INCIDENT ACTION PLAN

Update 08/16/2020
0720

LAKE FIRE

CA-ANF-003273

P5NE2V

Saturday / Sunday

NIGHT SHIFT

1800 8/15/2020

TO

0600 8/16/2020

FOR PUBLIC INQUIRIES REGARDING LAKE FIRE
INFORMATION, DIRECT THEM TO CALL (626) 574-5208

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">LAKE FIRE</p>	2. Operational Period:	Date From: 8/15/2020 Time From: 1800	Date To: 8/16/2020 Time To: 0600
--	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat of exposure to COVID-19 by adhering CDC COVID-19 Guidelines.
- Minimize the threat to private property, critical infrastructure and heritage resources.
- Establish and strengthen cooperators, partners, and stakeholder relationships.
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

- Keep the fire North of Castaic Lake
- Keep the fire South of Hwy 138
- Keep the fire East of Red Rock Mtn.
- Keep the fire West of Tule Ridge

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required?

Yes No

Approved Site Safety Plan(s) Located at:

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 003	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Lake	OPERATIONAL PERIOD: 8-15-20 Night Shift
DATE ISSUED: 8-15-20	TIME ISSUED: 1200
UNIT: CA-ANF	SIGNED: <i>Matt Brown</i> 
Typed/printed: Matt Brown FBAN(t)	

INPUTS

WEATHER SUMMARY: Expect evening temperatures to be higher today, reaching low 100's at the upper elevations with RH in the low 20's in the same locations. Winds will be SW early in the evening then switching to WNW 3-6 with gusts to 15 mph at the 20 ft level.

Poor recoveries and warm overnight temperatures will continue the burn period longer into the evening than yesterday. Increasing instability after midnight as a wave moves through.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire will experience another evening with a very unstable atmosphere parked over the top. Tonight we may see visual indicators of the instability such as cumulus build up and may begin the shift with a pyrocumulus in the area. This layer can enhance burning through convection or a type of "chimney" effect". Due to the decedent dry fuels and lack of fire history, expect long rang and increased spotting. This heavier fuel layer has sufficient size and duration to produce the type of ember cast that can be lofted up in the column and cause fires over a mile away from the main fire.

Live fuels are at critical and burning index extreme. ERC is forecasted to set a record today.

SPECIFIC:

Divisions toward the head of the fire will experience a change in fuels and topography. Although winds can increase on the lee side of the slopes adjacent to the desert communities, choice of barriers and lighter grass type fuels typically respond to favorably suppression efforts.

Divisions on the right flank of the fire will experience faster rates of spread, but the recent fire history has reduced the fuel loading; therefore, increasing chances of success using direct tactics when conditions allow. Some threats remain to the line in drainages requiring extensive mop-up where fuels are heavy.

Divisions on the left flank of the fire will experience the most challenging fire behavior. Spotting is expected to exceed a mile. The probability of ignition will be 100% at the start of night shift. The shrub type fuel is not only tall but has a 100 year-old dead component under the canopy. Conifer type fuels will produce brands that can effectively produce spots. Aerial retardant application may slow the fire for a brief period of time but will be mostly ineffective in stopping spread without close ground follow up. The fire will continue to flank out and run in aligned drainages and slopes. Structures along Pine Mountain road will continue to be threatened by spots and runs that are produced in aligned drainages.

Head Fire Estimates BEHAVE Plus 5.0.5

Fuel Type	ROS	FL	PIG
Shrub SH7	100-120 ch/hr 80-100 ch/hr after 2300 hrs	20-30 ft. 15-20 ft after 2300 hours	100% 50% after sunset

AIR OPERATIONS:

Transport winds will carry most of the smoke to the east overnight. Air Operations should experience good visibility early in the operational period.

SAFETY

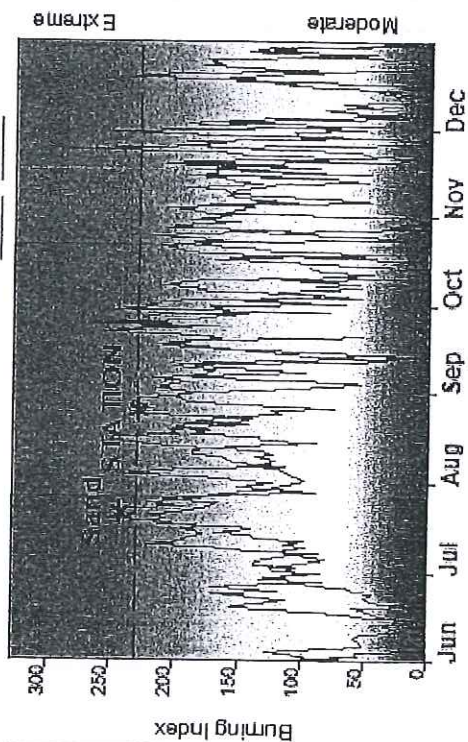

In the heavier fuels spot fires can grow and spread rapidly and with great flame lengths. Consider your escape route and overall effectiveness based on fire behavior before engaging. Pyrocumulus collapse rarely produces significant outflow winds directly over a fire, but the chance of a down draft should be considered when planning work assignments. There is a chance of thunderstorms after midnight. Safety plans should consider outflows from these storms as well.

