Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for high values at risk.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and risk management.
- Minimize risk and limit exposure by following COVID-19 best management practices.
- Minimize or avoid impacts to wilderness values by applying minimum impact suppression tactics (MIST).
- Utilize incident resource advisors to minimize impacts on natural and cultural resources.
- Distribute accurate and timely fire information to cooperators, the public, and stakeholders.
- Manage resources to meet protection objectives while maintaining fiscal accountability.

CONTROL OBJECTIVES

- Minimize risk to private property, surrounding communities, and resource values by:
- Maintaining the Dolan Fire within existing perimeter.
- Provide for suppression repair where most advantageous with existing resources.
- Utilize technology to manage risks to infrastructure, values at risk to guide aggressive mop up, control and suppression repair tactics.
- Conduct direct attack on the Coleman Fire when possible focusing on the north, south, and east flanks to protect values at risk. Construct indirect fireline if direct attack is not feasible.
