WEATHER DISCUSSION:

...RED FLAG WARNING 500 AM Sunday through 500 PM MONDAY...

Moisture from Tropical Depression Genevieve will bring the threat of thunderstorms to the incident through the operational period. There will be slight chance (10-15%) of thunderstorms into early this afternoon. By late this afternoon through Monday morning, there will be a chance (20-30%) of thunderstorms.

The moisture associated with the expected thunderstorm activity is confined to the mid and upper levels of the atmosphere. So, any thunderstorms that do develop will likely be dry, producing little rainfall. **Therefore, the main hazards will be dry lightning strikes (causing potential new starts) and gusty and erratic outflow winds. Gusts associated with the outflow winds could approach speeds up to 50 MPH which would result in dramatic changes in fire weather conditions and fire behavior.** Given the potential for dry thunderstorms, a RED FLAG WARNING is in effect for the area.

By Monday night and Tuesday, the moisture will continue streaming across the area. So, there is a chance that the Red Flag Warning may need to be extended.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Down draft winds from nearby thunderstorms have the potential to cause dangerous rates of spread on our fire. Depending on the intensity of the storm we could be effected by storms up to 25 miles away. If you see clear skies expect a dramatic increase in fire behavior. The fire will continue to spread laterally along the coast ridge. When the fire becomes established in, sub-drainages expect short duration, rapid crown runs. Main fire progression will be to the north with active flanking fire.

The top of the marine inversion is sitting at about 1000ft. Expect the fire behavior to diminish below this elevation and remain very active above it especially at night.

There is a great deal of ragged burn along Hwy, this means there is a high probability of reburn.

Roll out has the potential to spread the fire across Hwy 1 also, bridge crossings that have vegetation will be a means for the fire to become established west of the highway.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant amount of dead fuel under the brush.

Spotting will be mid range less than ¼ mile and from rollout.

Probability of ignition will be 60-70%

SPECIFIC:

Eastside: This whole side of the fire is above the marine layer, expect active flanking fire with isolated torching and short range spotting. With the forecasted winds, the N. Coast Ridge Rd should hold the fire in Branch I. Branch V the fire will continue to push Vinciente Crk to the south and has the potential to impact the Hermitage.

Westside: This side is below the marine layer. Expect the fire to continue backing down to Hwy. 1. Expect some torching the main concern for spotting will be rollout. There are many unburned islands and ragged burn areas, which increase the potential for reburn. Any fire established west of Hwy. 1 will back slowly but has the potential to hook and make up hill runs back to the highway.

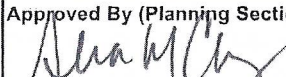

AIR OPERATIONS: Thunderstorms have the potential to shut down air operations.

SAFETY

Fire behavior is affected by the marine layer, it is sitting at 1000 ft. Expect dramatic increases in fire behavior above the marine layer.

SITUATIONAL AWARENESS:

The 10 Standards, 18 Watch-Outs and LCES, are the bare minimum safety precautions. Go into your areas today with a fresh set of eyes. Do not allow yourself to become complacent because the fire has not been active in your area. Whether it is vehicle or equipment use, mop-up or rehab, ask yourself "Are my actions achieving the Incident Objectives?" If not re-evaluate your plan. Keep an eye on other personnel; it is **EVERYONE'S** responsibility to stop an unsafe act.

DRIVING on ROUGH ROADS

Most incident roads are the same: rough, steep drop offs, dusty and narrow.

- Drive slowly and defensively, anticipate wildlife and other vehicles.
- Maintain a safe distance behind other vehicles to increase visibility.
- Reduce speeds when entering corners, there may be obstacles, rough road conditions, or other vehicles ahead.
- Use caution along the edges of the road as there may be steep drop offs, soft shoulders, or undermined surfaces.
- Slow down when you see wash board conditions.
- When you see another vehicle, slow down as you never know what to expect.
