COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, <u>supervisors</u> should remind their personnel to self-screen for symptoms.

This document to be placed in the daily IAP

SAFETY MESSAGE SAFETY IS OUR FIRST PRIORITY

Fire fighter safety comes first on every fire, every time

SAFETY THOUGHT FOR TODAY

"The dynamic wildland fire suppression environment is complex and possesses inherent hazards. Therefore, we will do our best to aggressively manage the risk because no resource or facility is worth the loss of human life". HTTF Task Group

MAJOR HAZARDS AND RISKS TO THINK ABOUT TODAY:

Situational Awareness (SA): SA is a key component of risk management and must be maintained at all times. Conduct SA briefings to brainstorm and consider specific ways in which you can increase awareness of the hazards you face. Evaluate the hazards involved with your activities and mitigate for these hazards to reduce exposure to an acceptable level of risk for firefighters and others. Achieve and maintain good SA both individually, within your crew, and between different types of resources.

RISK MANAGEMENT: Aggressive risk management is our primary means of maintaining safe wildland fire operations. Consistently evaluate fireline tactics and do not hesitate to adjust tactics as environmental and human factor conditions change -- Review Risk Management Process in IRPG, Page 1.

HAZARD TREES: Exercise extreme caution when working in timber canopy areas -- assume every tree has some level of hazard associated with it. Review "PRINCIPLES OF HAZARD TREE RISK MANAGEMENT" at: http://www.nwcg.gov/teams/shwt/httf/training_education/s212/ht-risk-mgmt.pdf.
