## INCIDENT Weather Forecast

FORECAST NO: 6  
PREDICTION FOR: 24 hr SHIFT  
SHIFT DATE: 8/2720 to 8/28/20 (0700-0700)

NAME OF FIRE: Dolan

UNIT: USFS

SIGNED:

Richard Thompson  
Incident Meteorologist

TIME AND DATE  
FORECAST ISSUED: 8/26/20 @ 2000

**WEATHER DISCUSSION:** The marine inversion (around 1200 feet) will once again impact the fire, producing night and morning low clouds and fog across the west flank of the fire. Otherwise, mostly clear and smoky conditions are expected. With the continued marine influence, relative humidity will be at moderate to high levels, underneath the inversion. However, above the marine inversion, drier conditions will prevail. In fact, a nocturnal drying trend is expected above the inversion with the lowest humidity occurring in the late night and morning hours. Ridgetop winds will shift quite a bit during the operational period with typical diurnal winds at the lower elevations.

### **WEATHER FORECAST:**

**WEATHER:** Mostly clear except for some night and morning low clouds and fog below 1200 FT.

**TEMPERATURES:** Maximum: Below 1200 FT: 64-76...Above 1200 FT: 76-92.  
Minimum: Below 1200 FT: 56-64...Above 1200 FT: 64-70.

**HUMIDITY:** Minimum: Below 1200 FT: 25-40%...Above 1200 FT: 15-30%.  
Maximum: Below 1200 FT: 60-80%...Above 1200 FT: 35-55%.

**20 FT WINDS:**  
**RIDGETOP -** 0700-0900: Northwest to north 3-6 MPH Gust 10 MPH.

## INPUTS

**WEATHER SUMMARY:** Warm and Dry

**Temps:** Day 76-92 Night 64-70

**RH:** Day 15-30% Night 35-55

**Winds:** Day Ridge top W-NW 5-10 Gusts 15mph Night NE-E 6-12 gusts 15-20mph

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** The fire will continue to spread laterally along the coast ridge. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Main fire progression will be to the south and east with active flanking fire.

The top of the marine inversion is sitting at about 1000 ft. Expect the fire behavior to diminish below this elevation and remain very active above it.

The probability of re-burn along Highway 1 remains high.

Roll out has the potential to spread the fire across Hwy 1 also, bridge crossings that have vegetation will be a means for the fire to become established west of the highway.

Expect the most active fire behavior from about midnight to about sun up. This means that you could see rapid downhill fire runs and spotting distances up to ½ mile.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant amount of dead fuel under the brush.

Spotting will be mid range less than ¼ mile and from rollout.

Probability of ignition will be 60-70%

### SPECIFIC:

**Eastside:** This whole side of the fire is above the marine layer, expect active flanking fire with isolated torching and short range spotting. With the forecasted winds, the N. Coast Ridge Rd could be challenged near or south of Anderson Peak. The fire has crossed over McWay Ridge and is well established in the drainage. Expect this part of the fire to try and push towards Coast Ridge Rd. In Branch V the fire will continue to push from Vicente Crk to the southeast towards Cone Peak. Expect mainly creeping and smoldering fire above the structures at Lucia and the Hermitage.

**Westside:** This side is below the marine layer. Expect the fire to continue backing down to Hwy. 1. Expect some torching but the main concern for spotting will be rollout. There are many unburned islands and ragged burn areas, which increases the potential for re-burn. Any fire established west of Hwy. 1 will back slowly but has the potential to hook and make up hill runs back to the highway.

**AIR OPERATIONS:** Smoke and fog have the potential to limit operations until about 1200

## SAFETY

Fire behavior is affected by the marine layer, it is sitting at 1000 ft. Expect increased fire behavior above the marine layer.

The most active fire behavior has been occurring at night, do not become complacent.

*Be sure all elements of your safety plan are in place prior to engagement*

**MY SAFETY**

An important aspect of risk management is an individual’s responsibility for one’s own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety.

- Remain fit for duty.
- Utilize personal protective equipment.
- Follow safe work practices.
- Ensure instructions are clearly understood.
- Maintain situational awareness at all times.

Do not expect someone else to be responsible for your safety. Take it upon yourself to make “My Safety” your number one priority.

## FIRELINE GUIDANCE FOR ARCHAEOLOGICAL AND HISTORIC RESOURCES

The Big Sur Coast has long been home to Native American people, and also has a rich history of use by peoples from many cultures. Archaeological resources include historic and prehistoric artifacts, and cultural features on the landscape. Archaeology is an important part of the environment. In Big Sur, you are likely to see ancient bedrock mortars and shell middens, as well as historic artifacts and cabins, and occasionally paleontological fossils. Please leave all these materials in place, and report any new discoveries to the ARCH or READ.

Suppression Personnel (Bulldozer and Hand Line Crews): Don't compromise safety for the protection and preservation of archaeological and historic sites. When possible and prudent:

1. Please be aware that prehistoric and historic sites may be situated within areas of line construction. Sites tend to be situated along ridge lines, saddles and low-relief land forms, stream terraces, creek sides and springs, rock outcrops and side-slope terraces which are less than 30%. Sites may also be in the vicinity of oak, pine, and juniper vegetation communities. Watch for rock outcrops and boulders that may have milling features (bedrock mortars, grinding slicks) or rock art, and artifacts that may be present in surrounding soils. Historic sites include rock foundations, milled wood, and old trash with glass and tin cans.
2. If you observe cultural resources, attempt to avoid if possible and inform an archaeologist (ARCH) or Resource Advisor (READ).
3. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons. Federal laws also prohibit the removal of artifacts on public lands. These laws hold enforceable penalties.
4. If you cannot avoid, attempt to minimize disturbance as much as possible, only clearing the surface to as minimal depth as necessary.
5. If possible, please take an Avenza point, photo, and note locations of resources encountered in the field on a map, and describe the location and resource. Please provide this information to a resource specialist so it can be properly recorded and monitored.
6. If you encounter a burial or human remains, contact resource specialists ASAP so that we may notify Tribal representatives to determine the appropriate treatment of the remains.
7. Be mindful and careful in areas with historic mining. Constructing line in these areas may pose risks such as old mine shafts, abandoned equipment, and hazardous materials.
8. If possible, culturally sensitive locations will be flagged in the field with a combination of yellow/black stripe and blue flagging. If you encounter an area that has been flagged, please try to avoid. If you cannot avoid report the disturbance to resource specialists.

Thank you,  
Resource Personnel
