# INCIDENT ACTION PLAN

## DOLAN FIRE

CA-LPF-002428

P5NF6M (0507)

### Operational Period:

10/10/2020 0700

to

10/11/2020 0700

*This page intentionally left blank*

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <p style="text-align: center;">Dolan Fire</p>	<b>2. Operational Period:</b> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 33%;">Date From:</td> <td style="width: 33%;">10/10/2020</td> <td style="width: 33%;">Date To:</td> <td style="width: 33%;">10/11/2020</td> </tr> <tr> <td>Time From:</td> <td>0700</td> <td>Time To:</td> <td>0700</td> </tr> </table>	Date From:	10/10/2020	Date To:	10/11/2020	Time From:	0700	Time To:	0700
Date From:	10/10/2020	Date To:	10/11/2020						
Time From:	0700	Time To:	0700						

**3. Objective(s):**

**LEADERS INTENT**

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, National Scenic Byway (Highway 1), Fort Hunter Liggett improvements, and wilderness values. Apply tactics that offer the highest probability of success. Identify, develop and prepare contingency measures in a proactive fashion. Develop and maintain an accurate and timely information sharing process for values at risk.

**MANAGEMENT OBJECTIVES**

Provide for firefighter and public safety through hazard recognition and risk management.

Minimize risk and limit exposure by following COVID-19 best management practices.

Minimize or avoid impacts to wilderness values by applying minimum impact suppression tactics (MIST).

Utilize incident resource advisors to minimize impacts on natural and cultural resources.

Distribute accurate and timely fire information to cooperators, the public, and stakeholders.

Manage resources to meet protection objectives while maintaining fiscal accountability.

**CONTROL OBJECTIVES**

Minimize risk to private property, surrounding communities, and resource values by:

Maintaining the Dolan Fire within existing perimeter.

Provide for suppression repair where most advantageous with existing resources.

Utilize technology to manage risks to infrastructure, values at risk to guide aggressive mop up, control and suppression repair tactics.

**5. Site Safety Plan Required?**      Yes  No

**Approved Site Safety Plan(s) Located at:**

# Fire Weather Forecast

## SATURDAY, OCTOBER 10, 2020

**FORECAST NO:** 49  
**PREDICTION FOR:** Saturday  
**SHIFT DATE:** October 10, 2020  
**ISSUED:** 1900 Friday, Oct 9, 2020

**NAME OF FIRE:**  
**UNIT:**  
**Incident Meteorologist:**

**Dolan**  
**USFS/LPNF**  
**KVS/SBN (T)**  
**(240) 778-5301**

**DISCUSSION:** No rain is expected this weekend. Wind gusts Saturday night into Sunday morning of 18 mph could cause branches of fire damaged trees to break and fall. Cooler weather today will be followed by a steady warming trend and episodes of weak to moderate offshore winds this week with a possible return to near critical fire weather conditions (warm, dry and occasionally breezy).

### TODAY:

- WEATHER: Mostly cloudy.
- WIND (20 FT): Coast: Northwest 4-6 mph gusting 12 mph.  
 Inland: N wind 3-6 mph. Above 2000 ft NNW 4 - 7 mph gusting to 12 mph.  
 Arroyo Seco: WSW 6-8 mph then ENE 10 mph gusting to 15 mph.
- MAX TEMPERATURES: Highs 55-64 near the coast. 74-80 inland and Arroyo Seco. 72-78 above 2000 feet MSL
- MIN RH: 60% near the coast. 40-50% inland.
- MARINE LAYER: 2000 feet

### SATURDAY NIGHT:

- WEATHER: Partly cloudy 2000 feet. Mostly cloudy/fog below 2000 feet.
- WIND (20 FT): Calm below 1000 feet. Above 2000 ft wind N 6-10 mph gusting to 18 mph.
- MIN TEMPERATURES: 50-59 near the coast, 48-55 inland and Arroyo Seco, 48-56 above 2000 feet MSL.
- MAX RH: 100% near the coast. 80-100% inland areas and Arroyo Seco, with 60-70% higher terrain.
- MARINE LAYER: 2000 FT coastal branch and Salinas Valley

