

SKY FIRE IAP
CA-SNF-1058
P5JS5V (0515)

JUNE 23, 2015
OPERATING PERIOD
0600-1800 DAY

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY				
SKY	Date/Time From: 06/23/2015 0600 TUE	Date/Time To: 06/23/2015 1800 TUE			
3. Objective(s): 1. Provide for firefighter and public safety using LCES, Standard Orders, and Watch-Out Situations. 2. Minimize damage to structures, private property, and other improvements in the fire area. 3. Coordinate with Forest Resource Advisors to protect cultural, soil, water, and scenic resources in the fire area. 4. Manage the incident cost effectively for values at risk, through regular and ongoing use of cost analysis. 5. Implement Suppression Repair Guidelines for the Sky Fire provided by the Forest in coordination with the Resource Advisors. 6. To protect subdivisions and Giant Sequoia Groves in the area, keep the fire: <ul style="list-style-type: none"> • South of Gooseberry Flat; • West of Forest Road 6S011 • North of Forest Roads 6S11E and 6S010YA; and • East of Lewis Creek. 					
4. Operational Period Command Emphasis:					
General Situational Awareness: Maintain situational awareness in bug kill pockets.					
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:					
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%; vertical-align: top;"> <input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206 </td> <td style="width: 33%; vertical-align: top;"> <input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents </td> <td style="width: 33%; vertical-align: top;"> Other Attachments: <input checked="" type="checkbox"/> POCKET CARD <input checked="" type="checkbox"/> FIRE BEHAVIOR FORECAST <input checked="" type="checkbox"/> HUMAN RESOURCE MESSAGE <input checked="" type="checkbox"/> ICP PHONE LIST / BASE CAMP MAP S </td> </tr> </table>			<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input checked="" type="checkbox"/> POCKET CARD <input checked="" type="checkbox"/> FIRE BEHAVIOR FORECAST <input checked="" type="checkbox"/> HUMAN RESOURCE MESSAGE <input checked="" type="checkbox"/> ICP PHONE LIST / BASE CAMP MAP S

INCIDENT Weather Forecast

FORECAST NO: 6

NAME OF FIRE: Sky Fire

PREDICTION FOR: Day SHIFT

UNIT: USFS

SHIFT DATE: 6/23/15 (0600-1800)

SIGNED: Richard Thompson

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 6/22/15 @ 2030

WEATHER DISCUSSION: Relatively persistent conditions will prevail through the operational period. Afternoon highs will top out in the 80s to lower 90s while relative humidity drops into the teens. Variable winds in the morning will become southwest/upvalley by late morning...becoming gusty in spots by mid-afternoon.

From Wednesday through Saturday...a warming trend is expected as high pressure builds over the Great Basin. This high pressure will bring some mid-level moisture into the area on Friday and Saturday. At this time...there looks to be enough moisture and instability to generate isolated to scattered thunderstorms. Initially...any thunderstorms that develop will be dry.

WEATHER FORECAST:

WEATHER: Mostly sunny.

MAX TEMPERATURES: 82-92.

MIN HUMIDITY: 10-18%.

20 FT WINDS:

RIDGETOP - 0600-0900: North to northeast 4-8 MPH.
0900-1800: Southwest to west 4-8 MPH Gust 15 MPH.

SLOPE/VALLEY - 0600-0900: Variable/upslope 2-5 MPH Gust 8 MPH.
0900-1300: Upvalley 3-6 MPH Gust 12 MPH.
1300-1800: Upvalley 4-8 MPH Gust 16 MPH.

EXTENDED FORECAST (WEDNESDAY THROUGH SATURDAY):

WEDNESDAY: Mostly clear. Max Temps: 84-94. Min Temps: 54-62. Min RH: 12-20%. Max RH: 25-40%. Ridgetop winds: southwest 4-8 MPH Gust 15 MPH daytime and northeast 3-6 MPH nighttime. Slope/valley winds: upslope/upvalley 5-10 MPH Gust 16 MPH daytime and downvalley 3-6 MPH nighttime.

THURSDAY: Partly cloudy. Max Temps: 88-96. Min Temps: 58-66. Min RH: 8-18%. Max RH: 20-35%. Ridgetop winds: southwest 4-8 MPH Gust 15 MPH daytime and northeast 3-6 MPH nighttime. Slope/valley winds: upslope/upvalley 4-8 MPH Gust 14 MPH daytime and downvalley 3-6 MPH nighttime.

FRIDAY: Partly cloudy. Slight chance of showers and thunderstorms. Max Temps: 88-98. Min Temps: 60-68. Min RH: 10-20%. Max RH: 20-35%. Ridgetop winds: southwest 4-8 MPH Gust 15 MPH daytime and northeast 3-6 MPH nighttime. Slope/valley winds: upslope/upvalley 4-8 MPH Gust 14 MPH daytime and downvalley 3-6 MPH nighttime.

