

Incident Action Plan
ROUGH FIRE (WEST ZONE)
CA-SNF-001746

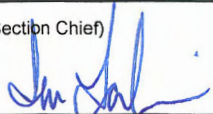

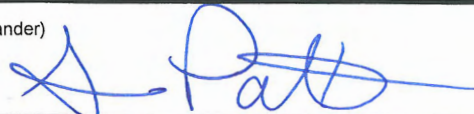

Operational Period

9/16/15 – 9/17/15

0700 – 0700

INCIDENT OBJECTIVES	1. Incident Name Rough (West Zone) CA-SNF-001746	2. Date 9/15/2015	3. Time 1800
4. Operational Period 09/16/15 – 09/17/15 0700-0700			
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Establish and maintain safe work practices to minimize threats to the public and emergency personnel. • Protect infrastructure, residences, and other structures by employing a variety of tactics, including point protection, indirect attack, direct attack, and close coordination with agency READs • Protect wilderness values, natural processes, and other natural and cultural resource values by avoiding or minimizing the impact of suppression operations. Examples of modified suppression tactics include employing MIST tactics, using aerially-delivered water rather than chemical retardants, and avoiding non-essential ground disturbing activities. • Maintain relationships with local, state, private, tribal, and federal partners and stakeholders through formal (e.g., stakeholders meetings, public meetings) and informal coordination. Control Objectives <ul style="list-style-type: none"> • Keep the fire East of Elwood Road • Keep the fire South of Pine Flats Reservoir • Keep the fire West of Highway 245 • Keep the fire North of Highway 180

INCIDENT FIRE WEATHER FORECAST

FORECAST NO. 2

NAME OF FIRE: Rough Fire West

PREDICTION FOR: Wednesday, Sept 16th, 2015

UNIT: Sierra National Forest

TIME AND DATE

FORECAST ISSUED: 2000 9/15/15

SIGNED:

Amanda Graning
Incident Meteorologist

WEATHER DISCUSSION:

A departing upper level trough will bring clouds and a few rain showers or sprinkles to the area this morning. Clouds will gradually decrease through the afternoon as winds turn out of the west and drier air begins to filter into the area. Temperatures will remain below normal with readings similar to yesterday. Afternoon relative humidity values will be slightly drier around 30 to 40%. Winds will remain generally terrain driven as the transport winds turn from the south to west through the day. A transition to warmer and drier conditions will arrive Thursday and continue through the upcoming weekend.

.WEDNESDAY...

SKY/WEATHER..... Mostly Cloudy with a slight chance of showers in the morning; then gradually decreasing clouds through the afternoon.
MAX TEMPERATURE.....65 to 75 mid slope ...55 to 65 above 5000 ft.
Warmer in the valleys.
MIN HUMIDITY.....30-40 percent around 5000 ft.
EYE LEVEL WINDS.....Drainage/downslope winds 2 to 5 mph...becoming upslope/up valley 5 to 8 mph with gusts to 15 mph after 1100.
MIXING HEIGHT..... 7800 feet agl after 1100
TRANSPORT WINDS.....West 15 mph.
LAL.....1

.WEDNESDAY NIGHT...

SKY/WEATHER..... Partly Cloudy.
MIN TEMPERATURE.....50s mid slope around 5000 ft...40s above 5000 ft.
MAX HUMIDITY.....60 to 70 percent.
EYE LEVEL WINDS.....Upslope/up valley winds 3 to 7 mph...becoming downslope/down canyon east to northeast 4 to 8 with occasional gusts to 15 mph after 2100.
SMOKE/INVERSION.....Developing after 0200 below 5000 feet.
TRANSPORT WINDS.....West 15 mph.

.OUTLOOK FOR THURSDAY...

