Fire Weather Forecast SATURDAY, OCTOBER 10, 2020

FORECAST NO: 49
PREDICTION FOR: Saturday
SHIFT DATE: October 10, 2020
ISSUED: 1900 Friday, Oct 9, 2020

NAME OF FIRE: UNIT: Incident Meteorologist:

Dolan USFS/LPNF KVS/SBN (T) (240) 778-5301

DISCUSSION: No rain is expected this weekend. Wind gusts Saturday night into Sunday morning of 18 mph could cause braches of fire damaged trees to break and fall. Cooler weather today will be followed by a steady warming trend and episodes of weak to moderate offshore winds this week with a possible return to near critical fire weather conditions (warm, dry and occasionally breezy).

TODAY:

WEATHER: Mostly cloudy.

WIND (20 FT): Coast: Northwest 4-6 mph gusting 12 mph.

Inland: N wind 3-6 mph. Above 2000 ft NNW 4 - 7 mph gusting to 12 mph.

Arroyo Seco: WSW 6-8 mph then ENE 10 mph gusting to 15 mph.

MAX TEMPERATURES: Highs 55-64 near the coast. 74-80 inland and Arroyo Seco. 72-78 above 2000 feet MSL

MIN RH: 60% near the coast. 40-50% inland.

MARINE LAYER: 2000 feet

SATURDAY NIGHT:

• WEATHER: Partly cloudy 2000 feet. Mostly cloudy/fog below 2000 feet.

WIND (20 FT): Calm below 1000 feet. Above 2000 ft wind N 6-10 mph gusting to 18 mph.

MIN TEMPERATURES: 50-59 near the coast, 48-55 inland and Arroyo Seco, 48-56 above 2000 feet MSL.

MAX RH: 100% near the coast. 80-100% inland areas and Arroyo Seco, with 60-70% higher terrain.

MARINE LAYER: 2000 FT coastal branch and Salinas Valley

SUNDAY:

WEATHER: Mostly cloudy.

WIND (20 FT): Coast: NNW 4-6 mph gusting 12 mph.

Inland: N wind 3-6 mph. Above 2000 ft N 5 - 10 mph gusting to 18 mph.

Arroyo Seco: WSW 6-8 mph then ENE 10 mph gusting to 15 mph.

MAX TEMPERATURES: Highs 55-64 near the coast. 74-80 inland and Arroyo Seco. 72-78 above 2000 feet MSL

MIN RH: 50% near the coast. 30% inland.

MARINE LAYER: 2000 feet

Planning forecast: A steady warming and drying trend is expected in the coming week with a return to 100 degrees temperatures inland and in the usual warmer locations. Offshore winds may inhibit significant marine layer influence as warmer and drier condition impact the coast later this week.

- Columbus Day... Mostly sunny. Max Temp: 87 95 inland; cooler at coast. NNE wind 6 8 mph gusting 15 mph at ridgelines.
- Tuesday... Mostly sunny. Max Temp: 91 100 inland; cooler at coast. NE wind 6 8 mph gusting 15 mph at ridgelines.
- Wednesday...Mostly Sunny. Max Temp: 91-101 inland; cooler at coast. N wind 3-6 gusting 12 mph at ridgelines.

Sunrise: 7:09 AM Sunset: 6:35 PM

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 45 TYPE OF FIRE: Wildfire

FIRE NAME: Dolan OPERATIONAL PERIOD: October 6-10, 2020

DATE ISSUED: October 5, 2020 TIME ISSUED: 1900 hours

UNIT: CA-LPF SIGNED:

Typed/printed: Nic Elmquist, FBAN

Weather Summary

Please see attached Fire Weather Forecast

FIRE BEHAVIOR

GENERAL:

There is a rich history of fires within the Monterey R.D. for good reason. Before current record keeping began, there are accounts of the entire coastal range burning over the course of a summer in the late 1800's. These fires will continue to exist within this landscape because the components which cause wildland fire spread (fuels, weather, topography) are all at the extremes of the complexity scale. Once a fire gets engrained into the rugged wilderness, it is almost guaranteed the fire will be measured in months, not weeks or days. A lot of sweat has gone into getting the Dolan Fire to its current state of holding within its 124,924-acre perimeter. Continue the strong work which has occurred since August 18th.