### SUNDAY:

- WEATHER: Mostly cloudy.
- WIND (20 FT): Coast: NNW 4-6 mph gusting 12 mph.  
 Inland: N wind 3-6 mph. Above 2000 ft N 5 - 10 mph gusting to 18 mph.  
 Arroyo Seco: WSW 6-8 mph then ENE 10 mph gusting to 15 mph.
- MAX TEMPERATURES: Highs 55-64 near the coast. 74-80 inland and Arroyo Seco. 72-78 above 2000 feet MSL
- MIN RH: 50% near the coast. 30% inland.
- MARINE LAYER: 2000 feet

**Planning forecast: A steady warming and drying trend is expected in the coming week with a return to 100 degrees temperatures inland and in the usual warmer locations. Offshore winds may inhibit significant marine layer influence as warmer and drier condition impact the coast later this week.**

- Columbus Day... Mostly sunny. Max Temp: 87 – 95 inland; cooler at coast. NNE wind 6 - 8 mph gusting 15 mph at ridgelines.
- Tuesday... Mostly sunny. Max Temp: 91 – 100 inland; cooler at coast. NE wind 6 - 8 mph gusting 15 mph at ridgelines.
- Wednesday... Mostly Sunny. Max Temp: 91-101 inland; cooler at coast. N wind 3-6 gusting 12 mph at ridgelines.

**Sunrise: 7:09 AM**

**Sunset: 6:35 PM**

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 45</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Dolan</b>	<b>OPERATIONAL PERIOD: October 6-10, 2020</b>
<b>DATE ISSUED: October 5, 2020</b>	<b>TIME ISSUED: 1900 hours</b>
<b>UNIT: CA-LPF</b>	<b>SIGNED:</b>  <b>Typed/printed: Nic Elmquist, FBAN</b>

### Weather Summary

\*\*Please see attached Fire Weather Forecast\*\*

### FIRE BEHAVIOR

#### GENERAL:

There is a rich history of fires within the Monterey R.D. for good reason. Before current record keeping began, there are accounts of the entire coastal range burning over the course of a summer in the late 1800's. These fires will continue to exist within this landscape because the components which cause wildland fire spread (fuels, weather, topography) are all at the extremes of the complexity scale. Once a fire gets engrained into the rugged wilderness, it is almost guaranteed the fire will be measured in months, not weeks or days. A lot of sweat has gone into getting the Dolan Fire to its current state of holding within its 124,924-acre perimeter. Continue the strong work which has occurred since August 18<sup>th</sup>.

An analysis was completed with the following chances of a season slowing event by date:  
October 12<sup>th</sup> – 25%, October 20<sup>th</sup> – 50%, November 3<sup>rd</sup> – 75%, November 18<sup>th</sup> – 90%

Probability of ignition peak burn period (1200-1600): Use Predicted Weather and IRPG page: 78

Local Thresholds: Combinations of any of these factors can lead to greatly increased fire behavior: **20' windspeed over 7 mph, relative humidity <17%, temperature over 98, 10-Hour Fuel Moisture less than 6.**

#### SPECIFIC:

All Divisions: The fuels within the major drainages on the coastal side of the fire (Limekiln, Hare, Mill) are full of heavy fuels. These fuels will continue to smolder until a season ending event occurs. There are still relatively large islands of either unburned or partly burned vegetation throughout the fire. If a smoke occurs, make a fire behavior assessment on the risk of it threatening the containment lines. Weigh this risk to that of the firefighters (air or ground) needed to contain it. Act accordingly.

Initial Attack: We are in peak fire season for Southern California due to the dryness of the fuels and the periodic offshore wind events. Several years back, the Pfeifer Fire started in late December near Big Sur. Remain vigilant and be prepared to switch from mop-up operations to supporting initial attack.

