castle.finance@firenet.gov or (949) 591-4123
3. Submit the hard copy as usual to Whitsett Spike Camp or Troy Meadow
4. A justification in remarks is required for federal employees claiming hazard pay or environmental on CTRs.
5. Be sure to call Finance 1 day prior to your scheduled DMOB to ensure time is complete at (949) 591-4123

Federal Forms:

eFC-33 INITIAL INPUT FORM

1 2 3 4 5 6 7

Overhead: Complete one form per person.
All Others: Complete one form per vehicle.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is **not permitted** on private property without the property owner's permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore, when on a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be no posting of:

- Inappropriate information or materials, no opinions, no endorsements, inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.

Incident Base Camp Mailing Address

Amy Head 916-956-3277

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

A message to our firefighters from **ASHLEY IVERSON**.

Stay Healthy, Stay ³⁸Alert and Stay Strong!

FIRE SUPPRESSION REPAIR PLAN: West CASTLE INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles may be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rockied areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

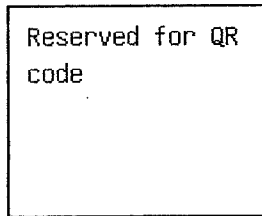

Federal Interagency and Tribal Lands Suppression Repair Guidelines

Scan QR code for detailed Suppression Repair Plan

Fire Line

- Restore natural contour.
- To prevent erosion: construct waterbars, pull back vegetation with excavator, use straw bale, etc.
- De-compact fire line, pull back vegetation with excavator.
- Attempt to conceal or hide the entrance & exit using the landscape & available materials.
- To prevent access to Off Highway Vehicles (OHV) where fire lines intersect roads or trails, block intersections with large rocks, large trees, or walls of brush.
- Concentrations of slash along commonly used areas such as roadways, developed recreation areas, & structures should be chipped & dispersed.

Heli-spots, Drop Zones, Sling & Medi-vac Sites

- Use standards like fire line repair to repair these activity areas. If available, use cleared vegetative material for soil cover. Place waterbars where appropriate.

Line in or through Watercourses

- Restore preexisting streamflow & remove any deposited debris not present before suppression.

Water Drafting Sites

- Restore water sources used or developed as draft sites to original condition. Remove any dams, dikes, or other impoundments created for fire suppression activities. Backhaul any trash.

Concentrations of Slash

- Concentrations of slash created by fire suppression activities along commonly used areas such as roadways, developed recreation areas, & structures should be chipped & spread across the landscape. Chip piles should not exceed six inches in depth. Lop & scatter concentrations of slash not to exceed 18 inches in height.

Roads

- Road repair should follow the existing design of the road prism. Repair damage to pavement, gates, cattle guards, & culverts. Remove soil pushed into cattle guards.
- Remove all slash & debris created by fire suppression from culvert inlets and outlets.
- Clean & grade ditch lines, rolling dips, & lead off ditches to repair function.

- Physically close off all unauthorized routes/roads opened during suppression
- Place rocks / logs to disguise the entrance to prevent unauthorized OHV.

Litter, Trash, and Flagging Removal

- Remove all litter, trash, & flagging from all suppression areas; this includes micro-trash.

Wilderness & Wilderness Study Areas (WSA)

- Areas of fire suppression in wilderness will follow many of the *General Repair Guidelines* previously discussed, but with an emphasis on restoring wilderness aesthetics & characteristics. One way to think of this is to “make it look like we were never there.”
- The use of mechanized equipment may require special authorizations to repair the area. Verify with the appropriate land manager before use of equipment in wilderness or WSA’s.

Tree Disposal from Dozer-lines & Roadside Hazard Mitigation

- Reduce fuel loadings along access roads, accessible dozer-lines & cleared areas following suppression.
- Fallen trees will be yarded & decked.
- Do not stockpile fuels against standing live or dead trees.
- Locate decks in disturbed areas where trees can be safely processed.
- Use low impact machinery on improved surfaces.
- Locations for roadside hazard tree & fire line tree disposal will be determined by assigned Resource Advisors or agency personnel.
- The locations will be recorded on the Suppression Repair Map, which will be provided to the assigned Equipment Managers & equipment operators completing this work.
- Do not enter known archeological sites with heavy equipment or skid logs across arch sites.
- Felled trees within archaeological sites must be left in place unless they can be removed without skidding (i.e. full suspension).
- Where it is feasible, equipment can reach into an arch site and pluck the tree (or portion of a tree) up without skidding.
- If it is necessary for equipment to pass through a known site, raise the blade or other attachments while within the site boundaries.

Contact Agency Personnel or Resource Advisors with any questions or for additional solutions.