An analysis was completed with the following chances of a season slowing event by date: October $12^{th} - 25\%$, October $20^{th} - 50\%$, November $3^{rd} - 75\%$, November $18^{th} - 90\%$

Probability of ignition peak burn period (1200-1600): Use Predicted Weather and IRPG page: 78

<u>Local Thresholds:</u> Combinations of any of these factors can lead to greatly increased fire behavior: **20'** windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6. SPECIFIC:

All Divisions: The fuels within the major drainages on the coastal side of the fire (Limekiln, Hare, Mill) are full of heavy fuels. These fuels will continue to smolder until a season ending event occurs. There are still relatively large islands of either unburned or partly burned vegetation throughout the fire. If a smoke occurs, make a fire behavior assessment on the risk of it threatening the containment lines. Weigh this risk to that of the firefighters (air or ground) needed to contain it. Act accordingly.

Initial Attack: We are in peak fire season for Southern California due to the dryness of the fuels and the periodic offshore wind events. Several years back, the Pfeifer Fire started in late December near Big Sur. Remain vigilant and be prepared to switch from mop-up operations to supporting initial attack.

AIR OPERATIONS:

A deepening marine layer will impact the coastal areas early in the day. This marine layer should start to recede by late morning. However, it may come and go throughout the day impacting flights into Pacific Valley.

SAFETY

This is a historic fire season with added complexities due to Covid-19. Watch out for each other and always take time to check in with the FMO (Family Management Officer).

6. Work Assignments:

TASK: Patrol and mop up where possible. Monitor the fires edge in inaccesible locations.

PURPOSE: Keep fire within existing containment lines and erosion control providing for public safety.

END STATE: Highway 1 corridor and associated communities protected.

RISK ASSESSMENT: Stay alert for drivers on Highway 1 that stop to watch fire activity. Watch for snags along the roadway and rollout from above.

7. Special Instructions:

NIMS IAP

- -All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.
- -Ambulances will be located on paved roads for patient transport only.
- -READs and the BAER Team will check in and out with Division.
- -Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.
- -For Mop up and Patrol Do not go off the road (UXO).
- -Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.
- -Use call outs when traveling on Nacimiento Ferguson Road.
- -INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

| | | | | | | | | | | |

6. Work Assignments:

TASK: Patrol and mop up where possible. Monitor the fires edge in inaccessible locations.

PURPOSE: To maintain the fire's current identified perimeter and provide erosion control.

END STATE: Potential of future threats of growth and erosion are eliminated.

RISK ASSESSMENT: Watch for ash pits when mopping up and be alert for vehicle traffic. Watch for snags and rollout onto roads.

7. Special Instructions:

- -All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.
- -Ambulances will be located on paved roads for patient transport only.
- -READs and the BAER Team will check in and out with Division.
- -Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.
- -For Mop up and Patrol Do not go off the road (UXO).
- -Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.
- -Use call outs when traveling on Nacimiento Ferguson Road.
- -INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

6. Work Assignments:

TASK: Mitigate slope to prefire drainage patterns. Minimize visual impacts to the extent feasible. Any fire suppression activities will remain to existing roads, trails and dozer lines.

PURPOSE: Minimize potential for erosion and sediment delivery to water courses.

END STATE: To restore landscape back to prefire conditions as reasonably possible.

RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads and working around heavy equipment.

7. Special Instructions:

- -All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.
- -Ambulances will be located on paved roads for patient transport only.
- -READs and the BAER Team will check in and out with Division.
- -Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.
- -For Mop up and Patrol Do not go off the road (UXO).
- -Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.
- -Use call outs when traveling on Nacimiento Ferguson Road.
- -INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

8. MEDICAL EMERGENCY PROCEDURES

LINE-EMERGENCY MEDICAL DAY/NIGHT PLAN:

- **Crew Supervisor** to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- **Division Supervisor/Operation** contacts Dolan Communications:
 - Division Supervisor or POC* will run "Medical –Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
 - Dolan Communication contacts Medical Unit Leader on the Command frequency or camp frequency.