FIRE DANGER – High Country Forecast Zone

Maximum, Average, and 97th Percentile, based on 10 years data

Years to Remember: 2009 2016

Fuel Model: B - California Chaparral

Fire Danger Area:

- ◆ High Country Fire Danger
- ◆ High Country Zone
- ◆ SIG High Country WX
- * Meets NWCG Wx Station Standards

Fire Danger Interpretation:

- EXTREME – Use extreme caution
- High – Watch for change
- Moderate – Lower Potential, but always be aware

Maximum – Highest Burning Index by day for 2009 - 2018

Average – shows peak fire season over 10 years (2110 observations)
97th Percentile – 3% of the 2110 days from 2009 - 2018 had an Burning Index above 228

Local Thresholds - Watch out:

Combinations of any of these factors can greatly increase fire behavior:
20+ Wind Speed over 0 mph, RH less than 1%,
Temperature over 1, Burning Index over 0

Remember what Fire Danger tells you:

- ✓ Burning Index gives day-to-day fluctuations calculated from 2 pm temperature, humidity, wind, daily temperature & rh ranges, and precip duration.
- ✓ Wind is part of BI calculation.
- ✓ Watch local conditions and variations across the landscape – Fuel, Weather, Topography.
- ✓ Listen to weather forecasts – especially WIND.

Past Experience:

- Wind Driven Fires Can Produce:
- Rates of Spread > 80 c/hr
- Spotting up to .5 - 1 mile ahead of fire front
- Eye Level Winds > 7 MPH
- Live Fuel Moistures < 75%
- Fine Fuel Moistures < 5%
- Active Night Burning Conditions with RH < 25%
- Non-Wind Driven Fires: Mature fuel beds 20+ years of growth identify the alignment of wind, slope and solar pre heating

Responsible Agency: LA County

FF+5.0 build 20191211 06:01/2020-14:52 (C:\Users\Garett... \High County 2019_10 Years)

Design by NWCG Fire Danger Working Team

Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: Lake Fire

PREDICTION FOR: 1800 Sat - 0600 Sun

UNIT: CA-ANF

SHIFT DATE: 08/15

SIGNED: *Matt Mehle*

TIME AND DATE

Incident Meteorologist - Matt Mehle

FORECAST ISSUED: 1200 08/15/20

...Excessive Heat Warning valid through Monday Evening...

WEATHER DISCUSSION: Lingering monsoon moisture will produce cumulus clouds in the afternoon/evening with a possibility for thunderstorms through early Sunday. Dry lightning and gusty outflows would be the greatest threat with developed storms. An unstable atmosphere will remain allowing for vertical plume growth in the afternoon and evening hours. Little relief is expected Saturday night with mild low temperatures and poor relative recoveries. Very hot and dry conditions will persist into early next week.

WEATHER FORECAST FOR SATURDAY NIGHT:

WEATHER: A slight chance for showers and thunderstorms. Thunderstorms most likely during the evening, but a few are still possible overnight. Otherwise, partly cloudy overnight.

TEMPERATURES: Min 75-80 F...above 2000' 70-75 F. **24 HR Trend:** Little Change.

HUMIDITY: Max 35-45%...above 2000' 30-40%. **24 HR Trend:** Little Change.

20-FOOT WIND: Southwest 4-8 mph with gusts to 15 mph in the evening becoming West to Northwest 3-6 mph overnight.

Chance of Wetting Rain (0.10"): <10% **LAL:2**

WEATHER FORECAST FOR SUNDAY:

WEATHER: Mostly Sunny. Slight chance for afternoon showers and possibly thunderstorms.

TEMPERATURES: Max 99-105 F...above 2000' 93-97 F **24 HR Trend:** 3 degrees cooler.

HUMIDITY: Min 20-30% ...above 2000' 25-35% **24 HR Trend:** 5% wetter.

20-FOOT WIND: West to northwest 3-6 mph in the morning. Southwest 5-15 mph in the afternoon gusts 20-25 mph.

Chance of Wetting Rain (0.10"): <10% **LAL:2 in the afternoon**

EXTENDED FORECAST:

MONDAY... Mostly sunny. Max temps 97-102 F above 2000' 90-95 F. Min RH 15-30%. Southwest 6-12 mph with gusts 20-25 mph in the afternoon.

WEATHER SAFETY MESSAGE

- Dangerous Heat – Stay hydrated.
- Thunderstorms with dry lightning and gusty outflow winds.
- Plume dominated fire possible. Use LCES.
 - Collapsing plumes create gusty and erratic winds

ASSIGNMENT LIST (ICS 204 WF)

6. Work Assignments:
 Task: Advance permieter control lines from Lancaster road east and south to Pine Canyon Rd. to protect the Lake Hughes area. Mop up and patrol around structures within the existing burn area to minimize damage.
 Purpose: Stop forward spread of fire.
 End State: Confine the fire between 195th St./Aquaduct Road and Pine Canyon Road.

