Nighttime temperatures will drop to 76 degrees and humidity raising to 52%, with winds shifting to the southeast 10mph with gusts to 19mph. OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE MILES	PROBABILITY OF IGNITION
GRASS	24	2	.1	82
SHRUB	56	8	.30	82
BRUSH	124	20	.60	82

GENERAL: Fuels across the region are at critically dry levels. Expect critical rates of spread when fire is in alignment with brush fields, topography, and wind direction. Spot fires will become established easily in all fuels models. ERC's for the area are above the 90th percentile and will continue to rise over the coming days. 1000hr fuels (3-8") are below the 10th percentile and will drop further over the coming days.

SPECIFIC:

- Any new ignition or spot fire will have high potential to become established rapidly and transition into extended attack easily.
- All brush in the area has a large dead fuel component intermixed within due to the prolonged drought and long duration heatwave.
- Wind shifts in the canyons will occur rapidly, and threaten control lines throughout the operation period.

AIR OPERATIONS:

Expect gusty conditions over the ridgetops. Aerial drops could drift well out of the intended area, make sure personnel are clear. Plan ahead for your needs, as aircraft may be diverted to new incidents or become unavailable. Mixing height will be above 7,000ft AGL with transport winds northeast at 3 mph.

Sunset 19:03

Sunrise 06:27

SAFETY:

- Weather will get hotter and dryer.
- Plan early for changes in fuel, fire behavior, and your hydration needs.
- Be alert. Keep calm. Think clearly. Act decisively.

 Erratic Weather Conditions; changing with high winds and possible rainfall/Flashflood.

Terrain & Drainages.

Steep, FOOTING Issues, Access Issues – Creates alignment and Safety Issues.
 WATCH OUT for fires establishing in drainages; have lookouts & Escape Routes.
 Roll Out and Rock Slides are being reported; add to your S.A.

HEALTH & WELLNESS: Take Care of Ourselves & Others.

MONITOR yourself and your assigned personnel for FATIGUE and DEHYDRATION.
 Avoid Complacency; Maintain Good Work Rest Cycles.

SAFETY COMMUNICATION

HIGH TEMPERATURES & HEAT ILLNESS

With the significant heat wave across California, all CAL FIRE employees are expected to review and implement the following heat illness prevention measures. With high heat, body temperature can rise to dangerous levels and lead to heat related illnesses such as heat exhaustion or heat stroke. Heat related illnesses can affect anyone, regardless of age or physical condition. Those who have not properly acclimated to hot conditions, include new employees and employees returning to work after a week or more off, are at an increased risk of heat related illnesses.

WHILE RECOGNITION AND TREATMENT ARE IMPORTANT, PREVENTION IS ESSENTIAL.

Avoid or reduce outdoor activities:

- Strenuous activities should be reduced, eliminated, or rescheduled.
- Outdoor activities, including trainings and exercise, should be moved indoors or rescheduled during cooler times of the day.
- If outdoor work cannot be avoided, increase recovery time spent in cool, shaded areas, such as the cab of vehicles, shade from trees or vehicles, rock outcroppings, or buildings. During breaks, and when operationally safe to do so, loosen or remove PPE.

Hydrate:

- Drink cool water, even if you are not thirsty.
- Begin hydrating well in advance of physical activity, including when off shift and during recovery periods.
- Avoid Hyponatremia (low concentration of sodium in the blood) by supplementing water intake with electrolyte enhanced fluids, such as sports drinks.
- Avoid carbonated and caffeinated beverages, as they can lead to dehydration.

Monitor for symptoms:

- Signs and symptoms of heat illness may progress over the course of a few days or may have a rapid onset
- Signs and symptoms of heat illness include headache, muscle cramps, unusual fatigue, profuse sweating, unusual behavior, and nausea or vomiting

Any employees exhibiting signs and symptoms of heat illness require immediate attention. If medical personnel are not available on-site and heat illness is suspected, emergency medical personnel should be contacted immediately and on-site first aid shall begin.

Additional heat illness prevention tools are available through the Safety Program's Safety Officer Toolbox or by contacting your Unit, Program or Region Safety Officer.

- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.