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients <u>do not</u> trigger Incident within Incident (IWI).
- **Division Supervisor** contacts Dolan Communications:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
 - Dolan Communications contacts Medical Unit Leader on the Command frequency or camp frequency.

IN-CAMP 24 HOUR MEDICAL PLAN:

 Contact Incident Communications with: Patient Complaint, Condition, and Location via Logs Net or Command frequency.

Tod Lemieux SOFR

COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

This document to be placed in the daily IAP

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms 1?

| Symptom |
|---|
| Cough more than expected? |
| Shortness of breath or difficulty breathing? |
| Fever? Chills? |
| Muscle pain, outside your normal for firefighting? |
| Sore throat? |
| New loss of taste or smell? |
| Fatigue, outside your normal for firefighting? |
| Headache, outside your normal for firefighting? |
| Congestion or runny nose, outside your normal for firefighting? |
| Nausea or vomiting |
| Diarrhea |
| * Take temperature with no-touch thermometer, if available * |

1 Symptoms of Coronavirus

https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

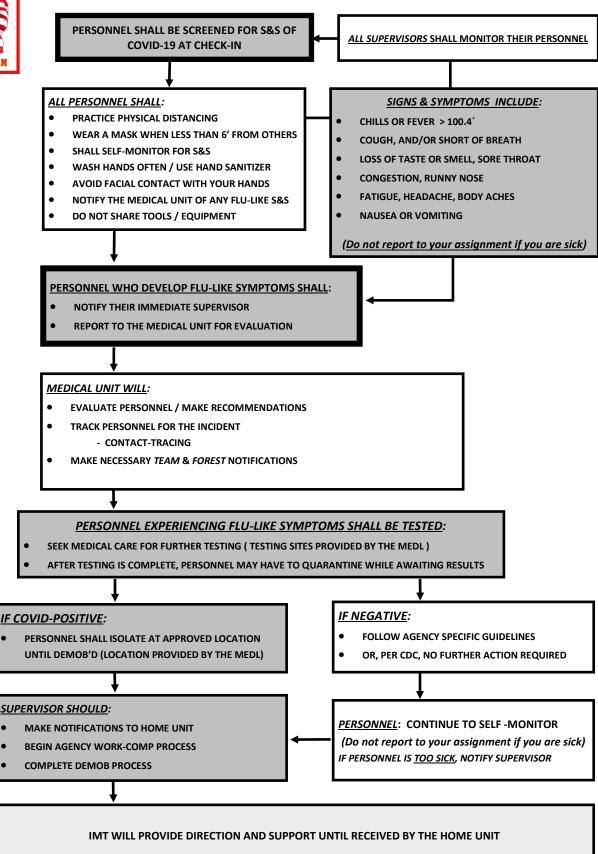

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

^{*}Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

COVID-19 OPERATIONAL FLOWCHART

IN-CAMP ISOLATION FLOWCHART:

IN-CAMP GUIDELINES AS FOLLOWS:

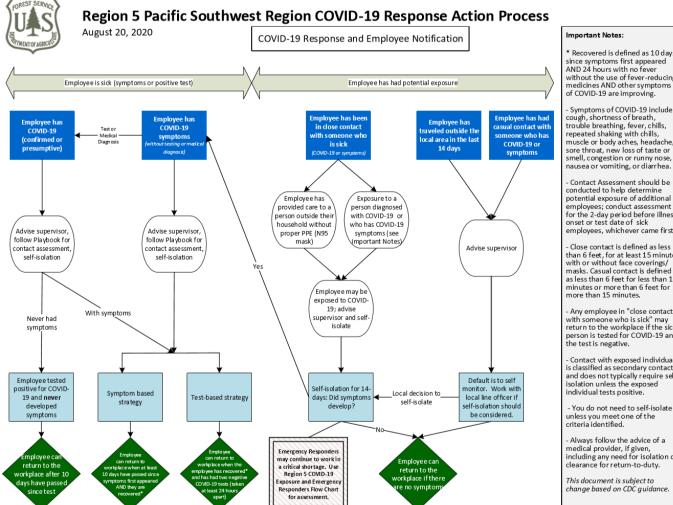

- PERSONNEL SHALL ISOLATE AT APPROVED LOCATION ONCE EVALUATED BY MEDICAL STAFF
- MEDICAL UNIT WILL MONITOR PERSONNEL UNTIL DEMOBILIZED FROM THE INCIDENT

SHOULD PERSONNEL'S HEALTH STATUS DETERIORATE, CONTACT THE MEDICAL UNIT ASAP

MEDICAL UNIT SHALL:

- CONTACT COMMUNICATIONS ARRANGE FOR TRANSPORTATION TO HOSPITAL IF NEEDED
- **CALL THE IMMEDIATE SUPERVISOR**
- MAKE NECESSARY TEAM & FOREST NOTIFICATIONS

FEDERAL EMPLOYEES SHALL REFER TO REGION 5 — COVID-19 ACTION PROCESS FOR AGENCY SPECIFIC GUIDANCE

- * Recovered is defined as 10 days since symptoms first appeared AND 24 hours with no fever without the use of fever-reducing medicines AND other symptoms of COVID-19 are improving.
- Symptoms of COVID-19 include cough, shortness of breath, trouble breathing, fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.
- Contact Assessment should be conducted to help determine potential exposure of additional employees: conduct assessment for the 2-day period before illness onset or test date of sick employees, whichever came first.
- Close contact is defined as less than 6 feet, for at least 15 minutes with or without face coverings/ masks. Casual contact is defined as less than 6 feet for less than 15 minutes or more than 6 feet for more than 15 minutes.
- Any employee in "close contact with someone who is sick" may return to the workplace if the sick person is tested for COVID-19 and the test is negative.
- Contact with exposed individuals is classified as secondary contact and does not typically require self-isolation unless the exposed individual tests positive.
- unless you meet one of the criteria identified.
- Always follow the advice of a medical provider, if given, including any need for isolation or clearance for return-to-duty.
- change based on CDC guidance.

09/06/20 PAGE 18 OF 28

DOLAN FIRE SAFETY MESSAGE

INCIDENT: **Dolan Fire** DATE: October 10, 2020 TIME: 0700-0700

Major Hazards and Risks:

- DRIVING Keep your speeds down. Drive like your life depends on it.
- STEEP TERRAIN AND ROLLING MATERIALS Watch for boulders and logs that can roll out.
- POTENTIAL FOR EXTREME FIRE BEHAVIOR All fuels are available and can burn aggressively. Ensure <u>LCES</u>. Heat and Wind are here.
- **DEHYDRATION** Fill up early and often.
- FATIQUE Look for signs of fatigue and mitigate them.
- WORKING UNDER HELICOPTERS Stay engaged if helicopters are in the area.
- SNAGS AND FIRE WEAKENED TREES Look up and live.
- COVID IS A RISK Use COVID precautions.
- POSION OAK Avoid, Avoid, Avoid.
- ASH PITS Watch out for ash pits while in mop up phase.
- UNEXPLODED ORDINENCE Stay on road system while on Fort Hunter Liggett.

<u>Narrative:</u> Do not become Complacent! Now is not the time to let our guard down. Stay focused, stay alert. Do not just "go through the motions". The fog on the coastal area can roll in at any time. Driving in the "marine layer" is always dangerous. Nature is not going to let up just because we are tired. Allow yourselves plenty of time for travel, and make sure you check in where and when you are supposed to.

As always – work safe, stay safe.

