

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Taboose CA-INF-002018	IR Interpreter(s): Maximillian Wahlberg max.wahlberg@usda.gov	Local Dispatch Phone: Inyo National Forest 760-873-2488	Interpreted Size: 10,293 acres Growth last period: +3 acres since previous night's IR perimeter
Flight Time: 1947 PDT Flight Date: 9/20/2019	Interpreter(s) location: Portland, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Kyle Felker GACC IR Liaison Phone: 530-251-6112	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: CA-INF	A Number: A-98	Aircraft/Scanner System: N149z / Phoenix	Pilots/Techs: N149Z Flight Crew Pilot: Johnson Pilot: Boyce Tech: Butler
IRIN Comments on imagery: Some clouds present, but most of the fire area was mappable between the two strips. Slightly tighter flight lines tonight made for better coverage in some of last night's holes.		Weather at time of flight: Clear	Flight Objective: Map heat perimeter, intense heat, scattered heat, and isolated heat
Date and Time Imagery Received by Interpreter: 9/20/19 @ 2013 PDT		Type of media for final product: Shapefiles, PDF Map, KMZ, IR Daily Log	
Date and Time Products Delivered to Incident: 9/20/19 @ 2120 PDT		Digital files sent to: NIFC FTP: https://ftp.nifc.gov/public/incident_specific_data/calif_s/!2019_Incidents/CA-INF-002018_Taboose/IR/20190921/	
Comments / notes on tonight's mission and this interpretation: Tonight's mapping began with the previous night's IR heat perimeter. Limited growth over the previous night's flight. Only 3 acres of growth were mapped, occurring in the unnamed drainage south of Red Mountain Creek. Five pockets of intense heat were mapped in the area around and south of Red Mountain Creek. One additional small pocket of interior intense heat was mapped on the south side of Shingle Mill Bench. Pockets of scattered heat, and isolated heat were once again mapped in the southwestern and southern portions of the fire area. NOTE: Some area were obscured by clouds. Clouded areas were mapped, and depicted on the map products as "Cloud Cover". Unmapped heat may exist in these portions of the fire.