#### AIR OPERATIONS:

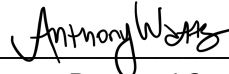

A deepening marine layer will impact the coastal areas early in the day. This marine layer should start to recede by late morning. However, it may come and go throughout the day impacting flights into Pacific Valley.

#### SAFETY

This is a historic fire season with added complexities due to Covid-19. Watch out for each other and always take time to check in with the FMO (Family Management Officer).

# ASSIGNMENT LIST (ICS 204 WF)

 -Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.  
 -For Mop up and Patrol – Do not go off the road (UXO).  
 -Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.  
 -Use call outs when traveling on Nacimiento Ferguson Road.  
 -INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

<b>6. Work Assignments:</b>								
TASK: Mitigate slope to prefire drainage patterns. Minimize visual impacts to the extent feasible. Any fire suppression activities will remain to existing roads, trails and dozer lines.								
PURPOSE: Minimize potential for erosion and sediment delivery to water courses.								
END STATE: To restore landscape back to prefire conditions as reasonably possible.								
RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads and working around heavy equipment.								
<b>7. Special Instructions:</b>								
-All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.								
-Ambulances will be located on paved roads for patient transport only.								
-READs and the BAER Team will check in and out with Division.								
-Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.								
-For Mop up and Patrol – Do not go off the road (UXO).								
-Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.								
-Use call outs when traveling on Nacimiento Ferguson Road.								
-INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

# COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concept.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

This document to be placed in the daily IAP

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup>Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

---

# COVID-19 OPERATIONAL FLOWCHART

**PERSONNEL SHALL BE SCREENED FOR S&S OF COVID-19 AT CHECK-IN** ← *ALL SUPERVISORS SHALL MONITOR THEIR PERSONNEL*

- ALL PERSONNEL SHALL:**
- PRACTICE PHYSICAL DISTANCING
  - WEAR A MASK WHEN LESS THAN 6' FROM OTHERS
  - SHALL SELF-MONITOR FOR S&S
  - WASH HANDS OFTEN / USE HAND SANITIZER
  - AVOID FACIAL CONTACT WITH YOUR HANDS
  - NOTIFY THE MEDICAL UNIT OF ANY FLU-LIKE S&S
  - DO NOT SHARE TOOLS / EQUIPMENT

- SIGNS & SYMPTOMS INCLUDE:**
- CHILLS OR FEVER > 100.4°
  - COUGH, AND/OR SHORT OF BREATH
  - LOSS OF TASTE OR SMELL, SORE THROAT
  - CONGESTION, RUNNY NOSE
  - FATIGUE, HEADACHE, BODY ACHES
  - NAUSEA OR VOMITING
- (Do not report to your assignment if you are sick)*

- PERSONNEL WHO DEVELOP FLU-LIKE SYMPTOMS SHALL:**
- NOTIFY THEIR IMMEDIATE SUPERVISOR
  - REPORT TO THE MEDICAL UNIT FOR EVALUATION

- MEDICAL UNIT WILL:**
- EVALUATE PERSONNEL / MAKE RECOMMENDATIONS
  - TRACK PERSONNEL FOR THE INCIDENT
    - CONTACT-TRACING
  - MAKE NECESSARY *TEAM & FOREST* NOTIFICATIONS

- PERSONNEL EXPERIENCING FLU-LIKE SYMPTOMS SHALL BE TESTED:**
- SEEK MEDICAL CARE FOR FURTHER TESTING ( TESTING SITES PROVIDED BY THE MEDL )
  - AFTER TESTING IS COMPLETE, PERSONNEL MAY HAVE TO QUARANTINE WHILE AWAITING RESULTS

- IF COVID-POSITIVE:**
- PERSONNEL SHALL ISOLATE AT APPROVED LOCATION UNTIL DEMOB'D (LOCATION PROVIDED BY THE MEDL)

