FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 023	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Lake	OPERATIONAL PERIOD: 8-26/27-20 Day/Night Shift
DATE ISSUED: 8-25-20	TIME ISSUED: 2200
UNIT: CA-ANF	SIGNED: <i>Matt Brown</i> 
Typed/printed: Matt Brown FBAN(t)	

INPUTS

WEATHER SUMMARY: Expect daytime temperatures to continue to increase a bit today, reaching the high 80's at the upper elevations mid 90's in the drainages. RH will trend down in the higher elevations, reaching the upper end of the forecast 20-30%. Winds will be WSW early 5-15 with gusts to 25, then gradually switching to mostly upslope.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Moderate overnight RH recovery allowed the fuels to respond and increase the 10 hour fuel moisture. Until fuels receive full sunlight and wind on the upper ridge system, fire behavior estimates may over predict ROS and FL and timing of the burn window. RH continues to be a good indicator of effective burning. **RH below 30% and 10 hr FM <=6% has show to be effective in initiating runs which can be funneled by terrain and driven and upslope, adverse to the northern lines.**

Due to the conifer on the top of the ridges, long range spotting is probable should these stands become involved in fire. Spotting can still occur in shaded fuels but chances are reduced. Spot distance will to be up to a 1/2 mile. **Fires established deep in W and S aligned drainages will generate significant fire runs.** Watch for possible re-burn runs in these drainages and pockets on the north ridge.

Night-time recovery should set up after midnight and close the burn window.

Live fuels are at critical for Chamise and Sage, Scrub Oak is 85%. The burning index is in the 90th percentile.

SPECIFIC:

Divisions I, S, T, X, Z have been wind tested. No further fire spread is expected.

Divisions G/F/E continue to have challenging fire behavior. Pockets, green islands and dirty ridge top burns will make containment vulnerable due to spotting. Under-slung line will become more vulnerable to roll-out, especially when fuels are primed: FDFM reaches 5% and 10 hr FM 6%. Most of the NW corner will receive adverse wind when terrain driven winds are set up in the early afternoon. Dog-legs will be vulnerable.

Divisions A/B/C will receive favorable upslope winds checking fire back into the burn, slowing western spread. Fire behavior will be difficult to contain if a run is established towards open line. When 10hr FM reaches 6%, a significant run in several west oriented drainages could be produced if the fire continues its way down into Burrow Canyon. Complex terrain and saddles in the area have a high likelihood of generating fire whirls when a run is established towards the ridge system.

Head Fire Estimates BEHAVE Plus 5.0.5

Fuel Type	ROS	FL	PIG
Shrub SH7	80-100 ch/hr 60-70 ch/hr shaded	15-20 ft 13-18 ft shaded	70% 40%

AIR OPERATIONS:

Air Operations should experience good visibility.

SAFETY

Consider re-burn potential and runs back into the line. **Yucca plants intermixed with Chamise present a significant roll out potential.** These are especially numerous in the southern divisions. Use lookouts to detect roll out and pre-plan escape routes should a run get started in a deep drainage.

Fire Weather Forecast

FORECAST NO: 23

NAME OF FIRE: Lake Fire

PREDICTION FOR: 0600 Wed – 0600 Thu

UNIT: CA-ANF

SHIFT DATE: 08/26-8/27

SIGNED: *Matt Mehle*

TIME AND DATE

Incident Meteorologist - Matt Mehle

FORECAST ISSUED: 2100 08/25/20

WEATHER DISCUSSION: A warming and drying trend will through at least Thursday. A dry southwest flow will prevail over the region today before switching to more westerly on Thursday. Winds will be gusty at times in the afternoon, similar to previous days. Temperatures will moderate into the upcoming weekend.

WEATHER FORECAST FOR WEDNESDAY:

WEATHER: Sunny.

TEMPERATURES: Max 86-94 F ...above 4000' 82-86 F **24 HR Trend:** 3 degrees warmer.

HUMIDITY: Min 20-30% ...above 4000' 20-30% **24 HR Trend:** Little change.

20-FOOT WIND: West to southwest 5-15 mph. Gusts 25 mph in the afternoon.

Chance of Wetting Rain (0.10"): 0% **LAL: 1**

WEATHER FORECAST FOR WEDNESDAY NIGHT:

WEATHER: Mostly clear.

TEMPERATURES: Min 70-75 F...above 4000' 65-71 F. **24 HR Trend:** Little change.

HUMIDITY: Max 50-60%...above 4000' 45-55%. **24 HR Trend:** Little change.

20-FOOT WIND: West to Northwest 5-10 mph with gusts to 15 mph.

Chance of Wetting Rain (0.10"): 0% **LAL: 1**

EXTENDED FORECAST:

THURSDAY... Mostly sunny. Max temps 85-97 F. Min RH 20-30%. West to Northwest near Liebre Mt and West to Southwest near Warm Spring 5-10 mph with gusts 15-20 mph in the afternoon.

