# INCIDENT Weather Forecast

**FORECAST NO:** 11  
**PREDICTION FOR:** 24 hr **SHIFT**  
**SHIFT DATE:** 9/1/20 to 9/2/20 (0700-0700)

**NAME OF FIRE:** Dolan

**UNIT:** USFS

**SIGNED:**

Richard Thompson  
Incident Meteorologist

**TIME AND DATE**  
**FORECAST ISSUED:** 8/31/20 @ 2000

**WEATHER DISCUSSION:** The marine inversion (around 1200 feet) will once again impact the fire, producing night and morning low clouds and fog across the west flank of the fire. Otherwise, mostly clear and smoky conditions are expected. With the continued marine influence, relative humidity will be at moderate to high levels below the inversion. However, above the marine inversion, drier conditions will prevail. Minimum humidity, above the inversion, will drop into the teens and 20s with poor overnight recovery. Ridgetop winds will start out easterly, but will shift to a northerly direction this afternoon and tonight. Typical diurnal winds will prevail at lower elevations.

For the rest of this week, high pressure will gradually build over the area. This will bring warmer and drier conditions to the fire along with limited marine layer stratus and fog.

**WEATHER FORECAST:**

**WEATHER:** Mostly clear except for some night and morning low clouds and fog below 1200 FT.

**TEMPERATURES:** Maximum: Below 1200 FT: 62-74...Above 1200 FT: 82-92.  
Minimum: Below 1200 FT: 52-58...Above 1200 FT: 62-70.

**HUMIDITY:** Minimum: Below 1200 FT: 50-70%...Above 1200 FT: 12-25%.  
Maximum: Below 1200 FT: 80-100%...Above 1200 FT: 30-50%.

**20 FT WINDS:**  
**RIDGETOP -** 0700-1600: East to southeast 4-8 MPH Gust 12 MPH.  
1600-2300: Northwest to north 4-8 MPH Gust 12 MPH.  
2300-0700: Northeast to east 3-6 MPH Gust 10 MPH.

**SLOPE/VALLEY -** 0700-0900: Variable/upslope 3-6 MPH.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: Wild Fire
FIRE NAME: Dolan	OPERATIONAL PERIOD: Sept, 1, 2020 24hr
DATE ISSUED: 8/31/20	TIME ISSUED: 1930hrs
UNIT: CA-LPF	SIGNED: _____ Typed/printed: /s/ Dennis Burns

### INPUTS

**WEATHER SUMMARY: Warm and Dry**  
**Temps: Day 82-92 Night 62-70**  
**RH: Day 12-25% Night 30-50**  
**Winds: Day Ridge top N-NW 4-8 Gusts 12mph Night N-NE 3-6 gusts 10mph**

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** The fire will continue to spread laterally along the coast ridge. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Main fire progression will be to the south and east with active flanking fire.  
The top of the marine inversion is sitting at about 1200ft. Expect the fire behavior to moderate below this elevation and remain very active above it.

There is still a potential for re-burn along Highway 1.

Expect the most active fire behavior from about midnight to about sun up. This means that you could see rapid downhill fire runs and spotting distances up to 1/2 mile. The most active area will be below Division X and in the wilderness.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant amount of dead fuel under the brush.

Spotting will be mid range less than 1/4 mile and from rollout.  
Probability of ignition will be 60-70%

#### SPECIFIC:

Branch I: Unburned and partially burned stringers of fuel along McWay Ridge have the potential to burn with high intensity and challenge the line. South of Anderson Peak the fire will continue to burn down slope to the southeast. Watch out for the potential that the fire could hook and run back at the line.

Branch IV: The fire is well established around Cone Peak. Main fire progression will continue to the east. The fire will continue to flank down slope along Twin Peaks Ridge above Lime Kiln Creek. The fire has crossed the Coast Ridge and will back down to the trail system, rollout will be the main cause for fire spread. Expect rapid intense runs in aligned drainages. From Lucia to the Hermitage no fire spread is expected. Along Highway 1 rollout and re-burn will continue to challenge containment.

**AIR OPERATIONS:** Smoke and fog have the potential to limit operations until about 1300. Fog along the coast may not clear out enough for filling buckets.

