INCIDENT OBJECTIVES (ICS 202)							
1. Incident Name:	2. Operational Period:	Date From:	11/15/2018	Date To:	11/16/2018		
Woolsey		Time From:	0700	Time To:	0700		
3. Objective(s):							
Management Objectives							
 -Provide for emergency personnel and public safet through the hazard risk assesment process. 	ty at all times by ensuring ha	zards and risks are	identified, comm	unicated and	l mitigated		
-Protect property, improvements, and infrastructure	e.						
-Ensure an appropriate evacuation and repopulation	on plan is in place and comm	unicated.					
-Foster and strengthen relationships by recognizin	g the needs of all unified, ass	sisting and coopera	ating agencies.				
-Accurately track costs and provide fiscal accounte	ability while ensuring the nee	ds of the incident a	ire met.				
-Ensure timely and accurate information is coordin	ated and provided to the pub	lic and cooperators	s.				
					W		
0							
Control Objectives -Keep the fire North of the Pacific Ocean							
-Keep the fire South of Highway 118							
-Keep the fire East of South Reino Road & Sycamo	ore Canyon Road						
-Keep the fire West of Topanga Canyon Boulevard	l						
General Situational Awareness:	· · · · · · · · · · · · · · · · · · ·	-					
Steep and rugged terrain, critically dry and rec	eptive fuel beds, active are	a for fire history a	and drought stre	ssed trees.			
The fire area has a significant history for firefig	hter entrapments and injur	ies.					
5. Site Safety Plan Required?	Yes □ No Ø

INCIDENT Weather Forecast

FORECAST NO:

6

NAME OF FIRE: Woolsey

PREDICTION FOR: 24 hour

SHIFT

UNIT: VNC/CalFire

SIGNED:

SHIFT DATE:

11/15/18-11/16/18 (0700-0700)

Rich Thompson

Incident Meteorologist

TIME AND DATE

FORECAST ISSUED:

11/14/18 @ 1900

WEATHER DISCUSSION: Weak north to northeast winds can be expected this morning with gusts between 20 and 30 MPH. By late morning and early afternoon, the northeasterly winds will weaken and shift. Ridgetops and upper slopes will experience winds shifting to the northwest while lower elevations will experience weak southwesterly/upcanyon winds. After sunset, the wind will become light northeasterly at the ridges and weak drainage winds at lower elevations. Relative humidity this afternoon with be slightly higher, ranging from the upper single digits to mid-teens. Recovery tonight will be poor at the ridges with moderate recovery at lower elevations.

For Friday through the weekend, onshore flow will gradually increase. This will result in cooler temperatures and the possible return of some coastal stratus and fog. Relative humidity will also be higher through the period with moderate to high recovery likely at night across lower elevations.

WEATHER FORECAST:

WEATHER:

Mostly clear.

TEMPERATURES:

Max: 72-78.

Min: 46-56 except 56-62 in breezy areas.

HUMIDITY:

Min: 8-15%.

Max: Below 1000 feet: 45-65%.

Above 1000 feet: 15-25%.

20 FT WINDS:

RIDGETOP -

0700-1200: Northeast to east 10-20 MPH Gust 25 MPH. 1200-2000: Northwest to north 5-10 MPH Gust 15 MPH.

2000-0700: Northeast 5-10 MPH Gust 15 MPH.

SLOPE/VALLEY -

0700-1100: North to northeast 8-15 MPH Gust 20 MPH. 1100-2000: Southwest/upcanyon 5-10 MPH Gust 15 MPH.

2000-0700: Downslope/downvalley 4-8 MPH.

EXTENDED FORECAST:

Friday through Sunday: Through the weekend, onshore flow will prevail across the area. With this pattern, coastal stratus and fog will make a return during the night and morning hours. During the daytime hours, southwesterly/upcanyon winds can be expected with weak drainage winds during the overnight hours. Temperatures will be cooler, trending a degree or two below seasonal normal. As for relative humidity, afternoon minimums will be higher with moderate to high overnight recovery.

