STRATEGIC FRAMEWORK

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, Anderson Communication Site, National Scenic Byway (Highway 1) and wilderness values. Apply tactics that offer the highest probability of success.

LEADERS INTENT

Provide the highest level of customer service to all involved with, or impacted by, the Dolan Fire. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct and timely/effective communications.
- Personal safety and the safety of others, includes driving slowly, safely and defensively.
- Implementation of tactics that offer a high probability of success.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing module of one concept.

MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Reduce the threat to private property, residences and infrastructure through the application of effective suppression tactics.
- Reduce the impacts to the Ventana Wilderness values by ensuring minimum impact suppression tactics (MIST) are applied. Utilize historic fire control lines, trails, streams, ridges and natural barriers when possible for control lines.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Manage resources at a level to meet protection objectives while maintaining fiscal accountability

CONTROL OBJECTIVES

To prevent the fire spread to private property, surrounding communities, and values at risk, Keep the fire:

INCIDENT Weather Forecast

FORECAST NO: 13

NAME OF FIRE: Dolan

PREDICTION FOR: 24 hr SHIFT

UNIT: USFS

SHIFT DATE: 9/3/20 to 9/4/20 (0700-0700)

SIGNED:

Richard Thompson
Incident Meteorologist

TIME AND DATE

FORECAST ISSUED: 9/2/20 @ 2000

WEATHER DISCUSSION: The marine inversion (around 1500 feet) will once again impact the fire, producing night and morning low clouds and fog across the west flank of the fire. Otherwise, mostly clear and smoky conditions are expected. With the continued marine influence, relative humidity will be at moderate to high levels below the inversion. However, above the marine inversion, drier conditions will prevail. Minimum humidity, above the inversion, will drop into the teens with poor overnight recovery. Ridgetop winds will remain north to northeast through the operational period with weak diurnal winds at lower elevations.

For the rest of this week, high pressure will gradually build over the area. This will bring warmer and drier conditions to the fire along with limited marine layer stratus and fog. In fact, an EXCESSIVE HEAT WATCH is in effect Saturday through Monday.

WEATHER FORECAST:

WEATHER: Mostly clear and smoky except for some night and morning low clouds and fog below 1500 FT.

TEMPERATURES: Maximum: Below 1500 FT: 62-74...Above 1500 FT: 84-94.
Minimum: Below 1500 FT: 54-60...Above 1500 FT: 66-74.

Maximum: Below 1500 FT: 80-100%...Above 1500 FT: 35-55%.

20 FT WINDS:

Weather Summary

Continued warming and drying trend.

Conditions above the Marine Layer

Temps: Day 84-94 Night 62-74

RH: Day 10-20% Night 35-55% (Above inversion)

Winds: Day Ridge top N-NE 4-8 Gusts 12mph Night N 3-6 gusts 10mph

FIRE BEHAVIOR

GENERAL: The fire will continue to spread laterally along the coast ridge. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Main fire progression will be to the south and east with active backing fire and rollout being the primary means of fire spread. 2008 fire scars slow spread *except* where there is a decadent brush component.

The top of the marine inversion is sitting at about 1500ft. Expect the fire behavior to moderate below this elevation and remain very active above it.

Expect the most active fire behavior from about midnight to about sun up. This means that you could see rapid downhill fire runs and spotting distances up to ¼ mile. The most active areas will be below Division X and east of Div. Kilo.

Spotting will be short range less than 400 feet and from rollout.
Probability of ignition will be 60-70%

SPECIFIC:

Branch I: No forward fire progression is expected. There is still a potential for re-burn along Highway 1.

Branch III: Fire progression will continue to the east. Expect mainly backing fire as the fire approaches Lost Valley Creek.

Branch IV and VII: The fire is well established around Cone Peak. Main fire progression will continue to the east. The fire will continue to flank down slope along Twin Peaks Ridge above Lime Kiln Creek. The fire has crossed the Coast Ridge and will back down to the trail system, rollout will be the main cause for fire spread. Expect rapid intense runs in aligned drainages. From Lucia to the Hermitage no fire spread is expected. Along Highway 1 rollout and re-burn will continue to challenge containment.

AIR OPERATIONS: Smoke and fog have the potential to limit operations until about 1300, with coastal areas the last to clear.

SAFETY

Over the next 5 days, ERCs are forecasted to reach the 90th percentile. Take advantage of stability now to prepare for increased fire behavior in the days to come.

SAFETY MESSAGE

Pacific Northwest Incident Team 2

7-02-2019

INCIDENT: Dolan

OPERATIONAL PERIOD: 9/3-9/4

TOPIC:

Transfer of Command

NARRATIVE:

Transfer of Command multiplies the chance of confusion, misinformation, and misunderstanding. There may be different Divisions, changed tactics, people working in different places for different people.

The team has a good plan but you are the people who will implement it successfully.

So, before you leave ICP or spike camp, make sure you know:

- What your assignment is
- Where it is
- Who you will be working for and how to contact them

Commo is key. Ask Q's Repeat Repeat Repeat
Make sure everyone has a clear understanding of their mission.

Things can, and some will, fall through the cracks. Accept that you will make some errors but try to minimize the number and seriousness of any errors. A missing lunch or time sheet can be corrected; a person injured, not so easily.

SAFETY OFFICERS

Ken Gregor, Laura Livingston, Marshall Brown, Ryder Jones

Human Resources Message

Your Human Resource Specialist is here on the incident!

My role as a Human Resource Specialist (HRSP) is to be a focal point for informal resolution of issues and concerns involving discrimination or harassment. I also serve as an open channel through which individuals assigned to this fire can raise questions, discuss concerns, and get answers about any aspect of their work environment — be it practices, policies, operating procedures, facilities, or work conditions.

If you need to talk about a concern please contact me at 626-391-2347 or cabin #20.
