Remote Check-In

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: LAKE FIRE	2. Operational Period: Date From: 8/21/2020 Time From: 0600	Date To: 8/21/2020 Time To: 1800
---------------------------------------	--	-------------------------------------

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat of exposure to COVID-19 by adhering CDC COVID-19 Guidelines.
- Minimize the threat to private property, critical infrastructure and heritage resources.
- Establish and strengthen cooperator, partner, and stakeholder relationships.
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

- Keep the fire North of Castaic Lake
- Keep the fire South of Hwy 138
- Keep the fire East of Ridge Route Road.
- Keep the fire West of Tule Ridge

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Fire Weather Forecast

FORECAST NO: 14

NAME OF FIRE: Lake Fire

PREDICTION FOR: 0600 Fri – 1800 Fri

UNIT: CA-ANF

SHIFT DATE: 08/21

SIGNED: *Matt Mehle*

TIME AND DATE

Incident Meteorologist - Matt Mehle

FORECAST ISSUED: 2100 08/19/20

WEATHER DISCUSSION: Another hot and dry day expected over the Lake Fire. Winds will breezy to gusty in the afternoon. Winds will be strongest over higher elevations and northern areas of the fire. Hot, dry, and breezy conditions will result in critical fire weather conditions. Monsoonal moisture will return over the weekend with a slight chance for thunderstorms.

WEATHER FORECAST FOR FRIDAY:

WEATHER: Partly Sunny. A few increasing clouds.

TEMPERATURES: Max 97-103 F...above 4000' 95-98 F

24 HR Trend: 3 degrees cooler.

HUMIDITY: Min 15-25% ...above 4000' 15-30%

24 HR Trend: Little change.

20-FOOT WIND: Northern areas: West to Northwest 10-15 mph with gusts 20-25 mph. Southern areas: West to Southwest 5-15 mph with gusts to 20 mph.

Chance of Wetting Rain (0.10"): 0%

LAL: 1

WEATHER FORECAST FOR FRIDAY NIGHT:

WEATHER: Partly cloudy overnight.

TEMPERATURES: Min 75-80 F...above 4000' 70-75 F.

24 HR Trend: Little Change.

HUMIDITY: Max 45-60%...above 4000' 50-65%.

24 HR Trend: 5-15% wetter.

20-FOOT WIND: West to Northwest 10-15 mph early evening with gusts 20mph becoming 5-10 mph with gusts to 15 mph overnight..

Chance of Wetting Rain (0.10"): 0%

LAL: 1

EXTENDED FORECAST:

SATURDAY... Partly cloudy. Slight chance for afternoon showers/thunderstorms. Max temps 88-92 F. Min RH 20-30%. West Southwest 6-12 mph with gusts 20 mph in the afternoon.

SCAN FOR REALTIME OBS

WEATHER SAFETY MESSAGE

- Hot Weather – Stay hydrated.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 014	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Lake	OPERATIONAL PERIOD: 8-21-20 Day Shift
DATE ISSUED: 8-20-20	TIME ISSUED: 2200
UNIT: CA-ANF	SIGNED:  Typed/printed: Matt Brown FBAN(t)

INPUTS

WEATHER SUMMARY: Expect daytime temperatures to moderate a bit today, reaching the high 90's at the upper elevations. RH recovery was poor last night and expected to remain low in the 15-20% range in the upper elevations. Winds will be WNW early 10-15 with gusts to 25, then gradually switching to upslope. Southern areas of the fire will be predominantly SW 5-15 with gust to 20 and begin the shift with RH in the 30's.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Poor overnight RH recovery will allow the fuels to respond early and open the burn window. Shading from smoke will slow this process down. Until fuels receive full sunlight fire behavior estimates may over predict ROS and FL and timing of the burn window. RH continues to be a good indicator of effective burning. **RH below 30% has show to be effective in building depth and effective consumption.**

Due to the conifer on the top of the ridges, long range spotting is probable should these stands become involved in fire. Spotting will continue to be a major threat to containment with the PIG reaching 80% and spot distance to be up to a ½ mile. **Fires established deep in W and S aligned drainages will generate significant fire runs.** Watch for possible re-burn runs in these drainages.

Live fuels are at critical for Chamise and Sage. The burning index is in the 90th percentile.

SPECIFIC:

Areas north of Pine Mt. Road are burned-in and have been wind tested. No fire spread is expected in this area.

Divisions on the right flank of the fire continue to hold. This flank received a significant wind test. No further fire spread is expected.

Divisions on the left flank of the fire continue to have the most challenging fire behavior. Spotting is expected to exceed a ½ mile with burning ridge top conifer. The probability of ignition will reach 80% in the afternoon. Pockets, green islands and dirty ridge top burns will make the containment vulnerable due to spotting. Most of the flank will receive favorable wind that will help burn in the line. Dog-legs will be vulnerable. Watch for fire whirls on the lee side of broken terrain features and intersecting drainages when fire behavior picks up.