### SAFETY

Fire behavior is affected by the marine layer. It is sitting at 1200 ft. Expect increased fire behavior above the marine layer.

The most active fire behavior has been occurring at night, do not become complacent.

## **Human Resource Specialist**

Leading others effectively encourages those we lead to do great things. Let's remember the value of our leadership while we continue to do the important work we are doing here.

### **Leaders Who Motivate People:**

- Know their job
- Know the jobs of those they supervise
- Set the direction
- Make the team stronger by pulling from everyone
- Give people the chance to succeed or fail
- Work with reality and current conditions
- Enjoy their work and provide a positive work environment
- Keep it simple and keep it real
- Take responsibility
- Make a difference whenever and wherever they can.

In a learning organization, leaders treat honest mistakes as opportunities to do better next time. Understanding that failure is a part of learning, they establish command climates in which leaders are motivated by desire to succeed rather than fear of failure. - Leading in the Wildland Fire Service, Page 42-

## Dolan Incident Resource Advisor Message

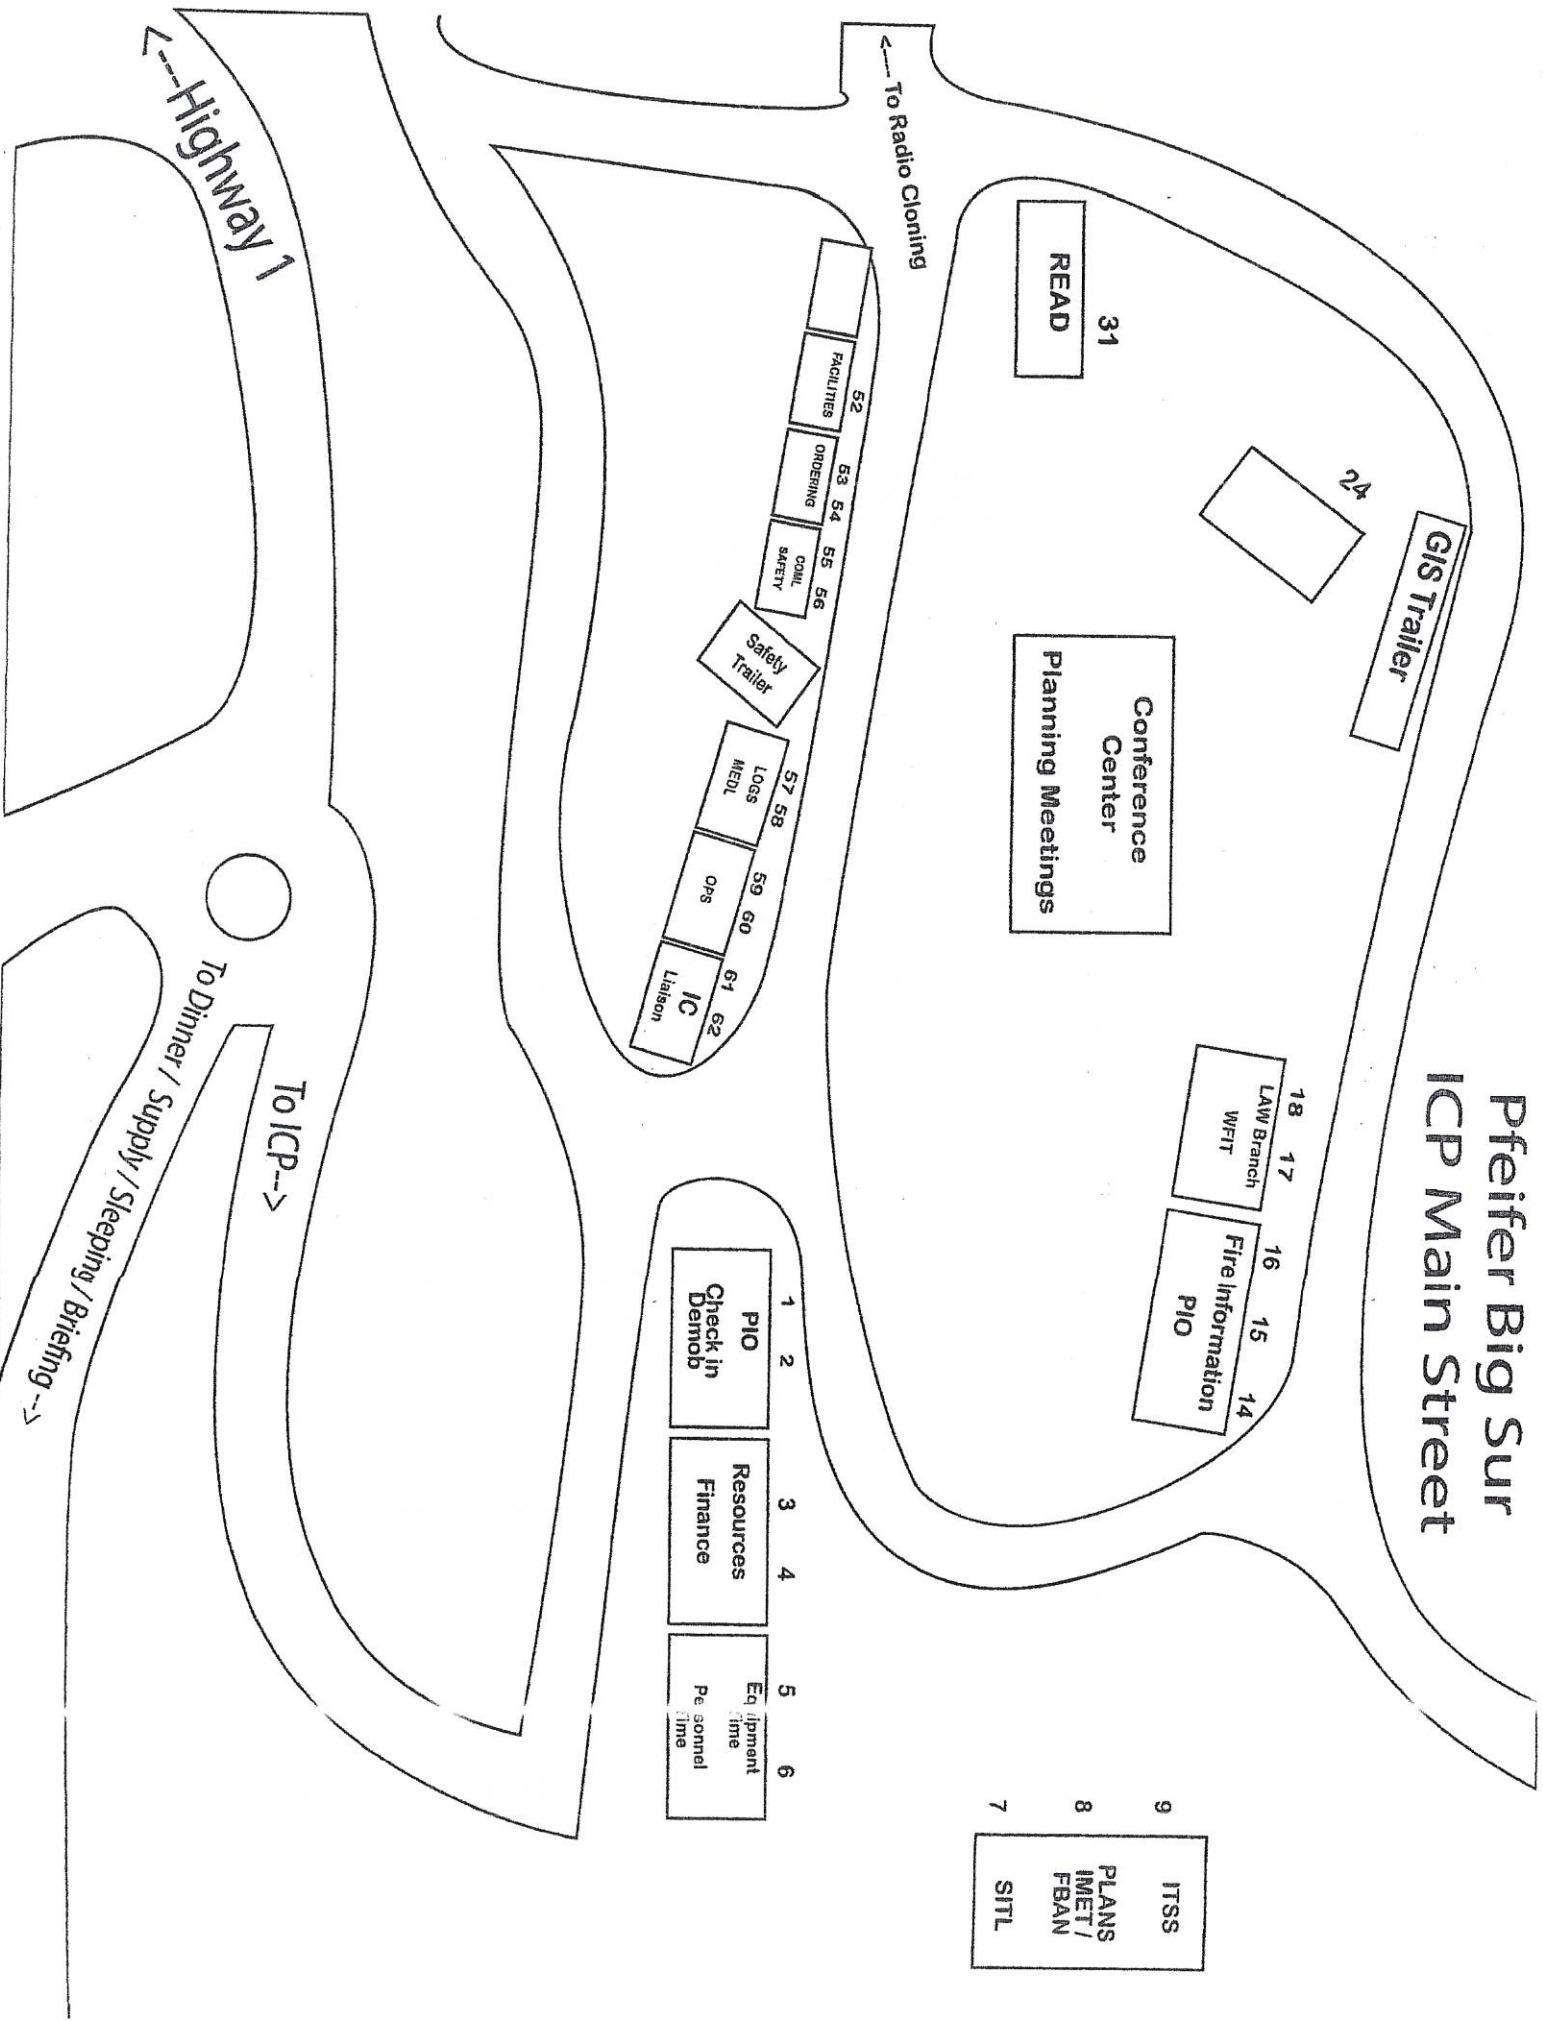

- California condors fly over the entire fire area.

- Pick up trash so they don't ingest it.
- Do not approach or feed condors
- Steelhead trout breed in coastal streams
  - Keep fuel out of waterways
  - Report draft/dip sites to READs, use a ¼ inch intake screen
  - Avoid retardant/foam within 300' of surface water
  - Report any retardant/foam within 300 feet of water to READs
  - Avoid soil disturbance in sites if possible
  - If not, minimize impact by using hand line
  - Notify READ if impacts occur
- Fire Suppression Personnel: Don't compromise safety for the protection and preservation of archaeological and historic sites. When possible and prudent:
- Please be aware that prehistoric and historic sites may be situated within areas of line construction. Sites tend to be situated along ridge lines, saddles and low-relief land forms.
- If you observe cultural resources, attempt to avoid if possible and inform a Resource Advisor.
- Leave all artifacts in place. Federal laws prohibit the removal of artifacts on public lands and hold enforceable penalties.
- If you cannot avoid impacts, attempt to minimize disturbance as much as possible.
- If possible, please take an Avenza point, photo, or note locations of resources on a map and report them to resource advisors.
- If you encounter a burial or human remains, contact resource specialists ASAP.
- Be mindful and careful in areas with historic mining, as mine sites can contain old shafts, abandoned equipment, and hazardous materials. Culturally sensitive locations will be flagged in the field with a combination of yellow/black stripe and blue flagging.