SKY/WEATHER..... Mostly Sunny
MAX TEMPERATURE.....70 to 80 mid slope 4000 to 5000 ft ...and 60 to 70 above 5000 ft
Warmer in the valleys.
MIN HUMIDITY.....25-35 percent around 5000 ft
EYE LEVEL WINDS.....Drainage/downslope winds 2 to 5 mph...becoming upslope/up valley 5 to 8 mph with a few gusts to 15 mph after 2000.
SMOKE/ INVERSION.....Lifting after 1100. Visibility improving.
MIXING HEIGHT.....lifting to 9500 ft agl after 1400.
TRANSPORT WINDS.....Northwest 15 mph.
LAL.....1

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 003	TYPE OF FIRE: Wildfire
FIRE NAME: Rough Fire-West	OPERATIONAL PERIOD: 09/16/15 0700-0700
DATE ISSUED: September 15, 2015	TIME ISSUED: 19:00
UNIT: CA-SNF-001746	Signature: <i>J. Shelton</i> Typed/printed: Jeff Shelton (LTAN/FBTS)

INPUTS

WEATHER SUMMARY:

*** Slow Drying Trend Starts Today ***

Cooler temperatures and higher humidity will continue to influence the fireground. Anticipate primarily terrain influenced winds becoming westerly by afternoon. Recent precipitation and overnight relative humidity recovery will shorten the burn window. Expect diminishing cloud cover to incrementally increase fuel receptivity throughout the day.

Max. Temperatures – 65 to 75 degrees (Unchanged) **Min. Humidity** – 30 to 40% (Down 10%) **LAL** – 2
Winds (Eye Level)
Morning: Downslope 1-3 mph **Afternoon:** Slope/Valley 3-5 mph **Ridgetop:** SW 5-10 mph

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Recent precipitation has reduced the availability of both grass and brush fuels to carry fire.
- Drought effected larger fuels are holding heat and will continue to burn; despite recent higher humidity.
- Areas sheltered from recent wetting rains will promptly respond to a dryer atmosphere.
- Hour by hour, fire weakened trees continue to lose integrity. Evaluate before you engage.
- With cooler, more humid weather, fire behavior values favor a more direct engagement stance.

SPECIFIC:

All Divisions: Spot fires outside established containment lines or new starts...

Flame Lengths- Up to 4 ft. in Grass, Up to 12 ft. in Brush

Rate of Spread- Up to 40 feet/minute in Grass, Up to 60 feet/minute in Brush

Spotting Distances- Up to .1 miles in Grass/Brush, Up to .2 miles from Torching Trees

Probability of Ignition- Shaded Fuels: 30% Unshaded Fuels: 50% ...at the peak of the burn period

AIR OPERATIONS:

Sunrise- 6:42 Sunset- 7:05

Expect only poor to fair smoke dispersion during the morning hours; with the inversion breaking well before noon. Mixing heights will rise to 7800' AGL during peak daytime heating. Anticipate possible standing clouds over the higher terrain to decrease by noon. Available flight hours are decreasing as Summer moves into Fall.

Fuels and Fire Behavior Advisory

Sierra Nevada Mountains and Foothills

September 9, 2015

Subject: Four years of drought has significantly increased the number of dead and dying conifers and oaks across portions of the Sierra Nevada and surrounding foothills. This has resulted in explosive fire behavior conditions and wildfire's resistance to control. Fire fighter safety is a major concern, as well as continued risk to the public in the affected forested areas.

Discussion: It is estimated that well over 5 million trees have died across the Sierra and Sequoia National Forests as well as in the nearby foothills. This is due to a combination of a multi-year drought and significant bark beetle infestation. This number is up from last year when approximately 300,000 trees had died. The deceased trees have immediately increased the amount of standing dead fuel load, which will contribute to extreme fire behavior in the affected areas. **Fire Managers/Firefighters should plan accordingly and be vigilant for flash fires through dead crowns.** Risk to ground suppression personnel and equipment from a greater likelihood of falling and/or weakened trees is also a major concern.

Departure from normal conditions: Normally, conifer forests across the southern and central Sierra experience something less than five percent mortality. In the last six months a substantial number of conifer stands have displayed a ten-fold increase in the number of dead and dying trees. It has been suggested that the current situation mimics the early stages of what occurred in the Southern California national forests between 2001 and 2005. The latest Energy Release Component (ERC) values are all near the 90th percentile for this time of year and are expected to increase further through the second week of September. **Recent fire behavior on the Rough Incident underscores the seriousness of the current situation.** Flash fires, long range spotting, and extreme rates of spread will continue to be common characteristics on new and existing incidents in the coming weeks.

