TIME AND DATE
FORECAST ISSUED: 11/11/18 @ 1900

WEATHER DISCUSSION: ...RED FLAG WARNING THROUGH 500 PM TUESDAY...

Moderate to strong Santa Ana winds will continue across the area through the operational period. The winds will peak in strength late this morning into early afternoon then will weaken through this evening. However, the winds will begin to increase yet again tonight and Tuesday morning. Relative humidity will drop into the single digits with little, or no, recovery tonight. Given the wind and moisture conditions, as well as the dry vegetation, **CRITICAL FIRE WEATHER CONDITIONS** will continue through the operational period.

The Santa Ana winds will continue through Tuesday afternoon with critical fire weather conditions continuing. There is a chance that Santa Ana winds could persist through Wednesday with **CRITICAL FIRE WEATHER CONDITIONS** continuing through Wednesday afternoon. For Thursday and Friday, the offshore flow will weaken with the potential for some weak onshore winds in the afternoon and evening hours.

WEATHER FORECAST:

WEATHER: Mostly clear. Areas of smoke.

TEMPERATURES: Max: 76-82.
Min: 50-60.

HUMIDITY: Min: 4-10%.
Max: 8-18%.

20 FT WINDS:
RIDGETOP - 0700-1000: Northeast 20-30 MPH Gust 45 MPH.
1000-1400: Northeast 25-35 MPH Gust 55 MPH.
1400-2200: Northeast 20-30 MPH Gust 45 MPH.
2200-0700: Northeast 15-25 MPH Gust 40 MPH.

SLOPE/VALLEY - 0700-0900: North to northeast 15-25 MPH Gust 40 MPH.
0900-1400: North to northeast 25-35 MPH Gust 55 MPH.
1400-2200: North to northeast 20-30 MPH Gust 45 MPH.
2200-0400: North to northeast 15-25 MPH Gust 40 MPH.
0400-0700: North to northeast 20-30 MPH Gust 45 MPH.

EXTENDED FORECAST:

Tuesday: Moderate to strong Santa Ana winds will continue across the area with gusts between 35 and 55 MPH with the strongest winds during the late morning and early afternoon hours. Relative humidity will remain very low with little, if any, overnight recovery. So, **CRITICAL FIRE WEATHER CONDITIONS** will continue.

Wednesday/Thursday: Santa Ana winds will gradually diminish through the period. However, dry conditions will persist with the chance of **CRITICAL FIRE WEATHER CONDITIONS** continuing into Wednesday.

WEATHER SUMMARY

Red Flag Warning through 5:00 PM Tuesday

- Today's weather will be dominated by Santa Anna Winds (off shore flow)
- See attached Incident Weather Forecast in IAP

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fuels in the area consist of cured annual and coastal grasses and coastal chaparral and sage. Rains in early October did not have a lasting effect and fuels are critically dry. The Topography is steep, broken and drainages are predominantly arranged in alignment with critical winds. Fire behavior in areas sheltered from the wind or decreases in off shore flow will transition rapidly to terrain runs. Long range spotting will continue to be a threat.

Forecasted Indices for Fire Area

Area	Fuels	DFM (10hr)	LFM	BI	FL	ROS
LA Basin (N of Hwy 101)	Chaparral	3%	64%	87 (Critical is 105)	40+	7-14 m/hr
Santa Monica Mts (S of Hwy 101)	Chaparral	2%	65%	139 (Critical is 94)	40+	7-14 m/hr

SPECIFIC:

Branch I

Hot spots in the Hidden Hills area will continue to produce embers that will threaten the line. Hold over fires in structures should be monitored closely.

Branch III/IV

Structures within 1 mile of the perimeter are capable of producing spot fires outside containment lines. The area of the tunnel has the most potential for growth. Fire crossing Malibu Canyon near the tunnel will be sheltered from the wind, expect a slope run toward Puma rd before turning back and making a wind run to the coast.

Branch V

Significant structure loss in the area will continue to be a source of embers. There are numerous green islands within the branch. These areas should be monitored closely for hold over fires.

Branch VI

The fire has burned into the Springs fire scar. The 5-year-old regrowth has proven to be an option as a barrier to fire spread.

Branch VII

The fire south of Hidden Valley and Lake Sherwood will continue to back. Any slacking of the offshore flow will result in increased fire behavior and terrain runs. This will lead to lateral growth to the East and West.

Branch VIII/IV/X

I do not expect any growth in this branch. Continue to monitor for hold over fire within structures.

AIR OPERATIONS:

Except for smoke, skies will be clear. Heavy winds will impact air operations.

SAFETY

Classic Santa Anna conditions today. Continually evaluate Escape Routes and Safety Zones. House to house ignitions and long range spotting may leave unburned fuel between you and the main fire.
