6 Work Assignments:									

### 6. Work Assignments:

TASK: Mitigate slope to prefire drainage patterns. Minimize visual impacts to the extent feasible. Any fire suppression activities will remain to existing roads, trails and dozer lines.

PURPOSE: Minimize potential for erosion and sediment delivery to water courses.

END STATE: To restore landscape back to prefire conditions as reasonably possible.

RISK ASSESSMENT: Stay alert for drivers in the fire area and in restricted areas. Watch for snags and rollout onto roads and working around heavy equipment.

### 7. Special Instructions:

-All medical resources MUST check in with Dolan Communications once in place, see medical plan for REMS availability.

-Ambulances will be located on paved roads for patient transport only.

-READs and the BAER Team will check in and out with Division.

-Assume all divisions have Sudden Oak Death Pathogen and clean and disinfect everything. No weed wash is available use a commercial wash station where sump collection is done to prevent the further spread.

-For Mop up and Patrol – Do not go off the road (UXO).

-Utilize Collector to mark all accountable property (pumps, hose, tanks...), attach a picture of the serial number with the LAT and LONG.

-Use call outs when traveling on Nacimiento Ferguson Road.

-INITIAL ATTACK RESOURCES will maintain a state of readiness for response. All responses will be initiated by operations through the

divisions. Once the resource is cancelled/released they will return to the incident and notify comms that they are back in their division.

# **Fatigue Awareness**

Monitor incident personnel for signs of fatigue; and adhere to work-rest guidelines, as feasible. Working 16 hour days for multiple days can result in a loss of situational awareness and sometimes an increased sense of complacency. Don't let down your guard!!! Get the proper rest when you end each shift and continue to drink plenty of water and eat healthy meals. It is only early July! We could be in for a long season of long shifts. GET YOUR REST when you can.

# Pacific Southwest Region Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2020 has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.