Concerns to Firefighters and the Public:

- Fire Managers/Firefighters need to plan for and anticipate the potential for explosive fire behavior conditions in the affected areas **even during non-critical weather events.**
- Fire personnel and the public should be aware of the increased fall hazard and should seek to mitigate appropriately.

Mitigation Measures: At the onset of a wildfire event, history shows a quick and effective initial suppression response is the first best tool in suppressing unwanted wildfire.

- Fire Managers/ Firefighters should consider suppression options and safe access prior to an event.
- Agency Administrators need to ensure the concerns brought forward in this advisory are included in all suppression and or prescribed fire operations.
- Review the most current [Southern California 7-day Significant Fire Potential](#) along with the [Monthly and Seasonal Outlooks](#).

Area of Concern: Predictive Service Areas **SC02, SC03, and SC04** (Southern Sierra, Central Sierra, and the Sierra Foothills).

Issued: September 9, 2015 (Note this advisory will be in effect for 14 days and will be reviewed/updated at that time.)

SAFETY and HEALTH MESSAGE

We Are ALL SAFETY OFFICERS !

INCIDENT: Rough Fire "West Zone"

DATE: September 16, 2015 TIME: 0700-0700

Major Hazards and Risks: Complacency, Firing, Fatigue, Hazard Trees.

Complacency: ALL PPE must be worn, including shrouds, when working on the fire line. Mop up requires your situational awareness even without active fire. Unburned fuels can reignite suddenly and turn against you.

Don't let complacency and fatigue cause you to compromise SAFETY!

Mop Up – Use all PPE, including eye protection. Maintain proper spacing. Be alert for stump holes.

Ensure the Communication Plan is understood and followed (ICS 205 in your IAP). Make sure your radio is programmed correctly.

Manage yourself and your personnel for excessive fatigue; many have driven long distances or been deployed for extended periods. Use the buddy system and take breaks as needed.

Hazard trees: Dead trees from bug kill. Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

Hydration: By the time your body tells you it's time to drink – you are already DEHYDRATED!!! On a regular basis drink fluids to maintain an appropriate energy level for any expected work assignment. Also, eat nutritious foods regularly.

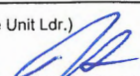

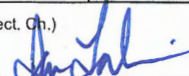

Review your ICS 206 and know what to do in the event of a medical emergency.

Tailgate Safety

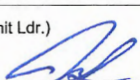

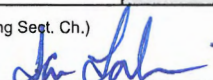

- **Accountability:** everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- **Communication:** everyone knows the com-plan
- **Briefing:** everyone knows the game plan, everyone knows the contingency plan
- **Safety gear:** everyone has the appropriate safety gear and in good working condition
- **LCES:** they are clear and made known to everyone

Safe Driving

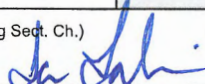

- **SLOW down** when driving on and off the line.
- Defensive driving always
 - Even if the road or highway is shut down for emergency personnel only, you must drive only as safe as the conditions allow.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 1. Closest EMS resource
 2. Communications Unit
- Communications Unit contacts:
 1. Ground or Air ambulance as requested
 2. Operations
 3. Safety
 4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 1. Communications
 2. Safety
 3. Logistics
 4. Operations
 5. Crew Supervisor
 6. Comps/Claims

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT WITH PATIENT: YES ___ NO ___
 AGE _____
 SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

TRAINING SPECIALIST MESSAGE

Trainees who have not previously checked in with the TNSP should do so immediately.

Beat the Rush!!

Trainer / Evaluators: If as much work as possible has been completed in the position task book, you are strongly encouraged to take advantage of your time in camp and conduct the training close-out with the TNSP. It is not necessary to wait until Demob!