7. Special Instructions:
 Provide for structure protection as needed.
 USE LAC V-13D FOR RADIO BRIEFING

SAFETY MESSAGE

LAKE FIRE CA-ANF-003273 Night Shift: 8/15/20 1600 hrs. to 0600hrs.

- Maintain LCES and continually re-evaluate. Assure that all personnel have good communications. If you aren't in position to see the fire, who is your lookout???
- Ensure your LCES is adequate for worst- case fire behavior.
- Maintain accountability of all personnel on the fire. No assumptions-Communicate
- Does EVERYONE know the plan if the fire gets up and moves big today?

FIRE BEHAVIOR: This fire has the potential for very large growth. Spotting is common and will continue. Very likely to have cumulus cloud built up with large fire growth, which can result in increased fire behavior due to column collapse and downdrafts.

HAZARD TREES: Snags are an issue, in the green and in the black. Perform hazard tree assessments and risk analysis at your location. Are you parking your vehicle in a safe spot? Wear your hard hat at all times when outside of vehicles & follow Hazard Tree Safety Guidelines.

POWER LINES: Always consider downed power lines energized. Even if Edison shuts down supply circuits, power lines always have the potential to be back-fed and live though properties with solar panels.

HYDRATE: We'll have extremely high temperatures today. Hydrate early and often. Keep an eye on all of your crewmembers. Look for the subtle signs that they might show if they're starting to have issues with the heat. It's important to keep ahead of it and catch issues early.

DRIVING ISSUES: Narrow, windy, roads throughout the fire area. Beware of the potential for large rocks and debris to fall onto the roadways. Drive defensively, keep your speeds down. Don't text and drive. WEAR YOUR SEATBELT!

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Symptoms & Signs of Heat Illness

Heat Exhaustion: Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

Treatment : Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

Heat Stroke: This is a medical emergency!! Victim will hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

Treatment – Immediately cool individual's body by pouring water over them, especially the head and upper body. Contact the medical unit. Monitor the victim and provide whatever medical

Safety Officers – Brian Savage- SOF1, Dave Welch- SOF1

INCIDENT RISK ANALYSIS

LAKE FIRE

(ICS 215a) Night Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	WEATHER	<ul style="list-style-type: none"> • Be aware of changing weather conditions. • Watch out for increasing heat, winds, and instability. • Anticipate increased fire behavior conditions. • Communicate any observed changes in weather and fire behavior. • "Base all actions on current and expected behavior of the fire."
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications..
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below. • Make sure LCES is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is high. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks and turn wheels into the hill. • Watch for rolling rocks and debris from hillsides.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas: use human repeaters as needed. • Ensure all personnel are familiar with the incident and the IAP communications plans. • Make sure all resources have radios cloned appropriately. • Ensure that non-agency resources understand radio use and procedures.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of heat stress and fatigue, take breaks as necessary. • HYDRATE before, during and after your shift. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of heat stress and fatigue, and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Do not plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Ensure ground personnel have safety illumination, with light-sticks being the minimum. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22-23). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Watch for agitated buffalo and cattle that may charge. • Follow all CDC and Agency COVID 19 protocols.

								County: LAC State: CA		Latitude: N		Longitude: W	

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz), or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Lake Communications:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor of POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG.

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients do not trigger Incident within Incident (IWI).
- Division Supervisor contacts Apple Communications:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on page 118 -119 of the IRPG.

IN-CAMP – 24 HOUR MEDICAL

- Contact Lake Communications with:
 - Patient Complaint, Condition and Location via LOGS net or Command frequency

Human Resource Message

Hello

As the Human Resource Specialist assigned to this incident, my role is to facilitate a positive work environment, which begins with "Hello"! A simple hello goes a long way toward establishing our human connection and how we relate to others.

My role is to be a focal point for informal resolution of issues and concerns to ensure a positive work environment. You may come to me with any question or concern about any aspect of your work environment while assigned to the incident. I am particularly committed to help assure resolution of issues as they arise, rather than waiting until after the incident is demobilized. High priority is given to resolving issues informally with mutual respect as a priority. If you are aware of inappropriate conduct, you have the right and the obligation to do something about it.

Come see me any time you have questions or concerns.

A sense of humor is part of the art of leadership, of getting along with people, of getting things done. Dwight D. Eisenhower

Andrea Cabida
Human Resource Specialist
707-330-9939

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

ALL ASSIGNED TRAINEES

working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The Training Specialist is available immediately following the morning Operations Briefing.

TRAINING SPECIALIST

**Claudia Soiza
Cell-(949)632-7813**

**Incident Trainee/Trainer Data Form
Lake Fire CA-ANF-003273**

Training Specialist: Claudia Soiza 949.632.7813

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package, bring: 1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2 ^o - 3 ^o burns more than 4 palm sizes, heat stroke, disoriented.	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2 ^o - 3 ^o burns not more than 1-3 palm sizes.	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC*
COMMAND	Operations	172.3750	Tone 8, 103.5	164.9375	Tone 14, 151.4
AIR-TO-GRND	Lake A/G	169.2875	CSQ	169.2875	CSQ
Med TACTICAL	Calcord	156.0750	Tone 6, 156.7	156.0750	Tone 6, 156.7

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
