INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: LAKE FIRE	2. Operational Period:	Date From: 8/20/2020	Date To: 8/21/2020
		Time From: 1800	Time To: 0600

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat of exposure to COVID-19 by adhering CDC COVID-19 Guidelines.
- Minimize the threat to private property, critical infrastructure and heritage resources.
- Establish and strengthen cooperator, partner, and stakeholder relationships.
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

- Keep the fire North of Castaic Lake
- Keep the fire South of Hwy 138
- Keep the fire East of Ridge Route Road.
- Keep the fire West of Tule Ridge

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

FORECAST NO: 13

NAME OF FIRE: Lake Fire

PREDICTION FOR: 1800 Thur - 0600 Fri

UNIT: CA-ANF

SHIFT DATE: 08/20

SIGNED:

Incident Meteorologist - Matt Mehle

TIME AND DATE

FORECAST ISSUED: 1200 08/20/20

WEATHER DISCUSSION: Winds will be breezy during the evening hours then gradually decrease overnight. The dry northerly flow will keep moderate to locally poor relative humidity recoveries in place. Temperatures will once again remain mild, especially higher elevations. Weakening high pressure will kick off a cooling trend beginning Friday and into the weekend. Will be watch for some moisture to move in over the weekend, which could bring thunderstorms back to the region.

WEATHER FORECAST FOR THURSDAY NIGHT:

WEATHER: Partly cloudy overnight.

TEMPERATURES: Min 72-78 F...above 4000' 75-81 F.

24 HR Trend: Little Change.

HUMIDITY: Max 30-40%...above 4000' 25-35%.

24 HR Trend: Little Change.

20-FOOT WIND: West to Northwest 10-15 mph overnight with gusts 20 mph becoming 5-10 mph with gusts to 15 mph overnight.

Chance of Wetting Rain (0.10"): 0%

LAL: 1

WEATHER FORECAST FOR FRIDAY:

WEATHER: Partly Sunny. A few increasing clouds.

TEMPERATURES: Max 97-103 F...above 4000' 95-98 F

24 HR Trend: 3 degrees cooler.

HUMIDITY: Min 15-25% ...above 4000' 15-30%

24 HR Trend: Little change.

20-FOOT WIND: Northwest 10-15 mph with gusts 20-25 mph.

Chance of Wetting Rain (0.10"): 0%

LAL: 1

EXTENDED FORECAST:

SATURDAY... Partly cloudy. Max temps 88-92 F. Min RH 20-30%. West Southwest 6-12 mph with gusts 20 mph in the afternoon.

SCAN FOR REALTIME OBS

WEATHER SAFETY MESSAGE

- Dangerous Heat – Stay hydrated.
- Plume dominated fire possible. Use LCES
- Collapsing plumes create gusty and erratic winds

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 013	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Lake	OPERATIONAL PERIOD: 8-20-20 Night Shift
DATE ISSUED: 8-20-20	TIME ISSUED: 1200
UNIT: CA-ANF	SIGNED: <i>Matt Brown</i> Typed/printed: Matt Brown FBAN(t)

INPUTS

WEATHER SUMMARY: Expect evening temperatures to be starting off right around 100 at the upper elevations with RH in the mid teens in the same locations. RH will recover to the 40% range. Winds will be NNW early in the evening then slowing later in the shift, 10-15 mph at the 20 ft level.

Poor recoveries, and warm overnight temperatures will continue the burn period long into the evening.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire will experience another evening with poor RH recovery; however, in some spots, it is expected to recovery above 30% which is the threshold for effective consumption in the shrub type fuels through firing.

Live fuels are at critical and ERCs are trending toward the 90th percentile.

SPECIFIC:

Divisions north of Pine Mt. Road are expected to have minimal fire activity.

Divisions on the right flank of the fire will have minimal fire spread.

Divisions on the left flank of the fire will experience favorable winds in most locations. The probability of ignition will be 80% at the start of night shift, unless shaded by cloud cover and smoke. Later in the evening the forecasted NNW and poor recovery will be favorable for firing the Liebre ridge system. Dog-legs and line oriented adverse to the winds will experience very slow backing (2ch/hr) and high spotting or slop over probability.

Divisions in the south part of the fire will experience wind eddies. The NNW dry flow will interact with broken terrain and produce gusty and erratic winds. Early in the shift, terrain winds will check fire spread into the burn until the diurnal downslopes set up later in the evening and become more adverse to the proposed line. Winds are expected to diminish later in the shift but will continue to have an erratic effect on fire behavior.

Head Fire Estimates BEHAVE Plus 5.0.5

Fuel Type	ROS	FL	PIG
Shrub SH7	100-110 ch/hr uphill run 40-50 ch/hr after 2300	20-25 ft uphill run 10-15 ft after 2300	80% 40% after sunset

AIR OPERATIONS:

Transport winds will carry most of the smoke to the SE overnight. Air Operations should experience good visibility throughout the operational period.