**Claudia Soiza
TNSP
949 632-7813**

DEMOBILIZATION PLAN Rough Fire (West Zone) CA-SNF-001746

DEMOB PROCEDURES

- CHECK THE DEMOB LIST EACH MORNING. YOU CAN FIND THE DEMOB LIST THROUGH THE “QR” CODE ON THE I.A.P. COVER OR ON LISTS POSTED THROUGHOUT CAMP. **ONLY REPORT TO DEMOB AT YOUR SCHEDULED TIME.** EARLY ADMITTANCE WILL NOT BE ALLOWED.
- PICKUP A DEMOB CHECKOUT FORM (ICS-221) FROM THE DEMOB UNIT, THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
 - ✓ SUPPLY UNIT
 - ✓ COMMUNICATIONS UNIT
 - ✓ GROUND SUPPORT/VEHICLE INSPECTION***
 - ✓ DOCUMENTATION UNIT
 - ✓ TIME UNIT
 - ✓ TRAINING UNIT (IF APPLICABLE)
 - ✓ ACCOMMODATIONS (IF APPLICABLE)

***VEHICLE INSPECTION:

- THE DEMOB UNIT WILL INFORM YOU IF YOUR VEHICLE NEEDS TO BE INSPECTED.
- YOU MUST HAVE THE ICS-221 DEMOB FORM WITH YOU AT VEHICLE INSPECTION.
- A VEHICLE INSPECTION TIME WILL BE PROVIDED WHEN YOU INITIALLY ARRIVE TO THE DEMOBILIZATION UNIT.
- **DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT**

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL HOME SAFE!

Jan Lab PSC 9/15/15

IMT-2 FINANCE MESSAGE

- CAL FIRE Finance is in the trailers North of the Community Center
- HIRED EQUIPMENT VENDORS NEED TO STOP BY FINANCE WITH COPIES OF THEIR CONTRACTS ASAP.
- Please review attached shift ticket guidelines.
- **KEEPING TRACK OF WATER SOURCES IS MANDATORY** FOR ENGINES, WATER TENDERS, AND HELICOPTERS. THIS APPLIES TO ALL RESOURCES, REGARDLESS OF AGENCY, INCLUDING PRIVATE HIRES. THE ATTACHED FORM CAN BE USED FOR BOTH INCIDENTS. DROP OFF IN THE FINANCE SECTION DAILY.
- OFFSITE FEEDING IS **NOT** AUTHORIZED, EXCEPT FOR RESOURCES IN HOTELS IN FRESNO OR VISALIA.
 - ONLY Dinner – breakfast will be at base camp, sack lunches will be provided for lunch – pick up at base camp
 - Motel Unit has a list of off-site feeding locations.
 - AO-341 sign-up sheet must be signed by each person eating

Finance Contacts	
FSC1 – Bill Winter 805-903-3491	COMP – Joe Ekblad 619-213-4418
DFSC – John Kiszka 619-933-1189	PROC – Andre Schmidt 909-436-8192

GENERAL SHIFT TICKET INFORMATION

- Hired equipment day begins at 0001 and ends at 2400. Indicate equipment starting and stopping times. Use the 24 hour clock and round to the nearest ¼ hour.
- Only one shift (day) per Shift Ticket and only one Shift Ticket per shift supervisor (DIVS).
- Must have license #, serial #(last six OK), etc. unless equipment does not have them.
- Government employee AND contractor/operator must sign the Shift Ticket.
- Put request number (E-23, S-10, etc.) on the Shift Ticket.
- Ask to see the previous shift's copy if necessary so that no breaks or overlaps occur in time keeping. Shift Tickets should account for every hour the contractor was under hire from the time of hire until their return to their point of hire, including rest times, travel, etc.
- If equipment is assigned and getting paid for 24 hours, two operator names must be on the Shift Ticket. If only one operator is listed, vendor will NOT be paid for 24 hours.
- If needed, do an inspection when the equipment arrives at the incident base for Compliment, Capacity and Capability. Note any damage.
- Operators must have personal protective equipment.
- **Supervisor (DIVS) is to turn in pink and blue Shift Tickets daily to Equipment Time Recorder (EQTR), and keep white copy. The contractor keeps the yellow copy.**

