FORECAST ISSUED: 8/23/20 @ 2000

WEATHER DISCUSSION:

...RED FLAG WARNING Until 500 PM MONDAY...

Moisture from Tropical Depression Genevieve will continue to bring a chance of dry thunderstorms to the area today. The best chances for thunderstorms will be this morning with the chances diminishing this afternoon and evening. The main hazards possible with any thunderstorm development will be dry lightning strikes and gusty outflow winds (which could approach speeds up to 50 MPH). With these conditions, critical fire weather conditions are possible. Therefore, a RED FLAG WARNING remains in effect until 500 PM this afternoon.

On Tuesday, the tropical moisture will move out of the area. Minor day-to-day changes in the sensible weather can be expected for the rest of the week.

#### **OUTPUTS**

#### **FIRE BEHAVIOR**

GENERAL: Downdraft winds from nearby thunderstorms have the potential to cause dangerous rates of spread on our fire. Depending on the intensity of the storm, we could be effected by outflow winds from storms up to 25 miles away. If you see clear skies expect increased in fire behavior. The fire will continue to spread laterally along the coast ridge. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Main fire progression will be to the north with active flanking fire.

The top of the marine inversion is sitting at about 1000ft. Expect the fire behavior to diminish below this elevation and remain very active above it.

There is a great deal of ragged burn along Hwy 1; this means there is a high probability of reburn.

Roll out has the potential to spread the fire across Hwy 1 also, bridge crossings that have vegetation will be a means for the fire to become established west of the highway.

Expect the most active fire behavior from about midnight to about sun up.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant amount of dead fuel under the brush.

Spotting will be mid range less than ¼ mile and from rollout. Probability of ignition will be 60-70%

### SPECIFIC:

Eastside: This whole side of the fire is above the marine layer, expect active flanking fire with isolated torching and short range spotting. With the forecasted winds, the N. Coast Ridge Rd should hold the fire in Branch I. Branch V the fire will continue to push Vinciente Creek to the south towards Cone Peak. Expect mainly backing fire above the structures at Lucia and the Hermitage. With the moister weather, there will be opportunities for direct attack.

Westside: This side is below the marine layer. Expect the fire to continue backing down to Hwy. 1. Expect some torching the main concern for spotting will be rollout. There are many unburned islands and ragged burn areas, which increase the potential for reburn. Any fire established west of Hwy. 1 will back slowly but has the potential to hook and make up hill runs back to the highway.

AIR OPERATIONS: Thunderstorms, smoke and fog all have the potential to shut down air operations.

#### SAFETY

Fire behavior is affected by the marine layer, it is sitting at 1000 ft. Expect increased fire behavior above the marine layer.

The most active fire behavior has been occurring at night, do not become complacent.

## Incident

**Operation Period: 8/24 to 8/25** Shift: 0700-0700

# **Emphasis on Communications**

# **Communication Responsibilities**

- Briefings All resources require briefings, use the briefing checklist in the IRPG
- Debrief Actions Conduct AAR's to identify lessons learned
- Communicate Hazards to others
- Acknowledge Messages
- Ask if you do not know Ask questions in unfamiliar situations

## **MAJOR HAZARDS AND RISKS**

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
COMMUNICATIONS	DEHYDRATION	SNAGS
SPOT FIRES	BUCKET DROPS	AIR OPERATIONS

Be sure all elements of your safety plan are in place prior to engagement

## **Planning for Medical Emergencies**

Ask and be able to answer these 3 questions

- 1. What are we going to do if someone gets hurt?
- 2. How will we get them out of here?
- 3. How long will it take to get them to a hospital?

All operational activities should be based on answers to these questions. See page 2 of the IRPG for more information.

# **Briefing Protocol**

- Brief your personnel using the IRPG checklist prior to engagement
- Re-brief anytime your plan changes, unexpected changes compromise the plan or your safety, or anytime essential information becomes know and needs to be communicated
- Ask questions to be sure essential content is understood