SATURDAY: Partly cloudy. Slight chance of showers and thunderstorms. Max Temps: 85-95. Min Temps: 60-68. Min RH: 15-25%. Max RH: 20-35%. Ridgetop winds: southwest 4-8 MPH Gust 15 MPH daytime and northeast 3-6 MPH nighttime. Slope/valley winds: upslope/upvalley 4-8 MPH Gust 14 MPH daytime and downvalley 3-6 MPH nighttime.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6

TYPE OF FIRE: Wildfire

FIRE NAME: Sky

OPERATIONAL PERIOD: 6/23/2015 Day

DATE ISSUED: 6/22/2015

TIME ISSUED: 2000

UNIT: Sierra National Forest

SIGNED: 

Typed/printed: David Greathouse - FBAN

WEATHER:

****Warm and dry again today with gusty afternoon winds****

****See fire weather forecast for details****

Batterson RAWS

Local Thresholds that shout watch out:

Temps greater than 92°, RH's less than 20%, 20' winds greater than 4mph

FUELS:

This fire is burning in Ponderosa Pine with a grass understory and brush at the lower elevations and mixed conifer at the higher elevations. Heavy slash from mastication work, and standing dead timber can also be found throughout the fire area. The fuels in this area are very dry. This area is experiencing its fourth year of drought. Current ERC's are trending way above normal for this time of year and is currently near the 90th percentile. Current fuel moistures are: Fine Dead - 3-4%, 10 hr. - 4-5%, 100 hr. 5%, and 1000 hr. - 8%. The 100 and 1000 hour fuel moistures are already at or below values observed in mid to late July.

**Todays Forecasted NFDRS indices:
(Batterson RAWS, Fuel Model B)**

ERC - 100 (Down 7), BI - 127 (Down 6)

FIRE BEHAVIOR:

This fire still has the potential for rapid, terrain driven rates of spread and high flame lengths at the head, single tree / group tree torching and short range spotting if it gets established outside the fireline.

All Divisions: Fire behavior along the fire edge today will be minimal, consisting of mainly creeping and smoldering. Some interior burning may be observed. Keep a heads up for spot fires. Any undetected spot fire can create suppression problems. Size up all snags for burning, look up! Just because it is not burning at the base doesn't mean there is no fire in the top. With the condition the fuels are in, pay close attention to them during mop-up, they can hold heat for several days.

**Maximum Fire Behavior Potential
(Head Fire, Upslope, Surface Fire):**

Rate of Spread: 10-18 Chains/hr, Flame Length: 8-12'
Spotting potential: up to 1000', Probability of Ignition: 90 - 100%

AIR OPERATIONS:

Visibility may be limited due to smoke
Sunset: 2023

SAFETY:

Stay alert, Don't be complacent!
Small changes in fuel and weather conditions can equal big changes in fire behavior

FIRE DANGER -- Sierra NF- Area 528

Maximum, Average, and 50th Percentile, based on 21 years data

Fire Danger Area:

- ◆ Fire Weather Zone 528
- ◆ North Fork RAIN/S 044204
- ◆ Elevation 2733 msl
- * Meets NWCG Wx Station Standards

Fire Danger Interpretation:

- EXTREME** -- Use extreme caution
- Watch** -- Watch for change
- Moderate** -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by day for 1991 - 2011

Average -- shows peak fire season over 21 years (3723 observations)

50th Percentile -- Only 50% of the 3723 days from 1991 - 2011 had an Energy Release Component above 41

Local Thresholds - Watch out:

Combinations of any of these factors can greatly increase fire behavior:
 20' Wind Speed over 3 mph, RH less than 20%,
 Temperature over 90, 10-Hour Fuel Moisture less than 6

Years to Remember: 2001 2008

Fuel Model: B - California Chaparral

Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

Past Experience:

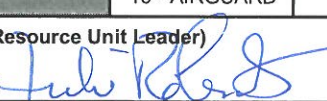

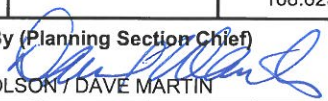

ERC's above 41 (50th percentile) are when the Forest historically begins to see consistent large fire days (> 100 acres in size) and multiple fire days (3 or more fires). This weather station represents the northern half of the forest, at lower elevations the area considered the front country. This area consists of a series of bluffs that range from 2000' to 4000' in elevation. Fires starting at the bottom of these bluffs have a tendency to burn to the top rapidly, roll out and repeat the process, couple this with wind and lat spread greatly increases. Urban intermix is also of concern with many small housing tracks in this area. The Highest recorded ERC was in August 2008 at 117.