SAFETY

As winds intensify and change direction, wind battle may develop. With instability over the fire area chances of fire whirls forming are greatly increased. Avoid areas of broken terrain features where these may form, mostly on the lee sides. When firing complex terrain, forecast slop over impact areas and ensure escape routes.

FIRE DANGER -- High Country

Maximum, Average, and 64th Percentile, based on 21 years data

Fire Danger Area:

- Represents portions of
- FRDAs 555, 556, 590
- above 5,000 ft
- Meets NWCG Wx Station Standards

Fire Danger Interpretation:

- EXTREME** — Use extreme caution
- Moderate** — Watch for change
- Low** — Lower Potential, but always be aware

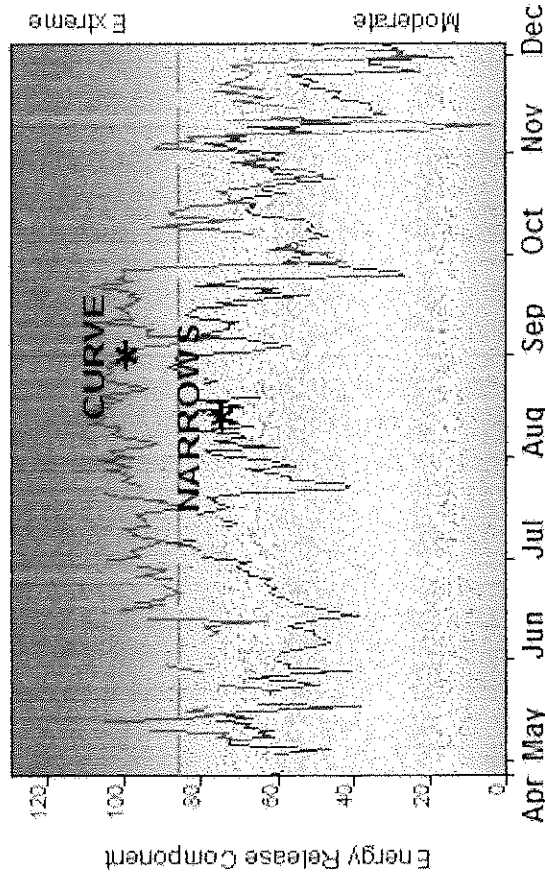

Maximum — Highest Energy Release Component by 3 day period for 1994 - 2014

Average — shows peak fire season over 21 years (4691 observations) 54th Percentile — Only 36% of the 4591 days from 1994 - 2014 had an Energy Release Component above 85

Local Thresholds - Watch out:

- Combinations of any of these factors can greatly increase fire behavior.
- 20' Wind Speed over 15 mph, RH less than 25%.
- Temperature over 85, 10-Hour Fuel Moisture less than 7

Years to Remember: 1997 2002

Fuel Model: G - Short-Needle (Heavy Dead)

Remember what Fire Danger tells you:

- Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & changes, and precip duration.
- Wind is NOT part of ERC calculation.
- Watch local conditions and variations across the landscape — Fuel, Weather, Topography.
- Listen to weather forecasts — especially WIND.

Past Experience:

Recent drought related conifer mortality has increased fire potential in these fuels. Torching and short duration crown fires should be expected. Medium and long distance spotting is common with 20 ft. winds in excess of 15 mph. Spot fire probability of ignition increases in full sun and at dry bulb temperatures above 85°F. Large fires (greater than 100 acres) have been documented at ERCs of 54, but become more probable as ERCs reach the mid-80's.

Weather Stations: Mill Creek, Big Pines, Vailermo, Chialo. Large fire threshold 100 acres.

Responsible Agency: U. S. Forest Service
 FF-4.1 build 02/24/2016-22:28 (E:130JUN2015)

Design by NWCG Fire Danger Working Team

Lake Fire – Safety Message

INCIDENT# CA-ANF-0033273

DATE:08-20-2020 TIME: 1800 – 0600 Night

Hazard Trees

- All trees need to be considered hazardous until they are evaluated.
- Even large, healthy looking trees can be dangerous due to forest health issues.
- Use the look up, down, and all-around process when working around or under trees.
- Minimize the number of personnel exposed, and the exposure time.
- Avoid unnecessary exposure around suspect trees during windy periods.
- Mitigate or close areas around hazardous trees in work areas.

Escape Routes (LCES)

Escape Routes are the path the firefighter takes from their current locations, exposed to the danger, to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter

- Have you timed your escape routes? The terrain here is very rocky and unstable.
- Think of a time when you were uncomfortably distant from your escape routes.
- Have you communicated your escape routes to your crews?

Mop up

- Conduct thorough briefing for all personnel (inside rear cover IRPG).
- Use all required PPE, including eye protection.
- Maintain proper spacing and overhead clearance.
- Be alert for stump holes and root cavities.
- Minimize exposure to smoke, and rotate personnel into clean air when practical.
- Evaluate unburned islands/Increase situational awareness.