Monday and Tuesday:

Weak offshore flow is expected during this period. There will be some locally gusty north to northeast winds, but, at this time, winds are expected to be weak. However, the offshore flow will bring warmer temperatures and lower relative

humidity. So, elevated fire weather conditions will be possible.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildland Fire
FIRE NAME: Woolsey	OPERATIONAL PERIOD: 24hr 11/15 (0700-0700)
DATE ISSUED: 11/14	TIME ISSUED: 2100
UNIT: VNC/LAC	SIGNED: //Troy Velin//

INPUTS

WEATHER SUMMARY

- Today is a transition day! On shore winds return to the area.
 - See attached Incident Weather Forecast in IAP

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fuels in the area consist of cured annual and coastal grasses and coastal chaparral and sage. Rains in early October did not have a lasting effect and fuels are critically dry. The Topography is steep, broken and drainages are predominantly arranged in alignment with critical winds.

The areas South of Hwy 101, East of Hwy 23 and West of Las Virgenes have not burned since the late 1970's. Fuels were dense and heavy. Mop up will continue to pose challenges to firefighters.

Local Thresholds - Combinations of any of the following factors can greatly increase fire behavior.

- 20' Windspeeds over 30 MPH
- RH less than 20%
- Burning index above 77

Forecasted Indices for Fire Area

Area	Fuels	DFM (10hr)	LFM	BI
Santa Monica Mts (S of Hwy 101)	Chaparral	3%	59%	122(Critical is 94)

SPECIFIC:

Branch I, V, VII, VII, IX, X

No growth expected, monitor for hot spots.

Branch III/IV

Hot rolling material will continue to be a threat in this area. For any fire crossing Malibu Canyon to the East near the tunnel expect upslope runs to the East. If a fire becomes established East of the drainage weak on shore winds will aid in fire growth to the Northeast. Head Fire ROS 82 ch/hr, FL 10'. Backing Fire ROS 5 ch/hr, FL 5'

Branch VI

The fire will continue to slowly back toward Big Sycamore, Sycamore and Potrero roads. The Fire is burning in relatively light fuels, with little residency time. The path of travel today will be flanking and backing fire down canyon towards the coast. Head Fire ROS 82 ch/hr, FL 10'. Backing Fire ROS 5 ch/hr, FL 5'

AIR OPERATIONS:

Generally clear. Decreasing off shore flow will allow smoke to return to the area.

SAFETY

Pay attention for increasing winds or winds that change direction. Monitor for fire weakened trees and compromised infrastructure.

Woolsey/Hill Incident Safety Message

November 15, 2018 Everyone is a Safety Officer

INCIDENT: Woolsey

DATE: 11-15-18

TIME: 0700-0700

MAJOR HAZARDS and RISKS: EXTREME FIRE BEHAVIOR – STEEP and ROCKY TERRAIN – NARROW ROADWAYS to FREEWAYS – BLOWING and ROLLING MATERIALS ALL PPE – ALL the TIME – On the FIRELINE – NO EXCEPTION!

FIRE ORDER of the DAY – BE ALERT, KEEP CALM, THINK CLEARLY, ACT DECISIVELY

This fire has demonstrated RAPID RATES OF SPREAD. "Situational Awareness" at all Times.

Do Not become Complacent in your work assignments.

Identify Escape Routes and Safety Zones of adequate size. As your position changes insure you identify new safety zones and escape routes.

Perform your Risk Assessment BEFORE engaging and identify decision points for DISENGAGING. IRPG Page 1

Confirm radio frequencies and that you know how to operate your radio. Develop back up procedures.

Provide for frequent rest breaks and adequate hydration. Monitor yourself and those around you for heat related illnesses. DON'T LET THETEMPERATURE FOOL YOU!

Drive with caution on narrow dusty roads and when in neighborhoods. Remember drive defensively!

