SAFETY MESSAGE

INCIDENT: Grand Complex

DATE: 5-16-13

Major Hazards and Risks:

HYDRATION---HYDRATION---HYDRATION, USE SPORT DRINK, 3 PARTS WATER-1 PART SPORT DRINK, PREFER NO MONSTER, REDBULL OR ROCK STAR. I KNOW, I KNOW YOU LIKE' UM BUT THERE NOT HELPING THE HYDRATION ISSUE

- ✓ **Driving** –Just because you know the road, don't let down your guard. Access is one way in and one way out. Drive defensively and expect the unexpected; lights on, clean windows, chock vehicles when parked. Manage parking/
WATCH YOUR SPEED.
- ✓ **FUEL TYPE**– Grass, sage and juniper are all around you. Be aware of all your work area hazards. Advise others in the crew. Keep one eye on the sky, one eye on the fire and one eye on your crew. Scout work areas and break or lunch areas—light flashy fuel with spotting potential.
- ✓ **STEEP TERRAIN** – The entire fire consists of terrain and unstable footings. LCES is extremely important. Call out rolling debris.
- ✓ **MINE SHAFTS** and other HAZARDS – There are unmarked shafts throughout the area. Maintain constant awareness for open shafts and identify them as they are found. Watch for power lines. There is no evacuation in place. Homeowners will be in the area and on local roads.
- ✓ *Let's apply what we have learned from those before us, check your slide tray, what's all the training been for. High risk-low frequency situations have killed too many of us...process the parts of the puzzle and make good decisions based on knowledge. If its stupid...its not our policy*

REMEMBER

- Ensure instructions and assignments are clear
- Ensure you have secured anchor points

- Your tailgate safety sessions are the best place for clarifying your hazards/risks/and needed mitigations.