Responsible Agency: USDA-FS Sierra National Forest

SAFETY* starts with *YOU

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Sky Fire

DATE: 06/23/15 Day Operations

Major Hazards and Risks: Steep, rugged, terrain; snags, stump holes and weakened green trees; Road/driving conditions, dry weather, wildlife and insects; dehydration/Heat Related Illness.

Narrative. Firefighters are being looked up to for their dedication and hard work.. Don't drive or behave in such a way to turn the public's attitude against us, or even worse, to cause a serious accident. Our policy is to drive slowly, courteously, **and with lights on**. Hot dry weather can produce dehydration/heat related illnesses. Plenty of fluids and food with frequent rest breaks are necessary. **Most importantly – Remain focused on LCES!**

Road Conditions: Steep, narrow mountainous roads with blind curves and falling/sliding fire debris. Smoky and dusty conditions add to the limited visibility and speeds must be kept at a minimum. **Drive defensibly!!**

Loose footing- Steep, rocky terrain produces difficult movement for personnel. Take your time and make proper foot placement.

Dry Weather- Continue to expect somewhat higher temperatures, low RH's, and some winds. Expect the unexpected!

Snags, stump holes & falling fire damaged green trees- still one of the biggest hazards out there. Look up, look down, around. Falling fire debris rarely gives us a second chance. Plan upon an approach, and retreat be prepared.

Don't get Behind

8. MEDICAL EMERGENCY PROCEDURES

FIRE LINE OR SPIKE CAMP EMERGENCY

Crew Boss to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor:
 - (Sky Dispatch consider restricting the channel for emergency traffic only)
 1. Contact communications with Patient injury/illness info.
 2. Request medical supplies & evacuation resources.
 3. Determine Plan for patient evacuation
 4. Give DP or LZ information for Patient Evac.
- Operations:
 1. Oversees Medivac operations
 2. Makes all necessary notifications & transport decisions per Med Unit and Air Ops input.
- Communications:
 1. Notify Operations, Medical Unit & Safety Officer
 2. Contact Sierra Dispatch to request air ambulance or ground ambulance if needed.
- Medical Unit:
 1. Notify receiving hospital of injury status and ETA.
 2. Assist with making the patient's transport decisions

Note: Notify Medical Unit of any firefighter injury or being sent in to the Med Unit, prior to transport.

BASE CAMP EMERGENCY

Contact Medical Unit with patient complaint/condition and location.

INJURY REPORTING PROCEDURES
(DO NOT USE PATIENT NAME OVER THE AIR)

NATURE OF INJURY _____

LOCATION OF PATIENT _____

IS EMT WITH THE PATIENT: YES _____ NO _____

TRANSPORT REQUEST BY: AIR _____ GROUND _____

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

PATIENT WT _____ lbs. (For Air Evac)

AGE _____

SEX: MALE _____ FEMALE _____

Vitals and other information: _____

Initial Patient Assessment

- General Impression of Patient
- Airway
- Breathing
- Circulation
- Wrist or Neck pulse
- Major Bleeding***

Skin Color

- Normal
- Pale
- Flush/Red
- Bluish***

Patient Information

- Chief Complaint _____
- Age & Weight _____ / _____

Level of Consciousness

- Alert and Oriented
- Responsive to voice
- Responds to painful stimulus***
- Unresponsive or Unconscious***

Skin Moisture

- Normal
- Dry
- Moist
- Profuse sweating

Breathing

- Normal Respirations
- Labored/Difficulty Breathing*
- Not Breathing (Start Rescue Breathing)***

Pupils

- Equal and reactive to light
- Sluggish to respond
- Fixed***
- Constricted***
- Dilated***
- Unequal***

Skin Temperature

- Normal
- Cool
- Cold
- Hot***

Pulse

- Present
- Not Present (Start CPR)***

Asterisked (*) marked vitals are significant findings, an airship should be considered as the first mode of transportation for the patient.

TRAINING SPECIALIST MESSAGE

Sky Fire

All packages are due in by the end of shift

June 23rd, 2015

TRAINING WILL BE CLOSING AT 2200

Regardless of home agency, in order to insure incident documentation of any training assignment - Close your assignment with the Training Specialist prior to demob.

Bring a completed individual performance rating and your trainer to the exit interview.

Forms are available at the Training Specialist office.

Thank You.

Derek Parker
Training Specialist

Sky Fire Human Resource Message

Each firefighter is expected to be physically and mentally prepared to perform emergency duties and assigned tasks requiring each of us:

1. To be proficient in our job, both technically and as a leader.
2. To make sound and timely decisions.
3. To ensure that tasks are understood, supervised and accomplished.
4. To develop your subordinates for the future.
5. To ensure that you treat everyone with respect.

The public expects our best efforts...they see us as professionals.

Let's continue by doing our best at all times.