- IF NEGATIVE:**
- FOLLOW AGENCY SPECIFIC GUIDELINES
  - OR, PER CDC, NO FURTHER ACTION REQUIRED

- SUPERVISOR SHOULD:**
- MAKE NOTIFICATIONS TO HOME UNIT
  - BEGIN AGENCY WORK-COMP PROCESS
  - COMPLETE DEMOB PROCESS

**PERSONNEL:** CONTINUE TO SELF-MONITOR  
*(Do not report to your assignment if you are sick)*  
 IF PERSONNEL IS TOO SICK, NOTIFY SUPERVISOR

IMT WILL PROVIDE DIRECTION AND SUPPORT UNTIL RECEIVED BY THE HOME UNIT

FDNY IMT - MEDICAL UNIT WILL TRACK AND MONITOR ALL COVID RELATED EXPOSURES

# IN-CAMP ISOLATION FLOWCHART:

- IN-CAMP GUIDELINES AS FOLLOWS:**
- PERSONNEL SHALL ISOLATE AT APPROVED LOCATION ONCE EVALUATED BY MEDICAL STAFF
  - MEDICAL UNIT WILL MONITOR PERSONNEL UNTIL DEMOBILIZED FROM THE INCIDENT

**SHOULD PERSONNEL'S HEALTH STATUS DETERIORATE, CONTACT THE MEDICAL UNIT ASAP**

- MEDICAL UNIT SHALL:**
- CONTACT COMMUNICATIONS - ARRANGE FOR TRANSPORTATION TO HOSPITAL IF NEEDED
  - CALL THE IMMEDIATE SUPERVISOR
  - MAKE NECESSARY TEAM & FOREST NOTIFICATIONS

