# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: WILDFIRE
FIRE NAME: Oak	OPERATIONAL PERIOD: JULY 24, 2022 24 HR
DATE ISSUED: JULY 23, 2022	TIME ISSUED: 1900
UNIT: CALFIRE MADERA-MARIPOSA-MERCED	SIGNED: 
	Typed/printed: Troy Velin - FBAN

## INPUTS

**WEATHER SUMMARY:**  
HOT AND DRY THROUGH THE OPERATIONAL PERIOD. SEE SPOT FORECAST

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

NFDRS- Energy Release Component is 74 well above the 95<sup>th</sup> percentile. BI – Burning Index is 49 also well above the 95<sup>th</sup> percentile. 100hr FM 7%, 1000 hr FM 6%. LFM in Chamise is 58% and Manzanita is 75% both at or approaching critical. Annual grass is completely cured. Fire area ranges from 2200' to 4500' elevation. Major drainages run NW to SE and there are numerous minor drainages. Beetle killed timber can be found throughout the area. Growth during daylight hours will primarily be to the ENE following terrain and normal upslope winds. Overnight, monitor for downslope winds with potential for SSW growth in aligned drainages.

#### SPECIFIC:

##### BRANCH 1

The fire will use upslope winds and terrain to move to the ESE towards the Hite Cove rd area. Afternoon Ridgetop winds from the Southwest will increase the frequency and distance for spotting. Down canyon winds overnight need to be monitored as the fire will be in alignment for potential SW growth.

##### BRANCH 3

The fire will use upslope winds and terrain to move to the ESE through the Jerseydale area towards the South Footman Ridge. Afternoon Ridgetop winds from the Southwest will increase the frequency and distance for spotting. The terrain East of Footman ridge becomes more broken and steeper. This may decrease SW growth during the overnight hours under down canyon winds.

##### BRANCH 5/10

The Southern and Western portion of the fire will be less impacted by overhead smoke today. This will increase fire behavior as the sun will be preheating fuels. The fire will generally be backing against upslope winds through the main drainage. Spots south of the fireline will move back toward the main fire. Down canyon winds overnight need to be monitored as the fire will be in alignment for SW growth.

#### AIR OPERATIONS:

SUNRISE 0556, SUNSET 2015.  
Inversion over the fire will be persistent until mid-morning.

## SAFETY

High probability of Ignition + Long Range Spotting = You need a lookout. This fire has been capable of spotting in excess of 1 mile. Post lookouts!

**Oak Fire**  
**HEALTH AND SAFETY MESSAGE**

INCIDENT: OAK CA-MMU-016149

DATE: July 24, 2022

TIME: 0700-0700

**24 HOUR SAFETY EMPHASIS**

**Critical Fire Conditions – Accountability – Heat Illness**

**CRITICAL FIRE CONDITIONS**

**Watch Out**

- Live and dead fuels are extremely dry across Northern California.
- Extreme fire behavior and rapid rates of spread are occurring in these areas, even when winds are light.
- Fire behavior changes due to current fire weather indices resulting in explosive fuels.

**Mitigation**

- Brief, Brief, Brief! Brief at all levels of your organization and brief throughout the shift.
- Take tactical pauses and evaluate conditions and brief on current and predicted fire behavior.
- Consider if conventional tactics are appropriate during these unconventional conditions.

**Accountability**

**Watch Out**

- Working with and relying on hired equipment
- Multiple fires in one geographic area
- IA and Immediate need resources may be off the radar

**Mitigation**

- Line supervisors perform routine accountability checks on all resources assigned to you
- Remain vigilant, know your maps and ingress and egress routes
- Line supervisors make sure everyone on the Fireline gets a briefing down to the lowest level, including hired equipment operators coming in for night shift

**HIGH TEMPERATURES – HEAT ILLNESS**

**Watch Out**

- Profuse sweating
- General reduction in work production
- Weakness, headache, muscle cramps, nausea, and vomiting

**Mitigation**

- Provide for cooling of the bodies core temperature
  - Provide Shade, rotate crews into air-conditioned vehicles when possible
  - Try to facilitate evaporated cooling of the body
- Provide significant periods of rest
- Hydrate with **cold** fluids when possible

**Each Safety Message is designed for a daily Tailgate Safety discussion**

# PUBLIC INFORMATION SECTION

**INFORMATION LINE** – call the Oak Fire Information line at **(844)668-3473** for questions regarding public inquires.

**MEDIA LINE** – media inquires can call (209) 628-3097 or (209) 628-5430.

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.
