OUTPUTS

FIRE BEHAVIOR

GENERAL: DEAD FUELS IN ALL SIZE CLASSES ARE DRY FROM RECENT HEAT AND LOW HUMIDITY. THE AREA HAS RECEIVED UNUSUAL AMOUNTS OF RAINFALL THIS SUMMER BUT THE DEAD FUEL COMPONENT IS HIGH DUE TO THE AGE OF THE FUELS, NO FIRE HISTORY EAST OF HYW 371. LIVE FUEL MOISTURE IN THE 70-80% RANGE IS ABOVE NORMAL FOR NOVEMBER. ENERGY RELEASE COMPONENT IS AT THE 72ND PERCENTILE. BURNING INDEX IS AT THE 87TH PERCENTILE. 10-HOUR FUELS ARE WELL BELOW AVERAGE AND 100- AND 1000- HOUR FUELS ARE ABOVE AVERAGE FOR THIS TIME OF YEAR.

SPECIFIC:**ALL DIVISIONS**

SMOLDERING DUFF UNER ROCKS AND IN THE BOTTOM OF DRAINAGES. ROLLOUT ON STEEP SLOPES WILL BE A HAZARD. LOTS OF UNBURNED CANOPY OR SCORCHED CANOPY NEAR THE LINES IS A THREAT.

AIR OPERATIONS:

VISIBILITY SHOULD BE GOOD.

SAFETY

- PLEASE REVIEW THE COMMON DENOMINATORS ON PAGE 3 IN THE GREEN PAGES OF THE INCIDENT RESPONSE POCKET GUIDE
- POST A LOOKOUT WHEN TRAVERSING ROCKY SLOPES. DO NOT CROSS UNDERNEATH PEOPLE ABOVE YOU

Situational Awareness at All Times!

When It comes to Safety, The only thing worse than being oblivious to the unknown is ignoring the obvious....

Weather: Monitor weather conditions as they may change quickly. Be cognizant with wind speed and direction accompanied by low humidity. Evening hours temperatures may be cooler.

Steep Slopes/Rocky Terrain/Rolling Material: Watch your footing while hiking in steep terrain. Watch your footing when traversing rocky areas. Be careful of loose rolling debris. Maintain Situational Awareness.

Personnel: Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner. Stay engaged and make smart decisions.

Driving: Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. There are narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic. If you are in an area with low visibility slow down! Drive slowly in or near base camp.

Complacency: All PPE must be worn when working on the fire line. Always wear appropriate eye protection. Mop up requires your situational awareness even without active fire. Unburned fuels can re-ignite suddenly and turn against you.

Mop Up: Conduct a thorough briefing for all personnel. Use all PPE, including eye protection. Maintain proper spacing. Be alert for stump holes. Evaluate unburned islands and stay alert.

Air Support: Keep personnel out of drop zones. When requesting air support, remove personnel from the area prior to air operations.

Review your ICS 206 and know what to do in the event of a medical emergency.

MEDIA

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

Please reach out to the Information Office through your Division Supervisor if you need any assistance related to media.

PHOTOS/VIDEOS

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer or email them to RRUPIO@fire.ca.gov; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites.

LOST AND FOUND

The Information Section will manage lost and found items for the incident. Please bring any items found on the fireline or at basecamp to the PIO trailer, and we will work to reunite the item with the owner.

Fire Suppression Repair Plan
11/3/2023**

Objectives:

- Minimize surface and gully erosion
- Minimize sediment delivery to stream channels
- Restore conditions to pre-fire drainage patterns
- Limit off road vehicle access on hand and dozer lines where possible with dirt berm or existing obstructions (i.e. re-installation of fencing)
- To the extent possible support agency specific needs.
- Back haul trash

General Guidelines

Dozer lines, direct and indirect

- Pull back berms, brush and rocks spreading over the width to the break
- Install and construct water bars on lines steeper than 10%, as per the following, or as directed by the Suppression Repair team:

Fireline Slope	Maximum Spacing(ft)
0 – 10%	100
10 – 25%	75
25 – 50%	50
50%+	25

*All waterbars should be installed diagonally with a minimum cut of 6” into existing grade, and minimum height of 12” from the bottom of the trench to backfill top. Waterbars shall be installed at all approaches to watercourse crossings. Waterbars shall be constructed to allow for drainage at the discharge end into non-erodible material and into the green where feasible. All waterbars to be constructed at 30 degrees, angled downhill.

- Where lines cross roads, barricade access to off highway vehicles

Roads

- Clean culverts plugged with soil and debris resulting from fire control activities.
- Breach/remove berms to facilitate drainage.

Camps, Staging, Helispots/Helibases and Drop Points

- Restore sites to pre-fire conditions to best extent possible
- Remove all flagging, garbage, litter and unneeded equipment
- Comply with all conditions of any Land Use Agreement

Watercourses

- All watercourse issues shall be reported to the Suppression Repair Group Supervisor immediately, before any work may begin.
- All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized.
- All loose soil must be pulled away from the watercourse and stabilized.

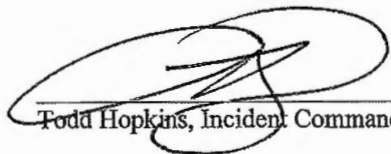

Archaeological or Historic Sites (if discovered)

- All potential sites shall be avoided.
- Impacted sites will be reported to the Fire Suppression Repair Group Supervisor or Suppression Repair Coordinator.
- If sites are encroached upon, work will stop immediately; **if there is no threat of fire spread**, and the Fire Suppression Repair Group Supervisor shall be notified.

Additional Specific Concerns

- Continue evaluation of additional fire suppression repair needs

Approved by:

Todd Hopkins, Incident Commander

Lynnette Short, RPF No. 3028, Fire Suppression Repair Coordinator