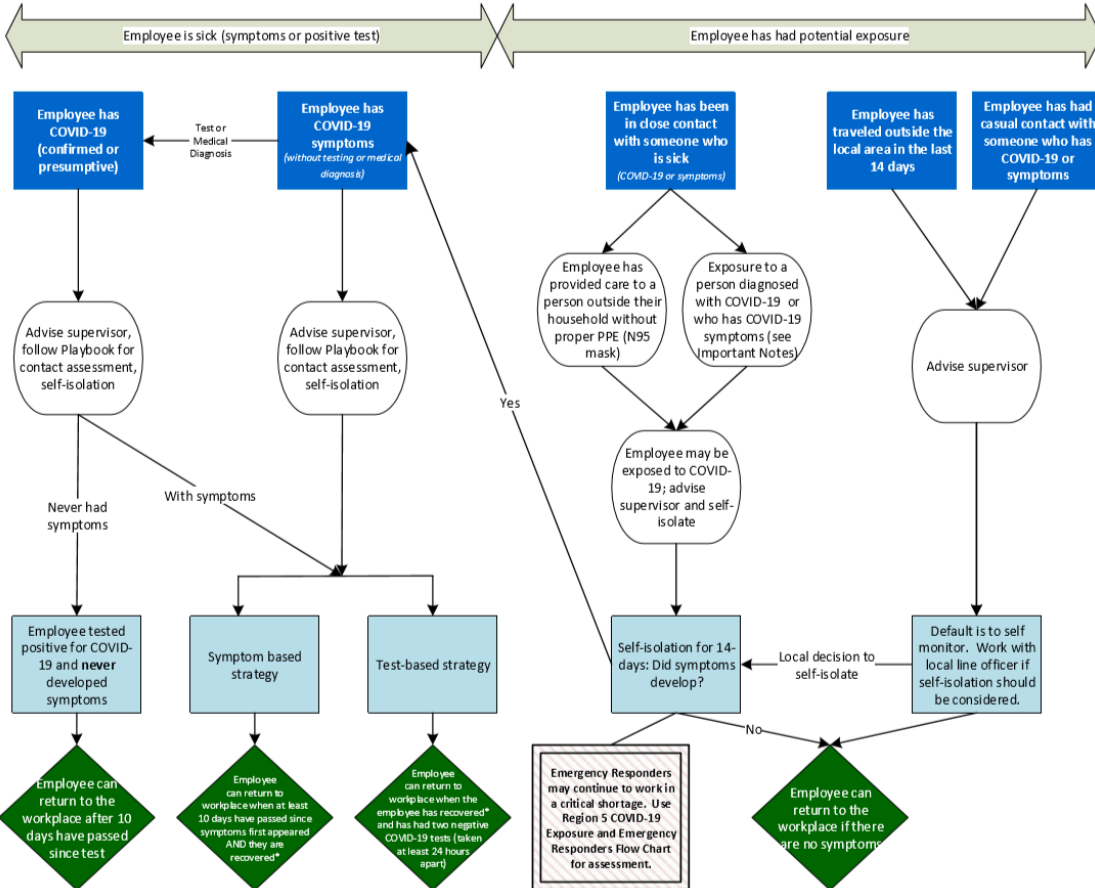

**FEDERAL EMPLOYEES SHALL REFER TO REGION 5 — COVID-19 ACTION PROCESS FOR AGENCY SPECIFIC GUIDANCE**

## Region 5 Pacific Southwest Region COVID-19 Response Action Process

August 20, 2020

### COVID-19 Response and Employee Notification

**Important Notes:**

- \* Recovered is defined as 10 days since symptoms first appeared AND 24 hours with no fever without the use of fever-reducing medicines AND other symptoms of COVID-19 are improving.
- Symptoms of COVID-19 include cough, shortness of breath, trouble breathing, fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.
- Contact Assessment should be conducted to help determine potential exposure of additional employees; conduct assessment for the 2-day period before illness onset or test date of sick employees, whichever came first.
- Close contact is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. Casual contact is defined as less than 6 feet for less than 15 minutes or more than 6 feet for more than 15 minutes.
- Any employee in "close contact with someone who is sick" may return to the workplace if the sick person is tested for COVID-19 and the test is negative.
- Contact with exposed individuals is classified as secondary contact and does not typically require self-isolation unless the exposed individual tests positive.
- You do not need to self-isolate unless you meet one of the criteria identified.
- Always follow the advice of a medical provider, if given, including any need for isolation or clearance for return-to-duty.

*This document is subject to change based on CDC guidance.*

# DOLAN FIRE SAFETY MESSAGE

INCIDENT: Dolan Fire

DATE: October 10, 2020

TIME: 0700-0700

## Major Hazards and Risks:

- **DRIVING** - Keep your speeds down. Drive like your life depends on it.
- **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for boulders and logs that can roll out.
- **POTENTIAL FOR EXTREME FIRE BEHAVIOR** - All fuels are available and can burn aggressively. Ensure **LCES**. Heat and Wind are here.
- **DEHYDRATION** – Fill up early and often.
- **FATIGUE** – Look for signs of fatigue and mitigate them.
- **WORKING UNDER HELICOPTERS** – Stay engaged if helicopters are in the area.
- **SNAGS AND FIRE WEAKENED TREES** – Look up and live.
- **COVID IS A RISK** – Use COVID precautions.
- **POSION OAK** – Avoid, Avoid, Avoid.
- **ASH PITS** – Watch out for ash pits while in mop up phase.
- **UNEXPLODED ORDINENCE** – Stay on road system while on Fort Hunter Liggett.

**Narrative:** Do not become Complacent! Now is not the time to let our guard down. Stay focused, stay alert. Do not just “go through the motions”. The fog on the coastal area can roll in at any time. Driving in the “marine layer” is always dangerous. Nature is not going to let up just because we are tired. Allow yourselves plenty of time for travel, and make sure you check in where and when you are supposed to.

**As always – work safe, stay safe.**

## Stress Reactions

As operations become prolonged, mental fatigue or “burnout” may begin to set in.

These may be some of the indicators:

- Communication deteriorates or grows tense.
- Habitual or repetitive behaviors.
- Target fixation – Locking into a course of action, whether it makes sense or not, just try harder.
- Action tunneling – Focusing on small tasks, but ignoring the big picture.
- Escalation of commitment – Accepting increased risk as completion of task gets near.

Working distracted can lead to getting injured. If you or the people you are with begin showing these behaviors, take a “mental break”. Remember where you are and take a moment to enjoy the scenery.