Divisions A/B will receive favorable upslope winds checking fire back into the burn. Fire behavior will be difficult to contain if a run is established towards open line. A significant run in several west oriented drainages could be produced if the fire works its way down into Burrow Canyon by slope reversal. Complex terrain and saddles in the area have a high likelihood of generating fire whirls when a run is established towards the ridge system.

Head Fire Estimates BEHAVE Plus 5.0.5

Fuel Type	ROS	FL	PIG
Shrub SH7	100-110 ch/hr	20-25 ft	80%

AIR OPERATIONS:

Smoke from firing operations and statewide fires may linger until the afternoon. Air Operations should experience good visibility after noon provided the smoke can get mixed out by the prevailing winds.

SAFETY

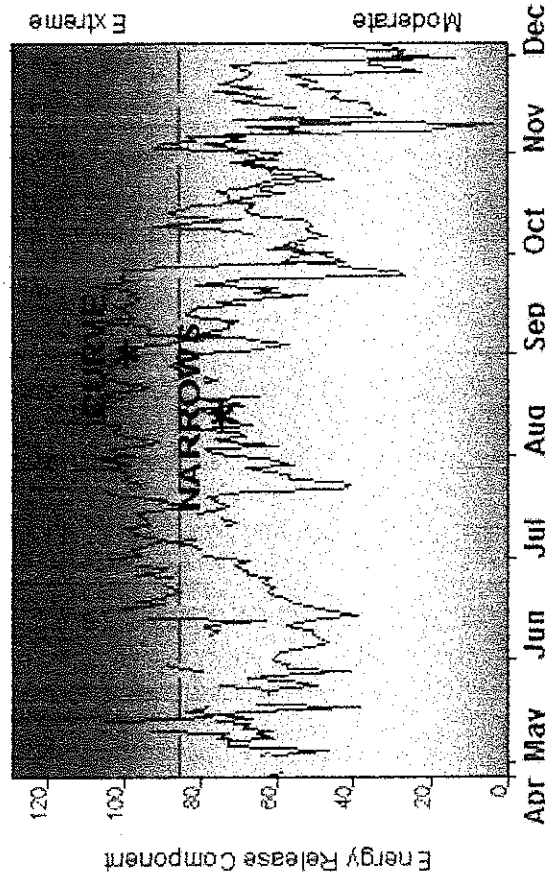

Ensure escape routes for firing operations and pre-plan locations that have an increased probability of entrapment from a spot or sloop over. Consider re-burn potential and runs back into the line when firing.

FIRE DANGER -- High Country

Maximum, Average, and 64th Percentile, based on 21 years data

Years to Remember: 1997 2002

Fuel Model: G - Short-Needle (Heavy Dead)

Fire Danger Area:

- ◆ Represents portions of
- ◆ FRDAs 655, 656, 690
- ◆ above 5,000 ft
- ◆ Meets NWCG Wx Station Standards

Fire Danger Interpretation:

- EXTREME -- Use extreme caution
- Watch out -- Watch for change
- Moderate -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by 3 day period for 1994 - 2014

Average -- shows peak fire season over 21 years (4591 observations)
64th Percentile -- Only 36% of the 4591 days from 1994 - 2014 had an Energy Release Component above 85

Local Thresholds - Watch out:

- Combinations of any of these factors can greatly increase fire behavior:
- 20' Wind Speed over 15 mph, RH less than 25%,
- Temperature over 85, 10-Hour Fuel Moisture less than 7

Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & dt ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

Past Experience:

Recent drought related conifer mortality has increased fire potential in these fuels. Torching and short duration crown fires should be expected. Medium and long distance spotting is common with 20 ft. winds in excess of 15 mph. Spot fire probability of ignition increases in full sun and at dry bulb temperatures above 85°F. Large fires (greater than 100 acres) have been documented at ERCs of 54, but become more probable as ERCs reach the mid-80's.

Weather Stations: Mill Creek, Big Pines, Valyermo, Chilo, Large fire threshold 100 acres.

Responsible Agency: U. S. Forest Service
FF+4.1 build 1622 02/24/2016-22:28 (E:130JUN2015)

SAFETY MESSAGE

Lake Fire CA-ANF- 003273

Day Shift

08/21/2020

0600-1800

MAJOR HAZARDS:

- High potential for EXTREME FIRE BEHAVIOR
- Snags, rolling rocks and debris.
- Heavy Equipment Operations
- Snakes, scorpions, bees, poison oak.

******INCIDENT DRIVING – Too Many Incident Personnel are Driving Too Fast- SLOW DOWN. If You Drive at Unsafe Speeds, Be Prepared to GO HOME.******

Fire Order of the Day – Base all actions on current and expected behavior of the fire.

- Aggressive risk management is our primary means of maintaining safe wildland fire operations. Consistently evaluate fireline tactics and do not hesitate to adjust tactics as environmental and human factor conditions change – **Review Risk Management Process in IRPG, page 1.**
- **Dehydration, Heat Stress, and Fatigue** – Constantly monitor firefighter’s water and electrolyte intake to avoid dehydration. Dehydration and long work hours, coupled with poor air quality and high temperatures all impact fatigue. Provide rest opportunities.