SCAN FOR REALTIME OBS

FIRE DANGER -- High Country

Maximum, Average, and 64th Percentile, based on 21 years data

Years to Remember: 1997 2002

Fuel Model: G - Short-Needle (Heavy Dead)

Fire Danger Area:

- ◆ Represents portions of
- ◆ FRDAs 855, 858, 890
- ◆ above 5,000 ft
- * Meets NWCG Wx Station Standards

Fire Danger Interpretation:

- EXTREME -- Use extreme caution
- Moderate -- Watch for change
- Moderate -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by 3 day period for 1994 - 2014

Average -- shows peak fire season over 21 years (4591 observations)
 64th Percentile -- Only 36% of the 4591 days from 1994 - 2014 had an Energy Release Component above 85

Local Thresholds - Watch out: Combinations

- of any of these factors can greatly increase fire behavior:
- 20" Wind Speed over 15 mph, RH less than 25%,
- Temperature over 85, 10-Hour Fuel Moisture less than 7

Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

Past Experience:

Recent drought related conifer mortality has increased fire potential in these fuels. Torching and short duration crown fires should be expected. Medium and long distance spotting is common with 20 ft. winds in excess of 15 mph. Spot fire probability of ignition increases in full sun and at dry bulb temperatures above 85°F. Large fires (greater than 100 acres) have been documented at ERCs of 54, but become more probable as ERCs reach the mid-80's.

Weather Stations: Mill Creek, Big Pines, Valyermo, Chilao. Large fire threshold 100 acres.

Responsible Agency: U. S. Forest Service
 FF+4.1 build 1622 02/24/2016-22:28 (E:\30JUN2015)

Design by NWCG Fire Danger Working Team

6. Work Assignments:
Mop up and patrol in all divisions and keep the fire within the current perimeter.

7. Special Instructions:
Traffic plan for Div. G incoming resources day and night shift travel route will be from DP9 to the 7N23 Road. Outgoing resources for Div. G day and night exit travel route will be through the 14 Road.
Remove excess equipment and backhaul trash.

6. Work Assignments:
When approved by the Division Supervisor: Close ends of constructed line with T Posts, wire fencing, and tank traps. Construct water bars to reduce erosion in critical areas (roads, property, critical infrastructure). Pull unused hose (i.e. black line and outside the burn area). Chip along road systems where fuel mitigation has taken place. Repair and refill water tanks/cisterns.

7. Special Instructions:
Motorized equipment used for repair will be thoroughly cleaned of any plant material that could potentially contain noxious weed seeds as part of the demobilization process. Avoid sensitive resources identified with orange flagging. No repair work will occur at these sites without consultation with a READ (e.g. an archaeologist, botanist or biologist, etc.). Any repair in riparian areas will require a READ on site.

Lake Fire – Safety Message

INCIDENT #CA-ANF-003273

DATE: 8/26-27/2020 TIME 0600–0600 Day/Night

Incident Management Team Transition

- Sometimes called the 19th Watch Out Situation.
- Take the time to understand the plan. Ensure all resources completely understand the assignment, the Communications Plan, and the Medical Plan.
- Briefings: Required every shift, for all personnel, for new assignments, and for changing conditions.

Hazard Trees

- ▶ All trees need to be considered hazardous until they are evaluated.
- ▶ Even large healthy-looking trees can be dangerous due to forest health issues.
- ▶ Use the look up, down, and all-around process when working around or under trees.
- ▶ Minimize the number of personnel exposed, and the exposure time.
- ▶ Avoid unnecessary exposure around suspect trees during windy periods.
- ▶ Mitigate or close areas around hazardous trees in work areas.

Driving

- When driving keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit a safe speed under the current conditions and traffic?
- **Use caution on unimproved roads as some have soft shoulders. Some roads are also only one lane with pullouts!**
- Road surfaces are variable with washboard conditions and thick powder that can compromise turning and braking.
- Watch for and anticipate stock and wildlife.
- Always fasten your seat belt before the vehicle is set into motion. Use backers.
- Don't tail gate, especially in dusty conditions.
- Slow down, slow down, and slow down!

Safety Officers: B. Savage (SOF1)

D. Welch (SOF1)

Understand your mission, ask questions!

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

INCIDENT RISK ANALYSIS

LAKE FIRE

(ICS 215a) Day & Night Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	WEATHER	<ul style="list-style-type: none"> • Be aware of changing weather conditions. • Watch out for increasing heat, winds, and instability. • Possible thunderstorms with heavy rains and lightning. • Communicate any observed changes in weather and fire behavior. • "Base all actions on current and expected behavior of the fire."
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications..
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below. • Make sure LCES is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22-23). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of heat stress and fatigue, take breaks as necessary. • HYDRATE before, during and after your shift. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of heat stress and fatigue, and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Do not plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Ensure ground personnel have safety illumination, with light-sticks being the minimum. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas: use human repeaters as needed. • Ensure all personnel are familiar with the incident and the IAP communications plans. • Make sure all resources have radios cloned appropriately. • Ensure that non-agency resources understand radio use and procedures.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is high. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks and turn wheels into the hill. • Watch for rolling rocks and debris from hillsides.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Watch for agitated buffalo and cattle that may charge. • Follow all CDC and Agency COVID 19 protocols. • Watch for unmarked mine shafts.

