		Time From: 0700	Time To: 0700

3. Objective(s):

Strategic Framework

Implement a full suppression strategy on the Dolan Fire. Values at risk include human safety, private property, Anderson Communication Site, National Scenic Byway (Highway 1) and wilderness values. Apply tactics that offer the highest probability of success.

Leaders Intent

Provide the highest level of customer service to all involved with, or impacted by, the Dolan Fire. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct and timely/effective communications.
- Personal safety and the safety of others, includes driving slowly, safely and defensively.
- Implementation of tactics that offer a high probability of success.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing and practicing module of one concept.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Reduce the threat to private property, residences and infrastructure through the application of effective suppression tactics
- Reduce the impacts to the Ventana Wilderness values by ensuring minimum impact suppression tactics (MIST) are applied. Utilize historic fire control lines, trails, streams, ridges and natural barriers when possible for control lines.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Manage resources at a level to meet protection objectives while maintaining fiscal accountability.

Control Objectives

To prevent the fire from spreading to private property, surrounding communities, and values at risk, keep the fire:

- North of Nacimiento–Fergusson Road to limit fire growth to the south and protect the communities of Lucia.
- South of Partington Creek and Cold Springs Campground to limit fire growth to the north and protect the community of Partington Ridge.
- West of Coast Ridge Road to limit fire growth to the east into the Ventana Wilderness.
- East of Highway 1 to protect corridor of this National Scenic Byway and adjacent communities.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wild Fire
FIRE NAME: Dolan	OPERATIONAL PERIOD: August 21, 2020 24hr
DATE ISSUED: 8/20/20	TIME ISSUED:
UNIT: CA-LPF	SIGNED: _____ Typed/printed: /s/ Dennis Burns

INPUTS

WEATHER SUMMARY: Continued warm and dry

Temps: Day 85-90 Night 70-75

RH: Day 13-18% Night 30-35

Winds: Day Ridge top N-NW 5-10 Gusts 20mph Night N 5-10 gusts 20mph shifting to SE after midnight

OUTPUTS

FIRE BEHAVIOR

GENERAL: Smoke from nearby fires is shading out our fire, which is dampening our fire behavior potential. If you see clear skies expect a dramatic increase in fire behavior. The fire will continue to spread laterally along the coast ridge. Main fire progression will be to the south with active flanking fire.

The top of the marine inversion is sitting at about 1000ft. Expect the fire behavior to diminish below this elevation and remain very active above it especially at night.

Roll out has the potential to spread the fire across Hwy 1.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant grass crop.

Spotting will be short range less than 400ft and rollout.

Probability of ignition will be 60-70%

SPECIFIC:

Eastside: This whole side of the fire is above the marine layer, expect active flanking fire with isolated torching and short range spotting. With the forecasted winds the N. Coast Ridge Rd should hold the fire

Westside: This side is below the marine layer. Expect the fire to continue backing down to Hwy. 1. Expect some torching the main concern for spotting will be rollout.

AIR OPERATIONS: Smoke will limit air operations until the inversion

SAFETY

Fire behavior is affected by the marine layer, it is sitting at 1000 ft. Expect dramatic increases in fire behavior above the marine layer.