FIRING OPERATIONS SAFETY:

- Conduct thorough briefing for all personnel involved (inside rear cover IRPG).
- All personnel to be fully qualified for their assignments. Trainees must have qualified trainers.
- Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan.
- Required PPE to be worn by all personnel involved.

LCES must be established prior to implementing burning operations (IRPG p. 7).

COMMUNICATIONS RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- **ASK** if you don’t know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated “Leader’s Intent.”

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done

Safety Officers: Brian Savage & Dave Welch

08/21/2020

INCIDENT RISK ANALYSIS

LAKE FIRE

(ICS 215a) Day Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	WEATHER	<ul style="list-style-type: none"> • Be aware of changing weather conditions. • Watch out for increasing heat, winds, and instability. • Anticipate increased fire behavior conditions. • Communicate any observed changes in weather and fire behavior. • "Base all actions on current and expected behavior of the fire."
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications..
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below. • Make sure LCES is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22-23). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of heat stress and fatigue, take breaks as necessary. • HYDRATE before, during and after your shift. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of heat stress and fatigue, and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Do not plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Ensure ground personnel have safety illumination, with light-sticks being the minimum. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas: use human repeaters as needed. • Ensure all personnel are familiar with the incident and the IAP communications plans. • Make sure all resources have radios cloned appropriately. • Ensure that non-agency resources understand radio use and procedures.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is high. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks and turn wheels into the hill. • Watch for rolling rocks and debris from hillsides.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Watch for agitated buffalo and cattle that may charge. • Follow all CDC and Agency COVID 19 protocols. • Watch for unmarked mine shafts.

Prepared By (Communications Unit Leader)
Stephen Weston, COML (949) 412-1215

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Lake Communications:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG.

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients **do not** trigger Incident within Incident (IWI).
- Division Supervisor contacts Lake Communications:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on page 118 -119 of the IRPG.

IN-CAMP – 24 HOUR MEDICAL

- Contact Lake Communications with:
 - Patient Complaint, Condition and Location via LOGS net or Command frequency

Human Resource Message

Leaders who Motivate

Leading others effectively encourages those we lead to do great things. Let's remember the value of our leadership while we continue to do the important work we are doing here.

Leaders Who Motivate People:

- Know their job
- Know the jobs of those they supervise
- Set the direction
- Make the team stronger by pulling from everyone
- Give people the chance to succeed or fail
- Work with reality and current conditions
- Enjoy their work and provide a positive work environment
- Keep it simple and keep it real
- Take responsibility

In a learning organization, leaders treat honest mistakes as opportunities to do better next time. Understanding that failure is a part of learning, they establish command climates in which leaders are motivated by desire to succeed rather than fear of failure. - *Leading in the Wildland Fire Service*, Page 42-

- Make a difference whenever and wherever they can

TRAINING SPECIALIST MESSAGE

**All Lake Incident Trainees
Beat the Rush!!!**

In order to receive documented credit for your training assignment you must register with the Incident Training Specialist.

If you are preparing to leave the Incident please scan the QR Code to start the Demob process.

No documentation...It didn't happen

Forms are available at the Training Office

RESOURCE ADVISOR MESSAGE

Old Ridge Route (ORR)

The Old Ridge Route/8N04 dates to 1915 and is of national significance and fragility.

In order to have no impacts to the ORR,

- Suppression activities along the Old Ridge Route should have an ARCH or REAF monitor.
- When possible use Fisher Springs Road or Posey Canyon Road to minimize trips along the ORR.
- Staging areas should be located off the ORR, whenever possible.
- No grading of staging areas along the ORR; any areas along the ORR suitable for staging are archaeological sites.

Tracked equipment and heavy vehicles can damage the road surface of the ORR.

- No blading of the ORR road surface. Lift Blade whenever possible
- Use rubber tired vehicles and equipment as much as possible **whenever possible avoid using tracked vehicles or equipment based on operational necessity.**
 - **If tracked equipment cannot be avoided on the ORR surface, coordination should be made with an ARCH or REAF. If tracking must occur, it is preferable to stay on the asphalt surface (NOT the concrete).**
- Any tracked equipment must be brought in on a low boy trailer and offloaded onto the dirt access road or other dirt surface outside the ORR;
- Diversion cones to direct traffic and/or rubber pads will used to protect fragile road surfaces. **The edges of the ORR where equipment must cross the road should be armored with rubber mats** or other effective material.
- Vehicles should avoid stopping and maneuvering on pavement that is in poor condition.
- Heavy vehicles (Gross Weight 8,500 pounds/axle and over) should maintain a speed limit of 10 miles per hour. Light duty pickups and crew transports should maintain a speed limit of 15 miles per hour.

Botany/Invasives

Areas of invasives will be flagged and should be avoided whenever possible to avoid their spread. If avoidance is not possible, areas will be monitored in the future. Types of invasives include (Phytophthora. - soil born fungus which can spread into native areas as kill native vegetation), Yellow Star Thistle, Perennial Pepperweed, Blessed thistle.

SOCAL Gas Pipeline mitigation/restoration sites

Soils are thin and the areas has a history of landslides 2005 landslide broke oil line

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