Document all tailgate safety briefings on your 214's (to include subject matter) for each operational period

Watch Out Situation of the Day

18. TAKING A NAP NEAR THE FIRELINE

Escape Route/Safety Zone Checklist

Escape Routes:

- *More than one escape route
- *Scouted soils, vegetation, slope
- *Timed slowest person, fatigue, dozer speed
- *Marked flagged for day and night use

Safety Zone:

- *Survivable without a shelter
- *Natural clean burn, water, bare soil/rock
- *Manmade constructed sites, roads
- *Scouted for size and hazards
- *Close enough considering escape time needed

Remember and Follow:

- *The 10 Standard Fire Orders
- *The 18 Situations That Shout Watch Out
- *The Common Denominators of Fire Behavior on Tragedy Fires
- *The Downhill Line Construction Guidelines

STATUS									
Incident Start Date: 11/08/2018	Incident Start Time: 2:30 PM								
Cause: Under Investigation	Acres:								
Containment:	Total Personnel:								

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found https://example.com/here.com/

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT — We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE San Luis Obispo Unit.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items, the address is: 480 Skyway Dr Camarillo, CA 93010

TRAINING SPECIALIST MESSAGE

All Woolsey Incident Trainees Beat the Rush!!!

In order to receive documented credit for your training assignment you must register with the incident Training Specialist.

The Training Specialist is available immediately following the morning Briefing.

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!!

Bring the following to the "exit interview"

- A completed and signed ICS 225 Performance Evaluation
- A completed Evaluator's Recommendation

Forms are available at the Training Office

Remember: No documentation – it didn't happen!

Claudia Soiza - 949 632-7813 Cory Cisneros - 909 224-1640 Jon Garber (t) – 909 307-4388 Danielle McMillion (t) 310 95 -2136

Peer Support

We may not recognize it now, but we are all part of an incident that may potentially have a lasting impact.

We are local, state and federal fire agencies, law enforcement, EMS, private contractors, public utilities and military working together for a common mission.

There are many kinds of trauma, grief and losses present in these incidents, and these factors may potentially have an impact on us, no matter who you are or what your background. These include:

- Successive large scale incidents.
- Local first responders who are personally impacted by the events.
- Incidents with national exposure, political implications and high media presence.
- Evacuations and rescues in high intensity environments.
- Destruction of residences, commercial buildings, critical infrastructure and community landmarks.
- Repopulation and the anguish we witness from the community.
- Providing emotional support for the community and each other.
- The time spent away from our families with the holidays approaching.

We all need to stick together, take care of ourselves and each other. We know how to watch out for each other on the fire line for our physical safety. The same is necessary for our emotional and psychological safety.

Come by the Peer Support trailer, we are on the grass adjacent to the briefing area.

Woolsey Fire Demobilization Plan CA-VNC-091023 November 14th, 2018

Supervisory personnel are to identify resources excess to the needs of the incident at the earliest opportunity. If possible, this should be done within 36 hours in advance of a proposed release by filling out a General Message Form (ICS 213) or Declaration of Excess Resource Sheet. Please include name, request number, date, ETD, ETA, and if available for reassignment. By definition, surplus personnel are available for release if they have met the 2:1 work rest requirements, and have rested for a minimum of 8 hours.

Section Chiefs will approve all excess resource lists and the lists will be forwarded to the Resources Unit for processing. Operational resource excess lists shall be prepared by the Planning Section and approved by the Planning Section Chief.

The release priorities are:

- Crews
- Overhead
- Equipment

The needs of the incident and off-incident issues may necessitate the modification of these priorities in certain cases.

Information concerning surplus resources will be forwarded to the Ventura County expanded dispatch by the Demobilization Unit (with ECC Support Team at incident). This information will include the resource name, request number, ETD, and ETA. Additionally, the availability of the resource for a new assignment will be provided.

All government vehicles and hired equipment must be safety inspected prior to release. Safety inspections shall be coordinated with the Ground Support Unit Leader. All deficiencies will be corrected prior to departure for home unless agency head signs a waiver of inspection.

Surplus resources lists will be posted within the ICP and at the Demobilization Unit with a schedule for resources to pick up the checkout form (ICS-221) at the Demobilization Unit and begin the checkout process. Finance will be the final stop prior to returning to the Demobilization Unit. All resources must complete the demobilization process. Once the ICS-221 has been completed and returned in to the Demobilization Unit, the resource will be released from the incident to home, re-assigned to another incident, or held as directed by Northern Region Operations Center (North-Ops).

All Resources will meet any agency-specific and/or DMV rest requirements before demobilizing from the incident. The operator must be rested prior to driving. A resource encountering a delay enroute will contact the appropriate home unit or incident.