**Rest.**

**Rest.**

**Rest.**

During the day, but **more importantly** at night, allow plenty of time to let your body AND your mind reset. Drink plenty of fluids.

Fatigue leads to more injuries during this phase of firefighting. Twisted knees, rolled ankles and back injuries don't need active fire behavior to happen.

## Fire Suppression Repair Guidelines

Mitigation of suppression damages will minimize the long-term impacts caused by personnel and equipment. The following actions will be implemented to minimize long-term impacts from suppression activities. See the Dolan Incident Suppression Repair Plan for more detail.

**Objectives** – Significantly reduce the potential for soil erosion and sedimentation; reduce visual impacts of firelines and other physical evidence of suppression activities; restore roads and drainage structures to a functioning condition; stabilize suppression-caused damage to natural and cultural resources; and prevent the conversion of firelines into new OHV routes and trail routes.

### DOZER LINES

Dozer lines will be treated by pulling outside berms back into the control line, re-contouring or out-sloping the surface to allow for drainage, and where necessary, placing waterbars in the control line. Installed waterbars will consist of a minimum of a six inch (6”) cut into the firm bed of the control line and have a berm with a compacted height of no less than twelve inches (12”). The waterbars will be constructed diagonally across the control line at an angle of thirty-five to forty degrees (see diagram). Where extreme slopes prevent the use of heavy equipment from placing waterbars in control lines, hand crews will be used to perform the necessary erosion control work. When dozer lines follow a ridge where there is no vegetation on either side, or where there is unburned vegetation on both sides (indirect line), re-contouring and waterbars should be designed to divert water equally to both sides of the ridge. In some cases, chunking or berming may be used in combination with the above techniques to prevent access for unauthorized OHV use.

### HAND LINES

Hand lines will be repaired to allow for drainage by re-contouring and construction of waterbars. Waterbars for hand lines should be cut to a depth equal to the width of a standard fire shovel. The waterbars will be constructed diagonally across the control line at an angle of thirty-five to forty degrees (see diagram). The outside end of the waterbar must be open and should discharge into an area where the ground surface is protected by vegetation that is unburned, if possible. Trenching and berms, where present, will be removed and any topsoil available will be pulled back cross the hand line. When hand lines follow a ridge where there is no vegetation either side, or where there is unburned vegetation on both sides (indirect line), re-contouring and waterbars should be designed to divert water equally to both sides of the ridge. In some cases, chunking or berming may be used in combination with the above techniques to prevent access for unauthorized OHV use.

### Waterbars

Waterbars should be constructed at logical discharge points and guided by the spacing criteria as follows:

#### Fireline Slope Approximate Distance Apart

%	feet
1-10	150-200
11-25	100-150
26-50	75-100
50+	50-75

#### Recommended spacing for waterbars on firelines.

Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more.

Adapted from: UDSA-Forest Service, "Sale Administrator's Handbook"

## ROADS

1. Existing dirt surfaced roads used for access will be returned as close to pre-incident condition as possible. This will be accomplished by pulling any significant amounts of side cast material back onto the road, watering and compacting the road surface.
2. Existing roads that are closed, but reopened for current incident use will be returned as close to pre-incident condition as possible. This may include repairing and/or replacing the original erosion control structures, cleaning and improving ditches and blocking the entrance to the roads. If needed, additional actions to prevent significant soil movement may be used at the discretion of the Resource Advisor.
3. Additional mitigations of suppression impacts to National Forest roads will be determined and directed by the Forest Engineer or designee.

## CUT VEGETATION

After the fire is under control and with the approval of the Incident Commander, vegetation removed to construct control lines will be scattered back onto the control lines. Approval for this could be a week or more after control of the fire depending on when the threat of restart has passed.

## WATERCOURSE

A watercourse is defined as a channel containing water or exhibiting a scoured bottom which indicates sediment transport or contains vegetation that grows in streams (i.e. willows, alders, ferns, etc.). Mitigation of suppression impacts will be determined and directed by the Resource Advisor and/or designees. Suppression activity causing ground disturbance of more than 800 square feet within 50' of streams will have appropriate erosion control treatment.