Safety Officers: B. Savage (SOF1)
D.Welch (SOF1)

Pay attention to changes in the weather patterns!!!

14.WEATHER IS GETTING HOTTER AND DRIER

INCIDENT RISK ANALYSIS

LAKE FIRE

(ICS 215a) Day Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	WEATHER	<ul style="list-style-type: none"> • Be aware of changing weather conditions. • Watch out for increasing heat, winds, and instability. • Anticipate increased fire behavior conditions. • Communicate any observed changes in weather and fire behavior. • "Base all actions on current and expected behavior of the fire."
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LACES is in place. • Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications..
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below. • Make sure LACES is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22-23). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of heat stress and fatigue, take breaks as necessary. • HYDRATE before, during and after your shift. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of heat stress and fatigue, and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Do not plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Ensure ground personnel have safety illumination, with light-sticks being the minimum. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas: use human repeaters as needed. • Ensure all personnel are familiar with the incident and the IAP communications plans. • Make sure all resources have radios cloned appropriately. • Ensure that non-agency resources understand radio use and procedures.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is high. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks and turn wheels into the hill. • Watch for rolling rocks and debris from hillsides.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Watch for agitated buffalo and cattle that may charge. • Follow all CDC and Agency COVID 19 protocols. • Watch for unmarked mine shafts.

Prepared By (Communications Unit Leader)
Stephen Weston, COML (949) 412-1215

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

Incident Location CASTAIC LAKE, LAKE HUGHES, ELIZABETH LAKE, THREE POINTS

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Lake Communications:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG.

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients **do not** trigger Incident within Incident (IWI).
- Division Supervisor contacts Lake Communications:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on page 118 -119 of the IRPG.

IN-CAMP – 24 HOUR MEDICAL

- Contact Lake Communications with:
 - Patient Complaint, Condition and Location via LOGS net or Command frequency

STRESS

~ Be good to your body! It is the only place you have to live! ~

Life is full of frustrations and demands. Our current state of affairs is unprecedented. That can cause stress and fear of the unknow. Changes to our norm is fluidly happening daily. You may feel there's nothing you can do about stress but keep in mind, stress isn't always bad. Stress within your comfort zone can help you perform under pressure, motivate you to do your best, even keep you safe when danger looms. When stress becomes overwhelming, it can damage your health, mood, relationships, and quality of life.

You have more control over stress than you might think. Stress management is all about taking charge: of your lifestyle, thoughts, emotions, and the way you deal with problems. No matter how stressful your life seems, there are steps you can take to relieve the pressure and regain control.

You can protect yourself by understanding how the body's stress response works, recognizing the signs and symptoms of stress, and taking steps to reduce effects.

Factors that influence your stress tolerance:

- Take Control - identify sources of stress
- Support Network
- Physical and Mental Health
- Attitude and Outlook
- Ability to deal with emotions
- Knowledge and Preparation

How you can support each other:

- Listen without judgement
- Don't take anger personally
- Look out for one-another
- Give and respect space
- Take a breath

Andrea Cabida HRSP-
707-330-9939

TRAINING SPECIALIST MESSAGE

**All Lake Incident Trainees
Beat the Rush!!!**

In order to receive documented credit for your training assignment you must register with the Incident Training Specialist.

If you are preparing to leave the Incident please scan the QR Code to start the Demob process.

No documentation...It didn't happen

Forms are available at the Training Office

FEDERAL FINANCE MESSAGE

DIVISION SUPERVISORS / BRANCH DIRECTORS debrief with Cost Apportionment Teams (CATS) daily after each shift. CATS is located at the ICP in Parking Lot 12 in the white trailer.

DIVISION SUPERVISORS / BRANCH DIRECTORS that are unable to come to the ICP please contact CATS

CONTACT NUMBERS: (805) 698-2541; (626) 698-9852

Federal Resources unable to come to ICP send an electronic copy of your signed CTRs or Shift Tickets to:

2020.lake.finance@firenet.gov

LACOFD FINANCE MESSAGE

All Los Angeles County Fire resources are to complete a Form 662 during the Demob process and submit it to LACOFD Finance on the LAKE FIRE.

All LA County Fire Resources that utilize Employee Self-Services (ESS) to submit their timecards, please use project **CODE EM2003B1** which has been established to track the LAKE INCIDENT

CAL FIRE FINANCE MESSAGE

Hired equipment suppliers check in with Cal Fire Equipment Time. Line Supervision and HEQB see shift ticket example.

FEDERAL FINANCE MESSAGE

FEDERAL RESOURCES unable to come to ICP, electronically send a copy of your signed CTRs or Shift Tickets to: 2020.lake.finance@firenet.gov

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES)	Federal	Contractor	Local Government
Patient Assessment:	Age:	Weight:	Chief Complaint:
(If pertinent to Injury)	Skin Signs: (color/moisture/temp)	Level of Consciousness:	BP: HR: Respirations:
Treatment:			

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards)	Patient's ETA to Location:
--	----------------------------

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