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

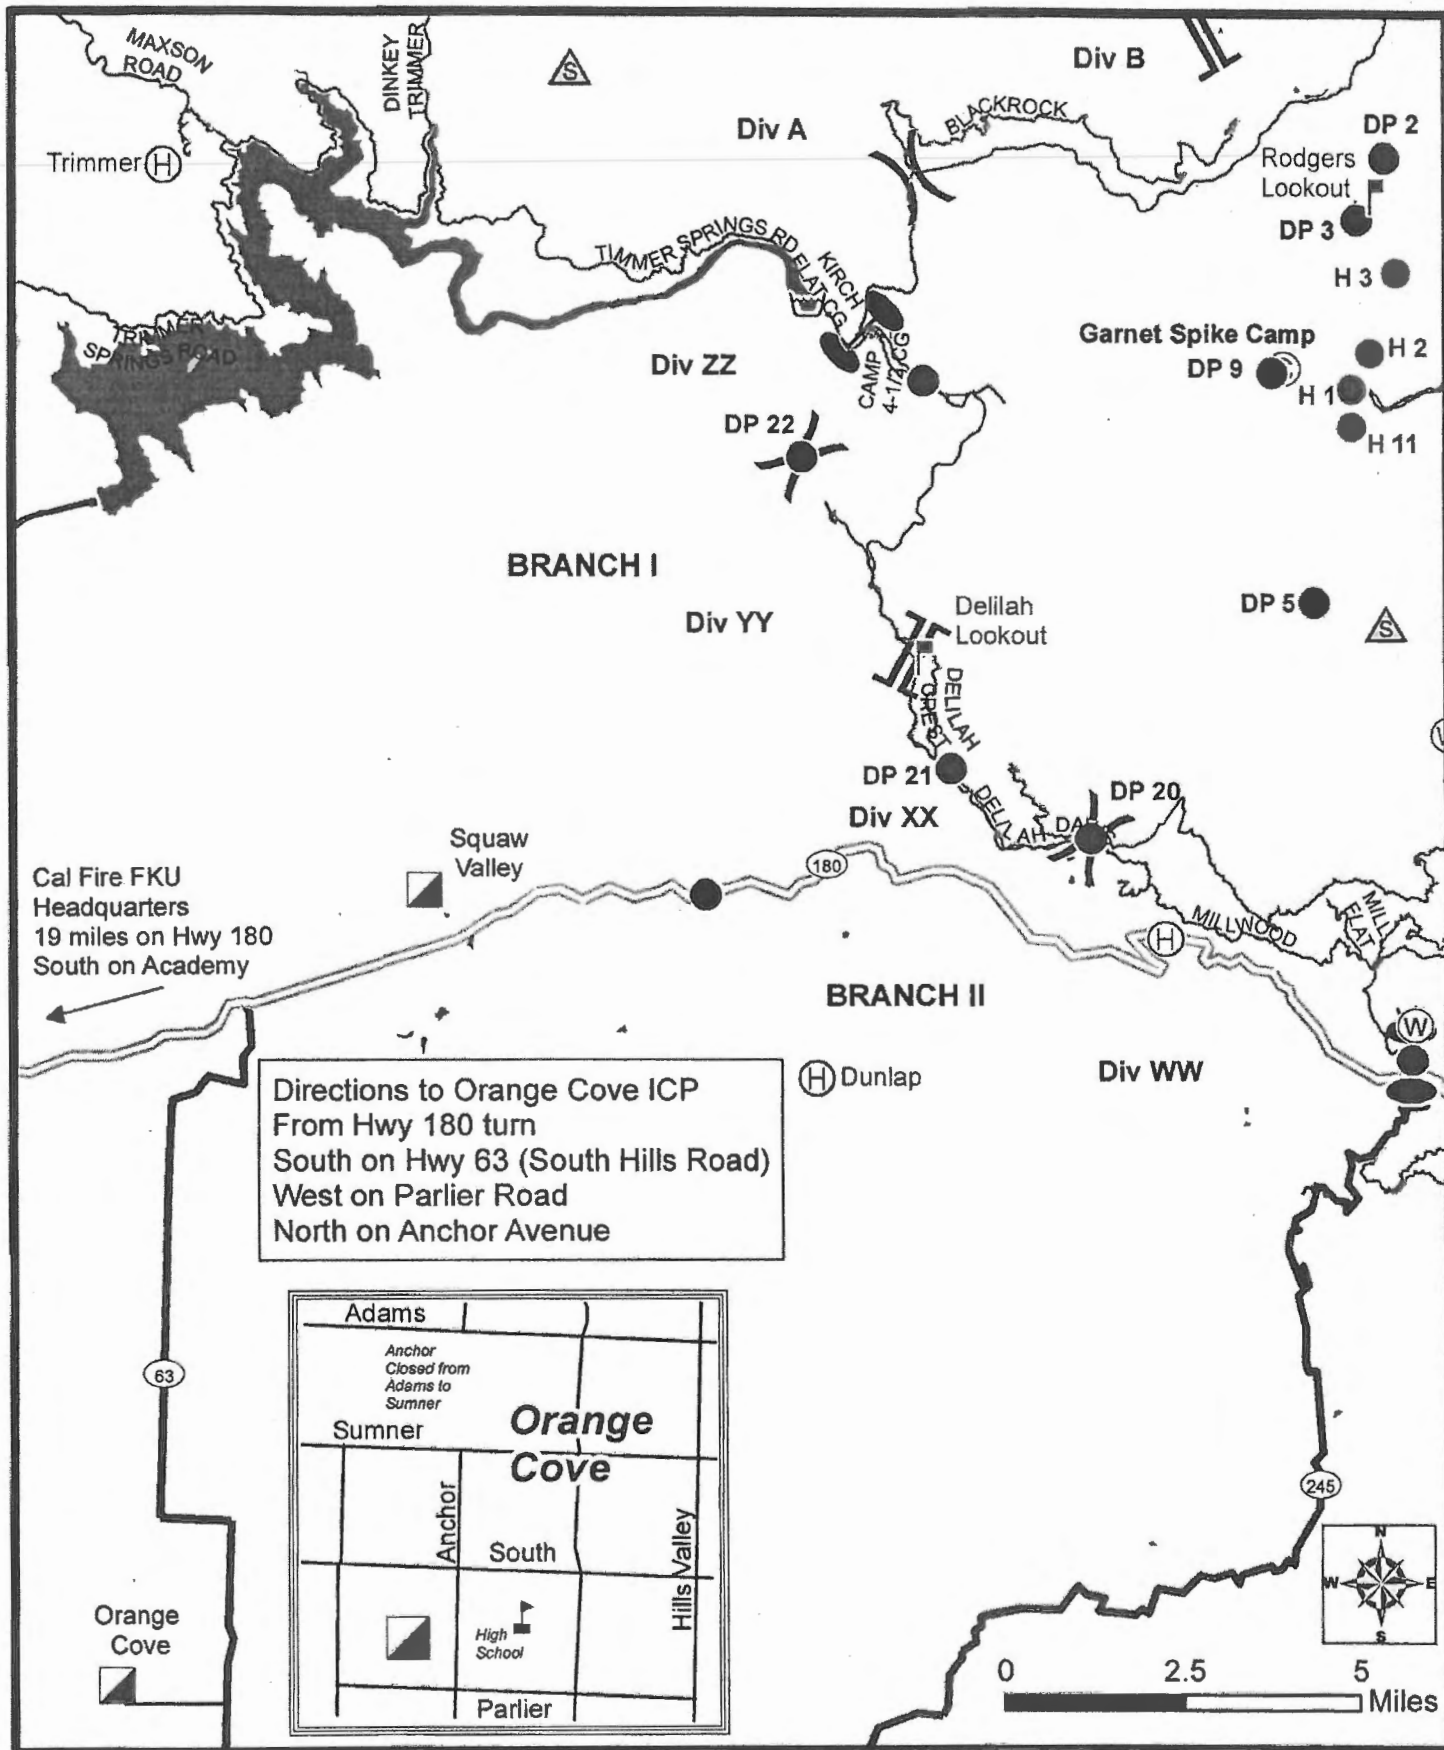

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