Stress Reactions

As operations become prolonged, mental fatigue or "burnout" may begin to set in. These may be some of the indicators:

- Communication deteriorates or grows tense.
- Habitual or repetitive behaviors.
- Target fixation Locking into a course of action, whether it makes sense or not, just try harder.
- Action tunneling Focusing on small tasks, but ignoring the big picture.
- Escalation of commitment Accepting increased risk as completion of task gets near.

Working distracted can lead to getting injured. If you or the people you are with begin showing these behaviors, take a "mental break". Remember where you are and take a moment to enjoy the scenery.

Rest.

Rest.

Rest.

During the day, but **more importantly** at night, allow plenty of time to let your body AND your mind reset. Drink plenty of fluids.

Fatigue leads to more injuries during this phase of firefighting. Twisted knees, rolled ankles and back injuries don't need active fire behavior to happen.

Incident Safety Officer: Tod Lemieux SOFR (t)

Fire Suppression Repair Guidelines

Mitigation of suppression damages will minimize the long-term impacts caused by personnel and equipment. The following actions will be implemented to minimize long-term impacts from suppression activities. See the Dolan Incident Suppression Repair Plant for more detail.

Objectives – Significantly reduce the potential for soil erosion and sedimentation; reduce visual impacts of firelines and other physical evidence of suppression activities; restore roads and drainage structures to a functioning condition; stabilize suppression-caused damage to natural and cultural resources; and prevent the conversion of firelines into new OHV routes and trail routes.

DOZER LINES

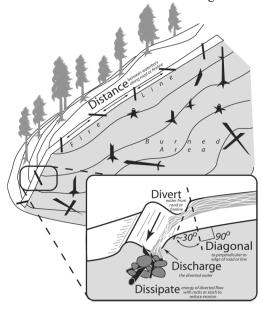

Dozer lines will be treated by pulling outside berms back into the control line, re-contouring or out-sloping the surface to allow for drainage, and where necessary, placing waterbars in the control line. Installed waterbars will consist of a minimum of a six inch (6") cut into the firm bed of the control line and have a berm with a compacted height of no less than twelve inches (12"). The waterbars will be constructed diagonally across the control line at an angle of thirty-five to forty degrees (see diagram). Where extreme slopes prevent the use of heavy equipment from placing waterbars in control lines, hand crews will be used to perform the necessary erosion control work. When dozer lines follow a ridge where there is no vegetation on either side, or where there is unburned vegetation on both sides (indirect line), re-contouring and waterbars should be designed to divert water equally to both sides of the ridge. In some cases, chunking or berming may be used in combination with the above techniques to prevent access for unauthorized OHV use.

HAND LINES

Hand lines will be repaired to allow for drainage by re-contouring and construction of waterbars. Waterbars for hand lines should be cut to a depth equal to the width of a standard fire shovel. The waterbars will be constructed diagonally across the control line at an angle of thirty-five to forty degrees (see diagram). The outside end of the waterbar must be open and should discharge into an area where the ground surface is protected by vegetation that is unburned, if possible. Trenching and berms, where present, will be removed and any topsoil available will be pulled back cross the hand line. When hand lines follow a ridge where there is no vegetation either side, or where there is unburned vegetation on both sides (indirect line), re-contouring and waterbars should be designed to divert water equally to both sides of the ridge. In some cases, chunking or berming may be used in combination with the above techniques to prevent access for unauthorized OHV use.

Waterbars

Waterbars should be constructed at logical discharge points and guided by the spacing criteria as follows:

| Fireline Si Distance | lope Approximate Apart |
|-------------------------|---------------------------|
| % | feet |
| 1-10 | 150-200 |
| 11-25 | 100-150 |
| 26-50 | 75-100 |
| 50+ | 50-75 |

Recommended spacing for waterbars on firelines.

Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more.