Prepared By (Communications Unit Leader) **Stephen Weston, COM1** Lake Comm Unit (661) 840-8716
 Incident Location **CASTAIC LAKE, LAKE HUGHES, ELIZABETH LAKE, THREE POINTS**
 County: LAC State: CA Latitude: " N Longitude: W

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

Human Resource Message

Food for Thought

As we go into transition, there are always challenges. Ensuring appropriate communication is important. New factors, such as COVID mitigations, processes and procedures will add to those challenges. Finish and transition strong.

When faced with a challenge, look for a way, not a way out. –

-David L. Weatherford

Andrea Cabida HRSP- 707-330-9939

TRAINING SPECIALIST MESSAGE

Thursday, August 27 at 1900 hrs. is the deadline to close the training package for the Lake Incident.

PLAN AHEAD

Regardless of home agency, in order to ensure incident documentation of any training assignment – You MUST CLOSE your assignment with Training.

Bring a completed individual performance rating,

ICS 225/Task Book/Qualifications card,

**And Evaluator's Recommendation
to the exit interview.**

Remember: NO DOCUMENTATION - IT DIDN'T HAPPEN!

Thank you

Claudia Soiza - 949 632-7813

COST APPORTIONMENT

DIVISION SUPERVISORS / BRANCH DIRECTORS debrief with Cost Apportionment Teams (CATS) daily after each shift.

CATS will be offsite, but in camp near the briefing area daily from 0700-0800 and 1900-2000.

DIVISION SUPERVISORS / BRANCH DIRECTORS that are unable to come to the ICP, please contact CATS.

CONTACT NUMBERS: (805) 698-2541; (626) 698-9852.

FEDERAL FINANCE MESSAGE

FEDERAL RESOURCES unable to come to ICP, electronically send a copy of your signed CTRs or Shift Tickets to:

2020.lake.finance@firenet.gov

On the subject line please include the word Time along with your request number.

INCIDENT DRIVING

No driver will drive more than 10 hours (behind the wheel within any duty-day.

Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.

A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.

Exception to the minimum off-duty hour requirement is allowed when essential to:

Accomplish **immediate** and **critical** suppression objectives, or

Address **immediate** and **critical** firefighter or public safety issues

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

LAKE FIRE ICP

Camp 300 Base Camp

PRIVATE PROPERTY NO ENTRY

California condors and MICROTRASH

California condors are a rare and unique species on the comeback from the brink of extinction. However, these magnificent birds which have habitat within the Lake Fire, still face threats that impede their survival and recovery, including microtrash:

- "Microtrash" refers to small bits of trash such as flagging, bottle caps, can tabs, and other smaller, broken down pieces of trash that can be ingested by condors.
- Condors are curious birds and natural scavengers and are attracted to small bits of trash that stand out from its surroundings.
- They consistently find and consume micro-trash. Trash cannot be digested.
- Additionally, when microtrash is brought to the nest and regurgitated by an adult condor, it is often ingested by condor chicks.
- The microtrash can get stuck in the gastrointestinal track of young condors and cause impaction, preventing the birds from digesting food, resulting in starvation and death.

Please remember to backhaul out all trash, thanks

Photos, viewing and more on the California condor available here:

8. MEDICAL EMERGENCY PROCEDURES											
LINE "MEDICAL-EMERGENCY" PLAN: - Crew Supervisor to contact Division Supervisor/Operations with: <ul style="list-style-type: none"> Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI). - Division Supervisor/Operation contacts Lake Communications: <ul style="list-style-type: none"> Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency. Division Supervisor of POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG. <p>POC* (Point of Contact) and/or Operations</p>						LINE "NON-EMERGENCY INCIDENT" PLAN: - Crew Supervisor to contact Division Supervisor with: <ul style="list-style-type: none"> Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients do not trigger Incident within Incident (IWI). - Division Supervisor contacts Lake Communications: <ul style="list-style-type: none"> Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency. Division Supervisor or POC* will use "Medical Incident Report" worksheet on page 118 -119 of the IRPG. IN-CAMP – 24 HOUR MEDICAL - Contact Lake Communications with: <ul style="list-style-type: none"> Patient Complaint, Condition and Location via LOGS net or Command frequency 					
9. PREPARED BY James Cermak – MEDL (T)			10. REVIEWED BY								

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (<i>Ex: Unconscious, Struck by Falling Tree</i>)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (<i>Ex: Trout Meadow Medical</i>)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (<i>Ex: TFLD Jones</i>)
Crew Patient Care		Name of Care Provider (<i>Ex: EMT Smith</i>)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp): Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

FUNCTION	CHANNEL NAME/NUMBER	RECEIVE (RX)	TONE / NAC*	TRANSMIT (TX)	TONE / NAC*
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