## WATER DRAFTING LOCATIONS, SUMPS, ETC.

All in-stream facilities and disturbance created by activities to improve water collection for fire suppression will be evaluated and mitigated under the direction of the Resource Advisor and/or designees. These facilities and disturbances include but are not limited to sumps, drafting locations, and intentionally blocked culverts. All building and other materials such as plastics, canvas, plywood, dimension lumber, etc., will be removed from such sites to a suitable disposal site or be recycled. All trash, cardboard, hoses, fittings, and pumps will be removed from the site.

## HELISPOTS, HELIPOINTS, SAFETY ISLANDS, DROP POINTS, AND OTHER CLEARINGS

All clearings constructed to support suppression activities will be returned as closely to pre-incident conditions as is possible. At a minimum, berms will be pulled or raked back into the site, if needed the site will be crowned to facilitate surface drainage and the vegetative material removed from the site will be lopped and scattered over the disturbed area to reduce erosion/unauthorized off-highway-vehicle potential. In some cases, chunking, berming or other barriers may be used in combination with the above techniques to prevent access for unauthorized OHV use. All areas cleared by heavy equipment must be surveyed for archaeological/biological resources prior to rehabilitation.

## FENCES, GATES, PAVED ROADS, CULVERTS, AND OTHER IMPROVEMENTS

Improvements such as fences, gates, guzzlers, flood control basins, drainage structures, drainage channel, culverts, and paved roads damaged by suppression activities will be repaired to pre-fire conditions. When dealing with damages to private property, repairs/mitigations to improvements that are beyond the capacity of suppression resources, notify the Resource Advisor and/or designee and also the compensation claims unit.

## ARCHAEOLOGICAL SITES

Any impacts to archaeological sites will be evaluated and mitigated on a case-by-case basis prior to rehabilitation activities. Additional measures may be required.

## ADDITIONAL REHABILITATION NEEDS

In situations where the above guidelines will not effectively prohibit unauthorized OHV use of new control lines or other cleared areas, additional measures such as fencing or other barriers may be necessary as determined by the Resource Advisor. Once site-specific assessments are completed and appropriate supplies and materials ordered, these measures will be implemented. This may require additional time.

# Virtual Times

Step 1: TAKE PICTURE OF YOUR CTR/SHIFT TICKETS !!

Step 2: UPLOAD PDF/PICTURE (JPG)

Step 3: Please add in the SUBJECT LINE your RESOURCE

NUMBER and LAST NAME/CREW NAME. EXAMPLE: O12.34 SMITH / C123 CREW NAME

Step 4: SEND EMAIL

OR Email TO:

**2020.Dolan.Finance@firenet.gov**

**Need to talk to Finance:**

**Dolan Finance Phone: 323-394-8817**

- PLEASE INDICATE BREAKS ON YOUR SHIFT TICKETS.
- PLEASE INCLUDE YOUR RESOURCE ORDER # ON ALL DOCUMENTATION SUBMITTED, INCLUDING RECEIPTS.
- IF POSSIBLE, PLEASE BE CONSISTENT WITH THE METHOD IN WHICH YOU SUBMIT YOUR DOCUMENTS.
- A JUSTIFICATION IN REMARKS IS REQUIRED FOR FEDERAL EMPLOYEES CLAIMING HAZARD PAY ON CTRS – FOR EXAMPLE, “WORKING IN DIVISION \_\_\_\_ WITH AN UNCORTOLLED FIRE LINE.”
- CREW CTRS NEED TOO SHOW ALL NAMES ON THE FIRST 2 SHIFT TICKETS OR ANY CREW SWAPS.
- PLEASE INDICATE RR DAYS IF TAKEN
- PLEASE TURN IN BOTH PINK AND BLUE SHIFT TIECKETS

### Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications / dispatch.

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.**

**8. ADDITIONAL INFORMATION: Updates/Changes, etc.**

**REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.**