Adapted from: UDSA-Forest Service, "Sale Administrator's Handbook"

ROADS

- 1. Existing dirt surfaced roads used for access will be returned as close to pre-incident condition as possible. This will be accomplished by pulling any significant amounts of side cast material back onto the road, watering and compacting the road surface.
- 2. Existing roads that are closed, but reopened for current incident use will be returned as close to pre-incident condition as possible. This may include repairing and/or replacing the original erosion control structures, cleaning and improving ditches and blocking the entrance to the roads. If needed, additional actions to prevent significant soil movement may be used at the discretion of the Resource Advisor.
- 3. Additional mitigations of suppression impacts to National Forest roads will be determined and directed by the Forest Engineer or designee.

CUT VEGETATION

After the fire is under control and with the approval of the Incident Commander, vegetation removed to construct control lines will be scattered back onto the control lines. Approval for this could be a week or more after control of the fire depending on when the threat of restart has passed.

WATERCOURSE

A watercourse is defined as a channel containing water or exhibiting a scoured bottom which indicates sediment transport or contains vegetation that grows in streams (i.e. willows, alders, ferns, etc.). Mitigation of suppression impacts will be determined and directed by the Resource Advisor and/or designees. Suppression activity causing ground disturbance of more than 800 square feet within 50' of streams will have appropriate erosion control treatment.

WATER DRAFTING LOCATIONS, SUMPS, ETC.

All in-stream facilities and disturbance created by activities to improve water collection for fire suppression will be evaluated and mitigated under the direction of the Resource Advisor and/or designees. These facilities and disturbances include but are not limited to sumps, drafting locations, and intentionally blocked culverts. All building and other materials such as plastics, canvas, plywood, dimension lumber, etc., will be removed from such sites to a suitable disposal site or be recycled. All trash, cardboard, hoses, fittings, and pumps will be removed from the site.

HELISPOTS, HELIPORTS, SAFETY ISLANDS, DROP POINTS, AND OTHER CLEARINGS

All clearings constructed to support suppression activities will be returned as closely to pre-incident conditions as is possible. At a minimum, berms will be pulled or raked back into the site, if needed the site will be crowned to facilitate surface drainage and the vegetative material removed from the site will be lopped and scattered over the disturbed area to reduce erosion/unauthorized off-highway-vehicle potential. In some cases, chunking, berming or other barriers may be used in combination with the above techniques to prevent access for unauthorized OHV use. All areas cleared by heavy equipment must be surveyed for archaeological/biological resources prior to rehabilitation.

FENCES, GATES, PAVED ROADS, CULVERTS, AND OTHER IMPROVEMENTS

Improvements such as fences, gates, guzzlers, flood control basins, drainage structures, drainage channel, culverts, and paved roads damaged by suppression activities will be repaired to pre-fire conditions. When dealing with damages to private property, repairs/mitigations to improvements that are beyond the capacity of suppression resources, notify the Resource Advisor and/or designee and also the compensation claims unit.

ARCHAEOLOGICAL SITES

Any impacts to archaeological sites will be evaluated and mitigated on a case-by-case basis prior to rehabilitation activities. Additional measures may be required.

ADDITIONAL REHABILITATION NEEDS

In situations where the above guidelines will not effectively prohibit unauthorized OHV use of new control lines or other cleared areas, additional measures such as fencing or other barriers may be necessary as determined by the Resource Advisor. Once site-specific assessments are completed and appropriate supplies and materials ordered, these measures will be implemented. This may require additional time.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch.

| Ex: "Commur 2. INCIDENT STA Ex: "Commun | nications, Div. Alpha. Star TUS: Provide incident st ications, I have a Red pri | ATCH (Verify correct frequency nd-by for Emergency Traffic." ummary (including number of patie iority patient, unconscious, struck Smith is providing medical care." | ents) and command stru | icture. | rest Road 1 at (Lat./Long.) This will be the Trout | | |
|--|---|--|----------------------------|--------------------------|---|--|--|
| | riority | oort □ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° − 3° burns more than 4 palm sizes, heat stroke, disoriented. □ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° − 3° burns not more than 1-3 palm sizes. □ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness. | | | | | |
| Nature of I | njury or Illness | | ar rotatou imioco. | | D: (0 (1) (1) | | |
| Mechani | & sm of Injury | Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree) | | | | | |
