INCIDENT Weather Forecast

FORECAST NO: 12

NAME OF FIRE: Dolan

PREDICTION FOR: 24 hr SHIFT

UNIT: USFS

SHIFT DATE: 9/2/20 to 9/3/20 (0700-0700)

SIGNED:

Richard Thompson
Incident Meteorologist

TIME AND DATE

FORECAST ISSUED: 9/1/20 @ 2000

WEATHER DISCUSSION: The marine inversion (around 1500 feet) will once again impact the fire, producing night and morning low clouds and fog across the west flank of the fire. Otherwise, mostly clear and smoky conditions are expected. With the continued marine influence, relative humidity will be at moderate to high levels below the inversion. However, above the marine inversion, drier conditions will prevail. Minimum humidity, above the inversion, will drop into the teens and 20s with poor overnight recovery. Ridgetop winds will start out southeasterly, but will shift to a north to northeast direction in the afternoon and evening. Typical diurnal winds will prevail at lower elevations.

For the rest of this week, high pressure will gradually build over the area. This will bring warmer and drier conditions to the fire along with limited marine layer stratus and fog. In fact, an EXCESSIVE HEAT WATCH is in effect Saturday through Monday.

WEATHER FORECAST:

WEATHER: Mostly clear and smoky except for some night and morning low clouds and fog below 1500 FT.

TEMPERATURES: Maximum: Below 1500 FT: 62-74...Above 1500 FT: 82-92.
Minimum: Below 1500 FT: 52-58...Above 1500 FT: 64-72.

HUMIDITY: Minimum: Below 1500 FT: 50-70%...Above 1500 FT: 12-25%.
Maximum: Below 1500 FT: 80-100%...Above 1500 FT: 35-55%.

20 FT WINDS:
RIDGETOP - 0700-1400: East to southeast 4-8 MPH Gust 12 MPH.
1400-2000: Northeast to east 4-8 MPH Gust 12 MPH.
2000-0700: North 3-6 MPH Gust 10 MPH.

SLOPE/VALLEY - 0700-0900: Variable/upslope 3-6 MPH.
0900-2000: Upvalley 5-10 MPH Gust 15 MPH.
2000-0700: Downslope/downvalley 3-6 MPH.

INPUTS

WEATHER SUMMARY: Warm and Dry

Temps: Day 82-92 Night 64-72

RH: Day 12-25% Night 35-55

Winds: Day Ridge top N-NE 4-8 Gusts 12mph Night N 3-6 gusts 10mph

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire will continue to spread laterally along the coast ridge. When the fire becomes established in sub-drainages expect short duration, rapid head fire runs. Main fire progression will be to the south and east with active backing fire and rollout being the primary means of fire spread.

The top of the marine inversion is sitting at about 1500ft. Expect the fire behavior to moderate below this elevation and remain very active above it.

There is still a potential for re-burn along Highway 1.

Expect the most active fire behavior from about midnight to about sun up. This means that you could see rapid downhill fire runs and spotting distances up to ¼ mile. The most active areas will be below Division X and east of Division K.

Live Fuel moistures in the brush are running average for this time of year but will still burn readily because of the abundant amount of dead fuel under the brush.

Spotting will be short range less than 400 feet and from rollout.

Probability of ignition will be 60-70%

SPECIFIC:

Branch I: No forward fire progression is expected. Keep an eye out for any potential for re-burn.

Branch III: Fire progression will continue to the east. Expect mainly backing fire as the fire approaches Lost Valley Creek.

Branch V and VII: The fire is well established around Cone Peak. Main fire progression will continue to the east. The fire will continue to flank down slope along Twin Peaks Ridge above Lime Kiln Creek. The fire has crossed the Coast Ridge and will back down to the trail system, rollout will be the main cause for fire spread. Expect rapid intense runs in aligned drainages. From Lucia to the Hermitage no fire spread is expected. Along Highway 1 rollout and re-burn will continue to challenge containment.

AIR OPERATIONS: Smoke and fog have the potential to limit operations until about 1500. Fog along the coast may not clear out enough for filling buckets.

SAFETY

Fire behavior is affected by the marine layer, it is sitting at 1500 ft. Expect increased fire behavior above the marine layer.

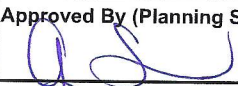

The most active fire behavior has been occurring at night, do not become complacent.

Tactical Pause Focus on Risk Management

We are in the middle of the 2020 fire season and are reminded each day the environment we work in is dangerous regardless of where you are assigned. Along with the increase in fire activity, there has been an increase in close calls, serious accidents, injuries, and fatalities.

Stop Think and Talk about:

- 1. Is anything different from your previous experiences and how are you dealing with Risk Exposure?**
- 2. What is concerning you specifically when it comes to your safety and those you work with or lead?**
- 3. What might you be missing?**
- 4. What measures you can take to reduce your exposure to the inherent hazards of our occupation or COVID-19, which can reduce the probability of the next accident or illness?**

Discussion Aids:

- Incident Response Pocket Guide**
 - Risk Management Pg. 1**
 - Look Up, Look Down and Around Pg. 3-4**
 - Common Tactical Hazards Pg. 6**
 - LCE\$ Pg.7**
 - Planning for Medical Emergencies Pg. 2**
- Incident Action Plan (IAP)**
 - Medical Plan IC\$ 206**
 - Medical Incident Report**
 - IAP**
 - IRPG Pg. 118-119**

It is all too easy to be task oriented so take this opportunity to discuss some simple reminders or measures you can take to reduce your exposure to the inherent hazards of our occupation or COVID-19, which can reduce the probability of the next accident or illness.
